In the Stud.

Seminole Kennels,

CHESTNUT HILL, PHILADELPHIA, PA.,

OFFER THE SERVICES OF THE FOLLOWING

STUD DOGS:

Rough-Coated Collies.

CHAMPION
The Squire,
(E. 15,757). Fee $50.

Roslyn Conway,
(A. 20,882). Fee $20.

Sir Kelpie,
(A. 14,735). Fee $15.

CHAMPION
ROSLYN WILKES,
(A. 20,883). Fee $50.

CHAMPION
ROSLYN DANDY,
(A. 17,577). Fee $35.

ENGLISH PUGS.

Kash, Jr.,
A. 17,804). 1st, Albany; 2d, N. Y., 1892. Fee $15.

IRISH SETTERS.

Champ TIM.
1st and special, N.Y.,'92. Fee $25.

JERRY JARVIS,
(A. 15,347) litter brother to Duke-Elcho. Fee $20.

Extended pedigrees of any of the above on application. Bitches entrusted to us receive the best of care. Fine specimens of the above breeds for sale at reasonable prices, including several good stud dogs and brood bitches in whelp.

Young Stock Always on Hand.

IN STUD.

SIMONIDES,

No. 17,068. Black, white and tan.

Winnings: 1st, I. S. Derby, 1889; 2d, Southern Derby, 1889; 2d, All-Age, 1890; 2d, Inter-State All-Age, 1890; 1st, Inter-State All-Age, 1892; 1st, N. O. Bench Show, 1892.

Fee $50.

CAPTAIN BETHEL,

No. 16,147. Black, white and tan.

Is a wonderful field dog, very fast, runner-up Rowdy Rod Inter-State Trials, 1891. Sire of Wun Lung and Glenn. He transmits his qualities to his offspring. All of his get have proved remarkably good ones. Litter brother to Dimple, winner of Southern Derby, 1888.

Fee $35.

RETREAT KENNELS,
Hammond, La.

For particulars and engagements address
F. F. MYLES,
New Orleans, La.

AT STUD.

IRISH AND ENGLISH SETTERS.

Ch. Inchiquin, 18,191, imported. The most famous sire in America. His get never fail to win when shown, and are remarkably handsome and excellent field dogs, just the blood needed to advance the Irish setter in America. Stud fee $25.

Prince Noble, 8232, English setter, blue belton, by Count Noble—Lassie, grand field dog; his get are first-class field dogs. Stud fee $20.

Gus Gladstone, 8216, by ch. Gladstone—Donna J., black, white and tan. A great fielder; none better, and an excellent stock getter. Brother to Rush Gladstone, the Derby winner. Stud fee $20.

Puppies by Inchiquin always on hand out of prize winning bitches, cheap. Pedigrees and cuts on application to J. J. SCANLAN, P. O. Box 339, Fall River, Mass.

AT STUD. FEE $50

PENNSYLVANIA FISH PROTECTIVE ASSOCIATION.

AMONG the powerful organizations of the Keystone State, none is better known for its effective labors in behalf of fish protection and propagation than the one whose name appears above. It was to be expected, therefore, that its reunion in Philadelphia and reception on March 29, to the Pennsylvania Commissioners of Fisheries and other invited guests, including a representative of FOREST AND STREAM, would be attended with feasting, good fellowship and entertaining speeches. The rooms at 1020 Arch street were far too small to hold the throng, and they were conducted to Wesley Hall, in the adjoining building, which was handsomely decorated for the occasion. Among those present were Messrs. Henry C. Ford and W. L. Powell of the Pennsylvania Fish Commission, Frank J. Amsden, of Rochester, N. Y.; Hon. A. G. Green, of Reading; Charles E. Voorhees, of Harrisburg; R. M. Mackay, C. H. Fitzgerald, the Revs. T. Edwin Brown, D.D., R. H. Fulton, D.D., Jacob Todd, D.D., Messrs. Edward F. Hoffman, Thomas Stiles, of Analomink, Monroe county; Edwin Hagert, W. H. Burkhardt, J. Penrose Collins, W. J. Sellers, Frederick W. Brown, W. S. Hergesheimer, R. W. Hartley, E. W. Walton, John R. Sypher, Dr. Tarleton H. Bean, of FOREST AND STREAM and the U. S. Fish Commission, Col. John Gay, of the U. S. Fish Commission, Sylvanus Garrett, H. O. Wilbur, Mahlon K. Smith, Edwin A. Sellers, W. C. Henry, of Henryville; W. W. Trompe, of Newark, N. J.; N. H. Carpenter, J. B. Chandler, Jesse N. Baker, of Media, and N. L. Jones, members of the State House of Representatives; Dr. W. W. McClure, Eugene Henry, of Henryville; C. T. Colladay, Cyrus S. Detre, W. P. Oglesby, Thomas M. Longcope, John A. Shulze, John A. Walker, of the Reading Railroad Company.

After those present had done justice to a most substantial supper, the president of the association, Mr. A. M. Spangler, delivered a brief address of welcome, and he was followed by Mr. Ford, whose account of the work of the Pennsylvania Fish Commission appears elsewhere in our columns, and by several other speakers, among them Mr. Amsden, Reverend Doctors Fulton and Brown, Jesse N. Baker and Dr. T. H. Bean. The angling reminiscences of the clergymen were highly entertaining. Mr. Amsden noted the growth of fish protective associations in many States as compared with the unsympathetic condition of public sentiment in New York. Mr. Baker warned the Pennsylvania Commissioners of the constant danger to their work from lack of appropriations and from the introduction of laws allowing destructive fishing, particularly as relates to the use of fish traps in streams. He expects that the new fish car will so increase the introduction of food and game fish into the rivers as to strengthen the Commission with the public.

This Protective Association is the mainstay of the State Fish Commission and its influence is felt far and wide. May its membership greatly multiply and its power for good increase until the streams of the Commonwealth are filled with choice fish and the wisdom of protection is fully recognized.

MR. BLACKFORD'S TROUT OPENING.

THE trout opening display provided by ex-Fish Commissioner Eugene G. Blackford, in his establishment in the Fulton Market, of this city, has come to be a regular feature of the day so eagerly looked forward to by anglers; and the handsome exhibit of last Friday well repaid the throngs of pleased visitors who crowded the stalls all day long. The display was, as usual, large and comprehensive, of much variety and beauty; and all the more pleasing because framed in bowers of moss and foliage and flowers, with running waters, and the illusion of sparkling streams.

The exhibits of speckled trout came from the ponds of the South Side Sportsmen's Club, of Oakdale, Long Island; from Patchogue, Smithtown and other points on the Island; the Wildwood and Old Colony ponds, of Massachusetts; the Troutmere Hatchery, of Wisconsin; the Troutdale Fish Farm Company, of Arkansas (who sent such a show of big fish as made Mr. Blackford open his eyes); the Tuxedo Club, and James Annin, Jr., of New York; and Joseph Hoxie, of Rhode Island. A consignment of Dolly Vardens from the Pacific Coast was belated: but besides the speckled trout shown were rainbow trout, brown trout from Caledonia, and from the Old Colony ponds some interesting specimens of a cross between the brook and the lake trout.

It was just after 5 o'clock Friday afternoon, when he reached Fulton Market. He was fagged out and disappointed, as any other trout fisherman would have been who had never a fin to show for his opening day expedition. But he was a bit canny, and had come the long way round, not so much to see the trout display as to buy a fish or two, which, if all went well, he might palm off on a confiding wife and family as convincing evidence of the prolificness of Long Island trout streams and unquestioned trophies of his own skill. He wandered in a dazed and manifestly disappointed way amid the mossy banks on which reposed scores of giant beauties, and between the translucent tanks in which other huge fellows were lazily disporting themselves and showing off their spots as vainly and as self-consciously as so many peacocks.

There were big fish galore; no doubt about that—magnificent specimens from Arkansas notable for their light shades of coloring; long red-bellied monarchs from Canadian pools; Cape Codders whose sides shone like the FOREST AND STREAM'S New Jersey rifle trophy, and heavy-weights from Long Island and Caledonia; but the disappointed angler was evidently hard to please, the more he looked the deeper grew the lines of chagrin on his face.

"You don't appear to stick to the legal limit of length very closely," said he, when he came to Mr. Blackford.

"I don't! The limit is six inches, is it not?"

"Yes."

"Well, do you see anything here that looks smaller than that?" asked the ex-Fish Commissioner, waving his hand comprehensively over the two and three and four and five pounders.

"Oh no, I did not mean that," said the disappointed angler. "I was only looking for two or three fish as small as possible, as near six inches as you had them, say six and an-eighth."

"What do you want such fingerlings for?"

"Well, you see, I meant to take them home, and to tell my wife I caught them myself; and I want her to believe me, you know. She just couldn't do it with these big fellows. She isn't used to them. The children have been brought up on smaller trout. Can't you find me something reasonable, something nearer the limit, something my trustful family can swallow?"

"I'm sorry that I cannot fit you out," said Mr. Blackford: "but here, take this, and tell her it's the 'big one that got away,' about which you've been spinning yarns to her all these years."

"No," said the disappointed angler, "she would not believe that either, for the fish I've told her about is as big as any four in your whole trout opening."

And he departed as he had come, to join the innumerable caravan that wends its way fishless to its abode at the close of every trout opening day.

FISH HATCHERY IN NORTHERN NEW YORK.

IN our columns of July 30 and Aug. 20, 1891, we referred to an appropriation of $20,000 by Congress for the establishment of a great fish hatchery in the St. Lawrence basin and the exploration of the region by Commissioners McDonald and Blackford. No suitable site was found, nor has the U. S. Commissioner yet indicated his discovery of a valuable location. The great essentials for the undertaking are cold water and an almost unlimited supply of it. In order to be effective and adequate to the needs of the region, the station must have accommodations for 100,000,000 whitefish eggs and 1,000,000 salmon fry during a season. Haste in making a choice of site may result in serious embarrassment and waste of time and funds. The bill signed by Governor Flower on March 19, releasing jurisdiction to the United States over certain lands in the towns of Theresa and Antwerp in Jefferson county for a United States fish hatchery, was doubtless intended to facilitate the work of Commissioner McDonald; but its effect may be to so enhance the value of lands and water rights in the estimation of their owners as to defeat the hopes of its promoters by forcing a selection of a site elsewhere.

SNAP SHOTS.

IN our columns will be found a description by Mr. Gilchrist, Inspector of Fisheries of the Northwest Territory, of the singular whitefish known as the tullibee. We believe it is the first satisfactory account of the habits of this whitefish, about which little has appeared since the writings of Dr. Richardson. In Lake Erie the species is called the mongrel whitefish by fishermen who mistake it for a hybrid between the common whitefish and the lake herring. We are indebted to Commissioner McDonald for the fine illustration, which was made from a Manitoba specimen forwarded to the U. S. Fish Commission by Mr. Blackford.

The illustration of the white goat printed on another page is the first really lifelike figure of that curious animal ever published. The picture was taken by Mr. Seward immediately after he had killed the goat, and it had been propped up into the position usually occupied by this animal when lying down. The reproduction shows well the long and narrow face, the head held no higher than the line of the back, and the clumsy bulk of the species. A good idea is given also of the slide rock, on which these creatures spend much of their time. In the posing of the animal figured Mr. Seward had the assistance of a hunter who has had a long experience with white goats, having killed a good many and devoted much time to studying their habits. The scene of the photograph is in the St. Mary's Lakes country, on the head of a short stream flowing into Swift Current River, which has been named, by the only persons who have ever been to its head, Cañon Creek. It is fed by the waters from glaciers and snowbanks, and tumbles down the northwest slope of Mt. Allen, one of the highest peaks in the region. Mr. Seward is entitled to great credit for the pains which he took to secure this picture. To carry a camera up the steep cliff and along the difficult ledges which had to be passed over before the goat was secured was a task of no little labor and even danger; but the picture which he brought back with him from the mountain amply repaid him for his efforts. Moreover, the satisfaction of having killed one's first goat is not to be lightly passed over.

To prevent an undue encroachment of advertisements upon the reading matter this week, we have added four extra pages; and the purchaser of FOREST AND STREAM this week, as every other week, receives for his ten cents a store of woods and waters literature attainable nowhere else on this "livin' airth," as Uncle Lisha, of blessed memory, would have put it.

The Sportsman Tourist.

STORIES OF THE OZARKS.—II.

[Continued from Page 295.]

THE new arrival was a slim, wiry-looking man, with a stealthy catlike tread, dressed in home-spun, on his head a cap made from the skin of some of some wild animal and beneath peered a pair of keen gray eyes. He was tendered a camp-stool and a cigar, which he lighted at the camp-fire; but to all our questions about the locality of the game he gave evasive and unsatisfactory answers.

Casting a suspicious look about the camp he said, "I see you've got some dogs. Dogs ain't no good. A pack o' dogs yowling on a trail scares all the game out'n the country. It's a mighty poor hunter that can't kill game 'thout dogs, and to put a lot o' dogs on a run and shoot the deer when it comes through the stand as you'd shoot a beef, 'taint fair play for the deer, 'taint fair play. I say it's butchery, and you call it sport. I'd as soon shoot a calf in a farmer's barnyard and call it sport. I hunt for a livin'. If a hunter can get the wind of a deer and slip up on it, I allow it's the square thing, as they're made for man's use; but dogs, no!"

The stranger's fur was all turned the wrong way, and we must mollify him in some manner, but how was the question. On asking his name we found he was the most noted and successful hunter in all that region, and we had often heard of him in our previous hunts in the Ozarks, but had never met him before. He was the very man we were looking for; he was a veritable storehouse of hunting lore, and his exploits would fill a volume. How to unlock this storehouse was what puzzled us. He softened somewhat when we told him we would leave in the morning. His reticence was easily accounted for, as he thought we were poaching on his game preserves and intended to jump his claim.

A local hunter would lose caste with his fellows in that section, and be a traitor to himself as well, if he should pilot strangers to the best hunting grounds, for that would be giving aid to the enemy. In all previous trips we had had a friend at court who had kept us posted by mail during the summer months where to look for mast and game during autumn; but as he had recently removed from the State we missed his advice on the present trip, and were in consequence considerably at sea.

We tendered our visitor the hospitality of the camp, and after he had thawed out we succeeded in getting him to relate the following incidents in his experience:

"One day some years ago I went to one o' my neighbors 'bout eight miles off to help him build a log cabin for the winter. As it was late in the afternoon when I started back, I made a straight cut across the mountains toward the cabin I called home. I allus carried my gun no matter where I went; and as it was in the fall o' the year I thought I mout chance to kill a deer or a turkey or two 'thout goin' out o' the way to get 'em. When I was 'bout a mile from my cabin I heard a flock o' turkeys going to roost in a grove o' pines on the side o' the mountain, and bein' too dark to shoot I allowed I'd give 'em an early call in the mornin' and have a turkey for dinner. So I took a round-'bout course so as not to scare 'em, eat a late supper and went to bed.

"The next mornin' afore daybreak I was on the ground and hid in an openin' between some large boulders that closed a space on three sides but was open at the top, where a man could stand comfortable 'thout bein' seen. I sat down at the mouth o' the openin' and waited for daybreak, and laid my gun on the ground and listened till I heard the turkeys fly down from the roost; then I called gently two or three times. It was a little too soon, I reckon, for I got no answer. With the second call came two or three answers, an old gobbler among the rest. I could hear 'em comin' on the run, and was just reachin' for my gun when I heard a rapid breathin' or pantin' of some animal behind me, like a dog does when he's hot or tired, and turnin' my head I saw the biggest kind of a wildcat, with mouth wide open and eyes lookin' like two full moons, just in the act o' jumpin' on my back. I sprung to my feet and throwed my arms over my head, and gave a yell that would have scart a grizzly. The cat went one way and I went another. I got out o' my hidin' place in a hurry, and stood a few minutes feelin' weak and trembly like, and went back and picked up my gun and started for home feelin' like a sheep-killin' dog.

"You see, the cat was out lookin' for breakfast, and hearin' my call, crept up the rocks behind me, expectin' to get the pick o' the flock. I allow I'd a-soured on his stummick, for I still had my knife, and I'd been sure to tickle his ribs afore he got through with me. That's one time I was flustrated."

"Did you get any turkeys?"

"Turkeys? No. I couldn't have shot a turkey if one had run up and bit me. But I laid for that cat till I got him, leastwise I reckon I got him, though when I first seed him I didn't examine him very perticular, and he didn't stop long enough for me to cut a swallow fork in his year neither, so I'd know him agin. I've taken a many and a many o' their pelts, and shot a heap o' his family since; and I'm goin' to keep a-shootin' as long as I can load a gun or pull a trigger. I've sworn vengeance agin the whole cat family; and when I see one during the summer when his hide's no good I allus send him a lead charge with my compliments. It's allus been an unsettled pint in my mind, which was scart the worst, the cat or me."

"Are there any panthers in this section?"

"No, there ain't many painters right about here, but I've heard say there's a good chance of 'em down 'bout the Arkansas line.

"Now, you don't want no scrimmage with a painter. Let me tell you that now; and 'specially you don't want to shoot at no painter with them bird guns o' yours [doublebarreled shotgun] nor a rifle neither, 'nless you're as stiddy as a rock, which I don't reckon you are, as I allow you ain't had much experience with them critters. A man's life sometimes hangs on a single shot, and if you cripple a painter you're apt to be in a mighty bad fix; and if a man's a little shaky he'd better not shoot 'nless he has to.

"I've heard hunters say that a painter will run from you if you let him alone; and I don't say it ain't so, but I never seed that kind. They most allus see you first; and if you don't tackle 'em they will you if you come near 'em, leastwise that's my experience. I've shot several painters in my time, and I've had two or three narrer escapes.

"When I lived over on Imboden Fork I was out one day on the divide huntin' deer. There was plenty o' fresh sign, and I knowed I was close on a drove of 'em, for I've hunted so long I can tell almost to an hour how old the sign is. Lookin' carefully down a ravine or gully that opened into a little valley toward which the tracks led, I seed several deer a little below the mouth o' the ravine, a buck, a doe, and two nearly grown fawns. To get a shot at 'em I laid flat on the ground and begun to crawl toward 'em 'long the edge o' the gully that had a heap o' leaves and trash at the bottom. I was tryin' to get to a bunch of scrubby cedars, where I'd be hid from 'em, and bein' above and havin' the wind of 'em I had a mighty good show to kill one or two of 'em afore they'd find out where to look for me. I'd crawled nearly to the cedars, pushing my gun along on the ground ahead o' me, when I heard a rustling in the scrub oaks to my left, and turned my head, and there was a painter not over 15ft. from me, gatherin' his feet under him like a cat, just ready to jump for me. I raised to my knees and fired as quick as a flash, and throwed myself on the ground.

"The painter sprung at me just as I fired, and missed me by a hair. His claws just touched my jacket as he went over me head first into the gully; and the way the leaves and gravel flew for a few minutes was a sight.

"I wasn't long in rammin' down another ball, and stood on the edge 'o the gully ready to give him another shot; but the painter was kicking his last kick and had nearly buried himself in the leaves and gravel. I rolled a rock or two down on him to see if I could wake him up, and after a few minutes slipped down the gully with rifle cocked and hit him a kick to see if there was any life in him, for it'll never do to trust them critters an inch, for they belong to the cat family too. But he was dead as Jonah. I had shot him in the mouth and the ball came out 'o the back of the head. I dragged it out 'o the gully to an open space away from large trees for fear it might have a mate lyin' round somewhere that might put a feller to a heap 'o trouble unless he was ready for it, for it often happens where you find one there's another not far off. It was a full grown male and I wasn't long in gettin' the pelt off his carcass and started for home in a pretty fast walk.

"No, I didn't get any deer; didn't want any deer just then when there was bigger game to be had. I could get deer any day.

"The painter was watching the deer, you see, and was hankerin' after venison himself, and as I was likely to interfere with his dinner he thought he'd take it out 'o me, and he came mighty near gettin' me, too. If I'd crippled that painter or the gun had snapped I don't reckon I'd be here to-night tellin' you 'bout it. I had my hunting knife and might a made a right smart fight, but a man 'u'd have to be mighty quick and cool with five pints to one agin him, to come out even in a scrimmage with a full grown painter.

"I tanned that hide and my old woman lined it with flannel and it made a mighty warm blanket to put on the bed in a cold night in the winter. It sometimes makes the cold chills run over me when I think how near the old woman come to bein' a widder that day, but I'd do the the same thing over agin ter-morrer if I had the chance."

CAMERON.

[TO BE CONTINUED.]

FLORIDA SPORTS.

I AM speaking of Florida, delightful, semi-tropical Florida, whose fauna vies with its flora in variety and beauty—where not more than 10 years ago her waters teemed with fish, the call of the bob white resounded through the scrub, and deer were plentiful. All combined made parts of Florida an Eldorado for the naturalist, the hunter and the fisherman. I cannot help but recall a few of the many pleasant fishing and hunting excursions in different parts of the State in the early spring of 1883. The hoarse bellowing of the alligator by night added a weird charm, and the expected shrill warning of the rattlesnake gave but greater zest to our daylight excursions through the palmetto scrub.

Among the many places I visited during my sojourn there, memory loves to linger over that period passed under the hospitable roof of Captain A. E. Willard, then residing at Sarasota, on Sarasota Bay, to whom I had letters of introduction.

It was here that I first made the acquaintance of the tarpon, one of the largest scale fishes in existence, and was admitted by stealth to the "inner circle" of a laying-seance of a mammoth logger-head turtle, and observed with much interest the minute details of the operation.

Among the people with whom I was thrown in contact was a native named Roberts, who lived on the water and in the woods, and was often employed by Captain Willard.

Because I shot fairly straight and knew something of woodcraft, he took a fancy to me. So one morning when the tide was dropping out he called and said to me that he would show me such fishing as I had never witnessed nor dreamed of, if I cared to go with him. I agreed joyfully, when he told me to take my Winchester rifle, hire a skiff and oarsman and follow him. Roberts had an old ship's yawl boat, which very probably he had found adrift and patched up.

We set out for the shallow flats across the bay, the feeding grounds of the tarpon. Before we reached the flats I could perceive the dorsal fins of our quarry dotting the surface of the water here and there. With a word of caution to me Roberts took in his oars and placed himself in the bow of his boat, instructing his man to move slowly and quietly toward the nearest fish. He stood erect in his boat with his grain poised in his hand like a javelin, and as my man quietly followed the lead of his boat I handled my rifle nervously, and awaited results. When the yawl boat had reached a point not less than 50ft., the arm of the cracker hurled with unerring skill the barb of the grain into the body of the unsuspecting fish. The staff of the grain, fitting loosely in the socket, fell away and floated harmlessly on the surface of the water. The poor tarpon, wounded nigh to death, rushed madly for deep water, Roberts paying out the stout line, one end of which was securely fastened to the barb, the other made fast to the bow of the boat. When the line had reached its limit the strength of the fish was so great that he dragged the yawl boat as fast as my man could pull my boat, and for a time I was afraid I would be left out of the race and not get near enough for a flying shot; but the opportunity came at last, for the poor victim in its desperation would spring six or eight feet above the surface of the water, when a bullet from a .44-caliber Winchester would end the matter or would weaken the animal to such an extent that it became an easy prey to the pot-fisherman. The only attraction which the sport had for me was its novelty; the wild rush of the fish, the foaming wake, the leaps above the water, with the sharp explosion of a repeating rifle, followed by the silver scales which fell away from the fish in mid-air, was exciting enough and reminded me of many days in the field with quail and duck when the feathers floated from the birds like the scales from the fish; but the birds were not held in leash by a cord; and while it is true that I shortened the agony of the fish, I felt very much like a murderer when it was all over. I am glad to say that I did not indulge in this sport but on two occasions, the first was the one alluded to above, when, with the combined effort of grain and rifle, we secured thirteen tarpon, ranging in weight from 75 to 125lbs.; on the other occasion we killed fifteen of about the same average weight. It must be remembered that at this date the tarpon was not considered a game fish, for it had not prior to this time been taken with rod and line.

While I was yet enjoying the hospitality of Captain W, we made a trip down the bay in his sloop to one of the several keys which lie to the westward of Sarasota Bay. Our main object was deer hunting, for these animals come across the bay and occupy the keys, where they find good feeding ground as long as they can find fresh water, but return to the mainland again when the fresh-water pools dry up in long periods of drought. Unfortunately for us, it fell upon just such a time, and we found no deer; but Captain W. proposed that we should pitch our tent on one of the keys and take a turtle egg hunt. Presenting another novelty, it was more agreeable than deer hunting. The moon was full and the weather perfect. Turtles always choose such nights to deposit their eggs in the sand above high water mark along the beaches of the keys. After supper we set out down the beach and found many nests, but we had walked several miles before we found a turtle that had just come from the water and was looking about for a place of deposit. Cautiously we placed ourselves between her and the Gulf, and dropped down on the sand in her rear just as she had found a place to suit her. I was within easy reach of her as she began the excavation, using her hind flippers with much dexterity. When she had made the hole, about 18in. in depth, I made a lateral trench into this, and withdrew the eggs as fast as she laid them, securing the entire number, which was 126. As soon as she was through depositing the eggs, she filled up the hole with sand, using her fore flippers for this purpose. The sand was pulled under her, and as she filled the hole she would raise her body and come down with her entire weight to pack it more securely. Not satisfied with this, she reached out and gathered in bits of seaweed and drift with which to cover all traces of the newly made nest. The whole time occupied in making the excavation, depositing the eggs and filling up the hole was just thirty-one minutes, having taken out my watch and timed her accurately.

I was so much interested that I did not realize that she had finished the operation until with a dexterous turn she suddenly faced about and then we were 6in. apart. I admit I was frightened, for she could have taken the half of my face with one little bite. Fortunately she was as badly frightened as I was, and with a snort of terror she turned obliquely and started for the Gulf. When I looked around there was friend Willard rolling in the sand, convulsed with laughter at my fright, but as he saw the turtle making her escape he called out to me to turn her over. This I attempted to do, but always caught her too far aft, and had he not hurried to my assistance would have lost the prize, for she was a monster.

We left her lying on her back, and as we walked back toward camp I asked the Captain how he would ever get the monster to the boat, which was anchored near the camp in the bay. He merely answered "Wait and you will see." The party secured 2,600 eggs that night, and having made a supper of some of them we turned in.

Rising rather late the next morning my attention was attracted to a man walking along the beach a mile or so away, and when I asked what he was doing Capt. W. again replied, "Wait awhile and you will see." In the meantime the man leisurely made his way to the camp, following the curvature of the shore. As he approached nearer I discovered that there was a line attached to his waist which extended out into the Gulf, to the other end of which was securely fastened her ladyship, the turtle, which would rise to the surface occasionally to blow. A hole had been cut through one of her flippers, to which the rope was made fast. The man having thus secured the turtle, turned her over, when she went to the water and was quietly led by him to the camp. Her weight was estimated between 500 and 600lbs.

Bear and raccoon are very fond of turtle eggs, and destroy great numbers of them. I was told that these animals watch the turtles deposit their eggs from the palmetto scrub; thus locating the nests they go and rob them. We saw many raccoons scurrying away from the nests that night to the shelter of the scrub as we walked along the beach.

Another little fishing trip in the St. John's River and I shall have finished for the present. In the spring of the same year I left the steamer at Astor, the terminus of the St. John's & Lake Eustis Railroad, and while waiting for the cars to start my attention was called to a lean, lank "cracker" who was trying to dispose of some very fine black bass. When I approached him and asked where they were caught and how, he replied, "Not far away, here in the river with a bob," the zest of the sportsman got the better of me, and I told him that I would stop over and take a day's fishing if he would take me out for a consideration. There were no hotels there at that time, but he said that he could find accommodation for me across the river if I would get into his skiff. While my baggage was checked through, I took my grip and was rowed across the river, and found accommodations with a store keeper who furnished board and lodging to the few transient visitors who came along.

After an early breakfast my cracker called for me and when I repaired to his skiff I found several fishing poles

with corks and lines and two "bobs." The last named implement of sport, if it can be called such, I was familiar with, having seen them used in my native State. It consists of a stout rod or pole, some 15ft. in length, with a short stout line, not more than 4ft. long, to the end of which are attached three large hooks wrapped or soldered together. An inch or so above the hooks a portion of a deer's tail is securely wrapped on the line; sometimes a bit of red flannel is added to make it more attractive to the fish. This is what is known as the "deer tail bob," but the "bone whirler" has in a great measure superseded this ancient device, and from my own experience with both, I think it is more effective in this kind of fishing. With this rig and no bait we set out up the river. When near the fishing grounds the fisherman ran his boat among the bonnet lilies, which grow and flourish in the shallow waters near the shores, for the purpose of securing bait. In the stems of this plant we found a cream white worm known to the fishermen as the "bonnet worm." They are about 2in. long and with but little trouble we secured all we wanted. They were for use on the ordinary tackle in still-water fishing with hook and line.

Proceeding yet further up the river we came to a point where it widened out into a bay or lake, and running the boat near the shore we began to fish with the bonnet worms. I noticed that the fisherman sat with his face up stream and kept a sharp lookout ahead. I felt a curiosity to know the reason for this. Our still-water fishing was rewarded with a good bass now and then, when presently my companion bade me abruptly: "Take in your line and get out the bob, for a school of bass are coming and now the fun will begin." I looked in the direction indicated and saw that the water was very much disturbed by the bass as they made their way down the river. As soon as the head of the school came abreast of us my guide, with a dexterous stroke of the oars, put the boat amid the fish and, really, the fun did begin and lasted as long as we could keep within reach of the school.

It was, of course, only a short time when the rapidly-moving fish had passed, but during this time we secured seven or eight apiece. The fisherman followed the school as fast as he could row and I was enabled to hook several more before the school got entirely beyond reach. The bob is moved quickly on or near the surface of the water and when a fish is hooked it allows of no play worth the name; it is simply hauled hand over hand toward the boat. This is the chief objection to this kind of fishing.

When this school had passed we again resumed our still-water fishing and waited and watched for another. Our patience was not taxed long, when we again enjoyed the same sport. This operation was repeated several times and we soon had a fine lot of bass ranging from two to five pounds. They were so easily caught and so plentiful that I thought sadly that the time would soon come when the decimation of their numbers would be so great that it be difficult to get a single rise to the bob. The thought was in a great measure prophetic.

Natural History.

THE OUSEL IN OREGON.

IT may perhaps be interesting to some of your many readers who have never seen or perhaps heard of the ousel, to know something of the appearance and habits of this curious little bird, which is found I think from the Rocky Mountains to the Pacific coast. I think I am safe in believing that some, at least, of your readers east of the Rockies have never heard of the bird, because I find that even here, in its home, there are those who have neither seen it nor heard of it. I have read of it and know something of its habits, my attention first having been called to it, I think, in some article by Prof. John Muir, of California, some years ago, but I have never had an opportunity of seeing and watching the bird, as I have long wished to do, until recently. I don't pretend to any very intimate acquaintance with it yet, but know considerably more about it than I did a few days since. I was walking up the gulch or cañon, down which flows beautiful Ashland Creek, which furnishes the town with pure snow water from the lofty siskiyous far up in the range, and also supplies power for mills and electric light plant, admiring the flashing, tumbling stream and precipitous sides of the cañon which there narrowed down and turned abruptly to the right until there was little more than room for the creek and road, when a little bird flew out from the rocky edge of the stream and whisked around the bend out of sight. "Aha!" said I to myself, for I was alone, as I like to be on such occasions, "I don't know anything about the color of an ousel, but I believe you're the identical chap I've long wanted to see," so I cautiously uncovered the bend, and there in the middle of the creek, a typical mountain stream strewn with boulders, on a stone round which the water was boiling, was perched, bobbing up and down in funny little jerks, a bird shaped like a wren but three or four times the size, solid slaty-blue in color, long-legged for a bird of its size, bill quite long and very fine, tail short and cocked somewhat like a wren's but not so saucily. It wasn't quiet a minute, but moved around continually in a queer combination of hop and step, and every time it hop-stepped it worked the spring in its dainty little legs, the jerkiest little curtsey you ever saw. I measured it with my eye, for lack of closer acquaintance, and should say it was 4in. from bill to tail, and stood, from head to ground, 2½ or 3in. when erect. It had some moss in its bill, and was evidently curious about me; but after satisfying itself that there was no harm imminent, it flew up stream a few yards and disappeared beneath a large overhanging rock, on each side of which the water poured and spray flew. Presently it reappeared, and with it came its mate; and as they did not go far for their supply for nest building, there being plenty of satisfactory moss on the sides of the rock wall, I sat down and had as enjoyable a half hour's entertainment as I have had in many a day. If the ousel does not belong to the wren family, it ought. Its flight is like that of the wren, shape ditto, carriage of tail similar, and I should say its nervous temperament is similar, apparently, though on this point it was not possible to interview it. Frequently one of the birds flew up against the face of the rock, picked off a billful of moss, flew down on to a stone in the stream and repeatedly dipped the moss into the water, probably to clean it; and sometimes, after having washed it thoroughly, apparently having arrived at the conclusion that it wasn't just the thing, it dropped it into the current deliberately and went for something more appropriate. Part of the material was taken from beneath the water. They occupied most of the time, while I watched them, in nest building, but occasionally felt the pangs of hunger and plumped into the water and poked around on the bottom or searched for food around the edges of the rocks among the moss just beneath the surface, standing on the almost perpendicular stone leg-deep in the water and head out of sight much of the time. As I saw them disappear repeatedly beneath that big rock, I wondered how such mites of birds could raise animal heat enough to hatch their young in a place dark, damp and cold as that must be continually, for the snows which fed that stream are not far distant, and how the wee younglings could survive babyhood was more of a mystery. These birds must be as cold-blooded as a fish. On a later occasion I watched another pair feeding quite a long time, and a more enjoyable season, for both of us apparently, would be hard to discover. They are quite fearless of man, for where I saw them the road ran within ten feet of the creek, and I was in full view, though moving slowly and cautiously following in the rear of them as they prospected along, not more than thirty to fifty feet. They fed for the most part in midstream, where the water was not more than leg or half-body deep to them, and nowhere was the water sluggish, occasionally feeding beneath the overhanging bushes. Sometimes they floated quite a distance in the swift current, suddenly disappearing, if the water happened to be deep enough, or they would take wing a little distance, alighting as like as not in a swift, quite turbulent rapid, in which they would dive, coming up after a few seconds almost invariably where they went down, after I had begun to think they had got fouled and drowned. How they could dive in such water and not be carried down stream was puzzling to me. When wading in water not more than body deep their heads were underneath more than half the time. They must have large lung capacity. Sometimes they would stand on a rock, over which the water poured swiftly in a thin sheet, dipping their heads beneath the surface searching for food, while the water poured over their backs in a pretty little cascade, or stand on the very brink of quite a fall, in water leg deep, with head and body almost submerged, while I momentarily expected to see their tiny legs knocked from under them and they go tumbling into the pool below; but it never happened. They had it "down fine." I did not see them swim up stream, though I should not have been much surprised if they had. They did pretty much everything else I could think of. The way they worked down stream in shallow water, zigzagging along, poking their bills into every nook jerkily and untiringly, or diving here and there, was very pretty. One of the strangest things about the performance was the fact that they never shook themselves when they emerged from the water, at intervals of cessation from feeding as they sat for a moment on a stone or stick. They are a point ahead of fish even in this respect, for the latter always shake themselves when they come from the water. I was quite near the birds at times, and not a particle of moisture could I see on them. Once as I sat on a rock near the brook-side one of the little water sprites alighted within 10ft. of me with its bill full of moss. It knew there was something there out of place, and began to move about nervously and jerky, and every time its legs gave way its eyes showed white. The movement was so rapid, combined with the jerking, that I could not determine whether it was a film closing over the eye, or whether it was jeering me by rolling up the "whites of its eyes," if it had any, but it was quite uncanny in a small way. They did not seem to make much business of curtseying, except when unusual surroundings made them a trifle suspicious. The only note I heard them utter was on one occasion, when one took wing for some point quite a distance up stream, the mate following with a mingling of a peep and squeal, rapidly repeated, a note as fine as a cambric needle, seemingly saying, "Wait for me, wait for me, wait for me." These birds are found all the way to Alaska, the former customs collector of Sitka, who resides here, telling me he has seen them there feeding in the streams just at their junction with salt water. I suppose I might go up the gulch and shoot the little darlings and have them taxidermed and put in a glass case, as bird killers, alias ornithologists, take great pride in doing, but if I spare them other people can see their beautiful actions, the birds will reproduce and so prolong our pleasure, whereas if I slay them, I do what I can, as ornithologists are doing constantly, to hasten the day when there shall be no ousels. O. O. S.

ASHLAND, Oregon.

GLIMPSES OF BIRD CHARACTER.

A BOLD bad bird is the great shrike, of most reprehensible habits, feeding on the flesh of his fellow birds. Dragon flies and other large insects are his proper prey during the summer season at least, and should be sufficient for the appetite of any bird, without adopting the unbecoming habit of devouring his innocent and estimable bird neighbors. Another lawful article of diet is frogs and mice, which he does not despise when he happens on them, but duly impales on a thorn or sharp stick, to await his convenience. But it must in fairness be said that the shrike, being a native of cold climates, would in the snow bound winter keep his larder but ill supplied if he confined his prey to mice and such small creatures as he might happen on at this season, and which require a special training in mousing to catch.

The shrike attacks his victims in a most ferocious manner; destroying them by crushing the skull with its strong beak, while holding them with its feet, which though slender, like those of small birds in general, have sharp claws. The shrike is credited with the gift of imitating other birds' notes, as a means of decoying them within its reach. Its natural note, which is not musical, is the same throughout the year; which is not strange, for who would expect sentiment from such a bird.

The great shrike has considerable skill as a nest builder. His large, compact nest is made of grass and moss woven together and well lined with feathers to keep out the cold. It is generally placed in the fork of a small tree. The eggs are six in number, of a pale cinereous color, thickly marked at the largest end with rufous marks and streaks. I knew a pair of these birds to build and rear their young for years in a small pine wood, which looked when one was in it like a part of the primeval forest.

The young birds, bright-eyed, bold and self-reliant, might be seen most of the time after they had left the nest, sitting on fence posts and such points of vantage in the surrounding neighborhood, watching for the return of the old birds with their booty, or themselves making bold endeavor to kill and slay.

The thrushes seem to be less capable than most song-birds of taking care of themselves, perhaps because they are not practical minded birds; their thoughts seem ever in dreamland.

Guileless birds they are, seemingly, who judging other creatures by themselves, cannot conceive a fellow-being so wicked as to injure those who had done them no harm whatever; for I find them often in the fields and gardens, winged by careless sportsmen. The hawks they greatly fear, and I do not very often find their remains among those of other birds left at a hawk's dining place.

Not practical minded birds as I said before—like most imaginative folk, not gifted with a clear comprehension of the everyday things of life. I came into possession of a specimen of the olive-backed thrush by his being found in the woods one rainy autumn day, so wet—soaked he was—as to be unable to use his wings. He had taken that day of all others to go bathing seemingly, and the weather being so cool and wet he had been unable to dry his plumage. A very unwise bird, and one not fit to be trusted with the management of himself.

I found another thrush of this species (*Turdus olivaceus*) in the woods one day in a curious state of deformity. The one side of the bird from the head down was plump and well proportioned, but the other side was shriveled to literally skin and bone, so that the bird could make but the lamest use of its limbs. I supposed the bird had been crushed by some means, but there were no bones broken.

Robins are sometimes to be found dead from no visible cause, but the robin is a species of the kind leading a harder life and with more anxieties on his mind seemingly than his more calm and contemplative relatives.

A. C. T.

BIRDS IN CENTRAL NEW BRUNSWICK.

I GIVE below some notes on the birds of this section, beginning with dates of arrivals in 1889, 1890 and 1891:

	1889.	*1890.*	*1891.*
Crow	March 13	March 12	March 13
Canada goose	.....	March 28	April 1
Junco	March 26	April 4	April 9
Blue heron	April 16	April 5	April 16
Robin	April 1	April 7	April 23
Song sparrow	.....	April 9	April 15
Crow blackbird	April 10	April 14	April 28
Sharp-shin hawk	.....	April 19	April 28
Wood swallow	April 25	April 22	April 18
Flicker	April 16	April 23	April 19
Hermit thrush	April 21	April 23	April 15
Eave swallow	April 26	.....	May 16
Ring-neck duck	.....	April 23	.....
Kingfisher	May 8	April 24	.....
Chippy sparrow	May 9	April 24	.....
Yellow-bellied woodpecker	.....	April 24	April 24
Winter wren	April 28	April 24	April 19
Osprey	April 20	April 25	April 28
White-throated sparrow	April 29	April 27	.....
Redpoll linnet	April 17	April 30	March 13
Purple martin	April 26	May 2	April 28
Wilson's snipe	.....	May 2	.....
Barn swallow	.....	May 10	May 11
White-crowned sparrow	.....	May 10	.....
Bluebird	May 6	May 10	April 19
Field sparrow	April 5	.....	April 19
Chimney swift	.....	May 14	May 11
Loon	April 25	May 14	May 8
Black-cheek warbler	.....	May 17	.....
Kingbird	.....	May 17	May 30
Yellow-rump warbler	.....	May 18	May 8
Redstart	.....	May 19	May 21
Black and white creeping warbler	.....	May 21	.....
Hemlock warbler	.....	May 21	.....
Nighthawk	.....	May 22	May 24
Whippoorwill	May 4	May 22	May 7
Thistle finch	April 30	May 23	May 9
Cedar bird	May 9	June 11	June 12
Cuckoo	.....	June 13	May 31

In 1888 a crow's nest was found containing ten eggs; a very large number. That same year a robin was seen as late as Dec. 21. As a rule they leave during the first two weeks of October. In 1890 a robin was seen Nov. 20.

Nov. 22, 1891, I saw a golden-winged woodpecker; this was very late. Oct. 1 is the time that the last of them go south. Mating commences as soon as they arrive in the spring, and commence laying the latter part of May, and the first of June.

The white-crowned sparrow does not breed here, and I have never seen it in the fall. It is here only for a few days in the spring; and in 1891 I saw none.

Never until the spring of '91 have I seen a shrike in the spring migration.

A chipping sparrow passed the winter of 1890-91 in a barn near here until a saw-whet owl got into the barn and killed the sparrow.

Aug. 6, 1891, I saw an albino robin. It was one of a flock of about fourteen birds. I tried to secure it but could not get near enough to shoot it.

There seem to be more winter birds here this winter than for a number of years.

A goodly quantity of ruffed grouse are left for next fall's shooting. They have had a very easy winter so far. There has not been any crust to imprison them when they are covered in the snow.

The crows have commenced their spring migration. One was seen as early as March 8. About ten miles from here they stay all winter, but in very small numbers.

The bobolink does not breed here, although about four miles distant they are quite numerous. W. H. MOORE.

SCOTCH LAKE, March 17.

MALLARD.—We read so often about mallard drakes and mallard ducks, and sometimes of mallard hens, that we hope it will not be amiss to say that the word mallard means drake and nothing else, so that the "duck and mallard" is only the "duck and drake;" and in England he is called the wild drake. One had as well speak of a male man as of a mallard drake, or of a male woman as of a mallard duck. To be sure, mallard is the generic name of this family of ducks, just as the term man includes the human family; yet, speaking with accuracy, a man kills 10 mallards and 20 ducks, not 10 mallard drakes and 20 mallard ducks. Though for short we would say 30 mallards tumbled to the racket—Q. E. D. (Brown's Valley, Minn.).

SEEN FROM MY WINDOW.

COMOX, Vancouvers Island, B. C., Jan. 27.—The varied thrushes are piping up and beginning to straighten themselves instead of sitting huddled up like so many balls of frayed carpet. On my fowlyard fence they still keep guard, from whence they can drop down comfortably for the few scattered grains left by chanticleer and his harem. Aye! they and plenty more would drop into that yard for a peck and a scratch during the deep snow. Song sparrows, little brown winter wrens, an occasional robin, with a red-shafted flicker or two, and sundry Steller's jays villains! I had well nigh forgotten the Western chewink or "catbird," with his scarlet eye, white waistcoat and black and chestnut top coat, and the little juncos, looking, when flying, like little blots of brown and white cotton, for their wings are so small and so thin, and withal they move so rapidly that in a bright sunlight the birds appear to have no wings. Ah! well, they were all welcome to the chicken food, but now, ingrates, they are leaving me when they know there are a few patches of mother earth uncovered where haply they may find a stray fat worm or luscious slug. And then the weather is so much warmer now—like April. I myself feel like the breaking up of a hard winter; as I sit and write I sometimes glance feelingly at the scars of a dozen coon hunts engraved with great, bold, masterly strokes on the backs of my hands. Have had the influenza, too; worse luck.

Well, to go back to birds. The siskins have stuck it out well, but those hardy chaps, the chickadees and gold crests, have been out of sight for a long time. Evening grosbeaks were quite common a month ago. I've not seen so many lately, but heard a chirp the other day. This is another bird which is quite a rarity with us as a general rule. A few pine grosbeaks have been about too.

IMMER DEIN.

FISHING CROWS AND OYSTER BIRDS.

NEWBERN, N. C., March 26.—Almost daily, in front of my residence on the Neuse River, I see the crows hovering and circling over the surface of the water looking for fish, very much after the manner of sea gulls. They will swoop down and scoop their little prey deftly, very often without breaking the surface. They do it more neatly and dexterously than kingfishers. Crows have to live by their wits until corn planting comes.

Down on the beach there are oyster birds, so-called, which subsist chiefly on mollusks. They are about 10in. tall, having black body and wings, with sparse white markings, long yellow legs, and straight bill 2in. long, and when standing erect look like diminutive cranes. They undoubtedly belong to the family of waders. Do you know about them? They are not mentioned in Trumbull's "Names and Portraits of Birds."

CHARLES HALLOCK.

[The birds mentioned are probably fish crows (*Corvus ossifragus*) and oyster catchers (*Hæmatopus palliatus*), both birds of rather Southern distribution.]

Camp-Fire Flickerings.

"That reminds me."

THERE is a certain back room in our small town where many lovers of rod and gun nightly assemble. Many yarns are spun on both shooting and fishing. More trout are caught there and larger ones than frequenters of the Adirondacks often have luck to see. Shots are made that would astonish a Brewer or Fulford. Every thing is killed from elk to woodcock. Once in a while a horse will trot faster than he ever could on any kite-shaped track. But every story goes. It is an unwritten law that no duubt he cast to cool the narrator's enthusiasm. Outside of the shooters and fishermen there are occasionally a few who are not much given to sports afield. They listen to the telling of tales, and though they may keep up a terrible thinking, have little to say. One night, not long since, one of the outsiders whom we will call "Uncle John," stood it as long as he could and then proceeded to surprise us with the following tale: "Do any of you remember that year when the pigeons were so thick? Why sometimes you could not see the sun for half an hour at a time. Everybody who could beg, borrow or steal a gun was out that day. I did not want to be left, but still I had no shooting iron. But I suddenly recalled the fact that there was an old gun up in the garret. It had no lock, but what of that? I'll make her go some way I thought to myself. Down to the store I went and bought a quarter of a pound of powder and a pound of shot. I had some caps. That took all the money I had and it was a big investment for me. Returning to the house I got the gun, put in a handful of powder and a handful of shot, ramming them down well. I put a cap on the nipple and I was ready for business. I did not have to go far they were coming so thick, so I took my stand by a fence and waited. When I saw they were flying low enough to be sure of some, I rested the butt of the gun on the fence, took a hammer from my pocket, hit the cap a crack, and away she went. Why you ought to have seen those birds fall. The air was full of dead pigeons." "How many did you get?" some one here interposed. "Why I picked up a pillow case full." H. N. C.

WATERVILLE, N. Y.

"Know how to cook ducks?" repeated the landlord's wife in an insulted tone. "I puts 'em in a pot an' boils 'em, an' changes the water an' boils 'em, an' then roasts 'em, an' sure an' they tastes just like chickens."

MALLARD.

One time last summer the fishermen here made quite a good haul of mackerel, and all hands were at once busily employed in preparing them to salt. One man in particular by his quickness and dexterity showed himself to be a star at the business.

In the midst of this scene of activity, old John G., who, from some remarkable experiences which he alleges to have befallen him, I have often thought might be the original of "Peleg's Grandpop," strolled up to the group, and the movements of the aforesaid star led him to deliver himself as follows:

"Wa'al, yes, sir, that fellar does handle them pretty slick, sartin, but you oughter seen old Cap'n Smith unharness 'em down on the banks. Thar was a tank of water, sir, on his smack at the foot of the mainmast that they used to wash 'em in, and he'd dress 'em and throw 'em in the tank so quick that when they struck the water they'd have life enough left to swim round and rinse themselves." E. W. L.

PINE POINT, Me.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

A FEW YEARS BACK.

I SUPPOSE you always have a place in your columns for a reminiscence when it relates to forest or stream, marsh or prairie. I am not an old man whose flintlock or ancient muzzleloader hangs on the wall covered with the rust and dust of departed years, the sight of which causes the blood to tingle afresh in the heart of the old sportsman! but I am a young man just entering that stage of life called middle age; and my guns, dogs and hunting equipment are in first-class order and "up to date." Still I look back fifteen years to my "teens" and wonder if the same keen enjoyment over a bag of birds or string of fish will ever come again. Born in Brooklyn, it was of necessity I learned "to shoot" with a sling-shot, putty gun, or pea shooter, but in my twelfth year I removed with my parents to a beautiful village in western New York, and on the bank of as handsome a sheet of water as ever the Lord put on the earth I had a chance to swing myself, and the love of hunting and fishing, descending to me through generations of sport-loving ancestors, developed rapidly. When I was sixteen years old I was the happy possessor of an English pin-fire breechloader that was my greatest joy. My school teacher, at that time the proprietor of a large and popular boarding school, made me a present of about ten or a dozen old decoys, that had lain away in his cellar for years. They were old and battered, but no flock has looked handsomer since. Many a day I have sat behind that flock of decoys, and at night if a pair of bluebills, redheads, butterballs or even a single whistler was the score, I thought I had done well.

Plenty of good shots went by me in those days, but for the first year over those decoys I had no use for a flying duck. He must light or swim it, and then he was my meat. How I have humped myself to keep out of sight of that little bunch of birds whose curiosity prompted them to see what was going on in that flock of wooden ducks near shore. The remembrance of my first duck shot on the wing is as vivid in my mind as if it were yesterday. One of our favorite points for decoying was the stern of an old canal boat that had gone to shore a wreck bows on. The hull of the old boat had disappeared almost entirely, the stern being about the only portion out of water, and with passing years the birds became used to its appearance and would feed within gunshot. One day with a young friend I was watching the decoys, rolling idly in a light swell and wishing for something to turn up, when "Mark" from my friend drew my attention to a single bird coming down the lake following the line of the shore and close in. Ah! that is our bird, he must see the decoys. By George, he don't turn out, he will fly inside of us. The next minute I saw the bird was going directly over our heads, a little high up and had no idea of stopping at all. Well, it looked as if I could make that shot and it could make no difference anyway; the bird was now almost over me, and pulling a trifle ahead I let into him. "Great Scott," I had killed the duck, and as he plumped down striking the deck of the old boat in his fall, I was the happiest boy in six counties. I have brought them out of the clouds since then going a mile a minute gait, but no shot has ever given me the pleasure since.

I don't think we killed anything more that day and I certainly did not care. I wanted to get home quick as possible to tell my father about the shot. It was in those days that my father used to go on the first of each September to the Montezuma Marshes, in years past one of the greatest hunting grounds in America. Thousands of ducks, geese and snipe have been killed there and some of the old fellows have told me of an occasional swan they had brought to bag. This vast tract of marsh, covering ten thousand acres right in the center of this great Empire State, was a paradise for sportsmen. The Seneca River running through it, afforded the finest of fishing. I am sure these remarks on this famous old ground will bring to the mind of hundreds of the readers of this paper the happiest of days with gun and rod. This is changed now, a very large part of the marsh has been redeemed, and where once was a favorite little lake for black duck or widgeon is now a cornfield.

The natural decrease in game or rather unnatural decrease is greatly noted, and now a good bag of ducks on this old ground is only occasionally made. A goose is killed now about as often as a swan was 25 years ago. The fishing is still fair, and "Mr. Jack Snipe" stops over for a while in spring and fall, although a large part of his feeding ground is gone. A trip to these marshes fifteen or sixteen years ago was to me of greater attraction than a trip to Europe would be now. If I was offered a trip to New York city or to Mud Lock, I never hesitated; and the bullheads cooked by Rube Jones's wife, at that little old hotel in the swamp, were as good as any brook trout I have had since at Delmonico's or Holland House. Lots of the readers of FOREST AND STREAM know Del Demont the lock tender, one of the best duck shots the State ever knew. He was my father's guide and hunting companion then, and many a nice bag have I seen them bring in. I was content to push around through the marsh for water hen and rail with an occasional shot at a "woody" or teal, as they sprang from the edge of the flag. In those days in the early hours of morning or evening, when the wind blew strong there was good flight shooting from the structure known as the "Free Bridge," and also from the bridge at Mud Lock. Del Demont told me of a shot at a flock of butterballs flying up the river in a gale of wind, and going so low they had to raise to clear the bridge. He waited till they passed over and then pulled into them as they flew straight from him, picking up sixteen dead birds.

Our room at "Rube's" was up next to the roof, and many a night I have lain listening to the honk of the wild goose or the whistle and peep of the shore birds as they passed over, and I know of no sweeter lullaby to the ears of young Nimrod as he sinks to sleep and to dreams of flying ducks and wonderful shots in the "Land of Nod."

ROCHESTER, N. Y. BLUE BILL.

AFTER MOLLY COTTONTAIL.

"THESE frosty nights, den ole Molly Cottontail done got fat as butter," the darky hunters tell you. At once they begin to trap and snare them by dozens. If they did not there would soon be a rabbit plague in the south country, worse almost than that of Australia. For a single pair unmolested will, under favorable conditions, increase to several hundred within a twelvemonth. There are six to eight young in a nest, which is usually an earthen burrow lined with fine downy fur from the mother rabbit's breast.

At first the small creatures are no bigger than your finger, blind and helpless, with only a sort of wiggling motion. In a week they find their feet and their eyes, and run hither and yon, small animate bits of fluff. At three months they are full grown, ready to eat their weight daily in tender buds, sweet bark, grass, clover or garden stuff, or ear corn or fallen fruit.

The snare itself is an ingenious contrivance of string, trigger and a bent sapling that in due time jerks poor cottontail high and dry. An industrious small black boy will set a dozen each evening and rarely come home next day without a bunch of fat rabbits.

Many more are shot in wrath by bird hunters, whose dogs they seduce into false points. To shoot rabbits *per se* is regarded as rather a waste of ammunition.

But when the first deep snow comes Mistress Cottontail is in peril. Wherever it overtakes her—in wood, field, sedgeland or briers—she crouches and makes herself as nearly as possible a furry hemisphere. As the snow deepens she moves gently back and forth, still in her crouching round. By and by she has a chamber maybe twice as big as herself, whose only window is the small round at top which her warm breath keeps open.

When the clouds break and sunshine streams merrily over a white world, you see here and there stealing up through the keen air what looks like the plume of a fairy steam engine. Signals of dire distress they prove to the small, shy creatures whose refuge they mark. For there snow is evanescent. The deepest fall rarely lies a week. Before the last flakes scurry to earth, men, boys and dogs are scouring the face of it in search of game of all sorts. They track coons—which do not hibernate there—mink, foxes, wild turkeys, partridges. Above all, they hunt rabbits. Up, down, around, across, about they go, seeking and finding Molly Cottontail on her form. While the snow is soft she has no chance for her life. The captor either falls flat upon her form, seizing with a gurgle of triumph his quaking, squeaking quarry, or else she is routed out by a dog's keen, cold nose, and done to instant death in the soft, white, treacherous stuff that she had vainly imagined would shield her from harm.

With a crust over the snow, sport begins in earnest. Cottontail is given a fair start, then away go boys and dogs in pell-mell scramble after her. The light-weights of course have the best of it. The mongrel hound, or one good for his weight in coon and possum hunting every season, trips and flounders in the drift, or when as the breaking crust cuts his feet, while fyce and terrier skim light as thistledown over the treacherous surface, and soon lay eager paws on the flying, panting thing before them.

Sometimes a quick shot ends the chase. Much oftener the animal is given life in consideration of a good run for it. In general, though, betwixt boy and dog, its doom is sealed. And though the sport is cruel from a humanitarian standpoint, the greatest good of the greatest number is undoubtedly furthered by its vigorous prosecution.

M.

CHICKENS USING AMONG CATTLE.

THE incidental remark in Mr. H. M. Harper's note, published in FOREST AND STREAM last week and Mr. Hough's quasi-indorsement of the same, that "chickens do not consort with elk and moose," calls up the suggestion that possibly both gentlemen may be wide of the true facts, for the reason that I have known prairie chickens to consort with cattle habitually; and when out shooting at the Bronson ranch, in the Roseau country Minnesota, within easy striking distance of the moose and elk range, it has been my habit, when luck failed me in the stubble, to hunt among the herds, and my quest has always been successful. Of course a herd of a hundred or more cattle would deploy over several acres of territory. Sometimes two or three coveys would rise, but the birds would usually run before they would fly. They seemed almost as tame as cowbirds, and acted as though they felt a sense of security in bovine company. It may be that they had learned to forage among the droppings, but this would be hardly probable, as the animals not being grain fed, the ordure would afford scanty pickings. At all events, I could discover no evidence of their doing so. My simple conclusion was that the birds had discovered that gunners did not shoot among the cattle, and that therefore they were safer within their lines than outside.

At all events, since moose and elk do a good deal of grazing in that section on the edge of the prairie where chickens are known to "use" habitually, analogy would suggest that the birds and animals named do sometimes consort together. *Quod erat demonstrandum*, or words to that effect. CHARLES HALLOCK.

MONGOLIAN PHEASANTS NESTING.—Owing to the unusually early season, the Mongolian pheasants have already commenced nesting. A few days since a farmer near Albany plowed up a nest containing several eggs. The Salem *Statesman*, in noticing the fact, says: "The early spring will probably be the means of making these splendid game birds plentiful, as each pair will raise several broods." This is about the first instance on record where any up-the-valley paper has said a good word for these pheasants. Under the cloud of the general howl raised by parties in some of the counties where the birds were becoming plentiful, thousands of them have been shot and shipped to the San Francisco market, in order that the crops of the farmers in those counties might be saved from utter ruin and destruction. It has been found that the birds do not devastate the country, and next fall, it is safe to predict, farmers on whose lands these birds are plentiful will have trespass notices posted and will not allow promiscuous shooting of their game. A man who has a farm well stocked with these pheasants will be able to sell his shooting privileges for as much as he will make off his potato crop.—*Portland Oregonian.*

AFTER WHITE GOATS.

FOR years it had been my ambition to have an opportunity of hunting the famous Rocky Mountain goat, and at last here our party were after the usual incidents of travel by rail and water of more than two thousand miles, now within sight of the rocky fastnesses, where high up the goat or white antelope makes its home. We had brought along a guide, only to find after our camp was made and we were ready to start out that he did not know anything about the country at all, and that we must depend on ourselves.

We divided into three parties and started out; and if you have ever been in the woods of the northwest coast you can sympathize with us, and know that our way through the dense forest was over logs and brush, moss and ferns, intermixed with a liberal supply of devil's club, salal and huckleberry bushes, forming in many places almost impassable barriers. One of the parties met with no game, though plenty of game signs were seen, and returned to camp about sundown. The others during the afternoon run on to an old bear and two cubs, and killed the cubs, but the old one got away, carrying a .45 Winchester bullet. They came into camp after dark, bringing in their game, and we feasted on bear steak and enjoyed it, except one of the party who suddenly started for the rear of the camp and came back a few minutes later and whispered in my ear, "I don't want any more bear." The thought of a large black dog at home had turned his stomach against bear meat.

The next morning it rained and we remained in camp all day. The following day was fair and we busied ourselves cooking up some grub, and making ready for a three days' trip into the woods. One took his gun and went out in the afternoon up the mountain, and shortly we heard him shout, and then call for help, and some of the boys went to his assistance and helped him bring in another fine black bear.

Early the next morning we shouldered our guns and provisions and a blanket apiece, and again dividing into two parties were off after game. Though we neither saw nor heard each other we camped near together, and each party spent a comfortless night in the rain. Our party were up early, and after breakfasting started up the bed of a small mountain stream, and one who was a few rods ahead of the others and out of sight by reason of some huge boulders, ran on to a large cinnamon bear, but for some reason his gun lock refused to work, and when we got to him the bear was gone. It had cleared up, but looked like rain again and our party returned to camp at night. The other party pressed on and climbed a high mountain and caught sight of a white goat, but did not get a shot, and came back to camp on the third day worn out and disgusted with the country and ready to start for home. Three of us, however, made up our minds to load up Monday morning with rations for a week and go after blood in a section of the mountains that we had been in sight of when we were out on our second trip, and where we thought we would find the goats. The rest tried to laugh us out of the trip, and failing in this tried to dissuade us from going on account of distance, rough character of the mountains, and the fact that we knew nothing about the country, and as for trails there was none except here and there a game trail, which invariably ended as "Nessmuk" tells us that trails usually do. When too late these same boys much regretted not having gone with us.

We left camp early and pushed on as rapidly as possible. The mountain side was very steep; we had to make frequent stops for rest, and all the time kept a sharp outlook for game.

At about 4:30 P.M. we were crossing the track of a rock slide, where it was very steep, when I again looked across to the bare sides of a mountain to the south of us and stopped as my eyes rested on some white specks on the landscape. In a moment some of them moved, and calling to my two companions I pointed out to them the white goats quietly feeding, the first that either of us had ever seen. Soon they started off and ran a short distance, for all the world like a flock of sheep, and we counted six in the bunch, two kids and four old ones, while two others grazed some distance away. We made up our minds that we could not reach them that night and pushed on up, intending to make camp in a gap ahead of us. Shortly after this, as we stopped for a rest, one of the party killed a fine deer; it rolled down some distance but did not break its fine antlers; and while my companions were dressing the deer I started out to look for water. I got several falls on the steep mountain side, but no bruises worth mentioning, though I found no water; and so we went back some distance, carrying the two hindquarters of the deer, to where a small stream of water ran out of the face of the cliff and there made camp.

The next morning we again saw some goats on the mountain opposite, and were soon on the march for the gap. We passed over some very rough ground and up some steep and dangerous places. At one time I had to hold on to some brush while the yellow-jackets lit on my hand, but to let go was to fall.

We reached the gap about 9 o'clock, and from it we had a good view of the mountain side where the goats had been feeding, but we could not see any; so we ate huckleberries and rested until noon, then ate our dinner, and cacheing our blankets and provisions started after the goats. Our way for some distance was along the perpendicular face of the mountain over masses of slide rock, that made traveling difficult and dangerous. We found a goat trail and plenty of fresh signs. Then we passed into a small bunch of scrubby pines, and beyond this were masses of slide rock again, broken by deep ravines.

We worked our way carefully over these, and when near the edge of the second one, saw ahead of us, and across a deep ravine some 200yds. distant, a large white goat standing in plain view, quietly chewing her cud and with a kid by her side. We could see the sunlight reflect from her glossy black horns, but she did not appear to notice us. We laid our guns across a large rock and taking careful aim waited for some minutes for the goat to turn side to; but it remained standing with its head directly toward us. We did not want to shoot it in that position for fear of spoiling the head or hide, or perhaps both. Soon it moved a few steps toward us, jumped down on a narrow ledge of rock and disappeared with the kid in the ravine.

We waited for some time, expecting them to come out on the side next to us, but as they did not appear I left Stout and Gardner on the watch and went around to the head of the ravine above to look for them. There was some very rough slide rock to climb over; and when I got around I was surprised to see that the ravine was very steep and rough; and a short distance below, where the goats went in it broke off into a sheer precipice some hundreds of feet high.

I could not see anything of the goats nor any place that I thought they could have gone, and had about made up my mind that we had lost them entirely, when I heard Stout and Gardner commence firing. They soon called; and going over I found that they had killed three goats, two old ones and a kid, and one kid had got away.

The two we first saw had evidently gone down the steep ravine; and joined by two others, had come out into view about 100yds. below where the boys were standing. They were all fine specimens, with good pelts, and we soon had them skinned.

As Mr. Gardner had killed two, he decided that he would not go any further that day; and so leaving him there, Stout and I went up toward the summit of the mountain. The way was steep and led over immense avalanches of slide rock, where we had to pick our way carefully; above this the face of the mountain was broken into benches or ledges, along which we had to work our way back and forth to find a place to get up.

It was hard work and we rested quite often and drank of the clear cold water that ran from the snow banks above us. When at last we reached what we had supposed was the top we found ourselves on a bench some 200yds. wide connecting two peaks about a mile apart. We hunted along this for a while without seeing any game, though there were plenty of fresh signs and at last we lay down to rest and enjoy the grand scenery before starting back to camp. We had been resting but a few minutes, when, looking around toward the peak at our backs, I saw away above on the bare rock, outlined against the clear blue sky, a large white goat looking at us without any appearance of fear, as though trying to decide what new animal had invaded his feeding grounds.

We quickly got behind some rocks and started to get near enough for a shot. We next saw him lying down; and when we got within shooting distance he was up again watching us, and standing on the very edge of the rock. A shot put a bullet through him, but he did not fall, but staggered back a few paces, then back again to the edge and finally lay down on the very edge of the bluff. Another step would have sent him rolling down the steep face of the mountain, and surely have spoiled his fine horns. We got up to the game, pulled it back, and I made preparations to take off the skin, while Mr. Stout went on a little further in search of more.

Pretty soon he began shooting. I went over, and found he had killed another, that had rolled down some distance. We started down, and found the mountain side very steep, so we slid down some distance, occasionally getting a bump, and holding on to small brush and bushes as best we could. Just as we got to where he had killed the old goat a kid jumped out and ran like a flash, going along the side of a bluff of rock where it hardly seemed possible for a squirrel to go. Stout shot it.

The old goat was found with one horn broken off, and I went down and got the kid. Taking out the entrails, we hung the goats on a stump and started for camp; had a hard climb; reached the summit about sundown; hung the other goat up on some rock; and went on. When we came to Mr. Gardner it was dark.

We were yet a mile or more from camp, over a rough and in some places dangerous trail. We soon missed the way and found ourselves on a narrow bench at least a hundred feet above the trail; managed to get down by holding on to bushes, but came near falling several times; and safely around the point of the bluff, had to make our way slowly in the dark, over the slide rock, where a misstep might mean a broken limb. At last we reached camp safely, well tired out, but satisfied with the day's work. We had in half a day killed six fine white goats. Stout had three, and Gardner two, while I brought up the rear with one, but it was the finest one in the lot.

Before I enter upon an account of the next day's work, let me mention a curious thing. We found on all the high passes and peaks numerous pools filled with clear, cold water. Sometimes these were in the rock, but more often with earthen banks, and many of them could have been drained with one stroke of a spade. From some small streams led away, showing evidence of a subterranean supply.

When after breakfast we came out to the edge of the slide rock and looked down the valley, we beheld the grandest sight it has ever been my fortune to see. The valley 2 000ft. below us was filled with clouds, and the bright morning sun shining down on the immense cloudy billows, made them as white as cotton, while the light breeze tossed and rolled them about, the tops of the lower mountains showing through the clouds with their dark green like islands in a vast white lake. We spent some time enjoying the scene, and at last reluctantly passed on to our hunting ground; none of the little party will ever forget the sublime beauty of that morning scene above the clouds.

Just as we came out on the rocks beyond the bluff I saw a young goat. At a snap shot he disappeared, but going to the place I found him dead in a crevice. Stout discovered another large one quietly feeding in a little park some 800ft. below us, and started after it. We heard him shoot several times, but neither heard nor saw anything more of him until nearly night. At last, tired of waiting, we made our way to those we had killed late the day before, and packing the skins on our backs started up again. We had a hard climb, as it was very steep, and we also got a few slight falls, but reached the summit safely, and soon had the skin off the one on the top. Again shouldering our packs, now heavy, we had gone down about 2,000yds., and over an old snow bank, at the foot of which we sat down to rest and refresh ourselves from the small stream of clear cold ice water that ran from under it; all the while keeping a sharp outlook for more game.

We soon saw a large goat on a mountain opposite and distant about a mile. We quickly unslung our packs, and dropping them struck out for him, keeping under shelter of the mountain side as much as possible. We were in about 100yds. of him, and had in the mean time discovered two more, when just as we turned the corner of a large rock there stood a very large white goat not over 50yds. away. A shot staggered him, and seeing he was done for, we went forward a short distance and came into full view of two others. We took a shot at these, and Mr. Gardner "downed" his, while mine ran away evidently untouched. I tried to get another shot, but failed; and just then we heard Stout shoot and soon found that he had shot at the large goat that I had shot. It had staggered over the crest of the mountain, and he supposed we had not seen it. Coming to the crest I saw that it had fallen right on the edge of the cliff, and was even then gradually slipping over. I climbed down as quickly as possible and got hold of him, but he was so large and so near the edge that I had to call for help at once. Stout came, and then we called for Gardner; and it was all the three of us could do to keep the carcass from going over. We did not have much room to work, and a slip would have sent goat and hunter a hundred feet. By hard work though, we got him back from the edge to where he was safe, and then Gardner reported that the goat he had shot and which was a yearling and a beauty, was not dead, but had got down the face of the mountain to the very edge of the cliff and in a place not very easy to get to him. We went around and found the goat standing where a few inches more would have sent him down a sheer cliff of at least 1,000ft. on the slide rock below. As it appeared to be nearly dead, and to shoot it again would surely send it over the precipice, we decided to leave it until morning, thinking it would crawl back from the edge and die and we would get it; but during the night it disappeared and we found it not in the morning.

We then skinned the large goat, and hanging the skin up as it was growing late, and Gardner and myself went after our packs and Stout after his, which he had a hard

WHITE GOAT (*Mazama montana*).

Correctly showing the usual position when lying down. Photographed by Wm. H. Seward, Jr., at St. Mary's Lakes, Montana, Sept. 28, 1891.

time finding; and so by the time we got together again it was quite dark. We strayed off the trail and down into a gulch, but out again without any mishaps; and then as it was late and we were completely worn out, we laid the goat skins on the rocks and made for camp.

While we ate supper Mr. Stout gave us his experience for the day. He had a fine large goat skin for his pains, but declared he would not risk climbing the face of that mountain again for all the goats in the range.

We had now nine goat skins, which, with our blankets and guns, would give us each a heavy pack to the home camp, a distance of eight miles or more, over worse than no road or trail; and so we decided to make a start for camp next day; and turning in before a good camp-fire, we slept under the clear frosty sky as only the tired hunter knows how to sleep.

Early the next morning, packing our blankets and the skins we had at camp, we went down to where we had left some of the skins the night before; and taking what we could carry, started down to make a temporary camp about a mile down the steepest part of the mountain in a grove of fine timber.

The morning was clear up where we were, but the clouds below us looked heavier and were higher up the valley, and seemed to be still rising as the wind rolled and tossed them about. The view was fine, but we knew we had a hard day's work on hand, and also made up our minds that it was raining below us; so we lost no time on scenery.

Half a mile below our camp, at the foot of the slide-rock, there was a thick growth of brush and some timber; through this we had to follow the bed of a small stream down the steep slope; and it was hard traveling.

By the time we got down to this place, the clouds had reached it from below; as we went down we found it very thick and damp and chilly, and a hundred feet or so down a light cold rain set in. If you have never walked down into a cloud, you have missed a singular and rather uncanny experience. We got very wet going down, but finally reached the grove; found a very good place to camp, and putting blankets, goat skins and provisions into a hollow tree, started back to get the rest of the goat skins and the goat that Gardner had wounded the day before.

We followed the course of the stream back up to the slide-rock, and then the clouds were so thick we could see but a short distance; but we shaped our course as best we could for the trail above. We missed the way, however, but after wandering around for a while the clouds broke for a moment and gave us a chance to locate ourselves before they came down again almost as thick as night. We found our trail and came to the skins, but the wounded goat had gone, leaving no trail behind; and gathering up our packs we started back.

When we came to the rock slide near the bluff, Stout said we could climb down a gorge to the timber below, and save at least a half mile of hard traveling. We could not see any distance for the clouds, but Stout had been down part of the way the day before and we did not stop to think that then the rocks were dry, but now were wet and slippery. We first had to let ourselves down over a perpendicular ledge some ten or twelve feet high, landing on a narrow one below; and it was pretty close work, as now each had a heavy pack and had to drop several feet. Soon we found ourselves in a bad place, but we could not go back very easily, if at all. Removing cartridges as a precaution against accident, we worked our way slowly down, one going ahead and then handing guns down to him.

We had descended some distance, holding on to the edges and crevices in the rocks and brush, when Stout slipped, broke off some brush he was holding to, and went down like a flash some ten or twelve feet, when he luckily caught the heel of his shoe on a small stone projection and saved himself. It was a close call for him. I was just out of reach, having started across the gorge on a narrow ledge about four or five inches wide, but had I been within a foot of him I could not have rendered him any assistance, for it was all one could do to hold on for himself. A hundred feet below us the gorge broke off into a sheer cliff several hundred feet high; and had he not caught when he did he would have gone over this like a shot and down on to the loose rock below, a shapeless mass.

We went on, sliding, dropping and rolling down, turning back and forth along narrow rock ledges; and got safely down after a time, after making one of the most dangerous trips I ever undertook and which neither of us would care to take again. A week later I looked at this place on a fairly clear day, and it hardly looked possible that men could come down it safely. How one can enjoy a good roaring camp-fire after a hard day's tramp in the rain and cold. We had a good night's rest and sleep, which we needed for the next day's tramp.

In the morning, when we had as much as we could possibly carry, we found that we must leave our goat skin and my blanket and canvas. We walked in on the boys in camp about 6 P. M. We came in so quietly that we were at the tent before they saw us. Just then some one rose up and said, "Well, you have lost your bet, for here they are and they have the goats."

But Uncle David Vandeveer, of Grinnell, Ia., struck the right chord when he said, "Well, boys, I was rather thinking you would be in to-night; and I have lots of good coffee and bread all ready, for I knew you would be hungry." Uncle Vandeveer, now nearly sixty years old, is an old hunter, and a good one, too, and in fact is one of the best men I have ever been in the woods with; and he knows all about camp life.

We had to relate our experiences and mishaps between bites, and then the boys made me promise that I would take them up to the hunting ground next week. They had had poor success while we were gone, Mr. Pratt having brought in the only game—a large wolverine, with a fine skin; and the lucky owner was justly proud of it.

We decided that we would get an early start Monday morning and reach the hunting ground the first day out from camp; but then you can't always tell, you know.

EDGAR, Neb. H.

An engineer on the Denver and Rio Grande railway shot and killed a wildcat from the cab of his locomotive. Nearly all of the engineers of railroad trains in Texas and most of the Western States carry revolvers, and often rifles, in the cab, for various contingencies that might arise. They amuse themselves by shooting the telegraph poles or any other mark while running at full speed, and attain a wonderful skill in marksmanship.—*Springfield Republican.*

CHICAGO AND THE WEST.

CHICAGO, Ill., April 2.—In regard to the little game pocket whose whereabouts I have recently discovered but not yet uncovered, several interesting events have transpired. In the first place, my unknown resident has sent me a number of photographs of game, etc., all scenes taken in this locality in question. One picture shows two young moose standing in a wood. Another shows a moose calf standing near a wagon load of prairie chickens, whereto are added a pair of geese. Another scene shows a grand lot of chickens festooned along a tent pole supported on a wagon. The total effect should convince any one that there is game, big and small, in that country, and the references given me by my informant need not be published here, although I shall retain them. The photos in question have been forwarded to FOREST AND STREAM, and may perhaps be reproduced in engravings.

The news of this locality came to me in such shape that I could not give names or places. There came a later consent to state the facts, leaving out names and places, and this I did. It appeared to me that this was something which belonged to the friends of FOREST AND STREAM, and not to my personal friends, so I resolved to give the locality to no one whatever until just before the opening of the game season, but to then treat all alike who could show that they were FOREST AND STREAM readers, not market shooters, but gentlemen not disposed to abuse the privileges they might receive. Certainly I should not throw open this little corner to the market-shooting public. To this effect I published a reply to one inquirer, stating, in mere fun, that in due time I should give him the facts, provided that I liked him. To this I added, "Of course, I don't know whether I will or not."

This last remark was unfortunate, because it did not take into consideration the fact that there are all sorts of people in the world, some of whom don't know that a newspaper man, in spite of his calling, may be somewhere near a halfway sort of gentleman, and who don't know that the FOREST AND STREAM staff may include men who try, to the best of their ability, to be as near as they can to what they think the honest newspaper man should be.

I had no earthly thought of any hidden meaning to my words, until I got a letter in which the writer said he thought he "saw some light," and added, "If that country bears investigation, I shall be glad to show my appreciation of any information in a substantial manner."

I shall do this man the final courtesy of not publishing his name. The forbearance of a large newspaper is wide, though a little insult of this kind is almost as much one to the paper as to its representative. For myself, the most "substantial manner" in which the writer of the above letter can benefit me and himself is by not writing to me any more. He certainly will never learn through me where this good shooting is. For any gentleman who knows better how to treat a paper and a writer whose sole wish is to be fair to all alike this information is ready, on the terms originally proposed, which terms were in effect established by the original informant, whose wishes could not in honor be violated. I have a list of all inquirers. In August FOREST AND STREAM may do with this list as it likes, should there appear to be too many for all to be accommodated. If not too many, then I shall notify all alike. My last letter comes from Mr. Chas. A. Rathbone, Detroit, Mich., who says: "I try to go for a few days' shooting each year, and will be obliged to know the address referred to." If Mr. Rathbone will write me in early August he shall have the address on the conditions above mentioned.

I have still another letter from my game pocket man, in which he says: "From present appearances, no one will be disappointed, for there are chickens everywhere you look, dancing on every snow drift. We must have driven, going for hay, half a mile, through 300 or more, scattered the whole way to the stack. It was a pretty sight. I often watch them by the hour, and shall try and get a photo of them this spring."

Our duck season here is pretty much a failure, although large flights have been in for short periods. A number of the Chicago boys have been up at Fox Lake this week, but the bags were all small. On Thursday a heavy flight of bluebills and pintails was coming in. To-day the shooting at Fox Lake should be good. During last night a windstorm of the most remarkable violence prevailed all over the middle West, and its effect was felt seriously here. The ducks came in just ahead of it.

So far as I know the biggest bag of ducks made this spring in this vicinity was that made by Col. Jas. A. Sexton, at Cumberland club, last Tuesday, 58 birds. Col. Sexton is the urbane postmaster of this village, and his popularity is increased by his practice of giving a mallard duck to every purchaser of more than 25 cents worth of stamps.

Yesterday Messrs. C. E. Willard and Ed. Bingham went to Koshkonong Lake, Wis., for some canvasbacks. Mr. Bingham's old home is near by, and they will stop there very pleasantly.

Mr. F. C. Donald and Mr. C. S. Burton contemplate an early trip to Eagle Lake, near Mukwanago, Wis., after ducks. This lake is the first above the Fox Lake system on the northbound flight to Puckaway, and it is quite possible it may afford better sport than some of the better known spots.

Poor shooting was reported a few days ago at Senachwine Lake, but it should be better now.

Charlie Wilcox is back from McHenry, where he went with 3,000 shells and a heart full of hope. He missed his usual good shooting and bagged only one duck. Mr. W. L. Wells is still up at the lakes, but I do not hear that he has had a great deal of shooting. He is probably studying up a new wildfowl picture to add to his "Going Out" and "Coming In," which excellent works have made Billy Wells famous, or will do so. We have no closer student of wildfowl in this section, and I can imagine a pleasant meeting between him and Mr. W. Townsend, whose "Among the Wildfowl" sketches have been so enthusiastically received.

Col. C. E. Felton, who has lately been out of it by reason of sickness, is now about again and much welcomed.

That big-waisted and big-hearted Kansas City shooter man, Jim Riley, abode with the Chicago boys for two brief days this week. Mr. Riley has reformed, and now no longer shoots at the trap. He is in danger of a relapse.

Last week Mr. R. S. Cox defeated Mr. H. B. Foss in a friendly trial of skill, as was duly reported in the trap columns. On Wednesday of this week Mr. H. B. Foss defeated Mr. R. S. Cox in a friendly trial of skill, 46 to 42 out of 50. There will be another friendly trial of skill between Mr. R. S. Cox and Mr. H. B. Foss next week, in which Mr. R. S Cox hopes Mr. H. B. Foss will kindly not go quite so high as 46, which is a good many.

On last Tuesday morning a flock of bluebills attempted to light in the Chicago River at Harrison street bridge. This is in the heart of the city. They could not accomplish their purpose.

At the meeting of the executive committee of the Illinois State Sportsmen's Association this week, it was decided that this year there would be no personal solicitation of dealers for donations to the prize lists. The secretary was instructed to write to the dealers and announce a readiness to receive any voluntary donations. Mr. Abner Price will award the publication of the programme to Mr. A. W. KNOX, who has handled it so well in years past. New clubs formally accepted for membership at the meeting are: Pekin Gun Club, Pekin, Ill.; Highland Gun Club, of Moline, Ill.; English Lake Club, of Chicago, Ill. General discussion followed on the old question of admitting members who do not belong to any regular club.

The first of the snipe flight got in this week. Lem Willard killed twenty-two on Thursday. This early flight will not afford much shooting, and the birds will be lean and wild. In two or three weeks the shooting will be much better. E. HOUGH.

SPRING SHOOTING OF PLOVER.

Editor Forest and Stream:

The spring migration of plover is now at its height, and from dusk to dewy morn their mellow notes are heard. Every tract of prairie with short fresh grass and gemmed with gorgeous flowers invites them to tarry and search for its insect harvest during the day, but the south winds of the night again starts them on the long journey.

Every horse, not gun shy, is now daily hired, and Bennie, who always is too tired to hunt in a legitimate manner and exercise his legs, now, with Phyllis sitting beside him and driving the disgusted horse, haunts the blossoming prairie, displaying his skill and posing as the "mighty hunter."

It may be fun for the dude shooters, but is destruction to the game, for, besides the plover, even the innocent quail, now happily mated, is not spared, and Bennie will even condescend to get his gaiters muddy if a poor unseasonable duck is discerned in a branch or pond.

Will public opinion and the law jointly ever stop the spring shooting? J. V. B.

AUSTIN, Texas, March 31.

NORTH DAKOTA GAME NOTES.—Towner County, N. D., March 29.—I noted the following game birds the past week: Canada geese flying round in some numbers. March 25 saw a flock of sharptail grouse flying north about sunrise; 26th, pinnated grouse were first seen, heard of quite a number being seen by different persons; 28th, mallards and pintail ducks were first seen by me; on the 29th quite a number of small flocks were seen flying around seeming not to be able to settle down in any hole for any length of time. The weather for the past week has been warm, some showers of rain and a strong south wind combining to make the snow disappear and pools of water form all over the prairies, only large drifts of snow being left. I heard lately of an incident of the big blizzard, that of the discovery of some seventy odd Canada geese that were found frozen in the edge of a slough hole near Wahpeton, Dakota.—E. T. JUDD.

NOTES FROM RARITAN BAY.—Perth Amboy, N. J., April 4.—Several hair seals have been seen and two captured this spring in Raritan Bay. The Applegates of Cheesequake Creek have killed a good many ducks since last fall. Two male woodducks were shot on Saturday. Wm. Hartmann has had considerable sport shooting ducks from the boundary monument over decoys. A large flight of flickers (highholders) occurred yesterday, and numbers of them were killed at Morgan Station (Cheesequakes) while flying across the Long Branch Railroad bridge. Robins, blackbirds and bluebirds are numerous.—K.

NOTES FROM MEXICO.—Eddy, New Mexico, March 31.—I have just returned from the Geyser Springs ranch at the base of the Guadalupe Mountains, forty miles west of here. On the trip there and back we killed forty-two quail and two jacksnipe without leaving the road. Mr. Rush, the owner of the ranch, has a pack of eight hounds and during our stay there they, with the aid of the men, killed two wildcats. Mr. J. H. Hickman, of Dorchester, New Brunswick, is here in search of sport and health. He has killed about thirty jack rabbits but has not yet been out after other game.—G. O. SHIELDS.

FLORIDA ALLIGATOR FARM.—The slaughter of alligators for sport and for the demands of trade has caused a scarcity of this formidable reptile in some parts of Florida. To repair the waste as far as possible, and to establish a profitable business, it is now proposed to rear the alligator in pens in the marshes and swamps. It is said that this can be readily done and that a gentleman from Central Florida is now seeking to carry out the project with the aid of some New York capitalists.

THE PAUGUS FISH AND GAME CLUB, recently organized in Lakeport, N. H., has elected the following officers: President, John S. Crane; Vice-President, Julius E. Wilson; Secretary and Treasurer, F. E. Gilford; Directors, H. Bickford, F. A. Baker and M. L. Crane. The club will have grounds for trap shooting, and aid in the enforcement of the game laws during close season.

THE IDEAL M'F'G CO. have brought out a new re and de-capper for rifle and pistol, and a bullet seater.

A strange accident has occurred between Potomas, Mexico, and Deming, New Mexico, to a Mormon family. B. R. Young was driving along behind another wagon when a loaded gun in the front wagon accidentally fell and was discharged, the ball piercing Mr. Young's shoulder, then his son's hip, and then passing through the baby, it struck Mrs. Mary Roberts, daughter of Mr. Young. The bullet seriously wounded the father and son, killed the baby instantly, and slightly wounded Mrs. Roberts.

NATIONAL ECONOMIC VALUE OF GAME.

Editor Forest and Stream:

I regret to observe that your journal and perhaps the readers of your journal seem to take but little active interest in the movement for rational forest management, which has just received a new momentum by the authority placed in the President, to make forest reservations in the public domain.

I do not know whether you are aware that three reservations have already been proclaimed and about a dozen more are under examination. One in northern Minnesota comprising areas of from three to six million acres deserves especially your attention and the active and expressed support of every sportsman, as well as every rational thinking citizen.

I take pleasure in sending you further information regarding this movement, inclosed.

I wish to impress your readers with the fact, that while these reservations are not asked for game preserves or parks, but for economic forestry purposes, there is no better method of preserving game than a well conducted forestry administration which secures a proper natural or artificial reforestation of the areas that are cut over. The reason is, that such reforestation produces thickets here and there, in which the game can hide, multiply and be for a time safe. Every sportsman knows, that the game is being killed out everywhere in this country. I maintain that this is largely due to the absence of forest management with the resulting dense cover, providing hiding places.

In this connection your readers will be interested in the following statistics, which refer to a country which is densely settled, more so than any State of the Union except Massachussetts or Rhode Island, and where although 35 per cent. of the forest area is under the conservative management of the Government, the fields and the other 65 per cent. of forest are open to the chase, which is one of the best loved sports of the country. Prussia, 24 per cent. of which is forested, contains 208,000 square miles, or an area about equal to Minnesota, Wisconsin and Michigan combined or to the North Atlantic States from Maine to Virginia. For the year 1885 to 1886 the government of Prussia ascertained full statistics of the game killed in the whole kingdom on private and public lands, which were published with much interesting detail. Naturally the figures which refer to the first source are under-statements, since it is difficult to ascertain them fully, hence the figures are conservative. The results are surprising and exceeded all estimates.

The amount of game killed in this one year, in Prussia, was 4,573,634 heads. Valuing this game at the moderate tax prices which the government takes for the game killed in its preserves, the value of running game was $2,082,687, and that of the birds $731,448, a total of nearly $3,000,000. These figures, which correspond to a meat product of not less than 30,000,000lbs. show plainly the economic importance of the game, and that hunting may be made not simply a sport for the rich, but a very important factor in the welfare of the country. It must not be forgotten that this represents only such proportion of the game as is annually reproduced, the "capital stock" being kept more or less unimpaired.

An interesting calculation was also made as to the amount of ammunition used for this purpose. In order to obtain fairly approximate results, the estimate was made only for hares and partridges. There were killed in round numbers, 5,000,000, hares and 2,000,000 game birds. Allowing four shots for each piece of game, the number of shots would be 28,000,000, each containing 1oz. of lead, and ⅛ of an ounce of powder. According to this there were used in this one year not less than 1,750,000 pounds of lead, and nearly 300,000 pounds of powder. This, it is to be remembered, was only for the hares and partridges; there were also killed 766,000 stags, 1,794,095 roe, 229,538 wild boar, besides many foxes, wildcats, and other injurious animals.

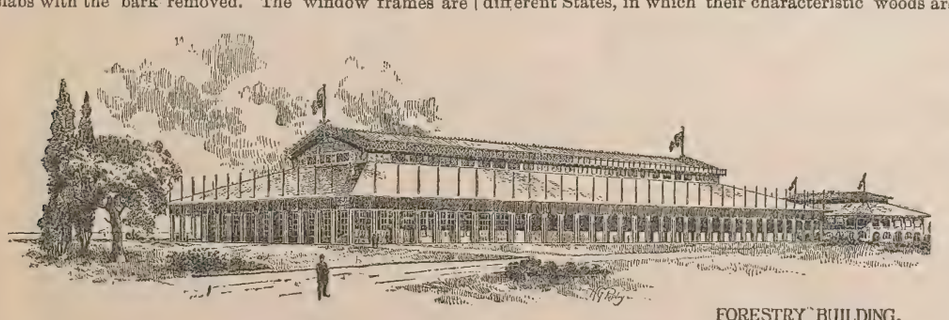
Of the scarcer game there are recorded 9 elks in the Province of East Prussia, 17 beavers in Saxony, 592 seals, 4 wolves in East Prussia, Brandenburg (!) and Rhine Province. Game is most abundant in Silesia and least in Hessen-Nassau.

This short account shows, that the sportsman's paradise can exist where population is densest, where every foot of ground is used for a purpose, where forest management exists without any parks specially set aside for game preserves, if matters are properly regulated.

In the establishment of the forest reservations, we are taking the first step to a rational management of our resources, and every sportsman should for his own benefit give his earnest outspoken aid to secure both the establishment and rational management of such forest reserves.

B. E. Fernow, Chief of Forestry Division.

U. S. Department of Agriculture,
Division of Forestry, Washington, D. C., March 2.



A Baby Manatee in a tank on board the steamboat St. Augustine, plying on the Indian River, attracts the wide-eyed admiration of all the passengers. The baby is only a few weeks old and weighs 150lbs. Its little bead-like eyes look through the glass and express satisfaction with the new quarters, where it gets an abundance of manatee grass and green oats, which it devours with ravenous avidity, but only at night. Messrs. Hepburn and Miller, two citizens of the Indian River county, discovered the baby manatee one night feeding peacefully upon the banks of the river among the tall manatee grass. The gentlemen approached stealthily with muffled oars and grabbed the baby by the tail. The baby started off as if it had received an electric shock, and ploughed through the tall grass, which bent and cracked as the water sped through with a comb of froth at the bows, making dead for the open water and the inlet, where the breakers were rolling in grand undulation and breaking over the shore with a thunderous sound. Mr. Hepburn held on like grim death to the baby's tail, while Mr. Miller steered the fast-flying little boat safely by obstructions, which came so near at times that death and demolition were only escaped. They were determined to have that baby at any cost. After a mile-a-minute journey of fully six miles the little manatee seemed to tire of the struggle, not, however, before he had rushed through the first line of breakers of the inlet. At last he was beached and carried back in triumph to the other side of the river.—*Times-Union, Jacksonville, Fla.*

Words of Appreciation.

Press of official business and absence have prevented me from sooner writing you a few lines expressing congratulation and admiration for your last successful effort to keep your valued paper up with the march of sporting taste in America. I possess one of the first numbers of the first volume of the Forest and Stream and all others up to date, and have observed with pride and interest its frequent improvements, as the development of gentlemanly and manly sports have followed in its wake; and it is a well-recognized fact that your paper has greatly contributed toward encouraging the cultivation of the ennobling recreation its pages so successfully and graphically describe. Your new issue of 32 pages, filled with interesting reading matter and excellent engravings, is highly appreciated by your numerous friends here, and no doubt by every one who has seen it, and I sincerely hope will crown your efforts with perfect success and bring the reward you so richly deserve. May you continue to teach the young idea how to shoot and do many other manly things to help them grow up strong, self-reliant men; teach their elders, often worried and tired with the battles of life, to find health and enjoyment, breathing God's pure air and admiring the beauties of nature, and that your good works may continue long after we older sportsmen may have gone to other and, we hope, happier hunting grounds, are the best wishes of yours sincerely, J. U. Gregory (Quebec).

THE FORESTRY BUILDING.

THE Forestry Building is, in appearance, perhaps the most unique of all the Exposition structures. Its dimensions are 200 by 500ft. To a remarkable degree its architecture is of the rustic order. On all four sides of the building is a veranda, supporting the roof of which is a colonnade consisting of a series of columns composed of three tree-trunks each 25ft. in length, one of them from 16 to 20in. in diameter and the others smaller. All of these trunks are left in their natural state with bark undisturbed. They are contributed by the different States and Territories of the Union and by foreign countries, each furnishing specimens of its most characteristic trees. The sides of the building are constructed of slabs with the bark removed. The window frames are

FORESTRY BUILDING.
World's Columbian Exposition.

treated in the same rustic manner as is the rest of the building. The main entrance is elaborately finished in different kinds of wood, the material and workmanship being contributed by the wood workers of the world. The other entrances are finished artistically to represent the woods of different countries and regions. The roof is thatched, not with straw, as was erroneously stated some time ago, but with tanbark and other barks. The interior of the building is finished in various woods in a way to show their beautiful graining, susceptibility to polish, etc. The visitor can make no mistake as to the kinds of tree-trunks which form the colonnade, for he will see upon each one a tablet upon which are inscribed the common and scientific name, the State or country from which the trunk was contributed and other pertinent information, such as the approximate quantity of such timber in the region whence it came. Surmounting the cornice of the veranda and extending all around the building are numerous flagstaffs bearing the colors, coat-of-arms, etc., of the nations and States represented in the exhibits inside.

The Forestry Building contains a most varied exhibition of forest products in general—the most complete which could be gathered together. It contains logs and sections of trees, worked lumber in the form of shingles, flooring, casing, etc. There are shown here dye woods and barks, mosses, galls, abnormal woody products, lichens, vegetable substances used for bedding and upholstery, gums, resins, vegetable ivory, cocoanut shells, gourds, wood pulp, rattan, willowware and woodenware generally, such as pails, tubs, brooms, etc. There is also an exceedingly interesting monographic display of the different States, in which their characteristic woods are most effectively and beautifully shown.

The Forestry Building was designed by P. B. Atwood, Chief Designer in the Exposition's Construction Department, and cost about $100,000. Chief Buchanan, of the Exposition's Department of Agriculture, is entitled to the lion's share of credit for the existence of this exceedingly novel and attractive building and display. As Acting Forestry Chief he induced the Directory to make the necessary appropriation of money, and he devoted much time and energy in effecting the erection of the building and the collection of the exhibit. The structure has a delightful site near the lake shore in the southeastern portion of the grounds. In itself and in the exhibits it contains it illustrates the forestry wealth of the world, and particularly of the United States. No forestry display was ever made before which approached this in extent or completeness.

Sea and River Fishing.

The full texts of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

MISPLACED SYMPATHY.

He sat down on the river bank, waiting for a bite;
He didn't know the sun was hot, though its rays were white.
I watched him from a shady nook, beneath a friendly tree,
He was a study, that old man, a patient waiter, he.

His rod was held with steady hand—he never moved a muscle—
Saving all his inward strength, waiting for a tussle.
My heart was touched, he looked so sad, sitting there alone;
I tried to say some kindly words—he couldn't hear a tone.

His beard was long and snowy white, emblem of weary years.
I felt his race was almost run—my eyes were filled with tears.
I little thought the old man had a particle of vim;
His hands were lean, and I could see the trembling of each limb.

At last there came a "mighty yank," and then a lively run;
It seemed to wake the old man up—and such a string of tongue.
I tried to take the old saint down, but shorthand wasn't in it;
The best of pot-hooks failed to catch three hundred words a minute.

He reeled that fish with all his might, and then he let it go;
He danced about like any kid—his face was all aglow.
At last I saw a gaping mouth, and then a ten-pound cat,
And floating down the stream I saw the old man's summer hat.

He didn't know his hat was gone—he tied his fish fast to a string;
Then down he sat in broiling sun, and I could see him grin.
As I passed on into the wood I left my every fear—
I thought the old man with the rod would live another year.

California. Marion.

WINTER PICKEREL FISHING.

ALTHOUGH I am not much of an angler, I am always interested in piscatorial matters, and have read with pleasure "Special's" contribution to your columns about this winter sport. But there is one thing that seems strange to me, and that is the size of the fish. From "Special's" and all other accounts about the pickerel fishing around Boston, I judge that the fish generally taken weigh from 2 to 5lbs. The latter weight considered to be a good-sized pickerel, while one that a boy caught was "an enormous pickerel," as "it must have weighed six or seven pounds." Now, I do not want to belittle the "Hub's pickerel fishing, for I presume it afforded fine sport to many of its citizens during the long winter.

As I said in the beginning, I am not much of an angler, never having put a line in Niagara county waters since I became a resident, nearly thirty years ago, although I am a member of the Niagara County Anglers' Club, a flourishing organization, of which I secured the names of eighty of the first one hundred members. But I have done some pickerel fishing on the St. Lawrence and Indian rivers in Jefferson county, but have never fished for them through the ice. Indian River had no pickerel in it until nine years ago this present month, although a number of the small lakes lying between it and the St. Lawrence contained them as long ago as I can remember, and it is on these lakes that the pickerel fishing through the ice has been done. A. J. O'Niel, of Theresa, caught one a few years since that weighed 18½lbs., another party caught one weighing 21½lbs. These I mention as being enormous pickerel, and not many are caught of these sizes; but none are retained that weigh less than 3lbs.

While on Indian River during October, 1890, a party told me that of thirteen pickerel caught one day seven were put back in the water, the balance ran from 4 to 9lbs. Above I mentioned that there were no pickerel in Indian River until nine years ago this month (1883), when about 200 were taken from Butterfield Lake, none of them weighing over 2lbs., and put into the river. In July, 1885, one was taken that weighed 10lbs. 6oz., an increase of over 8lbs. in two years and four months, which seems almost incredible, but as it was taken during an anglers' tournament, where prizes were offered for the largest mascalonge, small and large-mouth black bass and pickerel, and as it was weighed by competent judges there can be no doubt about it. And here I would like to say that I think the introduction of pickerel into Indian River is a detriment to the mascalonge and black bass fishing. Perhaps "Special" and other Boston correspondents may claim that the pickerel taken there are a different species of pike than those taken in northern New York, and I hope they may be, as I cannot understand what an angler wants of a pickerel of 1 or 2lbs. weight.

There is certainly a vast difference in the color and shape of the pickerel taken in the St. Lawrence from those of Indian River, the latter being much darker in color and more stocky and also more gamy.

I once took a pickerel in the St. Lawrence that weighed 11lbs.; it came in like a stick in comparison with a 5lbs. pickerel taken in Indian River. J. L. Davison.

Lockport, N. Y.

[The pickerel to which our correspondent refers is not the pickerel of "Special's" communications, but the fish known in Massachusetts, and most other States, as the pike. This is a larger and better fish, and is found over a vastly greater range than the pickerel. In last week's Forest and Stream, page 270, you will find reference to a specimen which weighed 42½lbs. On May 14, 1891, we illustrated the heads of muscalonge, pike and pickerel in such a way as to show plainly the difference between them; by reference to that number you will readily see how "Special's" pickerel differs from yours, which is actually the pike, figure 3 of the article mentioned. The pickerel has the cheeks and gill-covers (opercles) fully scaled; the pike has the lower half of the gill-covers naked.]

Leather Carp in the Erie Canal.—Lockport, N. Y.—In your last week's issue Mr. Eben P. Dorr, of Buffalo, noted the capture of a "carp sucker" in the Niagara River which you say "is evidently a leather carp." About two years ago a party brought to me for identification a fish he had taken in "the basin" below the five pairs of locks in this city. None of the local anglers could name it. This fish was taken on a hook, was 10in. long and weighed about three-quarters of a pound, and proved to be a leather carp. It probably came from Niagara River and passed through the locks.—J. L. Davison.

BOSTON ANGLERS—NORTH AND SOUTH

MR. CHARLES P. STEVENS, so well know among anglers, especially in the vicinity of Richardson Lake, Me., has not given up the idea of further visiting the old haunts after all. He has felt at times as though fishing was "playing out" there, and at one time it was understood among his friends that Camp Vive Vale, at the Narrows, was for sale, or likely to be for sale. But after considering the matter thoroughly this lover of angling, almost to the extent of Old Izaak himself, has come to the conclusion that fishing is on the wane at any point, and together with Mr. Edward J. Shattuck, he has leased the lot on which their camp stands for another five years. Mr. Shattuck is manager of the Geo. H. Morrill printers' ink establishment of this city, and Mr. Stevens is head of the well known firm of printers' roller manufacturers Wilde & Stevens, hence Camp Vive Vale has sometimes been called the printers' camp. Mr. Stevens has been spending the winter at St. Louis, Mich., with Mrs. Stevens, whose health has been considerably benefitted by the mineral springs there. Mr. Stevens has had some good fishing there. He will visit the camp at Richardson Lake this spring as soon as the fishing promises well. But as for going in before the ice is out, as on former seasons, he says he is done. It was Mr. Stevens of whom formerly the FOREST AND STREAM had an account of going into camp before the ice was out of the lake, and trying the fish every day for many days in the open water in the Narrows, but not getting a trout till after the ice went out of the lake. He kept a record of the temperature of the water, taken each day, and found that the trout did not take the minnow even till the mercury showed several degrees warmer than ice water.

The opening of the trout season in the Bay State was accompanied by the usual enthusiasm, though the weather had been very cold and unfavorable up to that date. Messrs. G. B. Appleton & Co. made a finer display of live trout in their window, on Washington street, than ever. They show native trout, English brown trout, Loch Leven, or Scotch, trout, California, or rainbow, trout and hybrid trout. The fish seem to attract more attention than ever and it sometimes requires police assistance to keep the sidewalk clear. There was but little use of trying the streams on opening in any part of the State, except on the Cape and the south shore, where the influence of the sea breezes had removed the ice. Capt. Nat Hoxie had a good delegation of trout fishermen at his place in Plymouth on that day. Among those booked to go there, and to other resorts on the Cape, may be mentioned W. C. Thairlwall, W. S. Peel, L. R. Rowe, R. B. Blodget, Luther Little, and other gentlemen well known in Boston business and professional circles. Then there is the Monument Club, which takes its name from the town, a club of highly-esteemed Boston sportsman. On April 1 there were booked for the club William Stackpole, J. S. Stackpole, C. P. Horton, and other prominent Boston lawyers and business men. Although the resorts of the Cape were visited by these usually successful anglers, yet the accout of catches is rather unsatisfactory up to date. But the warm weather of early this week has doubtless changed the complexion of trouting matters.

Mr. Fred W. Ayer, so well known as a salmon fisherman, and especially a devotee of the sport at the celebrated Bangor, Me., pool, was in Boston the other day. He had just returned from Ottawa. He had been there on business, and had given the celebrated salmon petition of Mr. Blanchard, of which he is a supporter, considerable attention. While not thoroughly hopeful of full success, Mr. Ayer thinks good must come of the salmon petition. He is of the opinion that money, judiciously expended, in buying up the netters, or buying the raising of their nets, would work wonders for many salmon rivers. He is not over hopeful of a run of salmon at Bangor this year, though he will try them, probably as faithfully as usual. He has usually been the first and the last to take salmon there. It is only the efforts of restocking, put out by the State, that leaves any salmon at all to get up as far as Bangor. Mr. Ayer believes, and it is a matter of record, that there are about 50 salmon netters on the Penobscot below Bangor. It is estimated by the commissioners, as well as Mr. Ayer, that about 10,000 salmon are caught each season by these netters, while from 75 to 100 are caught in the pool at Bangor. Mr. Ayer also thinks that possibly 200 salmon may be left to go up through the fishways at that point and into the river above. Here they are again beset by poacher and netter, though there are not salmon enough that get above the dam to make either netting or poaching in the upper waters of the Penobscot particularly attractive or profitable. The State restocks and the 50 netters get the salmon.

The Maine trout lakes and streams are still cased in ice, and little is known of a certainty as to the going out of this ice. The Rangeley Lakes have been very low all winter, the result of the remarkably low water last autumn and the continued drawing by the mills below all winter. But a spring freshet or the gradual moving of the snow, which is still two feet deep in the woods, is sure to fill these lakes. What the trout fishing will be, is a question. High water in the winter is usually followed by good fishing in these lakes in the spring, and low water has usually brought poor fishing. But the spring of 1892 may disprove all past theories. Tom French, of Richardson Lake steamer fame, was in Boston some days ago, looking after engines and machinery for a fine new boat he and his father are building for that lake. He says that very little winter fishing has been done this year, and that since the low water almost completely ruined the autumn fishing last year, the trout ought to be there for the anglers this spring. Capt. Fred. C. Barker is also of the opinion that there are really more trout, notwithstanding the low water, than there would have been had the fishing been good last autumn.

Already is the question asked me many times a day as to when the ice is likely to go out of the Maine lakes, and parties of Boston sportsmen are already being formed. Lines, rods and reels are looked over. Mr. Wadsworth and Mr. Paine of the former Eugene Clapp (lately deceased) party are making plans. Capt. J. B. Thomas, Jr., of the American Sumar Refining Co., mentions Moosehead very frequently. He is a son of Capt. Thomas, deceased, the founder of the Standard Sugar Refinery, and next in sugar refining business in the East to the Havemeyers of New York. Capt. J. B. Thomas, Jr. has been many seasons the commodore of the Kineo Club. Mr. Dwinell of Dwinell, Hayward & Co., well known in the coffee trade, will go to Moosehead this year, for his annual trout fishing, he having usually visited the Rangeleys. These few may be mentioned among the hundreds of Boston's best business men who will go afishing this spring.

The king of tarpon anglers seems to have come to light this year. The FOREST AND STREAM has already had a partial account of the success of Mr. Chas. A. Dean, vice-president and selling agent of the Hollingsworth & Whitney Paper Company, of this city, in catching the silver king in Florida the past season; a full score is published below. Mr. Dean got home to Boston on Friday, and to say the least he has a right to be proud of his success. The score is a most remarkable one. On Jan. 13, 1891, at Punta Gorda, Mr. Dean landed his first tarpon for the season. It weighed 158lbs., was 6ft. 8½in. in length, and he was five hours in landing him. The length of time occupied is explained from the fact that Mr. Dean was weak from the effects of the grip. On Jan. 22 he landed his second fish, weighing 105lbs., 5ft. 10in. long, time half an hour. Jan. 23 another fish was brought to the gaff, weighing 133lbs., 6ft. 6½in. long, time twenty-three minutes. Jan. 24 Mr. Dean landed his fourth and largest fish, weighing 172lbs., length 6ft. 10½in., time three hours. This fish Mr. Dean is to have mounted for his office. A scale of the monster is to be seen there and it is as big as the top of a fair-sized teacup. Feb. 4, the fifth fish was landed, weighing 90lbs., 5ft. 10in. in length, time, 16 minutes. Feb. 8, at St. James City, the sixth fish was hooked and saved, weighing 117lbs., time, 22 minutes. Feb. 15, the seventh tarpon was landed, weighing 105lbs., time, 30 minutes. Feb. 22, the eighth fish was caught, weighing 125lbs., time, 20 minutes. March 15, at Punta Gorda again, Mr. Dean's ninth silver king was conquered, weighing 80lbs., 5ft. long, time, 29 minutes. March 19, he caught his tenth fish, weighing 125lbs., 6ft. long, time, 15 minutes. March 25, his last fish for the trip was taken, weighing 140lbs., 6ft. 6in. long; time, 45 minutes. The fish were all given to the taxidermists, and they will go to grace natural history rooms, and the rooms of anglers' who have not been as successful as Mr. Dean. The united weight of all the fish was 1,350lbs. SPECIAL.

INDIANA LAKES AND STREAMS.

SPEAKING of the Indiana lakes, Fish Commissioner Dennis says these lakes occupy the highest ground in the State. It may not have been noticed by all my readers that all the lakes in the world, with a few exceptions, are on the highest ground; that is, they are on the top, or near the top, of the watershed, or "divide," on which they lie. It is also true that the more extensive the watershed the larger the lakes. The great lakes of the North American Continent are at the top of its most extended watershed. It may be said that these great lakes have a watershed of their own and good sized rivers run into them, which proves they are at the foot instead of the top of a watershed; but that fact only shows that the lake basin is not complete at some point and, therefore, is never full of water. It is a fact that part of the water of these lakes reaches the sea through the St. Lawrence and another part goes through a canal from Lake Michigan to the Mississippi River, and their waters are higher than the rivers that flow either north or south from either side of them. A little study of any map will show that this rule holds good even to the tiniest lakelet. It is true that there are many bodies of water along the alluvial bottoms of great rivers, but they are not true lakes; they are washouts and old river channels left by the river cutting a new channel across the neck of a bend.

Another exception is what may be termed the earthquake lakes, of which Reelfoot Lake in western Tennessee is a good example.

During the earthquakes of 1812 a large area of heavily timbered land sank many feet below the level of the surrounding country and the basin so formed filled with water. It is said the submerged forest is plainly seen in places more than 60ft. below the surface of the water; but as this article was not intended for a treatise on physical geography, let us return to the Indiana lakes and their fish. Quite within the memory of the present oldest inhabitants these lakes were fairly alive with pickerel, bass, perch and other kinds of game fish. For thousands of years they had been left to multiply, unmolested save by their natural enemies and the feeble efforts of the Indian fisherman. Forty years ago it was not uncommon for an angler to cut a 2lbs. bass into three pieces to make that many baits for 20lb. pickerel, and there were vast numbers of bass that weighed more than 6lbs. each.

When that most savage, destructive and rapacious of all creatures, the white man, appeared on the scene, he attacked the fish with hooks, seines, nets, spears, traps, and later with dynamite. Day and night, summer and winter, the destruction went on, till the accumuiated increase of a thousand years was wiped out in half that many months. The mischief has been done; the question for present consideration is, can it be repaired? It can, but I fear not in time to be of much benefit to the present members of the "old guard." The difficulties of restocking these waters are not great, but it will take a long time to educate the people into believing that public property is not rightfully their property if they can in any way get possession of it. It will take a long time to educate men into the belief that it is their duty to assist in enforcing the laws because they are laws, and regardless of whether their violation is a personal danger to the citizen or to his property, and finally, it will take a long time to get every man to comprehend that he is a part owner of all public property, and that his duty to himself as well as to the public, is to take care of it instead of wantonly destroying it. A man has no more moral or legal right to explode dynamite in public waters for killing fish than he has to explode it in his neighbor's hen roost; but FOREST AND STREAM and similar educators will labor a long time before they convince men that it is so.

It is also a matter for regret that these lakes have not the depth they used to have, and that the end of all of them will be marshes instead of lakes. Every year a rank growth of vegetation dies and rots, and as there is no current it settles to the bottom, till finally the lake becomes a marsh.

Because it could be done, the streams of Indiana have been more thoroughly depopulated than the lakes. Seines and traps are much more effective than in the lakes. Dynamite has been used for blasting stumps in almost every field that borders these streams, and it was very easy to put some of it in the streams. Besides being depopulated, the character of all except the largest streams has greatly changed. Formerly they were crooked, had many deep pools, drifts and sunken stumps and logs—the ideal home of bass. The porous, shaded soil of the woods absorbed the rainfall, preventing violent floods and giving a steady supply of water.

Now the streams have been straightened, the drifts removed, and the deep holes have filled up. The timber has been cut off their slopes and the land ditched, so that when a heavy rain comes the stream is for a few hours a raging flood of muddy water, subsiding in a few more hours to an insignificant rivulet. From streams of this class the glory has departed forever. One of these streams is near my home, and many pleasant days along its banks are well remembered. Within less than a mile of each other were the old dam, the elm stump, the sycamore stump, the willow bank, the high bank, the long swimming hole, and the big drift. Any of these places would yield a mess of bass, if they were in a biting mood, and many nice strings have I carried away from each of them. Now but two of these places are left, and a persistent angler might perhaps get two or three half-pound ones. Thousands of miles of Indiana streams have had their fishing spoiled in this way, but it was right, for the land along their banks was too valuable to be let lie idle for the sake of the fish, and they had to go.

Col. Dennis, our fish commissioner, has been personally acquainted with more black bass than any other man in the State; although of ripe age, his enthusiasm and energy are unbounded; but what can he do on a salary of $1,000 a year and pay expenses out of it? If the State would allow him five times as much it would not be long before the Colonel would be a terror to every fish poacher in the State. O. H. HAMPTON.

THE ROUND WHITEFISH.

LAC LA PECHE LAURENTIAN CLUB, March 24.—*Editor Forest and Stream:* In your issue of Jan. 14 I notice a very interesting article on the round whitefish (*Coregonus quadrilateralis*). I have cast my line on many lakes throughout the country between the Gatineau and the St. Maurice rivers, in the Province of Quebec, and have noticed the fish in question only in the lakes at the source of the Lac Quarro River, the main branch of the Assomption.

Many years ago, while visiting one of my lumber camps on the Lac Croche, a tributary of the Lac Quarro, I had occasion to follow up a logging road running parallel with a brook which emptied into the lake. A ray of sunshine lit up a pool, in which I noticed schools of fish. As the water was shallow below the pool, I thought there was a fair chance of capturing the fish, whatever they might be; so one of the men who accompanied me was dispatched for a bed tick, out of which was improvised a net, into which the fish were driven to the number of a couple of barrels. They proved to be the round whitefish, and most excellent eating: in fact, I prefer them to any fresh-water fish I have ever tasted. The fish were frequently speared, but never caught on a hook. I have made inquiries of the Hudson's Bay Company in the St. Maurice Territory as to whether the "round whitefish" was found in any waters of the St. Maurice Territory. Invariable the answer was, "We have never seen the fish you describe." The whitefish of the Great Lakes is found in lakes at the source of the St. Maurice.

W. H. PARKER.

GRANDES PILES, Quebec.

TROUT AND BASS VS. PICKEREL.

Editor Forest and Stream:

It has often occurred to me that the law which prohibits pickerel fishing through the ice in Lake George is not a wise one. It is a well-known fact to anglers who are well acquainted with this lake, that about eight years ago, before the law was on pickerel, there was excellent trout and bass fishing to be got. Since that time, however, the trout and bass have steadily decreased, until last year there was not a dozen bass caught at the end of the lake. Now, it is just a matter whether it is to be trout and bass or pickerel. I prefer the former, and who does not?

I will admit that it is not sportsmanlike to fish the pickerel at a time so near their spawning season; yet something must be done, and in this case I think we ought to let the "proper thing" go by and keep this fish a little more within bounds. This must be done at once if at all, and then, and not till then, will we be able to come in with a fair basket of these, the gamest and best of all fresh-water fishes.

There is another matter, too, that is ruinous to the trout and bass of Lake George, and that is explosives. This is by far the most dastardly way of catching fish ever practiced, and as a sportsman, I would call on summer visitors and all who are interested to investigate and report every case they come across. Let them, in the interest of sport, do so individually, for everybody's business is nobody's business. The game constables will welcome every one who brings news of these diabolical hoodlums, and a few heavy fines will have the good effect desired.

I have heard of lots of cases where pickerel have been caught while trolling for trout in from 90 to 150ft. of water. This proves that they are there after trout.

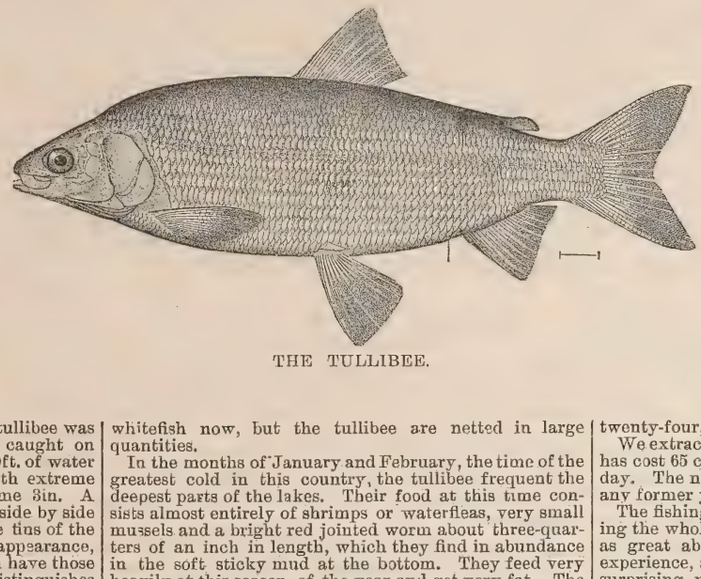
WILL HOULDCROFT.

TICONDEROGA, N. Y., March 29.

[The pickerel of Lake George is the common pike.]

SPRING WEATHER IN THE ADIRONDACKS.—Northwood, N. Y., April 3.—Snow covers the ground in patches only. The creek is open at this place, the ice having gone out in the last two days. Robins and bluebirds have been here more than a week. Some wild geese were seen here Sunday. On Saturday a kildeer plover flew around the ponds. To-day, in a walk of about a mile and a half, I saw a woodcock, several ducks, and some woodpeckers, robins, bluebirds, song chips, blackbirds and woodchucks. Game of all kinds wintered well, except deer, of which large numbers are said to have been killed by workmen on the new railroad about Moose River. Numerous insects have put in their appearance. Among them are several kinds of gorgeous butterflies.—R. S. SPEARS.

THE TULLIBEE.



THE Qu'Appelle River takes its rise about ten miles southeast of the Elbow of the South Saskatchewan River, and, after running almost due east through 250 miles of magnificent prairie land in the District of Assiniboia, one of the western Territories of Canada, it empties into the Assiniboine River at Fort Ellice, an old trading post of the Hudson's Bay Company, which lies about eight miles within the western boundary of the Province of Manitoba. The Qu'Appelle is a small river and, like a great many prairie streams, it goes dry or nearly so in the summer months.

About forty-five miles above the mouth of the Qu'Appelle River lies Round Lake, a small sheet of water seven miles long and three-fourths in width, with an average depth of 35ft. Eleven miles further west is Crooked Lake, eleven miles by one mile; its shores, especially on the south side, are well wooded and, with a number of points running out into the water, it is very beautiful. Its average depth is 50ft. One hundred and ten miles from the river's mouth are the far-famed Qu'Appelle Lakes, a chain thirty miles in length, which, beginning with the most eastern, are named respectively Katepwe (Cree for "Who calls?"), Mission, Qu'Appelle, Pasqua, Wyosung and Muskago, the last being a large marsh, where magnificent duck shooting is to be had every fall. Qu'Appelle Lake has the greatest depth, 75ft., but the first four mentioned are all deep, with clear cold water. Thirty-five miles west of Muskago Lake is the mouth of a creek, and five miles north lies Long Lake, a body of water forty-eight miles long and averaging two miles wide and 65ft. deep. The Qu'Appelle River runs through all these lakes, except Long Lake, which drains into the river, and the water is clear, and, in the deeper lakes, cold and pure. All have muddy bottoms, with sandy shoals, and the shores are sandy and stony, with large boulders here and there. Most of the lakes have a number of strong springs of cold water emptying into them from the shores, and undoubtedly there are many springs existing in the bottom, which go far toward helping to keep the water at a low temperature during the very hot weather of summer.

The varieties of fish, other than minnows, sticklebacks, etc., existing in the Qu'Appelle River and its lakes, are two kinds of whitefish (*C. clupeiformis* and *C. tullibee*); pike (*E. lucius*), called jackfish throughout the Northwest; pickerel (doré, *S. vitreum*); perch (*P. flavescens*); red horse (*M. macrolepidotum*); common sucker (*C. commersoni*); buffalo fish (*I. bubalus*) and burbot (*L. maculosa*). Although there are "gold eyes" (*Hyodon chrysopsis*) in the Assiniboine River, there are none in the Qu'Appelle.

The species to which I wish to draw your attention is the tullibee, or, as it is locally termed, "too-la-bee" or "too-na-pee." The accompanying photograph* of a tullibee was taken from a very fine specimen which was caught on Feb. 4 last in a gill net, set under the ice in 40ft. of water in Pasqua Lake. Its weight was 3¾lbs., length extreme 18⅜in., depth extreme 5¼in., thickness extreme 3in. A tullibee and a whitefish of the same size laid side by side will deceive most people who buy fish. The fins of the tullibee have a more tapering and delicate appearance, and its head a more nacreous iridescence than have those of the whitefish. But it is the mouth that distinguishes the tullibee from the whitefish, so far as external appearance goes. In the whitefish the snout is blunt and soft, and the upper jaw is longer than the lower; the snout of the tullibee is broad, when looked at from above, but the profile is acute, and the lower jaw is longer than the upper, and both are prominent and bony. The mouth of the whitefish has a small orifice, the tullibee's has a large one, so that if you hold the fish up with the open mouth toward you, until your eye is on a level with the lateral line, you can see into the interior of the mouth, the outline of which is irregularly orbicular and of a greatest diameter of 1in. The superior maxillaries are very large, and when the mouth is open, as in feeding at the surface, they stand at right angles to the lateral line, projecting slightly from the face so as to be the great cause of death of this fish. When a tullibee comes in contact with a net it naturally draws back, but finds that it is caught by the twine, which has dropped behind the projecting maxillaries; it begins to struggle, turning over and over, only to entangle itself more inextricably. Sometimes, however, it does succeed in escaping, leaving behind it a knot 3 to 6in. in length, which is most difficult to straighten out. It is owing to this peculiarity in its maxillaries, its way of struggling to escape, as well as its shadlike depth of body, that so many tullibee from 1 to 3lbs. in weight are caught in a 5 and 6in. extension-measure gill net in company with whitefish of 6 and 8lbs. I have seen tons of tullibee caught in gill nets of 5in. extension measure and larger, the former being the smallest gilling mesh allowed in the West by the regulations for the taking of whitefish, tullibee and lake trout.

The tullibee is found, as I have already stated, in all the deeper lakes through which runs the Qu'Appelle River, but, strange to say, not in Long Lake, the largest of them all; it is also taken in the Eagle Quill lakes, three small bodies of water lying about forty-five miles south of the South Saskatchewan River and connected with it by Swift Current Creek. Immediately to the north of the North Saskatchewan River are many hundreds of deep lakes teeming with whitefish, lake trout, pike, pickerel, sturgeon and other fish, and here, in some of the lakes, we find the tullibee in immense numbers. In this part of the country they are called "the small whitefish." Inspector McQueen, of Manitoba, tells me that they are plentiful in Lake Winnipeg, but the average size is small; he has never seen any in lakes Manitoba and Winnipegoosis, but some of the fishery overseers report that they are to be found there. In the Lake of the Woods Mr. McQueen says they are taken even larger than the one whose photograph I have sent you. In some of the lakes in the Rocky Mountains where I found *C. clupeiformis* and *C. williamsoni* I met with and heard of no tullibee. The edible qualities of the tullibee range from fair to excellent, there being a great difference in this respect between the fish caught in different lakes. In Pasqua Lake the quality is excellent, especially in the winter, the flavor then being hardly distinguishable from that of the whitefish. In this lake they are large, fat and plump and almost free from the creamy white worms that are found in the fleshy part of the back of the tullibee from other lakes to such an extent as to render them quite uneatable to a great many people. These parasites do not, however, appear to affect the general health of the fish and are to be found in its flesh at all times of the year. The flesh is beautifully white, but greatly lacks the curd and richness, as well as the flakiness and firmness of the whitefish. Split, slightly salted and dried, and then given four or five hours in smoke, they are delicious eating. When first drawn from the water they have, in common with the whitefish, the smell that has been likened to that of a fresh cucumber. It is a most prolific fish. For years past the Indians, half-breeds and Hudson's Bay Company's people have been drawing large quantities of whitefish and tullibee from our Western lakes. As soon as the fish began to resort to the shoals to spawn these people would set their gill nets and would keep them set until the fish returned to the deep water on the approach of very cold weather. As the fish were caught a hole was made through each at the base of the tail and they were strung ten on a stick and hung head downward from a scaffold for use in the winter. The result was that in many of the smaller, and a number of the larger, lakes there are very few whitefish left, but the tullibee are still fairly plentiful; indeed, I know of lakes where there are no whitefish now, but the tullibee are netted in large quantities.

THE TULLIBEE.

In the months of January and February, the time of the greatest cold in this country, the tullibee frequent the deepest parts of the lakes. Their food at this time consists almost entirely of shrimps or waterfleas, very small mussels and a bright red jointed worm about three-quarters of an inch in length, which they find in abundance in the soft sticky mud at the bottom. They feed very heavily at this season of the year and get very fat. The fish remain in the deep water until the ice begins to get rotten, when they gradually approach the shallower water along the shores and at the mouths of the rivers and streams, up which they often pass to other lakes early in May; but in September they pass down stream. Both the outlets and inlets of streams appear to be favorite spots at this time of the year, as well as early fall, undoubtedly on account of the great abundance of food to be found there, for their stomachs are gorged with it, and it is now that the young of the crayfish form a large portion of their diet. Later on, when the water has reached its summer temperature, the tullibee will be found back in the deep water again, and here they will remain until early fall, apparently having as great an aversion to warm water as have the whitefish. They run in schools and toward evening in the summer it is a pretty sight to see them jumping, at times in play, but as often after a fly or beetle upon the surface. They spring clear of the water, making a quick, sharp splashing noise, and, turning to one side or the other, disappear with a flip. I have counted ten in the air at one time, looking like as many gleams of silvery light, and they keep up their antics all night long.

In September they will again be found gradually nearing the shoal water, feeding heavily, and plump with fat and the now swelling ovaries. Later on they appear to eat little or nothing and devote all their time to playing until about the 25th of October, when they have settled down to the business of propagation, and have finished by Nov. 10. They prefer shallow water close to shore with clean sand to spawn on, and during the day they may be seen in pairs and small schools poking along the shores, but at night they come in thousands and keep up a constant loud splashing and fluttering, very strange and weird on a calm night. Two years ago I carefully counted the ova from a ripe fish, 2½lbs. in weight, and found there were 23,700, closely resembling whitefish eggs in appearance, but somewhat smaller. After spawning they are very thin, lank and dull in color and quite unfit for human food.

In these lakes the whitefish (*C. clupeiformis*) do not begin to spawn until Nov. 10 to 15, and have finished about Dec. 5, but in Long Lake, only a few miles away, and from which comes a great portion of the water that supplies the Qu'Appelle River, they do not spawn until late in November, and have not entirely finished until early January. The pike eat numbers of tullibee, about a pound in weight, at the time when the tullibee are in the shallow water in the spring and fall, but as pike do not go into the deep water to any great extent either in winter or summer, the damage they do is comparatively small; but the pickerel is, in my opinion, more destructive, because at the times when the tullibee are in the deep water the pickerel are there also, and in the spring and fall they may be found in company with the tullibee on the shoals. I have taken from the stomachs of pickerel a considerable number of small tullibee, weighing from 4 to 16oz. each. The burbot (*L. inaculosa*) are very destructive; at spawning time they may be found with their stomachs constantly distended with the ova of tullibee and whitefish. The tullibee are often found in the net torn and lacerated by the burbot, and fishermen have told me that the latter are so greedy that they will allow themselves to be drawn out on the ice rather than let go their hold. The common sucker is a great spawn-eater, but in that respect there is no fish that will eat more spawn than the yellow perch, which is also one of the most destructive to the fry of whitefish and tullibee, and, in fact, all fish that are indigenous to these waters.

The ducks, particularly bluebills, golden eyes and buffleheads, get so fat on spawn in the fall that great numbers of them actually cannot fly unless there is a strong wind blowing to assist them in rising from the surface of the water. Of course, such food renders their flesh scarcely eatable.

Nearly all the fishing in this country is done with gill nets, and in these vast quantities of tullibee, as well as other fish, are taken. In the past in Assiniboia, and in the North still, the tullibee were taken in traps, built of stones and brush across shallow places in the rivers and smaller streams, when the water was low and the fish were migrating upstream in May and down in September.

Although the tullibee is not so good a table fish as the whitefish, still its great prolificness and ability to withstand successfully the most murderous fishing, which has often cleaned out the whitefish in a very few years, and the peculiarity it undoubtedly possesses of being able to thrive in very small bodies of water, when the latter is sweet and cool and contains the necessary kinds and quantity of food, seem to me to entitle this fish to some attention from the fishculturist, the probability being that it would turn out a valuable addition to the list of fishes suitable for transplanting.

F. C. GILCHRIST.

FORT QU'APPELLE ASSA., N. W. T.

*Instead of the excellent photograph we have reproduced a fine drawing, by permission of Commissioner McDonald, from a specimen obtained in Manitoba by Mr. E. G. Blackford for the U. S. Fish Commission.

THE BISBY CLUB.

THE fourteenth annual report for the year ending Jan. 31, 1892, announces the following list of officers: President, Richard U. Sherman; Vice-Presidents, Jas. W. Husted and W. W. Snow; Secretary, Thos. R. Proctor, Utica; Treasurer, W. H. Boardman, 73 Broadway, New York; Legal Counsellor, R. F. Wilkinson, Poughkeepsie. Trustees—R. U. Sherman, H. Lee Babcock, W. H. H. Wooster, Thos. R. Proctor, R. W. Wilkinson, Wm. H. Boardman. Executive Committee—President, 1st vice-president, secretary, treasurer and legal counsellor, *ex-officio*. The membership now includes twenty-four, and the limit is twenty-five.

We extract the following items of public interest: Food has cost 65 cents per day; whole housekeeping $1.07 per day. The number of visitors has been greater than in any former year save one.

The fishing in the club's waters was steadily good during the whole season. The native Bisby trout has shown as great abundance as in the early years of the club's experience, and we have been rejoiced by the presence in surprising numbers of the landlocked salmon, which were artificially planted in 1889, and to which our waters seem to be peculiarly adapted. At one year old these fish appear of the almost uniform size of 8in. in length. In the second year, 1891, they attained the length of 12in. and the weight of one-half pound each, and according to the natural rate of progression, we may look for them in the next fishing season of the length of 14 and 15in., and the weight of a pound each, and, what is quite as gratifying as their rapid development, is the good game qualities they show.

They are given to range more freely than any other variety of fish in our waters, and last year were taken in every part of the lake, more often at the surface than at the bottom, where our native salmon trout mostly abide, and were ready at almost any hour of the day to take either the fly, trolling tackle or cut fish bait. In the evening they might be always seen disporting at the surface, exhibiting their full length, and appearing as they leaped upward from the water like lance heads of glistening silver.

Notwithstanding the large deposits of brook trout fry, a falling off is observed in this species; the same is true of the rainbow, brown trout and frostfish. The remedy must be found in the rearing to the age of a year or more of fry in artificial ponds, in which no predatory enemies are present, and an ample supply of suitable food is furnished daily. The construction of ponds for this purpose, and for the further purpose of keeping stock fish for breeding, was recommended last year, but no action was taken on the recommendation, and it is renewed now in the hope that it will receive the consideration it deserves.

The product of the Bisby hatchery last season was: Brook trout, 55,000; lake trout, 55,000; brown trout, 10,000; landlocked salmon, 17,000; frostfish, 250,000. There were in the hatchery at the time of the report 25,000 brook trout, 15,000 brown trout and 40,000 lake trout.

CHITTENDEN FISH AND GAME LEAGUE.—Rutland, Vt., March 26.—The sportsmen of Chittenden have organized a branch club of the State League, known as the Chittenden Fish and Game Club. Its officers are: Pres., A. W. Billado; Vice-Pres., E. J. Perry; Sec'y, Edwin Horton; Treas., N. D. Parker. There is also an executive committee of five members. Chittenden is in the heart of the best fishing grounds of Rutland county. Five years ago it would have been difficult to find more than one or two inhabitants of the town who favored an enforcement of the laws. A. W. Billado, the president of the club, is an efficient fish warden; and it is due to his efforts that the sentiment of Chittenden citizens has changed to favor an enforcement of the laws. A few years ago a valuable cow, the property of Mr. Billado, was poisoned, it was supposed, by one of the violators of the trout law.—W.

WITH FLY-ROD AND LANDING-NET.

AS Jack reclines in his comfortable chair, with feet on the fender, before a blazing hearth, drawing consolation from the pet meerschaum, which is his constant companion, his observations concerning a trip to the lake on the morrow, for which all necessary arrangements have been completed, recall most vividly the circumstances connected with our visit last year to this favorite angling resort.

Monday morning found us on the way at 4 o'clock; and with the eastern horizon beaming and sparkling in its ripening wealth of crimson and gold, inhaling the bracing atmosphere with that keen sense of exhileration ever imparted to the early starter, prospecting on the outlook for a day suited to our needs, doubt if you can, kind reader, that we felt like kings indeed.

At 5:20 o'clock we had stabled our horses, transferred our well-filled hampers to the pine grove bordering the shore and prepared to erect our tent, for we had planned for a stay of five or six days, when my attention was attracted by an exclamation from Jack, who had preceded me to the beach, near the mouth of the creek where our canoe was moored.

Hastily covering the intervening distance to the water's edge I found my companion with eyes intently fixed upon an ever-widening circle upon the lake's mirror-like surface, which proclaimed the presence of the king of fish, "a laker." Who can but feel anxious to test the tempting lure and pit human skill against the crafty cunning of some finny monarch of the lake or pool, when in the early morning hour he beholds breaking the water and glistening in the sparkling rays of the rising sun, that pink and golden four-pounder? Surely no true disciple of the oft-quoted gentle Izaak.

Returning to the camp for rod and landing-net, I hastily donned my coat and hat, which contained my store of lines, flies and necessary paraphernalia, which had been so carefully tested and arranged before the start, and when I again reached the shore Jack had launched the canoe, and directing me to take the cast, he carefully paddled me in the direction of the tell-tale break we had previously observed. Carefully jointing my Leonard and attaching a fine waterproof taper line, a very light-running reel, to which I connected the finest mist-colored leaders we had with a tempting fly, I was soon ready to try conclusions with his lordship. When in the vicinity of the coveted spot I made my first cast, let me state that my heart beat more quickly, for I realized that doubtless these dark, cool waters yet covered the object of our impromptu attempt to make a capture.

Again the fly was carefully cast, once again, and a rise and a strike.

Whir-r-r, sings the reel, as down, down he goes, then out again with a shake and splash that spoke volumes, for well we knew that he was well hooked; and Jack exclaimed, "Handle him carefully, Doc, he is a dandy and we must capture him." As he sounds deep home and the pliant rod yields, the reel sings that tune so dear to the sportsman's ear. Many were the thoughts of former battles and pretty little episodes of my experience that had transpired so near this very spot.

Then follows the conquest, so familiar, give and take, give and take, for so long a time that it does seem that each struggle must be his last, and the aching wrist proclaims that the capture is a specimen worthy of our steel. When at last, after more than thirty minutes of darting, whirling, diving struggle, we think it safe to reel in our prize, and when, after sundry feeble efforts and by-plays on the part of his lordship to evade the ready net, skilfully manipulated by Jack, he is in the canoe and our struggle is ended, then it was that criticisms on the part of Jack, and the usual comments were succeeded by that remark that is consolation in itself, "Never mind, we have him."

Reaching camp, the pocket scale registers 4lbs. 3oz., as a good beginning, and as our stomachs manifested a disposition to rebel at further inattention, our next duty was plainly that of providing for the inner man. Jack is a superb culinary artist, as the steaming potatoes, crisp trout and aromatic coffee served to testify. With appetites whetted by the vigorous morning's exercise, let it be said that we both did justice to the repast which was soon spread.

After satisfying our hunger, during which time the conversation had naturally drifted into the subject upon which but few anglers agree perfectly, that of flies and fly-fishing, my companion produced his "Levison" fly-book, which is not excelled, and said, "Doc, my experience is that for May trouting the flies that I have here are by far the best," and he showed me a fine line of flies of the varieties known as fern, iron-blue, hawthorn, sky-blue, yellow-dun, yellow-may, turkey-brown, and in addition he said, "I always have in my fly-book Montreal, professor, red-ibis, grizzly-king, queen-of-the-waters, white-miller, etc., and in most cases find that some of these varieties are suited to the needs of the occasion."

After breakfast and cooking utensils were disposed of we arranged our camp for convenience and comfort. The time thus employed engaged our attention until past 11 o'clock, and after a hearty repast we took our customary after-dinner siesta, preceded while smoking by reading copies of FOREST AND STREAM.

At 2:30 Jack awoke me saying, "Come, Doc, get ready for the fun; the loons are trying to raise a storm and we must try the fly." On the way to our favorite casting ground Jack drew a spinner, capturing a little beauty weighing ¾lbs., and within twenty minutes after reaching "the ledge" Jack had hooked a beauty, which gave him a smart battle, and as a result of the afternoon's sport we had four elegant specimens of the finny tribe, weighing ¾lbs., 1lb. 7oz., 1lb. 13oz. and 3lbs. 1oz. Dark, threatening storm clouds appeared in the western horizon, veiling the setting sun and flawy gusts of wind admonished us that duties urgently beckoned us campward, and thither we directed our frail craft's course, where everything was made snug for the storm king's approach. The wind, which had risen so suddenly, had as suddenly subsided, and the impressive silence was only broken by the distant reverberations of thunder, which ever increased in volume and constancy. Truly this was a magnificent sight. Zig-zag flashes that seemed in their intensity to fill the atmosphere with a dry, crackling sound were almost incessant, and with each flash heaven's artillery boomed and thundered discordantly. Soon the first fitful gusts were upon us, that well known forerunner of the gale so sure to follow, and once more looking to the stays of our tent and making everything secure, Jack suggested seeking cover, and agreeable to the suggestion we "turned in."

Our pine and balsam shakedowns were couches to which insomnia never pays court, and while the roaring, howling gale tears across the fleecy waters, through the dense pines surrounding us, and on toward the east, we are comfortably planning for an early start to a neighboring stream which ought to afford us prime remuneration for an early jaunt.

At half-past three next morning our fire was rekindled, and soon the steaming, coffee savory trout and eggs were partaken of with keen relish, and we were off for the creek. Reaching the stream as the rising sun gave token of approaching day, promising to soon dispel the misty, shroud-like fog which still enveloped the dripping earth, we drew lots to see whose should be the fly to tempt the denizens of the first and favorite pool near the creek's outlet. Fortune favored me, and Jack accepted it with sportsmanlike grace. Examining most minutely every section of my rod, which was a new 9½ft. Chubb fly-rod weighing about 6oz., and carefully testing line, reel, leader and fly, I cautiously approached the pool. Then it was that my thoughts turned to him who has never yet crept stealthily to the edge of some deep, dark pool, and cast his fly upon its glossy surface; who has never heard the swish of the tail nor seen the spotted sides of a speckled trout as he broke the silent waters in his leap and rush for the fly. To such I would say, quit for a while the bank, the office or the store, get out into God's sunshine by the side of a running stream, among the birds and odors of the woods, and breathe the pure air of heaven, a tonic once tasted never forgotten.

With a delicate, pliant curve of the rod I succeeded, by my first cast, in laying a white-miller on a No. 10 hook just above a huge log which had for years been the favorite haunt of each successive tenant of this pool, and, true to anticapation, I was greeted with a wolfish rise. After some seven or eight minutes of gallant fighting my quarry yielded and I landed a two-pounder. From the pool I succeeded in taking four as handsome specimens as one could wish, and upon our return later in the day Jake secured a strike and, though fairly hooked, lost a handsome fish by his leader parting.

This, I think, was one of the days that will ever linger in my memory, bright reminder of the true sport on the stream. Our creels were filled and we were ravenously hungry, so after seeking camp and doing sportsmanlike justice to a hearty meal we were content to rest for the day. During the balance of our stay our fortune was good, and when we broke camp Friday afternoon and returned to civilization, each carried in his vest a feeling of content to be had only by an outing with rod and net.

BYRON.

THROUGH TO TWITCHELL.—III.

[*Concluded from page 300.*]

THERE are fourteen smaller lakes so near Twitchell that a party can go and fish one of them, returning to camp on the larger lake the same day; and mind you, there is as good fishing in them as anywhere in the State. Now, if this same Twitchell isn't pretty near headquarters to a fishing paradise, I'd like to know why. This is saying nothing of the hunting, which is of the best; and scenery! why it can make 'em all hustle. Pardon this digression, but it's so, every word of it, even if not poetically told.

The carry led up a hill, then along the side of another, then down; and we were within a few rods of the lake before we saw it. What a gem it was, and what a beautiful setting. It seems presumptuous to attempt a description. Surrounded by mountains clad with their growth of virgin forest, beautiful in springtime, what must it be in autumn?

The lake itself, irregular in outline, is a little longer than it is wide, but not much; near the center is an island; and the only thing that tends to show that man has been here is the condition of this. A few trees, but mostly charred stubs, rise from it. That tells the story. It has been burned over by some knave or fool, we know not which. Nature is doing her best to repair the damage, and now even this disfigurement is hidden by the beauty that surrounds it.

We gazed at the lake with rapturous eyes for some moments, silently drinking in its beauty, when "High" turned to us and remarked, "Did you ever see one that could beat it?" We answered together, "No;" and he left us to get the boat, which was secreted near by. While he was after the boat we limbered up our rods, or rather I did, for Jim's cheap affair—he called it worse names than that before the day was spent—refused to be limbered. This was remedied by cutting off the bare wooden dowels which had swelled from getting wet. "High" appeared as the rod was finally jointed with the boat on his shoulders. He put it down on the beach, and taking his axe cut some boughs for us to sit on, as the boat was lacking in the matter of seats.

We laid a straightaway course until we passed a point on our right, around which we turned and skirted the shore until we came to another point, without getting a strike; but just as the boat was rounding this second point I felt a tug at the hook, some 60ft. away. "High" instructed us to let out about that much line, as the water was so clear one could see bottom where it was 30ft. deep. From the struggle I judged I had hooked a pound trout, but when after a gamy fight between the fish and the rod, with me coaching the rod and the trout doing his own coaching in a way that showed him to be a graduate of the trout school, he was steered near "High," who laid the paddle across his knees and, loosely holding the line near the boat with his left hand and sliding his right down the line until near the trout's head, deftly lifted him into the boat and said, "Half-pounder."

I caught two more, about the same size, before Jim had a strike, then he began to catch about one to my two, until I was for ahead on the grand total. Just before we stopped for lunch Jim added to his catch a trout that he and I thought would go 2lbs., but "High" simply said, "Pound an' a half," which settled it.

We ran into a beautiful shady cove, and landed; and while Jim and I built a fire, "High" dressed some of the smaller trout. Then he cut five green forked sticks and impaled five trout. These we broiled over the fire by sticking the stick into the ground so the trout was over the coals. It has been my luck to dine at several "tony" places, but I never enjoyed a dinner more than I did that one, simple as it was—broiled trout, cold slap-jacks buttered and a chunk of maple sugar. After this came the proverbial smoke, while enjoying which we reviewed the morning's sport, Jim and I voting unanimously that we had never had better.

"High" indulged in some reminiscences wherein he related having been at this lake many times years ago, when 3 and 4lb. trout were quite common; and how his boy fishing through the ice one winter caught a brook trout weighing 5¾lbs. This lake is almost an angler's paradise now, what must it have been then?

The pipes were burned out, and after throwing the embers of the fire into the lake and throwing some water on the place where the fire had been, we got aboard again.

I have omitted to state that we lost about half the fish we hooked. This, while it does not speak well for our skill, allowed us much sport which we would not have had, unless we had cared to become "fish hogs." The after-dinner sport opened up merrily, and after we had caught one each, I hooked a snag. This was got rid of, and as soon as the line had again been run out I felt my hook catch on something, the reel began to whirl, and as there was no commotion I concluded it was another snag and told High to stop paddling. Then I tried to shake the hook loose by moving the rod. As soon as I did this the hook seemed to free itself, and I began to reel in to see if the bait was still on. We were using fins and eyes now, our supply of worms being exhausted. I had reeled up 5 or 6yds. when there was trouble again at the hook end, but this time of another kind, and as I reeled this line taut a magnificent trout leaped from the water about 50ft, from the boat shaking his head savagely in his attempts to loosen the cruel barb, I shut my teeth and vowed I would have that fellow or break something in the attempt.

It was a great battle, one I should like to engage in again, although my wrist ached so I had to change hands twice. Sometimes I could hardly reel fast enough to take up the slack, and again it seemed as if the tip must go, when the old fellow suddenly turned and made off in spite of my giving him the butt vigorously. That trout believed in breaking water and did it time and again, in fact almost every time he felt the line taut he would leap from the water and shake his head, and flash his silver sides and crimson spots in the sun as a token of defiance. He was beginning to feel the steady strain of the good little lancewood rod, and I worked him up near the boat where he made the final struggle, which came near ending in his favor. He came with a rush toward the boat, broke from the water and then dived as if to go under the boat, and if High had not quickly swung the boat around this tale would ne'er been written, as I do not like to write those with the other ending. High's few strokes won the battle, for they brought the line near him, and I had given the fish the butt so strong that the supple rod brought him to the surface, and High sliding his hand loosely down the line until near the trout's head, with a skill born of experience, lifted him into the boat. Even then Jim had to fall on him until High could get hold of him and stab him. Then High removed the hook, and where do you suppose it was? Just hanging in the extreme edge of his upper lip, which adds another "if" to this tale.

"What did he weigh?"

"O," High said, "he'll go 'bout 2lbs."

Soon after this Jim had a rise that was a rise, but did not hook the fish. He let his tip go back to give the trout another chance and he took it, and again Jim missed. The tip was let back once more, and this time Jim struck so hard his rod broke at the middle of the second joint. Jim muttered a word or so, at the same time grabbing the line, and as the trout was still on tried to bring him in hand over hand. He got him within 20 or 30ft. of the boat when his lordship gave a mighty leap, showing himself to be the proverbial big one, got a little slack and shook himself free. Jim afterward managed to catch two on his handline, while I got one with my rod. This smoothed his ruffled feelings somewhat. Then as we had enough fish and I knew Jim was not enjoying himself I suggested to "High" that as we were near the trail we had better quit. The others acquiesced and "High" turned the prow shoreward. Just as we neared the shore a trout broke near us and the ruling passion was so strong that I made a cast over the spot where he had risen. He struck at the bait but I missed him; just then the keel grated on the beach, and while "High" was taking things out of the boat I climbed a rock and tried several more casts, but without success, and it was with a feeling of sorrow and regret at leaving such a gem of nature as this lake that I reeled up, unjointed the little rod that had served me so well and took the trail back to Twitchell, whither Jim and "High" had preceded me. I overtook them just before we reached the shore, where we found Will waiting; he had not enjoyed any luck and had only three fair-sized trout.

Jim and "High" had carried over the boat we had used that day, so Will got in with his father and Jim and I took the other boat. We steered from our course far enough to inspect a camp across the lake which is owned by Connecticut parties who occupy it for a month or so every season. It is very complete in its appointments and commands a very fine view.

During the night I was awakened by Jim's restlessness; suddenly he quieted down, muttering in his sleep something about "that rod," and I knew that he had been fighting the battle of the day again.

We were routed out early the next morning by "High," announcing that breakfast, the last meal in this camp, was ready.

Soon everything was shipshape and we all got into the borrowed boat and went over to the camp where we were to leave the boat as the boys had found it. From there we took the trail for South Branch where we arrived about one o'clock. Here finding the boats all right, we embarked for our twenty-mile row on our return to Stillwater. I took the oars for the first ten and Jim for the last. As we arrived at the mouth of Wolf Creek we met T. Miller Reed, with a guide, on the way to Smith' Lake. After we had told him of our luck he told us that the day before he had caught a trout weighing 2½lbs. on the rapids below the dam, and when we arrived at the camp soon after, we saw the diagram of the big fish on the wall, and later the big fish itself in the ice house. We accepted numerous congratulations on the size of our catch. At the table besides Doctor G. we found two boys from Lowville who had been out that day without catch-

ing a trout; Doctor G. had fared as badly, but had been more lucky the day before, having caught six trout that weighed 5lbs. Jim and I packed a box of our largest trout to take out, as we decided to go out at the first opportunity.

Next morning I set out with Doctor G. I walked out over the roughest and rode over the smoothest of the road, and when I walked I had to carry the box of fish, as the Doctor was too much occupied in driving and keeping his seat to watch it or hold it on. We arrived at Number Four in good time for dinner. Mr. Fenton said he had been thinking since I went in that I "must be the fellow that wrote notes to the FOREST AND STREAM occasionally." This I admitted. He then said, "I suppose you will write up this trip?" I said yes, and asked him if there had been any good catches there lately, also if he had seen many deer. He told me of these catches: Six trout weighing 8½lbs., by "Sid" Breeze of Oneida, N. Y., and seven by another party, weight 15lbs. One of this catch tipped the beam at 2½lbs., being the best catch of the season. I also heard that one of the boarders had seen three deer from his window one morning, and two the next; he told Mr. Fenton he must change his room or he would break the law, the temptation was so great.

Shortly after dinner our journey was continued, the only incident worthy of note being that a hawk sat on the telephone wire and allowed us to drive by it without being disturbed. Some one in a rig following us shied a stone at it. This caused it to fly on past us, when it again alighted on the wire and once more allowed us to pass without being disturbed; but when the other team came along it flew away although no stone was shied this time. This seemed to show reasoning power in distinguishing a friend from an enemy, reasoning from a previous acquaintance.

We arrived in Lowville about 4:30, and Doctor G. kindly carried me to my hotel, where ended one of the pleasantest outings of my lifetime.

Jim came out the next day with Mr. Reed, and they told the boys what I had neglected to, which was very little.

The two boys we had seen at Stillwater came out the day after Jim did, and brought sixteen trout, weighing 17lbs., their catch of the day previous off and near the mouth of Wolf Creek, proving one of the boys at least to be a chip of the old block—Wallace B. The other block I do not know well enough to speak with authority of.

These papers may reach the eyes of some of those named therein. If so, I wish them to know that although many miles may part us, I am thinking of them at this moment, and that we may meet again as anglers is the wish of one of the guild. OSCEOLA.

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., April 2.—Mr. C. B. Dicks, known as "Chief" Dicks, was one of the party of duck shooters who went up to Fox Lake this week. Mr. Dicks went out on Wednesday with Geo. Drury for pusher, and headed for Grass Lake. At the mouth of the channel, just beyond Crabapple Island, where the Fox River debouches through the heavy wild rice into Fox Lake proper, they saw a bit of stick bobbing about in the water, and in a moment knew it marked an escaped fish, which had carried off line and stick together. Mr. Dicks leaned over, caught the line, and sought to lift the fish into the boat. It wouldn't lift, but made a rush which caused him to drop the line. Presently the floating stick appeared again, and to make things short, they followed it up until in the shallow water in the wild rice and reeds they saw that the fish was a large mascallonge. Drury leaned over, watched his chance, got his hands in the gills of the fish and pulled it into the boat, of course lacerating his hand badly in the operation. It may well be supposed that the duck hunt was forgotten, and the two made back at once with their capture. The fish was a magnificent specimen of the genuine mascallonge, very light in general color, and of exceptionally great girth. It weighed 34½lbs., and was exactly 4ft. in length.

It appearing that this fish was full of spawn, it was opened very skillfully last night in the presence of a number of us by Prof. R. A. Turtle, our taxidermist. Two immense bodies of roe, over 2ft. long and weighing probably 3lbs. or over, were taken from the fish. It seems a pity that a fish so rare in these lower waters should be killed at this season. This fish might have reproduced thousands and thousands.

This is commentary on ice fishing. This great mascallonge, full of spawn, was the victim of a set line which it had carried away. The short stick which had held the line it had either broken or doubled down through the hole in the ice. The damage done this March to game fish full of spawn has been incalculable. The cold weather has given the ice fishers a harvest, and they have harvested countless millions with their thousands.

It is singular to add that a few days before this event this same George Drury found a dead mascallonge that had come ashore on the lake, apparently dead two or three days. This fish weighed 42lbs., and Drury has preserved its skeleton. It had doubtless gorged a bait on an ice-line and broken away to die, though I do not hear this mentioned.

It is remarkable that all the mascallonge taken in Fox Lake within the past ten years have been caught under strange circumstances. The instances I have given earlier. It may be remembered that a boy caught a large mascallonge on a minnow hook one morning, at the boat landing, in front of Clark & Neltnor's old place. Col. O. Lippincott's stories of a great fish which often of late seasons has destroyed his tackle may now be fully credited. There may be yet other mascallonge in these near-by waters, though they have not of late years been supposed or sought for by anglers. Fox Lake is only fifty miles north of Chicago. The regular 'lunge country these days is three times that far to the north.

Mr. A. F. Young, of Escanaba, Michigan North Peninsula, an old, old grizzled veteran of that country, who has lived there since the time the Indians were the only inhabitants, came into my office this week, and we had a mighty pleasant talk. Mr. Young is a fly-caster, and told me much of the trout fishing in the Escanaba, and also in Lake Superior for the big brook trout of the lake. He tells me that the only way these fish can be taken in the shallow water along the shores of the big lake is by a long, clean cast, 80 or 90ft.

"Ah, you young fellows, you boys, can't do that," said he. "It takes casters such as Seth Green and Rube Wood were. You will have to come to us old ones for that."

Mr. Young tells me he has only three or four varieties of flies in his book. He thinks most of the Parmachene belle for Lake Superior shore fishing. The trout fishing in the Escanaba, he says, is good, though requiring a boat for much of it. Trout over a pound are not at all rare in that water. The best fishing is about twelve miles above Escanaba. I am sure a river with so pretty a name ought to have trout in it, and plenty. Mr. Young has spent the winter in Chicago, but soon goes back home. "I must be there for a little of the early minnow fishing," said he.

In regard to the raid on the nets at English Lake, I have the following from Mr. Borders, the attorney who aided in directing the work:

WINAMAC, Ind., March 28.—Mr. Buck came down this morning and reports over one hundred nets taken out of the lake and river on last Friday and Saturday. Nearly all were gill-nets, and nearly all were the property of two men. The nets have been sent to the justices and by them will at once be turned over to the sheriffs of Starke and LaPorte counties, and Col. Dennis will see that the proper steps are taken to have them put where they will not take any more fish. The raid was a great one. Allow me to congratulate you on the man you sent to locate the nets, he is a success. Yours truly, B. BORDERS.

P. S.—Buck has probably done all the good he can now, and may be recalled at any time. If we need him as a witness we will notify you. He has gone back to English Lake to-day and awaits orders from the committee.

Mr. Borders has since sent for Warden Buck as a witness, and I infer the cases are called. Auge, the man who owned most of the nets, is showing fight. His lawyer is the prosecuting attorney of the county. I hear the cases are brought in justices courts after all and not in the circuit courts. We can only hope success.

These netters threaten to purchase new nets and go back to work. I hope they will. We will have their nets inside of thirty days. Auge threatens to shoot Buck. I hope he will try to, and sort of 'low Buck 'll get him if he does. There are threats from certain parties that they are going to burn down English Lake club house. I hope they will try to, and I further 'low that if they do they will wish they hadn't. Meantime Mr. Abner Price, of that club, and president of the Kankakee Association, will put in force the very practical measure of bonding a few of those fellows to keep the peace about $3 000 worth each.

The sharper and hotter this fight is the better. The issue ought to be joined promptly and fearlessly. The harder we go at these men the sooner they will quit their work and conform to the law. Show timidity and they will fight. Fight, and they will show timidity. A short fight is all that is needed, for the netters will stop when they see it is a fight, and not a long-distance talking match.

A meeting of committees of the Chicago Fly-Casting Club was held yesterday afternoon. The executive committee transacted some business preliminary to the annual meeting to be held April 11. The committee on rules governing competitions after prolonged discussion agreed on the following:

Rule 1. The unit of measurement of the Chicago Fly-Casting Club shall be a rod not less than 9 nor more than 10½ft. in length.

2. Such rod shall weigh not less than 6½ nor more than 8½oz.

3. All rods measuring more than 10½ft. shall be handicapped 3ft. for every 3in. they measure over 10½ft.

4. All rods weighing over 8½oz. shall be handicapped 5ft. for every ½oz. they weigh over 8½oz.

5. All rods measuring less than 9ft. shall be credited 3ft. for every 3in. they measure less than 9ft.

6. All rods weighing less than 6½oz. shall be credited 3½ft. for every ½oz. they weigh less than 6½oz.

7. In competitive casting 10 minutes shall be allowed each performer in which to complete his work.

The above rules are subject to change. It is a difficult matter enough to perfect a handicap which shall bring into one class all sorts of casters and all classes of rods, both wood and split.

If there is any club or any individual in the East or elsewhere who has a set of rules for tournament fly-casting I shall be deeply obliged if I may be put in the way of obtaining a copy for the service of the young Chicago club. E. HOUGH.

CALIFORNIA FISHING.

Editor Forest and Stream:

Perhaps it may be of some interest to anglers in the East to learn something of the California fishing grounds and the best tackle to use. An Eastern angler would be foolish to come to California for the sake of the fishing alone, for the simple reason that he can find much better sport nearer home; there are practically but two kinds of fishing here, viz., trout at the mountains and sea fishing. There are no other fresh-water fish but trout here worth angling for. A few catfish, carp and other trash makes up the list. The best fishing ground around Los Angeles for trout is the San Gabriel Cañon. Take Santa Fe route to Azusa, thence up the cañon by trail twelve to fifteen miles. Azusa is about twenty miles from Los Angeles. Other good fishing grounds are the Bear Valley Lake and streams emptying into the lake; there are also various trout streams in Ventura county within a few hours of the city at Santa Monica Redondo and San Pedro, all within easy distance and cheap fare. There is good fishing in the summer time for mackerel, croaker, smelt, bonito, surf-fish, perch, yellow-fin, etc. At Catalina Island, reached by a steamer from San Pedro triweekly, elegant sport may be had trolling for yellow-tail, bonito, Spanish mackerel, etc. The best time for both fresh and salt water fishing in this State is from May to October. The best rig for trout is a simple bamboo rod, 8 to 9ft. long, a No. G silk line and sproat hooks No. 6. The trout streams are so surrounded by bush and rocks that it is almost impossible to cast a fly, and as the climbing is often very difficult, a good rod stands a big chance of being smashed, so I advise a cheap, light and single rod. For salt-water fishing I should advise the angler to bring his tackle from the East, as he cannot get a very good assortment here and will have to pay higher for it. Hooks No. 6-0, 1-0, 2 and 6 will be all the sizes required for salt water. A good 9ft. striped bass rod and 200yds. 15-thread Cuttyhunk and a first-class reel will about fill the bill. Around San Francisco, Boulder Creek, Mark West Creek and the Arroyo Honda are the nearest and best, while anywhere in the vicinity of San Francisco fairly good salt-water fishing may be had. But the best fishing on the coast I have found to be in southern California. But alongside of Florida for fishing, California simply ain't in it. For yellow fever and sickness, ditto.

ALHAMBRA, Cal., March 21. C. B. WILLIS.

SMALL-MOUTH, RED-EYE GRAY BASS.

Editor Forest and Stream:

A friend of mine from St. Paul was here the other day, and in talking of fishing matters, said that north of St. Paul on the Great Northern Road somewhere about 100 miles, in what is called the Alexander Lakes, is found a bass that he calls the "small-mouthed, red-eyed gray bass." This is a long name and the fish must be a good one to bear it. What is the correct name for it? Do any of the readers of FOREST AND STREAM know anything about it? My friend informed me that it was the gamiest bass of them all and could give odds to the ordinary small-mouthed bass; that it seemed to run in schools; there would be quite an interval that you might be without a strike and then when you took one fish you would be apt to take several in quick succession; that they were very gamy fighters, the minute they were struck would come out of water as high as your head and repeat it until conquered; in weight they ran from 2lbs. up to 6lbs. He told some great stories of the number of fish he had taken, said that they would be a grand fish to stock artificial ponds or lakes, but the water must be pure, fed from springs, gravelly bottoms, etc.

Now, we are about to stock two small lakes west of us, and would like to get hold of some of these bass provided they are to be had, and we would be glad to have some information on the subject from any one that is posted.

W. B. MERSHON.

[We cannot recognize this bass by means of its common name, and would like to have a description of the fish or an outline sketch showing the shape, number of spines and soft rays in the fins and the number of scales through which the lateral line passes. With these data we can tell the name of the bass.]

LANDLOCKED SALMON IN MAINE.

BRIDGTON, Maine, anglers have been recently treated to an edifying object lesson, illustrating the rapid growth of landlocked salmon and the results of propagation. In the autumn of '85 a weir was put into Rogers Brook, a tributary of Long Lake, and about 16,000 landlock eggs secured, the enterprise being maintained mainly through contributions. The following April the young fry made their appearance and were a healthy lot. A certain per cent. of the fry were deposited in a stream tributary to Peabody Pond, in South Bridgton, a small pond well stocked with "red spots," but containing no salmon. Last week two Bridgton men, D. P. Chaplin and J. F. Libby, while "ice fishing" there, caught a landlock weighing 12lbs. 2oz., not a bad growth for six years. Landlocks have also been caught this spring by pickerel fishermen from Anonymous Pond, Harrison, and from Little Moose Pond in Waterford. No one suspected their presence in the latter sheet of water.

Landlocked salmon fishing in Sebago Lake will doubtless open unusually early this spring. In February a portion of the lake had not closed for the winter, and there is every prospect of an early spring. Unless we have heavy rains in April the lake will be extremely low, there not being sufficient snow in the woods to cause any material rise in the streams. The landlocks are increasing rapidly in Sebago, and the fishing grounds extending correspondingly. Large numbers of 1 and 2lbs. fish are now taken every spring, whereas six years ago a fish weighing less than 4lbs. was an exception. It used to be thought there could be no salmon caught in Sebago after the ice had been two weeks out, but now some of the best catches are reported in June. J. C. MEAD.

NORTH BRIDGTON, Me.

FLORIDA BLACK BASS.

Editor Forest and Stream:

As I have finished my visit here, I wish you would send FOREST AND STREAM to my Chicago address.

I have had some excellent black bass fishing in Lake Monroe, several times getting fish weighing 6½lbs. But the largest bass caught in this State to my knowledge have been caught in Lake Gleason, a small lake about two miles from this village. Last year my manager caught one weighing 10½lbs., and he saw one caught 12½lbs. Dr. Robinson, of Brooklyn, now at the Brook House, is said to have caught one weighing 10½lbs. Is that weight not very unusual? Dr. Henshall says the extreme weight of the black bass in this State is 9lbs. I found a viviparous minnow in a salt spring here. It is not over 2½in. long and has twenty to thirty young.

E. M. HALE, M.D.

ENTERPRISE, Fla., March 27.

[These are large bass, but Dr. Goode mentions a black bass from the lake at Gainesville reported at 19½lbs., and the FOREST AND STREAM office has the head of a specimen that weighed upward of 23lbs.]

A MUD EEL OR SIREN.—*Editor Forest and Stream:* While passing through one of our markets recently, my attention was called to the above (creature or what?). I was unable to give the owner any information relative to this little stranger. It has the appearance of an eel, with wing on either side of its head similar to a sea robin, and immediately behind these are legs with claws, not unlike those of a turtle. The mouth is underneath and formed like that of the German carp. It has no eyes, simply swellings where they should have been. In color it is dark green, and has a tail much like that of an eel. Its entire length is 20in. and its general circumference is 4 to 5in. I believe he said it came from North or South Carolina. Its appearance struck me as looking very much like a puppy before it has its eyes open.—SEDGE.

[This homely tailed batrachian has permanent external gills as well as lungs. Eyes are present, but very small. It inhabits lowland streams and swamps from northern Indiana to North Carolina and southward, reaching a length of 3ft. The color is usually black, sometimes dotted. Linnæus called this animal a siren because of the erroneous belief that it has a singing voice. The negroes of the South consider the mud eel venomous. The technical name of this ugly, but harmless, creature is *Siren lacertina.*]

WILL THE PIKE COUNTY LAW STAND?

Editor Forest and Stream:

In your issue of March 31 is an article on "Pike County Trout Season" in which after giving the opinion of the Attorney General on the repealing clause in the act of June 11, 1885, we are informed that the Pennsylvania Fish Commission have instructed its wardens to arrest all parties fishing for brook trout in Pike county prior to May 1 and in the rest of the State prior to April 15. Without going into the question of the advisableness of making special fish laws for one county over those of the counties surrounding it, I will say that the constitution of Pennsylvania, passed 1873, five years previous to the passing of the act giving special privilege to Pike, prohibits the General Assembly from passing any special or local laws regulating counties, townships, etc., so that it is a serious question whether the wardens would be justified in making arrests under it. I hope Mr. Henry C. Ford, President Pennsylvania Fish Commission, will ask the opinion of the Attorney General, Mr. Hensel, on the constitutionality of the Pike county act, and give it the same publicity that he has his opinion on the repealing clause in the act of June 11, 1885, since it is better for all, both accused and accuser, that the correct law on the subject should be known, as one has no heart to attempt an arrest as the case stands at present. R. K. R.

EASTON, Pa.

KEY WEST FISHES.—Some idea of the great variety of fish in these waters can be gathered from the following list which contains the names of all kinds shipped to Washington by Dr. J. A. Henshall while here. The majority of these fish are fine for food and nearly all of them are lovely in their coloring, which varies from the soberest grays and browns to the most brilliant silver and gold, reds and blues. The name conveys no idea of the beauty of the fish except to the fishermen who make their living by hooking them with the rod and line. Key West affords the finest angling of any place on the Gulf coast and those who are fond of that sport cannot resist the temptation to capture the brilliantly colored nibblers who glide so gracefully in and out among the coral beds, transforming them to gardens in which the fish resemble flowers. Lane snapper, yellow angel, pork fish, boar grunt, sow grunt, leather fish, little-head porgy, Tom tate, turbot, yellow tail, sand fish, grass porgy, schoolmaster, bream, leather jack, pug, blue pug, parrot fish, runner, mutton fish, glass-eye snapper, jolt-head porgy, black angel, dog snapper, black grouper, Nassau grouper, suck fish, green moray, gray snapper, hog fish (male), hog fish (female), gag, red grouper, bonito, plate fish, jew fish, speckled hine, stingaree, margate fish, squirrel fish, bone fish, cow fish, pudding fish, black moray, Scotch porgy, speckled moray, bonnet-head shark, trumpet fish, barracuda, sheephead porgy, toad fish, bally-hoo, scamp, shell fish, French angel, rock fish, tang, sun fish, hound fish, soap fish, swell fish, cat fish, sennet, moon fish, horse mackerel, horse-eye jack, jack, sailor's choice, runner, ten pounder, bone fish, white angel, yellow-fin grouper, old wife, mouse fish, albicore, amber jack, electric fish, cobio, Nugent grunt.—*Equator-Democrat, Key West, Fla.*

IRISH DEEP-SEA FISHES.—The Royal Dublin Society, aided by Government, has fitted out an expedition for the study of the shore and deep-sea fishing grounds of the West Coast of Ireland. In 1890 the steamer Fingal, and in 1891 the Harlequin, visited all the islands and creeks and carried the explorations seaward 50 miles from land into great depths. Rev. W. S Green, who became familiar with American methods of deep-sea dredging by observation at the U. S. Fish Commission station at Woods Holl in 1888, was in charge of the investigations. The apparatus used included the dredge, the beam trawl and long lines, the latter known in the United States as trawl lines. Ninety-nine kinds of fish were taken, or about as many as are found in Great Egg Harbor Bay, New Jersey. Among these are the common mackerel and the halibut, the great marine sunfish or mola, and the singular spinous shark, which has been obtained on our coast as an accidental visitor. In a recent number of the *Graphic*, Mr. Green has given a brief account of his cruising, illustrated by a number of spirited sketches of scenery and the apparatus and some of the results of the work.

WINTER SPAWNING OF SALMON.

"DEESIDER," under the title of "Salmon Spawning in February," records in *Fishing Gazette*, London, of March 5, the following: "The very unusual and in many respects highly phenomenal feature of salmon spawning, so late as the end of February, has been observed on more than one reach of the Aberdeenshire Dee. This is all the more strange, as the Dee is a particularly early river; and especially so in the upper waters, where fish usually go on to the redds toward the end of September, and often earlier. Late fish are often seen on the lower redds well into December and the early days of January, but the observation is unique in the annals of salmon hatching on the Dee so late in the season as ten days or so ago. Whatever may be the cause, and although it may not be general all over the river, yet spawners have been seen on the redds in the Braemar district, and on the middle redds in the Kincardine O'Neil and Branchory sections, so that the freak, or whatever it may be termed, is not confined to fish of the same run, as these places are in the extreme some forty miles apart. On the Branchory section, last week, an angler landed a partially spent fish, or what is termed a 'baggot.'"

STEELHEAD SALMON SPAWNING.—The U. S. Fish Commission will probably begin the hatching of the steelhead salmon or Gairdner's trout during the coming spring. Breeding grounds of this giant trout—for it is really a river trout, although known to commerce as a salmon—have been observed by Mr. Waldo F. Hubbard at the falls of the Willamette, at Oregon City, and in Eagle Creek, which empties into the Clackamas River about ten miles above Clackamas, Ore. In these localities the majority of the steelheads spawn in April and May. This trout reaches the extraordinary weight of 32lbs, and resembles the Kennebec salmon so closely in size, shape and coloration, that it is readily sold in Eastern cities at this season of the year for the Maine salmon. To anglers it is well-known because of its readiness in taking the artificial fly. Its introduction into suitable Eastern waters should be a very popular step for the Fish Commission, and its artificial hatching will leave only one important spcies of trout, the Dolly Varden, unprovided for in Governmental fishculture. The advantages of a spring spawning season will be at once appreciated by those who have endured the hardships of winter work with the salmon family.

Fishculture.

THE PENNSYLVANIA FISH COMMISSION.

[An address by Henry C. Ford, President Pennsylvania Fish Commission, at the Reunion of the Pennsylvania Fish Protective Association in Philadelphia, March 29.]

WHEN the present Pennsylvania Commission of Fisheries commenced their labors in 1887, the State possessed three hatcheries—two trout hatcheries, one at Allentown, the other at Corry, and the whitefish hatchery at Erie.

These under the able supervision of the former President of the Commission, Col. John Gay, and the unremitting attention of the superintendents, Mr. John P. Creveling at Allentown and Mr. Wm. Buller at Corry, were already showing an earnest of their great subsequent production.

Our whitefish hatchery at Erie, established by Col. Gay, was also pouring its millions of fry into that inland sea, and helping with the plantings of Ohio and Michigan to make that lake what it now is, the first in the commercial importance of its fisheries of all the Great Lakes.

Though our fishcultural plant was in admirable condition, we found that much remained to be accomplished in other directions before its steady and regular working could be made productive of the best results.

The young fry might be deposited in our rivers and streams, but the destructive agencies of man were there to blast the crop before it was ready for harvest.

The Delaware and Susquehanna and many of our inland streams were filled with the deadly fish baskets, that not only destroyed the fish, mature or fry, planted by the Commission, but in two instances had nearly ruined the largest fishery industry of the commonwealth, the shad fisheries of the Delaware and the Susquehanna. What the fish weirs spared, illegal netting with fine-meshed nets gathered in, almost to the smallest minnow, while trout and bass fishing out of season was openly carried on as if there were no laws on the statute book to require the contrary. The first efforts of the Commission were directed to remedy these wrongs.

Laws for the purpose were in existence, but in loose and disjointed condition.

As early as 1808 both New Jersey and Pennsylvania prohibited the erection of fish baskets in the Delaware, and in 1878 the use of nets was forbidden in any of the waters of Pennsylvania above tide.

But the laws were not enforced, and they would not have been to this day, had not the Commission procured the passage of stringent acts with heavy penalties, and which provided that every warden or any officer of the State could arrest any offender, without warrant, on the spot.

The result of fish propagation and more thorough fish protection has been simply marvelous. Take the Delaware River alone, from which the Commission has removed every fish weir, and which for the last five years has been under the constant supervision of its wardens, who patrol the river as policemen watch the streets of a city, and into the headwaters of which millions of young shad fry have been annually carried from the hatchery of the United States Fish Commission at Gloucester.

In 1881 the value of the shad production had fallen to $80,000 for the entire Delaware River and bay. In 1888, through the remedial agencies just mentioned, the value of shad production had advanced to $350.000; in 1889 to $460,000, and in 1890 to nearly $700,000, a production which has probably not been exceeded in the earliest and best years of the shad fishery, a most striking example of the wisdom of "protecting the spawning fish and enforcing the laws."

The Pennsylvania Commission, jointly with New York, have erected fishways at the Lackawaxen dam, the only obstruction in the river. These have been very successful, and large numbers of shad have been taken over a hundred miles above the dam, where they had not been seen since 1825, when the dam was built.

In connection with the Delaware River the Commission has secured a uniform law for the river with the State of New Jersey; and its wardens now work in unison with our own to prevent illegal fishing. It is now the object of the Commission to do for the Susquehanna what it has accomplished for the Delaware; and to restore it to its former prestige as a great shad-producing river. It is our intention to build fishways in every dam on the Susquehanna, until the headwater of the river shall be as accessible to shad as are those of the Delaware. Already hundreds of fish weirs have been destroyed in the Susquehanna, until now they only exist in any number in the fifteen miles in which this river flows through Maryland, and we hope that our fellow commissioners of that State will second our efforts in Pennsylvania, by the abolition of the devices that have practically ruined the Susquehanna as a shad-producing river.

As an instance of the great increase in the production of fry from our hatcheries, take the one item of brook trout:

In 1883 the distribution of brook trout was less than 100,000. This had increased in 1886 to 250,000. The output in 1890 was 2,500,000, while the distribution for 1891 will reach 3,000,000, or twelve times the number of brook trout distributed six years ago, and still we are not able to supply the demand.

The total output of the Commission of fish, mature and fry, in the year ending June 1, 1891, including the shad fry received from the U. S. Commission, amounted to over sixty-five millions of fish.

This enormous output has been made possible by greatly enlarging the capacity of our hatcheries. In 1890 at the Erie hatchery we commenced the hatching of wall-eyed pike, the food fish second in commercial importance to the whitefish in the great lakes, hatching 16,000,000 in 1890 and 40,000,000 in 1891.

The great expansion of the work of the Pennsylvania Fish Commission has necessitated the employment of a fish car, in which fish and fry can be carried in large numbers and with greater safety than at present.

This car will be finished in May, and will also enable us to bring better varieties of food and game fish from Western waters to stock streams where there are now none but inferior varieties of fish.

In the accomplishment of its work the Pennsylvania Fish Commission has not been without hindrances. We have had to meet and overcome adverse legislation; we have been forced to combat popular prejudices, and often have encountered opposition where we have had a right to expect support. But through all these opposing influences it has been gratifying to realize the steady increase of popular sympathy with the objects of our work.

Laws once viewed as an infringement on personal liberty are now accepted as a necessity for public welfare, and are generally respected as such by the community. Associations with objects similar to your own, "the protection of the spawning fish and the enforcement of the laws," have multiplied throughout the State, to assist us not only in their own localities, but also in the halls of legislation. The Pennsylvania Fish Commission has "protected the spawning fish and enforced the laws." We hope we may not be deemed self eulogistic if like Othello we can say, "We've done the State some service." It would indeed be a reward if like the Moor of Venice we could also add, "and they know it."

H. C. FORD, Pres. Pa. Fish Com.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—*Adv.*

DOG SHOWS.

April 13 to 16.—Third Annual Dog Show of the Continental Kennel Club, at Denver, Col. R. W. Isenthal, Sec'y.

April 30 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kenne Club, at Hamilton, Canada. A. D. Stewart, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

THE MASTIFF—PAST, PRESENT AND FUTURE.

Editor Forest and Stream:

March 18 brought by post your interesting issue of the 3d, containing excellent illustrations of New York show. I say excellent illustrations, for on opening the paper I at once recognized Beaufort's son, Beaufort's Black Prince, from his striking likeness to what his sire was at his age.

This typical son of a typical sire is an earnest of what American enterprise can do, and I shall be glad if you can find space for the following criticisms, comments and remarks of mine.

I have been accused of being, and not a little abused for being, the originator and chief exponent of the short-muzzled mastiff of the present day. That I have always argued in favor of a short muzzle and undershot jaw in the mastiff, I admit and still maintain; and am glad (if not a little proud) to say the mastiff of the present day is no longer a mongrel of conflicting types, if in some instances (owing to breeders' errors and carelessness) partially a cripple, and of the two (like Mr. Lukey) I would sooner have a cripple than a mongrel, although admiring neither.

That to be typical a mastiff should have a short muzzle, I have only to refer to naturalists like Cuvier, who rightly place the mastiff among the short-muzzled group of the canine race.

A few empirics, with the set notion that everything was better when they were a boy, may dissent from this; but their puerile ideas will not hold water beside those of men of Cuvier's stamp, and every man who thinks the world generally is deteriorating may solace himself with the fact, it is his own brain power and sound judgment that is deteriorating and not all else.

Secondly, that the mastiff to be typical should be slightly undershot may be seen at once by any unprejudiced person, from the fact that the boarhound, the result of crossing the mastiff with the greyhound group, is frequently undershot, inheriting the feature from its mastiff ancestry. Again the foxhound, the result of crossing terrier with an infusion of bull (and other?) blood, frequently shows the undershot jaw inherited from its bulldog ancestry. Thus that the undershot jaw is a peculiarity and characteristic of the mastiff group, requires very little acumen to discern; in fact it is as simple and certain as 2+2=4. Its use, origin, advantage for holding power I need not here enter upon, but the type is obvious and the use of the animal for baiting purposes, for fighting purposes, as well as for a watch dog, was what the mastiff was kept and used for anciently, and bearing this in mind we can alone arrive at an ideal type. That the mastiff of thirty to fifty years ago were often cripples or mongrels does not really affect what was and should be the true standard. If we regard the mastiffs of the past we see Mr. Lukey's Cardinal and Rufus were both grand, short-headed specimens, but cripples. The much vaunted and terribly overrated celebrated Governor was simply an overgrown, clumsy, inactive mongrel. "The breeder of his sire" lays down for a fact he, like his sire, showed trace of a boarhound infusion, and it is likewise an incontestable fact that he lost his life owing to his clumsiness and inactivity by failing to drag his hind parts over some palings when following his owner, whose figure alone pronounced he was no athlete. But of the lumbering, pointed muzzled, untypical mongrel Governor I will say no more, lest I tread too heavily on the corns of some old fogies, who remember Governor as simply the most popular show dog of his day.

But Mr. Lukey made no such mistake; he did not object to inbreeding, but he knew what mastiffs should be and objected to inbreeding to strains with untypical heads. I once asked him why he did not mate Treasure with her own brother, who was near at hand. "Have you seen him, and what a wretched head he has?" was his reply. So much for Governor's blood and type. No. While Governor was not perfection, Mr. Lukey knew what was typical and bred from the best sire of his day, Mr. E. Field's King, a dog full of true mastiff blood.

So much for the past. How far has the breed deteriorated or improved since the days of Baron-Beauty and Old King? For my own part (and I think I am as competent to speak as most men) I see plainly an improvement in greater size, probably averaging some two or three inches higher than the old mastiff ever did; I see also a decided improvement in the majority of specimens in squareness of muzzle and shortness of head, and general massiveness. But I likewise perceive decided deterioration in fighting properties and activity.

To commence with, let me criticise the typical Beaufort's Black Prince. He has a grand head, of the Crown Prince type, but is far too large in ear. Why cannot breeders bear this point in mind as well as breeding for a good muzzle? I cannot consider a specimen with overlarge ears to have a typical head.

Next, judging from the portrait, he lacks length of body and is not "well ribbed home." His hocks are terribly straight and hindquarters mean in comparison to his fore—compare the portrait of such a specimen with that of the mastiff drawn by Reinagle and see if we must not candidly allow the breed has deteriorated in physical power and fighting properties. Compare the bent sickle hocks of Bewick's fighting mastiffs of 1811 with the stilts of Beaufort's Black Prince and answer the question honestly—as an animal, is the modern mastiff of 1892 an improvement on that of 1792? I maintain we must admit the present is not perfection, neither was the past, for mongrelism then vied with malformation and weakness.

In making these remarks Mr. Winchell will pardon my criticising Beaufort's Black Prince, probably the best specimen in America, as his sire is in all England, specimens beside which Mr. Lukey's Governor would have paled into looking the under-bred, common, plain-headed mongrel.

But it is no use to quarrel over or disparage the past or present, but for the future we should study. In judging honestly no man has the right to take into consideration the animal's points in probable value for breeding purposes, but should judge it as a whole as placed before him.

On such grounds I cannot hide the fact that several of the older breeders failed miserably when called upon to judge. For my own part I was ever, perhaps, prone to be rather hard on mongrelism, others had the vulgar error of partiality for mere size above all else. But such is no standard for the breeder's aim.

For the future, to effect improvement, breeders must aim at a smaller ear, greater length of body, better—*i. e.*, broader—loins and hindquarters, well-bent hocks, and greater activity. To secure which they may well sacrifice something in size and bone and yet breed even more typical specimens.

THE AUTHOR OF "THE HISTORY OF THE MASTIFF."

POINTS AND FLUSHES.

FROM the comments of "S.," of New Haven, Conn., in the last issue of FOREST AND STREAM concerning my remarks on retrieving in general, and retrieving at field trials in particular, I think he misunderstood their purport or else I did not express myself so fully or clearly as I should have done on an important subject which is exciting so much interest and discussion at the present time.

The position held by "S.," as set forth in the article referred to, is that held by a large number of sportsmen in this country.

I think that "S." was unfortunate in his selection of an illustration to strengthen his case. He says that "It was universally accepted in the early ages that no good could come out of Nazareth, and that Wendell Phillips in '56, who advocated the abolishment of slavery, and had only sixty-five followers who dared to deposit a ballot even secretly in this State, was too 'impulsive' and 'retarded progress,' and also that the female portion of the human race should only be the ones to toil and bear the burdens."

These are simply instances in history which were founded upon principles of right and justice, and necessarily succeeded. How many movements have been advocated and zealously pushed by determined leaders which have failed utterly? Some are right, some are wrong. However, it does not follow that because John Smith's ideas of a ghost dance are correct that Tom Jones's theory of sun spots is a natural and correct sequence.

Retrieving at field trials has been given a thorough trial. To oppose it is not to retard progress, but on the contrary, to abolish something which obstructs it. Nearly every writer bases his arguments in favor of retrieving at field trials on the mistaken assumption that if a field trial association does not recognize retrieving in its scale of points it is opposed to retrieving under all circumstances. So firmly is this idea fixed in the belief of sportsmen, who are not regularly in attendance at field trials, that it is almost impossible to convince them of the real reason, and that it in no wise argues for or against retrieving. Retrieving is simply a quality which is not competitive in a field trial sense.

There is no question but what retrieving is absolutely necessary in actual field work, but the conditions are entirely changed as between a field trial competition and the much-abused term, "an ordinary day's shooting."

Aside from any matters of sentiment, in an ordinary day's shooting the hunter works his dog for the sole purpose of getting opportunities to kill birds. If the dog flushes there still may be afforded a good opportunity to kill. The dog hunts in his own manner, is not hurried from one nook to another, is not endeavoring to do something more or better than a competitor, and is not obstructed or annoyed by competition.

A thorough training is absolutely essential for good field work, to the end that the work shall be done in a finished and skillful manner, thus affording the shooter the greatest opportunities for success and enjoyment. Hence, in actual field work, retrieving is a necessity, although it does not even then follow as a consequence that it should be done by the finding dog. So much for the field work of a dog and the necessity of thorough training and retrieving.

Now, what are the purposes of a field trial? They are generally considered as being a test of the natural capabilities of the dogs; and by actual competition it is apparent wherein the superiority lies. The purposes are not at all as in field shooting. Two dogs compete, one endeavoring to beat the other, and two handlers are at the same time apply their skill to attain the same end. Thorough training is here necessary for several reasons. It is necessary so that a dog's qualities can be properly and methodically exhibited, and it is specially necessary so that an imperfectly broken dog shall not unduly interfere with his competitor.

All associations have wisely refrained from giving any value to breaking or training in the scale of points. To do so would be to give value to qualities due to education and the superior skill of one handler over another. The natural qualities of setters and pointers, so far as they relate to field work, are pointing, ranging, speed, tractability and bird sense, which includes intelligence, memory, knowledge of the habits and haunts of birds, and the best manner of locating and pointing with skill and precision. Backing is by some considered a natural quality, but, at least, it is chiefly peculiar to pointers and setters. If to these qualities retrieving is added then is a quality admitted which is educational and which is not peculiar to the setter and pointer, inasmuch as it can be taught to all kinds of dogs. As between two dogs of equal capabilities, the one which was the better retriever would probably have had the better trainer. A field trial being for the improvement of the pointer and setter, and it not being an ordinary day's shooting, why should a setter or pointer be required to do something in competition which is foreign to it? It is true that some setters and pointers retrieve better than others, but it is not simply because they are setters. There is just the same difference in the performance of other breeds, or even curs, as retrievers. Moreover, if the value of retrieving, which is largely educational, is admitted in a scale of points, other educational qualities, such as turning to whistle, remaining at heel, dropping to order, steadiness to shot, etc., should also have a value, since they are all essential in an ordinary day's shooting.

Again, there are men who do not care to have their dogs to retrieve, particularly in the first or second season, but by an arbitrary rule they are forced to have them to retrieve, whether they disapprove it or not, or compete with heavy odds against them.

This question has been before field trial associations for many years. In the first years of field trials in this country, the sentiment was in favor of retrieving, and no exception was made in some instances in favor of puppies. The undesirable and harmful effects of requiring puppies to retrieve were so pronounced that it, in puppy stakes, was dispersed with. In all-aged stakes, the test has always been imperfect and unsatisfactory. All the competitive qualities of two dogs in a heat might have been fully determined, excepting the one matter of retrieving. To test that one quality may require a further search of an hour or two hours to find birds. When found the dogs may not get a point on them, but, if they do, the handler may miss. Then follows another wearisome search till the judges, in weariness, order the dogs up, or else have a dead bird thrown out to see if the dog will retrieve. This has occurred many times. No field trial has ever been run in which every dog was thoroughly tested in retrieving.

In respect to the English special retrievers which "S." apparently holds in disfavor, there is much more reason in favor of them than he seems to recognize. It is not a senseless fad or a national lunacy. It is founded on the best of practical reasons.

I have dwelt upon this at some length, as I wished to have the matter more fully presented and discussed than it yet has been. I will add that these views are not peculiar to me, but are held by many sportsmen and field trial supporters of large experience.

In referring to the disinclination of new clubs to profit by the experience of older ones, I did not mean to imply that they should accept everything adopted by the older clubs. But matters which have been carefully considered and have received the sanction of common usuage, are worthy of the most careful consideration before being rejected as unsound or erroneous.

The Eastern Field Trial Club, the oldest field trial club in existence in this country, has stricken retrieving from its competition, yet I do not think that a single member intended that such should mean that a gentleman should not have his dog broken to retrieve.

I am glad that "S." took up this subject for discussion and presented his views fearlessly. It is only by careful consideration of all details that progress can be made. I hope that he will not fail to expose any weak or unsound places in the views of those who do not consider that retrieving has any place in field trials.

B. WATERS.

"WOLF COURSING."

MESSRS. Grimes, MacDougall, the judges, H. C. Lowe, Roger Williams and Heckler, W. L. Washington and several others, left Denver in a sleeper for Hardin, Colo., about 75 miles from that city, on Sunday evening, March 27, and arriving at Hardin, slept on the car. On Monday morning the air was rather raw, there was barely a suspicion of a sun somewhere in the east. The sun had not yet shown over the long stretch of prairie when signs of life in the sleeping car were manifest. Men in corduroy, men in riding boots, men in riding trousers, men in shooting coats, and all sorts and conditions of men came out upon the platform one after another, pulled a flask out of some inner pocket, pointed it at the zenith, then retired for a consultation with the man at the only wash-basin on board, who had brought with him on a wolf-hunt all the toilet articles of his private home. All things have an ending, so even this gentleman's ablutions, and by six o'clock every man on the sleeper was washed, to all outward appearance, and seated at either end the table of the station agent or that of a nearby farmer, enjoying a great breakfast of ham and steak and coffee and—jelly. Jelly for wolf-hunters!

Pipes and cigars were out, and the thirty odd men who came from Denver and other parts of the United States to see the wolf-hunt, to test the relative speeding, staying and killing qualities of Geo. MacDougal's deerhounds as pitted against Paul Hacke's Russian wolfhounds, began a long wait for the promised horses which were to be used in the chase.

"How can you tell a gray wolf from a coyote?" Allan Gullion was heard saying. "Huh! Easy enough. Tell 'em apart a mile off. You see, when a coyote sees a man or a dog up goes his head in the air, and he sidles off a little way and he stops to take another look. When he sidles, and he sidles, and finally is off, but he's got his head in the air all the time. The gray wolf, though, just drops his head, and makes a sneak the minute he sees you. He's not waiting for any dogs or bullets."

At 7 o'clock the party left the station in wagons for Seventy ranch, ten in a wagon. Lord Ogilvie joined the party and with Mr. Lowe galloped on ahead. Just as the last wagon was in the middle of the Platte, Van Hummell, Jr., rose to his feet with a howl, and simultaneously nine others howled and waved their hands. "A wolf! a wolf!" they shouted.

"No, no," said Gullion, "see, he holds his head too high," and sure enough, it was the pirate of the plains, as every one could see when he began his sneaking lope toward the underbrush

At Seventy ranch George Presly had number of horses ready, but not enough. Men from the neighboring ranches dropped in singly and in pairs till fully seventy-five people had gathered. It took a long time to get things ready, meantime telling about each other's fast dogs and former great hunts. A traveling photographer came up and joined the crowd.

It was 8 o'clock before the advance got away. It consisted of the judges and slip Steward Smith, with his assistants; next came the wagons and then the mass of riders. Within half a mile the open was reached, a brown plain broken into hillocks and knolls, a party of the hardest riders broke off to the left and another to the right. "Spread out so as to leave forty or fifty feet between each rider," Mr. S. B. Morgan ordered, and pretty soon a long crescent was formed, reaching over a mile. It looked very nice, very methodical, very business-like, and anybody could see that wolves that came within either arm of that crescent would stand no show at all. But wolves were not out hunting crescents this morning. By and by the crescent began to break up into groups. Those who were on the edges spread out further and further and those toward the middle converged, so that soon a nucleus of thirty or forty riders was formed and followed the wagons, leaving all the scouting to the enthusiasts. Plowhead's ranch, four miles out, was reached about 9 o'clock, and beyond that the plain became more broken and hilly, and cactus made its appearance. The objective spot was Point o fRocks, a slight elevation fully described by its name.

About three miles from Point of Rocks some one raised a shout. It had been agreed beforehand that if a wolf were seen no one should shout. He should wave his hat or ride around in a circle. Therefore, some one raised a shout and pointed toward the south. Every man rose in his stirrups. "There, there! Don't you see it?" a dozen exclaimed. Sure enough, away off on the side of a hill, a mile off, a black form was outlined on the brown earth.

The wagons containing the dogs were frantically signaled and the horses were put on a dead run. By the time it arrived another sight of the wolf, which had darted over the brow of a high knoll, was obtained. The game was half a mile away. "Too far to slip the dogs," announced Judge Lowe.

"I am willing," said McDougall, but the judges decided it would not be a fair contest, on account of the distance. Then the old order, or rather disorder, ensued till some more shouts announced a discovery. Away off in the distance could be seen Howard Ray, manager of the Norman Percheron ranch, tearing after something. Those nearest him—Bruce Eaton and W. E. Ingraham—followed hot on the trail. The pace was kept up a mile, when the others saw a wolf bounding over the hills. Ray took a long circuit, and pressed in on the wolf from the south. The wolf darted north, and was loping the hill at a tremendous pace, when a black figure appeared on the crest. It was Eaton, who sped down, whirling a lariat. The wolf turned east, when another threatening figure confronted it. Ingraham was closing in on that side.

The three horsemen narrowed the circle, swinging the lariats. The wolf felt it was doomed. Narrower and narrower grew the circle, and the lariats made many misses. Meantime, rolling on westward, the circle closed in a half-dozen times, and the wolf snapped its way out. Twice it sprang at the horses' throats. Finally Ray landed a lariat over the shoulders and threw the wolf to the ground, where it lay panting, tongue lolling out and the bright gray eyes watching every movement of its enemies. The dogs were called and fished out of the wagons. The McDougall dog was Black Sam, the half-breed, and the Russian wolfhound was Pospekh. The judges declared that the wolf was then in no condition for the contest, and Dr. Grimes and McDougall both declared unwillingness to turn the dogs on until it rested. So it was agreed to give the wolf an hour's rest. When the wolf staggered to its feet it was seen it was heavy with young. She moved about, barely able to drag her legs after her. Every time she was not jerked up by the rope she fell flat and rested her long muzzle on the ground, while the restless eyes roamed from side to side.

Suddenly the cry arose, "She's loose." It was true. The wolf, with her long, scissor-like molars, had cut the rope and was making a sneak for the open, but a child could have caught up. Ray leisurely galloped out and soon had her relassoed. Twice more this performance was repeated. It was afternoon when all prepared for the contest.

"Now!" yelled Judge Williams, and the Barzoi and Black Sam started after their prey, which was 300yds. distant. She was making faster strides than before, but it was an easy matter for the dogs to catch up. Black Sam smashed into her first, striking her body as he flew by and she fell to the ground. The Barzoi was on her in an instant, but the wolf turned savagely, displaying ugly fangs, and the Barzoi skipped gracefully by.

The crowd had closed in, leaving a space of 50 or 60ft. for the encounter, and was nearly paralyzed when they saw the Barzoi dash by instead of making the much-vaunted grip on the throat or disemboweling the wolf at one lunge. Black Sam returned, cast a look at the wolf and leisurely strolled away. The big Barzoi made a nip at the wolf, but it was a cautious one, and the beast retaliated with a snap. "Bring on more dogs," cried Eaton, and the cry was caught up. Derisive yells met each feeble lunge of the Barzoi at the wolf, met by a sharp snap, which soon showed as a result several red stains on the white coat of the hound.

The crowd grew wild and hurled sneering remarks at the dogs. The scene was proving painful to the spectators, when Judges Williams and Lowe ordered the dogs drawn off.

"Let the wolf go," said the latter, "she has earned her liberty."

"No, no," came from the ranchers, and a half dozen lariats swung in the air and landed on the wolf's shoulders and legs.

"We declare it no course," announced the judges, after a short conference. "The wolf belongs to Mr. Ray. Let him do with it as he pleases." There was no doubt of her fate, for cries of "Shoot her," arose from all sides among the ranchers. The others turned away, and a few seconds later the sound of a revolver told her fate.

It was a disgusted crowd that turned away. Dr. Grimes said in excuse for the Barzoi that it was trained to fight doubly, and when it got no help from Black Sam it would not fight. Mr. MacDougall said nothing, but at the next stopping place drew out his revolver and shot his dog dead. "I bought him as a wolf-fighter," he said, "and I was deceived. If Alan Breck fights no better I will kill him also, although he's worth $1,000 to me." Then the hunt was renewed, but the ranchers dropped off one by one till only about forty men were left in the party.

Tuesday.

The same straggling bands could be seen, sometimes three or four miles apart: but no more wolves were seen till about 3 o'clock, when two of the party saw one a mile or more away. Sadly they turned homeward, reaching the Seventy ranch at 4:30 o'clock. The ranchers remaining endeavored to get sport by asking the dogmen to let loose their dogs on a young wolf which had been in captivity eight months. McDougall finally consented and so did Grimes, but with the proviso that McDougall should forfeit if any of his dogs were killed. This fell through, and the party returned to the sleeping car for the night.

Another day of fiasco and farce in the great wolf hunt. The derision of forty or fifty ranchers who had assembled to see their deadliest foe trampled to earth, tossed in the air and disemboweled by savage Russian hounds, and had in reality seen a half dead gray wolf scare off a deerhound and chase a wolfhound, had caused the hunters, the "exterminators," to grit their teeth and say, "We'll show 'em." Everybody on the sleeping car was up at 5 o'clock this morning, had breakfasted and was at the Seventy ranch by 7. Then the hitch came. Dr. Grimes, the Russian representative, had been slipped up on his arrangements for carrying his wolfhounds from the neighboring ranch and had to hire a wagon, so really the "exterminators" did not get away till nearly 9

The day was the nastiest possible to conceive of on dry land. A cold north wind swept over the bare plain at a forty-mile gate and stirred up sand pellets which struck the party as though aimed from a mitrailleuse. The "exterminators" had been reinforced at Seventy ranch by twenty still hopeful mounted ranchers, so that forty destroyers went on the trail, which led in a northerly direction toward Greasewood Lake. This time the contesting hounds were led by the slippers on horseback instead of being carried in wagons, and frequent stops had to be made to pick the cactus out of their feet. Alan Breck was the Montana Kennel representative. When a distance of six or seven miles had been traveled a turn was taken in the direction of Point of Rocks, and during the whole time not a wolf was scared up. Nearly twenty-five miles was covered. At noon a halt was called for lunch, and there Lord Ogilvie and nearly all the ranchers mounted their cayuses and deserted the expedition. Slowly, almost tearfully, the hounds were packed into the wagons and a beeline was made for Seventy ranch.

There the usual palavering continued for hours when Judges Williams, Lowe and Heckler had consultation and decided to call the match off. Messrs. Grimes and McDougall were notified of the decision and did not like it. Both said: "We're willing to stay a year to decide the question of the superiority of the dogs." The latter then said: "Turn Ogilvie's wolf loose and I'll bet you $100 my two deerhounds beat any two of your wolfhounds."

"I won't," said the Doctor.

"Bet you two hundred to one," persisted McDougall, pulling out a roll.

"I will not," answered the Doctor, who went on to say that Mr. Hacke had specifically instructed him not to turn out the wolfhounds at any tame wolf, and this seemed for a while to end the whole matter.

This Ogilvie wolf is a little fellow, about one and a half years old, and has been in captivity eight months. You hear the strangest stories about him here. People will tell you he is a domestic pet; that children take it out walking, play with it, that it helps the dog drive in cattle and eats candy out of the hand. Others say it is a fiend in disguise, constantly wearing out chains in frantic efforts to get free, and that it bites huge fragments out of the woodwork in the shed where it is confined. Altogether it has been tremendously mysterious until to-day.

Grimes's refusal to accept either of McDougal's offers was reported to the crowd, and Conrad Schaffer, W. L. Washington and a half dozen others implored him to let the wolfhounds loose, just to show their quality. They all told him that the reputation of Hacke's kennels would be ruined forever if it got abroad that he was afraid to pit the Barzoi wolfhounds against a wolf. His invariable reply was that he had Mr. Hacke's positive orders not to let the dogs loose on any captive wolf.

McDougall raised the enthusiasm of the crowd to cheers when he suddenly announced that he would let out his two deerhounds, Alan Breck and Nipsic, on the Ogivie wolf provided that he be allowed to get near enough to shoot the wolf should his dogs' lives be endangered. The wildest enthusiasm was created by this announcement, and once more pressure was brought to bear on Dr. Grimes. "No go," said he, "I will not disobey Mr. Hacke's instructions." It took an hour to arrange preliminaries for the exhibition. It was settled that the wolf be let loose in the pasture adjoining the ranch buildings, and the dogs led out in slip near enough to sight him and then let go. The crowd was herded in an adobe-walled corral until the wolf got into the pasture, as the sight of them might enrage him.

From every cranny in the corral the men watched with eagerness to see the passage of the wolf from the place it was chained in a shed, through a long yard to the pasture. They soon saw a little freckle-faced boy leading the terrible brute by a rope. The terrible brute was trotting along

THE NEW WAY

From the Makers to the Users; That is Our Way.

We purchase all goods direct from the makers. There is but one profit to pay; we'll make it as small as we can.

For nearly a quarter of a century we have striven to make friends of the PEOPLE, and we now thank them publicly for the generous support given our plan of trying to make **FOUR DOLLARS** do the work of **FIVE**.

We claim to have the largest **SPORTS-MEN'S SUPPLY HOUSE** in the world. Try us on anything you are actually in need of---you'll find it hard to stump us.

Letters asking for prices answered promptly, and, we hope, intelligently.

Montgomery Ward & Co.

111 to 116 Michigan Ave.,

CHICAGO.

Nearly 15,000 Guns and Rifles carried constantly in Stock. Four Carloads of Ammunition and as many more of Targets in our Warehouses. 7,000 parts for **FIREARMS**.

AGENTS FOR

CREENER, DALY and WHITMORE

HAMMERLESS SHOT GUNS.

Of course we have every other kind for which there is a demand, but in these three we excel.

We do not carry them on paper but have the goods where we can serve you quickly.

Had to Mention . . .

OUR HAND LOADS.

Our Professional Hand Loaded Shells, Eley Gas Tight, U. M. C. Trap or Kynoch Patent Shells, any kind or quantity of powder and shot, packed 100 in case with neat handle for carrying. There are none better on earth. Other kinds at lower prices.

Write for Hand Loaded Shell Card.

CHICAGO, ILL.

peacefully with its tongue lolling out. When the boy reached the center of the pasture the excited crowd saw him sit down and look over toward the corral for the signal to let the wolf loose. The wolf walked up to the boy and confidingly pushed his long muzzle into his lap. It was a terrible moment for the crowd in the corral. What if the wolf suddenly should show its true character and rend the boy limb from limb? The tension was relieved when McDougall was seen bringing Alan Breck and Nipsic forward in leash. The boy untied the rope from the wolf's neck and fled. McDougall saw that his dogs perceived their game and let them go. Both bounded forward, Breck in the lead. The wolf halted a minute and turned as though to find his boy friend. Seeing nothing but two fierce hounds coming at him at full speed he wandered off in another direction. The onslaught of the dogs evidently took him by surprise, for he turned with a pained look on his face and at that moment Alan Breck rushed up, veered to one side and trotted around in a circle toward his master, who gazed in dumb astonishment at the favorite upon whom he had staked $750 to win a wolf killing match. Nipsic tore on, made a passing grab at the wolf's haunch, and returned to take another nip *en passant*. The wolf appeared to be grieved at the exhibition of hostility, and every time the dog made a lunge for a bite, it would bite back in a "you saucy thing" sort of a way, but neither touched the other, for after the fracas was over neither showed signs of contact with the other's teeth. A deep hush fell over the crowd, for all sympathized with McDougall, who withdrew from the field with Alan Breck leaping gaily about him. McDougall was too stunned to carry out his threat to kill the dog if he did not fight.

It was a sad task that Howard Ray performed. He rode out to the field of carnage after the show had lasted five minutes, lassoed the wolf and turned him over to the boy, who led the fierce animal back to the shed, through the crowd of men and horses. No one seemed to care whether the animal got frenzied or not.

"I'll turn two of my dogs out against the wolf just to show how this thing should be done," Dr. Grimes was heard to say, and the news spread.

"How about Hacke's orders?" some one asked.

"Will they kill the wolf?" another put in; and the Doctor, ignoring the first question, promptly responded to the latter "Yes, in five minutes, for $100."

"I'll take you!" shouted M. H. Morgan, bringing out a purse.

"Well, maybe not in five minutes," amended the Doctor, "I don't want to limit the time so closely."

"I'll bet you a hundred they don't kill the wolf at all," put in McDougall.

"Done," responded Grimes, and the money was put up in Roger Williams's hands. Mr. Williams was appointed judge and timekeeper. The time for killing the wolf was limited to fifteen minutes, and the time of the slaughter at 9 o'clock to-morrow morning. Later Dr. Van Hummel closed a simiar bet with Dr. Grimes

Wednesday.

The farce ended with the greatest fiasco of three days of fiasco. Mr. Hacke's representative, Dr. Grimes, let loose two of his fiercest Russian wolfhounds on Lord Ogilvie's captive wolf, and the wolf not only saved his own life, but showed his ability to whip both dogs had he been forced to fight. The dogs gave up at the end of five minutes' chasing and snapping, and the wolf would have escaped to the hills had he not been headed off and led back to his shed.

The party at Hardin arrived at Seventy ranch at 8:30 A. M. and found twenty-five or thirty men already there. George Peasely, the manager of the ranch, had everything in readiness. Lord Ogilvie shortly rode up, and exactly on the minute the wolf was led out into the large field adjoining the ranch buildings. Dr. Grimes had stipulated that no one except the judge, Roger Williams, should approach within 100yds., so the crowd had to content themselves with perches on the stable roof and corral fences.

The same little boy, Winfred Senier, who handled the wolf on the day previous, took him about 100yds. out and squatted down on the ground with one arm around his pet's neck. He had had charge of the animal ever since it was captured by A. L. Camp, Jr., near Greasewood Lakes, ten months ago, and nearly cried when Dr. Grimes on the day before agreed to loose his ravenous hounds upon it. But he was game, and besides that he had an abiding confidence in his pet's fighting powers. At 9 o'clock to the minute I. N. Porter led the dogs, Zloeem and Osmady, into the field, W. H. Clark holding the slip. The minute the Barzois saw the wolf they began to struggle and whine, tugging so fiercely at their fastenings that Clark was pulled along after them. "Are you ready?" shouted Ogilvie, and everybody answered "Yes" in chorus. He dropped his handkerchief and the boy let the wolf loose and darted away. At the same moment Mr. Clark unslipped the dogs. Mr. Porter let go their heads, and off they darted with the long galloping stride so characteristic of the greyhound, punctured with sharp low barks.

The first five minutes of the fifteen to which the contest was limited can best be described in a semi-official report, dictated by Mr. Williams, the judge, for the *Republican:*

"When the dogs were slipped I was on horseback within 30yds. of the wolf. He first seemed undecided whether to stay and fight or to run. Then he put out at a good stiff gait, straight away. Both dogs eagerly raced up to the wolf and overtook him in a slight draw or gully. Zloeem immediately and without hesitation took him by the right fore shoulder and threw him, the other dog being then three lengths away. When he came up the wolf was loose, and in the next few jumps both dogs overtook and caught him by either hindquarter. The wolf turned, wrenched himself loose and started out again. He was readily overhauled within a few jumps and bowled over by the dogs, one on either side of the hindquarters. This holding and throwing was repeated several times before the wolf got loose from them. They then ran probably 25 or 30yds. and Zloeem secured another hind hold. The wolf turned, grabbed Zloeem and threw him bodily fully 6ft., the dog landing on his back. I was on the far side of the wolf at the time, and it was so sudden I could not designate exactly where the wolf caught him. The other dog came up and commenced taking hind holds, the wolf freeing himself every time. This continued for probably 60yds., the dogs taking holds and the wolf breaking away. The dogs were fighting all the time, but did not seem to be able to hold the wolf. At the end of four minutes Zloeem quit, gave it up, and the other dog continued its hindquarter tactics for another half minute, and being unable to hold or punish the wolf, he also quit. The dogs were thoroughly exhausted, the whistle in the throat being audible. At no time was I over 20 or 30yds. from them. The first blood was drawn from the wolf on the second hold."

The fighters, or rather scramblers, were also followed by Lord Ogilvie and Howard Rea on horseback and a number of spectators on foot, who had to run at full speed to keep within sight of the animals. Rea and Ogilvie were charged with the duty of saving the dogs, or either of them, if their lives were endangered, and also to see that the wolf did not escape. The scramble led straight out the field toward some low, bare hills, about a mile away, the wolf having evidently selected them as a haven of refuge. At no time did he attack the dogs, except when he threw Zloeem in the air, but he showed his superior strength every ten feet by wrenching away from the pursuers on his flank.

About three-quarters of a mile away from the starting point he rushed into a herd of cattle, but they scattered in all directions, leaving the field perfectly open for the dogs to pursue. They did so, and here it was that Zloeem dropped his tail and quit. He ran behind Roger William's horse and trotted along peacefully, wagging his tail. Finally he dropped to the ground, stretched himself at full length and let his tongue hang out nearly half a foot and lay panting.

It was then Osmady quit and joined her mate. She fell beside him and never moved until Mr. Clark came out and took them in charge.

In the meantime the wolf was making an effort to gain the hills, but Rea and Ogilvie headed him off at every turn. It was stipulated that neither the dogs nor the wolf were to be touched, encouraged or discouraged during the fifteen minutes' fighting, and Judge Williams, sitting on horseback half way between the dogs and the wolf, held his stopwatch in hand, seeing that fair play was observed. It was a long ten minutes. All those on foot reached the scene before it was over, and kept very still 100yds. away until Mr. Williams should give the word.

Dr. Grimes rode up during this pause. He saw a scene fit for anything but a sporting picture. Near him lay two magnificent looking white hounds with their tongues lolling out and their breath accompanied by a whistling sound from their chests, coming in quick, labored gasps. Just beyond them Mr. Williams sat motionless on horseback with his eye fixed on the stop-watch. In the background a gray wolf was slowly and restlessly moving about with his face always turned to the hills, and two other horsemen with lariat in hand, guiding their horses as slowly back and forth. The scene was not a pleasing one for the Doctor. The ten minutes elapsed at last, and Mr. Williams raised his hand for attention. "Time!" he shouted, and every one rushed forward except Dr. Grimes. He turned his horse's head and slowly paced back to the corral. The boy, Senier, went up to the wolf with a light chain in his hand. The wolf recognized him at once and quietly submitted to being tied and led back into captivity. He was bloody on both haunches, but the wounds will heal in a few days. Zloeem did not show a mark. Osmady had a slight blood stain on the left foreleg, where the skin had been broken.

The crowd at the corral had guessed the result long before the contestants disappeared from view beyond the cattle. When they saw Zloeem going up in the air a wild cowboy yell broke from them. "Hurrah for the wolf!" one shouted, and three cheers were given for the game little animal, whose only crime was in belonging to the tribe of their deadliest enemy. Their contempt for the Barzoi got vent in contemptuous irony. "Did you see Slocum throw him in the air?" asked one, "Slocum" is the cowboy name for Zloeem.

"And did you see Osmady catch him by the throat as he came down?" another said.

"And Zloeem disembowel him?" The joke continued, for they had all heard that this was the regular programme of the Barzoi when they attacked a wolf.

"How about that spasm?" was the last fling, and a yell of derision went up. This was an allusion to a statement made by Dr. Grimes that when a Barzoi got a grip on a wolf the muscles of his jaw underwent a peculiar spasm and his mouth had to be pried open after the wolf's death.

A collection amounting to ten dollars was taken up for the boy who led the wolf. Dr. Grimes when asked what he had to say about the result, answered: "Not much. The dogs had a fair show and didn't do the work, that's all. I have no excuse to offer for their failure."

Dr. Van Hummel then asked Lord Ogilvie what he would take for the wolf.

"He cost me $15, but he has no pedigree, being a plain, ordinary gray Colorado wolf, I value him at $200," Lord Ogilvie replied.

"I'll take him," responded the doctor.

"Give me half?" put in H. C. Lowe.

"Agreed;" and in ten minutes a bill of sale was drawn up conveying one gray wolf named "Greeley" to Dr. Van Hummel and H. C. Lowe; provided that the wolf never again be run in coursing or its life exposed to danger from dogs or other enemies of its kind.

"We bought the wolf to make sure it will never be exposed to any more danger," Dr. Van Hummel explained. "What it cost me is exactly the sum I won from Dr. Grimes. We will put it in the Denver bench show, and keep the boy Senier with it until it gets accustomed to seeing strange places and faces.

"There is a little fox-terrier that was raised with the wolf, and this we shall also buy, as the boy says it is perfectly contented when it has its dog playmate with it. You may be sure it will have a life of luxury and ease after this, for the little animal has earned it."

When the ranchers heard of this they gave three cheers for the new owners and the wolf. In justice to Lord Ogilvie, it must be said that he refused to part with the wolf at any price, without the stipulation, which was his own.

About $600 changed hands on the contest. Dr. Grimes had bets of $100 each with George McDougall and Dr. Van Hummell, and many smaller bets.

Conrad Shafer, a prominent rancher and stock owner of the neighborhood, attended every meet. A year ago he brought ten half-Barzoi half-deerhound puppies from Hacke's Pittsburgh kennels, with the purpose of training them to kill wolves. "It is a matter of money for us to encourage breeding and training dogs to kill wolves," he said in a general talk. "I got these dogs on account of the reputation of their father, and am satisfied that if they will not kill wolves they will kill coyotes. I believe I can train them to kill wolves, and I further believe that if the two Barzoi which failed so dismally to-day had been trained properly they also would kill wolves."

S. Sanford, another rancher, agreed with Mr. Shafer. "You can safely calculate," he added, "that every wolf killed means $500 saved to neighboring stock owners. In a country like this, where stock is plentiful and the wolves can always find food, a wolf never eats more than the entrails, heart, liver, lungs, etc., after killing a calf, leaving the carcass for coyotes, which clean it to the bones. Nearly every wolf is good for two calves a week. That is why the ranchers took such great interest in this hunt and why they are so disappointed over the result. Hacke could have sold every one of them a litter of pups if this trial had been successful. Last Monday the wolves attacked a valuable Norman bred colt of mine and in an effort to hamstring it completely cut all the large muscles of the hindleg, leaving in one place a hole big enough to put your fist in. Something must have frightened them off, for they did not sever the tendon, but the horse is ruined."

From the remarks of Mr. Shafer and Mr. Sanford it may be judged that there is a great deal more in a trial of this character than to gratify a desire for sport. In a country like Colorado the wolf is more dreaded by cattle owners than the drought, and it had never been claimed that any breed of dogs living could kill wolves until the assertion was made on behalf of the Barzoi. The wolf-killing record of these dogs in Russia and Siberia is said to be unassailable, and this match was the first in which they had ever been pitted against an American gray wolf.—*Denver Republican.*

From the *Stock-Keeper's* witty comments on the bewildering increase of specials at their dog shows, those much maligned martyrs, the judges, must feel pretty bad. We have little of that trouble in this country, for when the regular classes are over our judges take the bull by the horns in a sensible manner by getting a catalogue and attend to the sorting out of the winners, themselves in most cases. It certainly simplifies things all round and very few, if any, mistakes are made, that is, outside of errors of judgment.

DOG CHAT.

THOSE Philadelphia dogmen know how to enjoy themselves. It is not long since they had a memorable house-warming with flash light trimmings. Now another serious "Item" claims their attention; but we cannot do better than give the invitation in full as received by us: "There will be a meeting of the Philadelphia Kennel Club, at the club rooms in the Scott Building, 1217 Filbert street, on Tuesday evening, the 12th instant, at 8 o'clock sharp. I am directed by Col. Ridgway to notify you that after the regular business of the club is over a supper will be served and the great bowl, donated by the *Item*, will be filled with King's Mark punch. Col. Ridgway extends a cordial invitation to you on this 'occasion,' given by him to celebrate his winning of the bowl. Please send your acknowledgment to FRANCIS G. TAYLOR, Secretary. P. S.—If you are interested in the Philadelphia Kennel Club, come."

Speaking of Philadelphia Club matters, we may remark that Mr. F. S. Brown sent in his resignation to the club both as president and a member on account, so we are told, of several of the members having shown their dogs at the late bench show given by the Keystone Kennel Club. We are surprised to hear this, and the club was quite right in taking the view of the matter they did by laying the resignation, etc., on the table. Judging from Mr. Brown's previous efforts in the cause of Quaker City canine affairs, we should have expected rather broader views than this.

A correspondent writes: "I heard a good story yesterday which I think ought to be chronicled. One of Dr. Bernard's, the philanthropist, boys, just out from old London, was placed with a farmer in this neighborhood who had a very fine collie dog, which he was instructed to take out for exercise on a chain. The boy returned in tears, saying some one had shot the dog: he was sure they had shot him, because he smelled the powder, though he heard no report of a gun going off. The farmer was very much put out about the loss of his dog and went out to investigate. He found no trace of the collie, but in the evening the dog returned and the cause of the smell was quickly discovered—skunk."

An adjourned meeting of the National Beagle Club will be held at Mechanic's Hall, N. E Kennel Club Bench Show, Boston, Mass., April 7, at 7:30 P. M.

Those fanciers who are striving to introduce the handsome Psovoi into this country and doing their utmost in a proper manner to further the interests of the breed, will likely have their best endeavors go for nothing unless a stop is put to the antics of the Pittsburgh contingent. The brutal farce that was enacted on Mr. Hacke's farm a few weeks since should have been sufficient to call down the derision of, and more than the derision—contempt—of true sportsmen. The Hacke—McDougall match did seem a more sportsmanlike arrangement, but with every condition favorable the affair seems to have turned out a greater fiasco than the preceding ones.

The report in the Denver *Republican*, forwarded to us by Mr. Thad. Banks, of that paper, gives an admirable account of this screaming farce. That men of presumably good sense should enter into such matches with no further knowledge of the wolf-killing powers of their dogs than these men seem to have had appears utterly ridiculous. That Mr. McDougall should shoot his greyhound because it did not tackle the wolf also shows an utter lack of sportsmanlike feeling. A greyhound is not bred to tackle wolves, though there are instances where they have by training, and if sufficiently strong built, give a good account of themselves in such sport. A greyhound is not naturally a fighting dog, and as they have been bred and trained as a breed simply to course the hare, the most timid animal that runs on four feet, it is expecting too much that when put on such a savage animal as a wolf, he should tackle it with any degree of gusto. To shoot the dog was a piece of needless cruelty. Dr. Van Hummel's greyhounds have, we believe, done their share in killing wolves, but then they were properly entered and had their first taste of blood in company with his wolf-killing deerhounds. When old champion Mac first sighted his wolf, we are told, he performed very indifferently, and it was in order, according to these modern ethics, for the Doctor to shoot the dog; instead of this he was given another chance, and learning from the others he soon tasted blood and became the keenest and boldest wolf hunter in Dr. Van Hummel's kennel. Our advice to these would-be mighty huntsmen is that instead of believing all the funny tales that come from the land of the Cossack, they should have their dogs entered properly in a country where wolves abound; and after the dogs have been put through a course of sprouts and it is known that they will tackle a wolf, then will it be time enough to talk about match-making, and so save themselves from becoming a laughing stock to all sportsmen.

The croakers about the decadence of collie intelligence should read the paragraph in *Stock-Keeper* about Mr. L. P. C. Astley, the noted judge, being matched to play Mr. Rumball's collie bitch Scot, by Metchley Wonder—Lady of the Lake, a game of "nap." To our readers who do not indulge in card playing "nap" is "napoleon," a game much in vogue among Englishmen, or used to be. This journal says: "Scot is a wonderful instance of superhuman intelligence and patient training, and can do endless tricks with the cards, numbers, etc., and her friends are offering 6 to 4 on her for the coming event. Her owner will back her to play nap, crib and dominoes against any person, and there is quite a flutter over the event among the doggily inclined in the hardware capital" (Birmingham).

We were pleased to meet the "only German" at the A. K. C. office on Saturday last, looking a little soft, but showing little effect otherwise of his recent severe illness. Blemton Victor II., out of sympathy, we suppose, had an attack of influenza as well, but is now on his legs again, but will hardly show up at Boston.

It is not often nowadays, we may say it is exceptional, to find an imported beagle on our show benches. The proprietors of the Waldingfield Kennels, of Ipswich, Mass., Messrs. Appleton, have struck out for new blood in importing the beagle Pulborough Crafty, who is by Pulborough Rattler out of Pulborough Gaylass. This dog will be shown at Boston this week.

At Boston the show of mastiffs will, as has been the case throughout the spring, be only fairly represented. There must be some peculiar reason why the good kennels have not come more to the fore this year. The Mastiff Club should see to this.

One always associates the name of Frank Forest with that of Mr. Parry, who handled him so ably in the trials of 1890. Frank Forest was sold for an unheard of figure in beagle circles, and finds a new home in the West, and now Mr. Parry severs his connection with the Forest Kennels, Mr. O. W. Brooking having purchased his interest in that kennel, which will henceforth conduct its business from Lynn, Mass.

Stock-Keeper (Eng.) is authority for the statement that the Government of Denmark has issued a decree prohibiting any dogs being imported from any foreign country excepting Sweden and Norway.

Mr. Brough, we are told, brought out a capital young bloodhound, and Mr. Tom Stretch swept the decks with what *Stock-Keeper* describes as one of the best young collies that have been brought out for a long time. A feature of the show was the competition for the Deakin cups for the best sporting and non-sporting dogs in the show. Mr. Brough's bloodhound, Bardolph, won the former and old champion Metchley Wonder, the collie, added to his already long list of honors by taking the other cup for the second time.

The sale of Sir Humphry de Trafford's sporting dogs in Manchester is said to have been one of the most successful held for some time.

A contributor to *Stock-Keeper* (Eng.) gets off a good one on our friend Mr. Wade this week. Two men were overheard in earnest conversation: "They were talking of bastiffs, sheepdogs, K.C. rules, Barzois, A.K.C. affairs, movement in dogs, and some other items that we cannot for the moment recollect. 'Well,' said one, 'then what d'ye think of Wade?' 'Why,' said a narrow-faced man with a grayish beard, 'he puts me in mind of the Apostle Paul, 'cos he seems to have a say 'bout everything.'" This reminds us that Mr. Wade gives the above journal a version of the "Spectre joke" at the New York show, that somebow, like Banquo's ghost, will not down, but seems to frisk round with the greatest activity still and without the slightest "reserve." Still we hardly think it kind on Mr. Wade's part to show up our judges' little weaknesses in this way to our cousins across the pond.

Spratts Patent shares must be a good paying investment in England, as at a meeting of shareholders held recently a dividend of ten per cent. was announced.

The loss of the crack greyhound bitch Miss Glendyne was a severe one to Col. North and rather counteracted the pleasant effects of Fullerton's great victory. "Vindex," the English sporting writer, says: "As a dam Miss Glendyne has not been a striking success. Like Bit of Fashion, she found her first mate in Greentick, but the litter nearly all died in distemper, Cagliostro being the best of the survivors. A second visit to Greentick was more successful, Not Out Not So Green, Naivette, and Irish Queen being among them. The third litter, to Herschel, produced Needham, Neston and Nacton. She was next put to Troughend, and the saplings are promising. There are also some nice whelps, the result of a second visit to Herschel. In all she thus had five litters. She was not a good mother. She was a real lover of any kind of sport. She would hunt rats for hours in the barns or mice in a field, especially at haytime. She had a remarkable power of scent for a greyhound, and would steal into and spring on mice in a field like a cat. Miss Glendyne was not an old bitch, being whelped in 1883, but she never rightly recovered from the effects of chesting a wall in a trial with Fullerton two years ago. She is buried alongside old Pretty Nell, the founder of Mr. Dent's success, just outside his sitting room window. The last clause in a letter I have from Mr. Dent says so much in so few words that I may appropriately give it. It reads, 'I shed an honest tear over her; there never was a better, not even Fullerton'."

It is proposed to start both a deerhound club and a Barzoi club in England. Speaking of Barzoi, it seems, from some Russian journals sent over to Mr. Wade, that the proper name is, after all, Psovoi—plural Psovie. Now that, under the name of Barzoi, some of these dogs have just rendered such a good account of themselves on the plains of Hardin, would it not be a propitious time to settle on the right name, Psovoi, and let bygones be bygones and start afresh, as it were? The Barzoi has lost caste almost irretrievably among the ranchmen of the West, and we all know what it is to give a dog a bad name.

Last week we referred to Mr. Little's importation of the Clumber Bustler IV., and now we learn from the *Fanciers' Gazette* that the dog met his death just before he should have sailed, under the most unfortunate circumstances. On the day previous to the day of sailing Bustler was received by the shipping agents at Liverpool, and in his box placed upon a cart in the stable for the night. He was found dead the following morning, having apparently eaten his way through the top of the box, fallen over the edge of the cart, and thereby hung himself. When found he was on the ground, his head having slipped through the collar, no doubt after death. His death is a distinct loss to the breed, and Mr. Little has our sympathy.

Mr. Frank Dole's big importation of bull-terriers, whose names we gave in a recent issue, sailed two weeks since under the care of Harry Layton.

Mr. C. Steadman Hanks is still further strengthening his kennel of Psovies, having secured five more from Russia, four bitches and one dog One bitch, Lekfiodeyka, a full sister to Leekhoi, won the silver medal at St. Petersburg at the annual field trials held there last fall under the management of Prince Nicholas. Fifty-two dogs competed on that occasion. She is in whelp and was bought by cable order on Wednesday last for a very long price. Two other bitches were shipped on the Indiana, the steamer which took the grain from Philadelphia to the starving Russians. The other dogs will come out on the Missouri. One is a present from Prince Galitzin to Mr. Hanks. There are no wolves at Marblehead, Mass.

Mr. Purbeck suffers a severe loss should the accident to his greyhound Ornatus be as serious as is expected. It seems he ran into a hotbed frame and cut the tendons on his hind-legs. Ornatus was in the challenge class, and his presence in the Big Four will be badly missed.

Mr. F. W. Chapman, of Melrose, Mass., has sold two beagle bitches. Ring, that divided second at the trials and was runner-up to Tony Weller, goes to the Englewood Kennels, Toledo, O., and Romp C., winner of first in the puppy and third in the under 13-inch bitch class at the late trials, goes to Mr. E. Gerry Roberts, Red Bank, N. J. Both were well sold.

Patti is still mourning the loss of her pet dog Ricci, who died Saturday last. "It was very sad," said Sig. Nicolini yesterday. "The madame—she feel very—what you say—triste? Mon dieu, it was terrible. She love the poor dog. He was not pretty, but what you call 'Oh, my.' The very poor dog. He was cold always. He had hair none, only on the very tip of his poor little tail. The madame is yet sick. She adore the poor frappé dog. He catch the cold in his bandbox. He die. The very poor dog."—*New York World.*

The Androscoggin Kennel Club intend holding a show at Lewiston, Me., from May 17 to 19. The entries close May 5 with Mr. T. R. Catland, secretary. In the principal breeds prizes of $8, $5 and a diploma will be given; foxhounds and beagles $7 and $4; other classes have $6 and $3. *Lewistown Gazette* gives $10 for the best pointer and the *Lewistown Journal* $10 for the best setter. Antoine, the jeweller, also donates $15, which has not yet been placed. Premium lists will be out about next Monday. As this is a new country the show should be well attended by those who want a good market for their surplus stock. The judges will be announced later. Lewiston is about thirty-five miles from Portland, Me., and can be easily reached from Boston or New York.

We regret to write that Mr. W. H. Hyland, of Tarrytown, N. Y., lost a good beagle last week through the fine discriminating powers of a local farmer, aided by a load of buckshot. This dog, Bill Nye, winner of third prize at the trials last fall, was on the trail of a rabbit which ran under the farmer's barn, and Bill coming up gave tongue so merrily that the farmer thought the dog was mad and so supposed he was doing a service to mankind by destroying him. Mr. Hyland intends to sue the farmer for the value of the beagle.

We publish this week a picture of a rough-haired beagle, a breed that we do not think has been seen on our show benches. Unlike the so-called shaggy foxhounds, this is a real "rough 'un" and reminds one somewhat of a bobtail

ROUGH-HAIRED BEAGLE.

sheep dog. The subject of our illustration was seen by Mr. Joe Lewis during his trip to Europe last summer, and we believe we are indebted to Mr. Boggs's active camera for the very good picture from which this is made. Several of our beagle men had expressed a desire to go into the breed, but did not know what they were like. Now they have no such excuse and this may be the means of inoculating the fever.

Jaggs—"I see that they are using dog flesh to cure consumption." Waggs—"Yes and it's a capital idea." "What's its virtue?" "It tans the lungs of the patient." "Tans the lungs?" "Yes, and makes them tough." "What is it about a dog to tan the lungs?" "The bark." "Any kind of a dog do?" "Yes, except the Spitz." "What's the matter with the Spitz?" "Makes the patient expectorate too much."—*Arkansaw Traveler.*

One of the most persistent beggars in Portland, Me., is a collie dog which is very fond of doughnuts. The collie, in company with his mistress, visited a bakery one day last fall, and perceiving some doughnuts in a showcase, he sat down and pleaded, by means of short, sharp barks, for a treat. The clerk generously fed the smart dog, but he wishes that he hadn't, for every day since the collie has appeared to beg for more doughnuts. If the shop door is closed he will wait out side until some one opens it, and then dodge in to get his regular free lunch.

When we remarked in our report of Pittsburgh show that Tempest's ears needed attention, we did so with a full knowledge of the facts. Mr. Ledyard takes exception to this, and says that the dog's ears, he is told, are all right. Very well, it is, or was, simply a matter of opinion. He (Mr. Ledyard) also adds that "he fails to see why a bad condition of ears in a dog not yet four years old would cause him to lose his bloom." Personally, we know of nothing that will worry a dog to skinniness sooner than a case of ear canker not properly attended to.

Monday last was a regular dog day—close, sultry and altogether, after the severe weather we have had lately, a very undesirable change. Exhibitors at Boston had to be particularly careful in shipping their dogs. We regret to say, however, that the Wheatly kennels had a close call of losing nearly all their crack bulldogs. The heat on the dock of the Fall River line was almost suffocating, and the authorities, as usual, were heedless in the extreme of the wishes of the dogmen. As a result, the bull bitch Carrie met an agonizing death. When her owner, Mr. Hobbie, opened the box on the boat she was almost dead from suffocation, and despite every attention died before reaching Newport. Carrie, it will be remembered was first at New York show in February last. With Pathfinder, and Saleni, it was also touch and go, but happily they were brought round. The Retnor kennels, however, were not so fortunate, as in the same manner they lost their dog Monarch VI., another winner of first at New York. The loss of these two bulldogs is a severe one to both kennels, and their owners have our sincere sympathy. Diamond King, the bull terrier, was also almost *hors de combat*, and it was only with great care that he was brought round. Exhibitors should be doubly careful in shipping bulldogs and pugs, as somehow it takes very little to upset their breathing apparatus.

In the award list of Pittsburgh show we find that Westminster Ralph, marked vhc. and owned by the Westminster K. C., was absent from Pittsburgh, having contracted distemper after the Washington show, where he won first in the puppy class.

It is proposed to have some beagle trials at Brockton, Mass., next Saturday, $100 sweepstakes. Such dogs as ch. Storm, Maud K., Tony Miller, etc., are expected to enter.

We note among the new kennel advertisements this week the following offers for sale: Collies, C. E Osborn; Pointers, J. E. Fisher; Spaniels, A. E. Smith, C. T. Sacket; Setters, Oakview Kennels, Redstone Kennels; St. Bernard, C. C. Chambers; Bloodhounds, J. F. Sacket; Hounds, T. E. Cronin.

In a recent issue of the *Stock-Keeper*, (Eng.) that journal takes occasion to call the attention of intending purchasers of dogs advertised in their columns, to the measures they have arranged to protect purchasers, especially the novice in dog buying, from the wiles of the unscrupulous. They say: "Although it is true, and we are proud to state it, that owing to the great and satisfactory change which has swept over the fanciers' domain in late years, an undeniable majority of the people who offer dogs for sale are honest men, yet it would be carrying credulity to a simple excess to suppose, as so many of our foreign readers do, that all our advertisers are above suspicion." The *Stock-Keeper* is continually receiving complaints, especially from foreign countries, and as a number of dogs are purchased by Americans through the medium of their columns, they advise would-be buyers to demand the stock offered "on approval." As security to the seller they are willing that the buyers shall forward the money to them, and they will hold it to the credit of the seller at the buyer's order. Further, and this will apply more especially to purchasers on this side, those who are not well acquainted with the bread of dog they wish to purchase or have no means of seeing the dog, can have it examined and a report given the intending purchaser, as to the dog's health and points by duly qualified veterinary surgeons, whose advertisements appear in their paper. Thus such an arrangement affords a minimum of risk, and should the buyer after all be swindled, let the editor know and he will show the parties up, *coûte qui coûte*. Of course, correspondence on this subject should be addressed to their business manager.

NEW ENGLAND FIELD TRIAL CLUB.

BOSTON, Mass., Tuesday, April 5.—This club held a most successful meeting this evening. At 8 o'clock the following members and well-wishers of the club sat down to a bounteous dinner at the Hotel Thorndike: President W. A. Power at the head of the table, J.W. Hayward, G. E. Osborne, Geo. E. Scheffeler, Walter Medbury, Chas. Steadman Hanks, Chas. H. Innes, Chas. Higgins, N. L. Chaflin, G. A. Vickery, Geo. W. Lowell, J. W. Newman, C. G. Brownell, Fred H. Clark, John Davidson, E. Knight Sperry, S. D. Freeman, J. L. Wells, G. L. V. Tyler, T. M. Aldrich, Chas. D. Roberts, H. D. French, Mr. Dexter and H. W. Lacy at the foot of the table, A. A. Savage, S. W. Pearl, Noyes Billings, Nathaniel T. Brown, C. A. Parker. John C. Sharp, Samuel Hammond, Jr., W. M. Lorring, Walter C. Baylies, C. W. Cates, Jr., Arthur R. Sharp, A. M. Tucker, D. A. Goodwin, Jr., E. O. Damon, F. W. Whitlock, J. M. Taylor, C. A. Evans, Geo. E. Stickney.

When cigars and coffee appeared the members settled down to a discussion of the affairs of the club. Measures were taken to incorporate the club under the laws of Massachusetts. By-laws were adopted. Afterward the following officers were elected for the ensuing year: President, W. A. Power; Vice-Presidents, Dr. J. W. Hayward, Geo. E Osborne, D. A. Goodwin, Jr., Harry Dutton; Secretary, Geo. E. Stickney; Treasurer, J. L. Wells; Board of Governors, all the above officers together with A. M. Tucker, C. D. Roberts, V. L. Bassa, F. L. Harken, F. H. Clark and Geo. W. Lowell.

The following applications were made for membership: A. A. Savage, O. A. Evans, C. B. Duboy, Dave Pearson, G. E. Scheffler, H. C. French, Dr. H. Bishop, S. C. Bradley, E. Brooks, Dr. T. W. Kendall, Bayard Thayer, Dr. J. E. Hare, Dr. C. A. Barker, J. H. Seeley. These were all elected. The committee on game reported that there would be plenty of game for the trials this fall. It was then decided that the Stake Committee make arrangements for judges. The subject of stakes for the next trials was then discussed and the following decided upon:

Derby with prizes of $200, $100 and $50, $10 forfeit and $10 to fill, entries to close Aug. 1. All age stake the same, entries close Nov. 1. Amateur stake prizes three cups, entries close Nov. 15. This stake is open to amateurs only; $5 forfeit and $5 to fill. It was then voted to commence the trials Tuesday Nov. 8.

A discussion then arose as to wide ranging and was in progress to a late hour. It was the sentiment of most of the members that the wide-ranging dog of the South was not what was required in the New England country, but that the dogs should be trained to work more to the gun, etc.

H. W. L.

SOUTHERN FIELD TRIAL GROUNDS.

MEMPHIS, Tenn., March 30.—*Editor Forest and Stream:* I am pleased to report the quail on the preserves used by the Southern Field Trial Club, at New Albany, Miss., were fed by the resident member, Dr. Rodgers, and none were killed during the snow storm that visited this section March 20, that was so destructive to quail when not fed.

Not a gun has been fired on the preserve of the club or any cover burned off, hence the quail do not have to seek other localities for food and cover.

The club is having one hundred different places planted in sorghum, the seed of which will afford ample winter food for the quail, as the sorghum will be left standing. The club has leased double the quantity of land used last year. Your able reporter, Mr. Waters, thinks the grounds used by the club the best in use by any club. This opinion is shared by many other well-posted gentlemen attending field trials. With every inducement in the way of liberal purses, good grounds, and accommodations at reasonable prices, the club hopes to hold trials of a very high order. P. H. BRYSON.

WORN-OUT DOGS AS WINNERS.

Editor Forest and Stream:

I was not a little surprised at some of the awards in the sporting classes at Chicago, but I waited till I had an opportunity of examining the dogs personally at New York before expressing an opinion. Judges and reporters do not seem always to recognize that "every dog has his day" as a bench show winner, and few seem to have the courage to go against a dog's record and place him on his merits independent of his past career. There must come a time when every specimen, however perfect, should give way to younger animals if justice is to be done. Few dogs and still fewer bitches can in these days win over others when they have reached their eighth or tenth year, and at least one that won over a fine young competitor at both New York and Chicago is not only old but in a comparatively decrepit or tottering condition. If we are not to take the amount of vitality into account in judging we might as well show a wooden or wax model. Let us have dogs judged as they appear in the ring, after being properly moved about (seldom done), and not on what they have been, however perfect.

I am glad to see that Mr. Waters has in a recent number touched on a growing evil. I can indorse all he says and add to it as regards the jockeying and its effects, but will not further encroach on your valuable space.

WESLEY MILLS, M.D.

MONTREAL, Canada.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

WANDERER.—Would you be able to put me in the way of finding out who are the owners of any pure Laverack setters that may now be owned in the United States or Canada. By pure Lavaracks I mean without any Llewellin or other blood than that which flowed through the veins of Pride of the Border, Guy Mannering, Roderick Dhu, Young Laverack and Thunder, and such bitches as Pearl, Petrel, Peeress, Fancy and Fairy II., Lady, Daisy and Pet Laverack. Ans. It would be impossible for us to furnish such information.

B. W., Baltimore, Md.—I have just purchased a dog whose parents are registered in the A.K.R. in Vol. IV., No. 9. Please inform me what steps to take to have him registered and can you give his pedigree? Ans. You do not give breed or name of dog. Send to secretary American Kennel Club, 44 Broadway, New York city, for registry blank and information. The fee is $1.

W. C. B., New York.—I have been offered an imported dachshund. I want a good rabbit hound, but am not sure if this breed will answer the purpose, will you kindly advise me as to its best features? Ans. The dachshund makes an admirable rabbit dog, and is much in vogue among the German sportsmen to put rabbits up in cover.

C. L. B., Denver, Colo.—1. Can anything be done toward curing cowlucks in a six-months-old St. Bernard that is growing very fast? 2. Will age improve them? Ans. 1. Give plenty of exercise, and do not confine the dog in close quarters or where he must continually get on his hind legs to look over the fence, etc. 2. Yes, very often, if the above conditions are carried out. Do not feed the dog too much till the legs are strong enough to bear the weight of his body.

BOSTON DOG SHOW.

BOSTON, Mass., (Special to FOREST AND STREAM) Tuesday, April 5.—The eighth annual dog show of the New England Kennel Club commenced under very favorable auspices. The weather, though chilly, was bright, and a fairly good crowd poured through the gates considering it was the first day. A large number of prominent exhibitors are present and the show is distinctively Bostonian as usual. The quality of dogs present is fully up to the average. In Mr. Mortimer's classes, St. Bernards have most of the cracks, but the quality through the classes is not very good; fox-terriers and bull-terriers are well filled, and so are collies. Boston terriers are good; the latter breed makes a big display with dogs and bunting, and Dr. Saunders had his work cut out to score his classes. Mr. Davidson's classes were very well filled with a representative lot of pointers and setters, and in Gordons there are the biggest classes yet seen this spring outside of New York. Beagles are also well represented. Owing to Mr. Bellin's illness his classes have been divided between Messrs. Davidson and Mortimer. This has materially retarded the judging, as two of the four excellent rings were idle half the day. The club gave their customary luncheon at noon and it was attended by a more representative lot of men than we have seen for several years, who "did full justice" to the good things provided. Judging continued till 6:30 P. M. with the following result:

AWARDS.

MASTIFFS.—CHALLENGE—*Dogs:* 1st, E. B. Sears's Sears' Monarch.—OPEN—*Dogs:* 1st, Mrs. Charles Wallack's Merlin II.; 2d, H. A. Harris's Ilford Caution II.; 3d, A. D. McClellan's Ben Hur. Very high com., John M. Stafford's Bruce. *Bitches:* 1st, Dr. C. A. Lougest's Gerda II.; 2d, Geo. W. Glazier's Madge Minting. Com., Bradley Kennels' Ruby Gem. *Puppies:* 1st, withheld; 2d, H. A. Harris's Punch.

ST. BERNARDS.—ROUGH-COATED—CHALLENGE—*Dogs:* 1st, Jacob Rupert, Jr.'s Aristocrat. Reserve, E. B. Sears's Plinlimmon, Jr. *Bitches:* 1st, E. H. Moore's Lady Livingston. Reserve, E. B. Sears's Manon.—OPEN—*Dogs:* 1st and 3d, E. B. Sears's Sir Bedivere and Jim Blaine; 2d, E. H. Moore's Lord Melrose. Reserve, E. B. Sears's Lothario. Very high com., Edward Booth's Imperator. High com., Medford Hillside Kennels' Prince Draco and E. Withington Robinson's Rex Withington. Com., Alex. McIntosh's Roderick Dhu and R. Leighton's Leo. *Bitches:* 1st, Jacob Rupert, Jr.'s Lady Gladwyn; 2d, E. H. Moore's Lady Sneerwell; 3d, E. B. Sears's Hepsey. Reserve, E. B. Sears's Lady Adelaide II. Very high com., Medford Hillside Kennels' Princess Saffron, Jacob Rupert, Jr.'s Altonette, E. H. Moore's Lady Melrose and Swiss Mountain Kennels' Florette. High com., Miller & Folsom's Dorothy IV. and Lewis K. Brown's Lady Vaughan. Com., Geo. W. Patterson's Bayadese and Swiss Mountain Kennels' Geraldine *Puppies:* 1st, E. B. Sears's Wyoming Prince; 2d, R. B. Fay's Sir Milo. High com., C. Kamtzerer's Claus.

SMOOTH-COATED ST. BERNARDS.—CHALLENGE—1st, Jacob Rupert, Jr.'s Empress of Contoocook.—OPEN—*Dogs:* 1st, D. P. Foster's Leicester; 2d, E. H. Moore's Alton II.; 3d, Dr. C. A. Lougest's Belisarius. Very high com., Swiss Mountain Kennels' Scottish Leader. High com., Tiot Kennels' Earl of Beaconsfield. Com., H. C. Delano's Pluto. *Bitches:* 1st, G. P. Wiggin's Judith; 2d, R. Rudolph Sack's Lady Hanway. *Puppies:* 1st, E. H. Moore's Alton II.

GREAT DANES.—OPEN—*Dogs:* 1st, withheld; 2d, Miss Jewell's Thorolf. *Bitches:* 1st, Oscar Vogel's Belley.

BLOODHOUNDS.—CHALLENGE—1st, Geo. W. Glazier's Jack the Ripper.—OPEN—*Dogs:* 1st, Geo. W. Glazier's Belhus; 2d, Chas. H. Innes' Bruno. *Bitches:* 1st, George W. Glazier's Benison.

DEERHOUNDS.—CHALLENGE—*Dogs:* Col. John E. Thayer's Robber Chieftain. *Bitches:* 2d, Hillside Romola.—OPEN—1st, Col. John E. Thayer's Hillside Raven; 2d, Col. John E. Thayer's Alpir. Very high com., A. Perbeck's Tosso. *Bitches:* 1st, Col. John E. Thayer's Hillside Ruth; 2d, Col. John E. Thayer's Hillside Sylvia. Very high com., Mrs. Lotta Barnard's Scotch Mist. High com., Col. John M. Thayer's Phyllis.

GREYHOUNDS.—CHALLENGE—1st, A. W. Purbeck's Bestwood Daisy.—OPEN—*Dogs:* 1st, A. W. Purbeck's Pious Pembroke; 2d, D. D. Lemley's Imperator; 3d, withheld. *Bitches:* 1st and 2d, A. W. Purbeck's Lily of Gainsboro and Lady Clare. High com., Manataug Kennels' Marguerite. *Puppies:* Withheld.

BARZOIS.—CHALLENGE—*Dogs:* No entries. *Bitches:* 1st, C. S. Hank's Svodka.—OPEN—*Dogs:* 1st, H. W. Huntington's Argos; 2d, C. S. Hank's Leekhoi; 3d, W. W. Dudley's Napoleon. *Bitches:* 1st, C. S. Hank's Flodeyka.

CHESAPEAKE BAY DOGS.—*Dogs:* 1st, C. G. Dean's Cleveland; 2d, G. W. Randall's Wave R. *Bitches:* No entries.

DR. JOHN S. SAUNDERS.

Judge of Boston terriers.

POINTERS.—CHALLENGE—55LBS. AND OVER.—*Dogs:* 1st, Geo. Jarvis's Lad of Kent. Reserve, G. W. Lovell's Pontiac.—50LBS. AND OVER—*Bitches:* 1st, C. Heath's Revel III.—OPEN—55LBS. AND OVER—*Dogs:* 1st, C. D. Robert's Duke of Dexter; 2d and high com., C. A. Parker's Dare (Go and Van of Dare; 3d, Dr. J. R. Daniels's Count Graphic. Reserve, Toon & Symonds's Devon Banger. Very high com., G. A. Vickery's Grandee and G. W. Lovell's Spot R. High com., S. Kellogg's Murat. Com., F. D. Smith's Nox, A. H. White's Schuyler and G. E. Thompson's Rialto Pride.—50LBS. —*Bitches:* 1st, C. Heath's Patti; 2d, G. Jarvis's Lass of Kent; 3d, Toon & Symond's Ruby VII. Reserve, W. H. Hyland's Peggie. Very high com., G. B. Neal's Mam'zelle. FOX-TERRIERS.—CHALLENGE—*Dogs:* 1st and reserve, Blemton Kennels' Blemton Victor II. and Lucifer. *Bitches:* 1st, J. E. Thayer's Dona. Reserve, John E. Thayer's Dona.—OPEN—*Dogs:* 1st, J. F. Thayer's Starden's King; 2d, George Raper's Raby Pallisy; 3d, W. & A. S. Cushman's Vandal. Reserve, Woodale Kennels' Dobbin. Very high com., J. E. Thayer's Brockenhurst Tyke, Toon & Symonds's Ebor Spendthrift, Blemton Kennels' Blemton Valor. High com., Miss Hope Goddard's Sashiy Verderer, Blemton Kennels' Blemton Volo. Com., J. E. Thayer's Hillside Ruffian, C. Rathbone's Beverwyck Rebel, Toon & Symonds's Endcliffe Spice. *Bitches:* 1st and reserve, J. E. Thayer's Miss Dollar and Dudley Toilet; 2d and high com., C. S. Hanks's Grouse II. and Damson; 3d, Blemton Kennels' Spinster. Very high com., Woodale Kennels' Woodale Regina.—WIRE-HAIRED—1st, Cainsmir Kennels' Suffolk Teazle; 2d, R. Lyon's Risca. Very high com., J. A. Poole's Tic-Tac. High com., Toon & Symonds's Barton Sting, R. Lyon's Ebor Snowbery.—PUPPIES—*Dogs:* 1st, W. & A. S. Cushman's Vandal; 2d, C. Rathbone's Beverwyck Punster. Very high com. and com., Woodale Kennels' Woodale Dividend and Woodale Deacon. High com., C. S. Hanks's Seacroft Romulus. *Bitches:* 1st, C. Rathbone's Beverwyck Moonray; 2d, very high com., high com. and com., C. S. Hanks's Seacroft Boaster, Seacroft Ottilia, Seacroft Ascot and Seacroft Fuss.

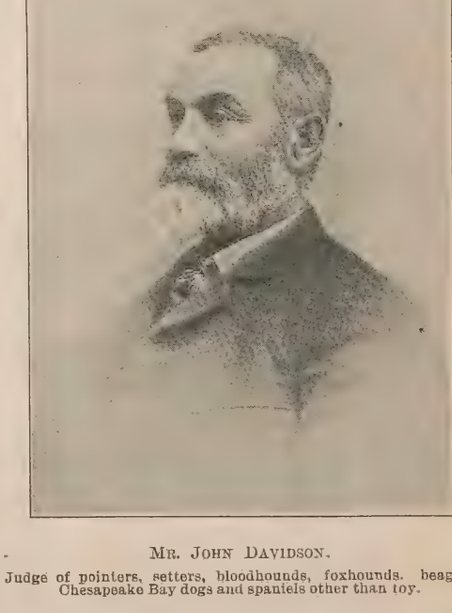
BLACK AND TAN TERRIERS.—*Dogs:* 1st and 2d, F. E. Comstock's Salisbury and Jasper. Very high com., Toon & Symonds's Prince Raglan. *Bitches:* 1st and 2d, F. E. Comstock's Queenie II. and Louis.



YORKSHIRE TERRIERS.—5LBS. AND OVER—*Dogs:* 1st, withheld; 2d, Huddersfield Kennels' Don. *Bitches:* 1st, Toon & Symonds's Venus; 2d, withheld.—UNDER 5LBS.—*Dogs:* 1st and 2d, Huddersfield Kennels' Charlie and Prince.

TOY TERRIERS.—7LBS. AND UNDER.—1st, M. Rothschild's Jerry; 2d, S. C. Swett's Lady Tersey.

SPANIELS.—CHALLENGE—1st, R. P. Keasby's Beverly Negus; 2d, J. F. Kirk's Newton Abbott Laddie.

FIELD SPANIELS.—BLACK—OVER 28LBS.—*Dogs:* 1st, Ancient and Modern Spaniel Kennels' Newton Abbott Farmer. *Bitches:* 1st, Bradley Kennels' Nancy Lee Obo; 2d, J. F. Kirk's Rosedale Bess.

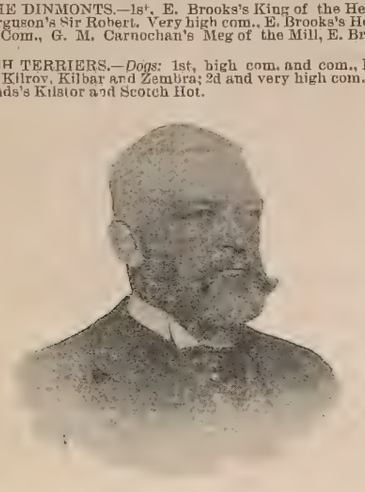
COCKER SPANIELS.—CHALLENGE—ANY COLOR. NOT OVER 28LBS.—*Dogs:* 1st, Ancient and Modern Spaniel Kennels' Fascination; 2d, C. G. Browning's Cherry Boy. *Bitches:* 1st, Ancient and Modern Spaniel Kennels' I Say; 2d, J. P. Willey's Black Duchess. —OPEN—BLACK—NOT OVER 28LBS.—*Dogs:* 1st, J. P. Willey's Jersey Obo; 2d, H. C. Brondson's Victor. Reserve, G. L. Tarr's Black Baby. Very high com., W. Sumner's Sancho Panza. High com., J. Donovan's Ben Rabbi and Brush. *Bitches:* 1st, J. Donovan's

MR. JOHN DAVIDSON.

Judge of pointers, setters, bloodhounds, foxhounds, beagles, Chesapeake Bay dogs and spaniels other than toy.

Woodstock Daisy; 2d, Dole & Thomas's Woodstock Dora. Res., J. P. Willey's Queenie W. Very high com., J. M. O'Brien's Lady. High com., J. Donovan's Beatrice and J. P. Willey's Bessie Beard. Com., F. P. Comstock's La La and J. Donovan's Cleo III.—ANY OTHER COLOR—NOT OVER 28LBS.—1st, G. L. Tarr's Bim; 2d, H. B. Tallman's Daisy.

IRISH WATER SPANIELS.—1st, F. B. Tyrell's Mike O'Donahue; 2d, C. C. Prescott's Curley.



SPANIEL PUPPIES.—1st, Ancient and Modern Spaniel Kennels' Fascination; 2d, J. Donovan's Woodstock Daisy; Reserve, Dole & Thomas's Woodstock Dora. Very high com. and high com., Miss M. M. Morse's Shasta II. and Smudge.

IRISH TERRIERS.—CHALLENGE—1st, Walter J. Comstock's Dunmurry.—OPEN—*Dogs:* 1st, Walter J. Comstock's Boxer VI.; 2d, Walter J. Comstock's Hanover Boy; Res., Toon & Symonds' Jack Briggs. Very high com., Peter R. Clancy's Shaun Boy. High Com., W. A. Dupee's Breda Choice. Com., H. A. Harris' Master

Kilder II. *Bitches:* 1st, Walter J. Comstock's Crato; 2d, Thomas Pulvertaft's Little Maid. Very high com., Capt. F. Ruxton's Brina. *Puppies:* 1st, Thomas Wise's Colleen Ruth; 2d, P. Clancy's Nancy III. High com., Trimount Kennels' Nora III. Com., Thomas Pulvertaft's Lilly.

DANDIE DINMONTS.—1st, E. Brooks's King of the Heather; 2d, J. Ferguson's Sir Robert. Very high com., E. Brooks's Heather Madge. Com., G. M. Carnochan's Meg of the Mill, E. Brooks's Sarah.

SCOTCH TERRIERS.—*Dogs:* 1st, high com. and com., Henry Brooks's Kilroy. Kilbar and Zembra; 2d and very high com., Toon & Symonds's Kilstor and Scotch Hot.

MR. JAMES MORTIMER.

Judge of mastiffs, St. Bernards, Great Danes, bull-terriers bulldogs, poodles, pugs and miscellaneous.

SKYE TERRIERS.—1st, Shinn's Sir Stafford; 2d, Nelson's Lovett.

PUGS.—CHALLENGE—1st, Mrs. M. M. Ballentine's Curtis.—OPEN—*Dogs:* 1st, Mrs. M. M. Balentine's Robin Hood; 2d, Ancient and Modern Spaniel Kennels' Tiptop. Reserve and high com., Seminole Kennels' Kash, Jr., and Wink. Very high com., Mrs. J. Smith's Budge. *Bitches:* 1st, Seminole Kennels' Midget; 2d, L. F. Clarke's Lena. Very high com., Dr. Stearns's Alpha. *Puppies:* 1st, Ancient and Modern Spaniel Kennels' Tiptop; 2d, J. Smith's Pet.

TOY SPANIELS.—CHALLENGE—ANY VARIETY—1st, George W. Fisher's Calumet Ben D'or.

KING CHARLES SPANIELS.—1st, Tom Plant's Cockney Charlie; 2d, Mrs. William Borrowscale's Dora.

BLENHEIM, PRINCE CHARLES, RUBY SPANIELS.—1st, George W. Wambach's Tiney; 2d, Mrs. R. E. Pease's Little Lady.

MISCELLANEOUS.—OVER 25LBS.—1st, Toon & Symonds's Sheffield Lad; 2d, Bradley Kennels' Fuldia Maud. Very high com., Bradley Kennels' Yolo Sport. High com., C. M. Blodgett's Dan.

This concludes all regular classes.

Yachting.

SAILING LENGTH.

Sailing length, commonly called "corrected length," is obtained by adding together the length on waterline and the square root of the sail area, and dividing the sum by 2, the result being in lineal feet. In this method of measurement, adopted by the Seawanhaka Corinthian Y. C. in 1884, and since known as the "Seawanhaka rule," the sail area is measured from the spars, club topsails not being included. The principal clubs now using the Seawanhaka rule are the Seawanhaka Corinthian, New York, Larchmont, Atlantic, Eastern, Beverly, Hull, Massachusetts, Philadelphia, Riverside, American, Knickerbocker, Royal Canadian, Royal Hamilton, Queen City, Oswego, Rochester, Marine and Field, Corinthian of New York, Marblehead, Philadelphia, and Corinthian Navy and Corinthian Mosquito Fleet. The full details of the rule were published in the FOREST AND STREAM of Feb. 25, 1892.

RATING.

The rating of a yacht is obtained by multiplying the length on waterline by the sail area, and dividing the product by the constant number 6,000, the result being a measurement in cubical units approximating to the old Thames tonnage. In this method of measurement, adopted by the Yacht Racing Association in 1887, the sail area is calculated from the drawing of the sail plan, such topsails, working, sprit or club, as are carried being included in the measurement. The established rating classes and the varying proportions of length and sail found in practice, are as follows:

½ rating.....16ft. l.w.l.×183 sq. ft. sail to 17ft. l.w.l.×178 sq. ft. sail.
1 rating.....18ft. l.w.l.×333 sq. ft. sail to 20ft. l.w.l.×300 sq. ft. sail.
2½-rating.....25ft. l.w.l.×600 sq. ft. sail to 28ft. l.w.l.×536 sq. ft. sail.
5 rating.....32ft. l.w.l.×1071sq. ft. sail to 33ft. l.w.l.×909 sq. ft. sail.
10-rating.....38ft. l.w.l.×1765sq. ft. sail to 39ft. l.w.l.×1666sq. ft. sail.
20-rating.....43.5 l.w.l.×2637sq. ft. sail to 40.5 l.w.l.×2580sq. ft. sail.
40-rating.....50ft. l.w.l.×4067sq. ft.
60-rating.....61ft. l.w.l.×5625sq. ft. sail to 68ft. l.w.l.×5294sq. ft. sail.

The rating rule is used exclusively in Great Britain, but is used in America by only one club, the Royal Nova Scotia Yacht Squadron, of Halifax, N. S.

CLASSIFICATION.

In America yachts are classed by some clubs by their waterline lengths alone; in others by their sailing length.

In Great Britain all yachts are classed by their rating, and not by waterline.

FIXTURES.

APRIL.

7. Savin Hill, Mosquito Boats. 7. Mos. Fleet, Open, Boston.

MAY.

21. Winthrop, 3d and 4th Classes, Winthrop.
30. Larchmont, Special, Larchm't
30. Corinthian Mosquito Fleet.
28-31. Oswego, Cruise, Gt. Sodus.

JUNE.

1. Winthrop, Pen., Winthrop.
1. Monatiquot, Opening.
4. Philadelphia, Ann., Del. River
4. Larchmont, Spring, Larchm't.
7. Winthrop, Moonlight Sail.

14. Winthrop, Cash, Winthrop.
24. Chelsea.

We publish this week the conditions governing the new "Coupe de France," recently established by the "Union des Yachts Français." It will now be in order to pull this document to pieces to find proof of the legality and fairness of the new deed, as was done with the Royal Victoria deed. Before adopting such a mode of argument it must be remembered that the "Coupe de France" was bought and paid for by the club making the conditions, just as the Royal Victoria cup was, and each is the absolute property of the respective clubs. The America Cup, however, has never been the absolute property of the New York Y. C., but was intrusted to the custody of the club by five gentlemen who originally owned it, upon certain conditions, which have been openly violated.

The "Coupe de France" was given for a special purpose, of encouraging yacht designing, building and racing in France under certain existing conditions, and thus the terms are quite different from those of a cup intended to be solely a token of international supremacy among all nations.

THE model competition and exhibition of the London Sailing Club suggests the desirability of a similar exhibition under the management of one of the New York or Boston clubs, which with proper management might be made very successful. An exhibition next spring of designs and models for yachts not over 21ft. l.w.l., open to amateur and professional designers, should bring out a goodly number of contestants.

THE LONDON S. C. MODEL EXHIBITION.

THE model competition and exhibition of the London Sailing Club, the particulars of which were published in the FOREST AND STREAM of Feb. 25, has proved a great success, the total number of entries being forty five, including a number of very meritorious designs. The competition was limited to centerboard boats of 1-rating, from 18 to 20ft. l.w.l., with 333 to 300sq. ft. of sail.

The models, to a scale of 1in. to the foot, were shown in the parlor of the L. S. C., at Hammersmith, attracting many visitors. Mr. Dixon Kemp was the judge, his decisions meeting with general approbation. The models were accompanied by the lines and tables of displacement, etc. Most of the models were of the latest type, deadwood cut away and drop rudder, but the first prize was given to a very handsome little cutter of the conventional type, with raking sternpost and usual rudder, her keel contour and overhanging ends being in no way extreme. She was designed by Mr. David Weir, of Partick, Scotland, the handiwork on the model being specially fine, though this point was not counted in the competition. The second model was exhibited by Mr. J. M. Sopher, the head draftsman of Fay & Co., and the third prize went to Mr. Chas. Livingston, of Liverpool, an amateur whose work is well known to our readers. Among the designs receiving honorable mention was one by Mr. Walter Stewart, the canoeist. The success of this experimental exhibition is likely to lead to another next year.

CORINTHIAN Y. C.

THE Corinthian Y. C. of San Francisco, whose station is at Tiburon, Marion county, Cal., has announced the following lengthy programme for the season: April 23, opening day; 24, opening cruise in squadron; 30, cruise to Quarry Cove. May 1, Channel cruise; 7-8, cruise to Vallejo and return; 14, cruise in squadron to Sausalito (S. F. Y. C. opening); 15, run to Blossom Rock Buoy; on signal from flagship try rate of sailing round Presidio Mid Channel Buoy, thence via Sausalito to moorings; 21-22, cruise to Marin Islands and return, 28-29, owners' day; 30, annual regatta (contest for Keil trophy). June 4, annual summer cruise; 5, owners' day; 11, crutse to Marin Islands; 12, return with yachts from summer cruise; 18-19, cruise to Goat Island and return; 25-26, owners' day. July 2-3 4, cruise to Martinez; 9-10, owners' day; 16, cruise to Harbor View; 17, cruise outside; 23-24, cruise to Corte Madera and return; 30 31, owners' day. Aug. 6-7, cruise to Encinal Boat Club, Alameda and return; 13-14, owners' days; 20-21, cruise to Vallejo and return; 27, owner's day; 28, cruise to Paradise Cove and launch race. Sept. 3, owners' day; 4, rendezvous at Cove, yachts and rowboats; 8-9-10-11, admission day, cruise; 17-18, reception to O. C. C. at club house; 24, owners' day; 25, race. Oct. 1, owners' day; 2, run outside; 8, owners' day; 8, cruise to El Campo; 15, closing day. The officers of the club are: Com., W. A. Stringer; Vice-Com., J. W. Peer; Sec'y, E. S. Emmons; Meas., H. H. Garter.

ANCIENT CITY Y. C.

THE annual regatta of the Ancient City Y. C., of St. Augustine, Fla., was held on March 28, 29 and 30, the races being as follows:

FIRST DAY.—FIRST CLASS.

Cheemaun	1 45 04	Estelle	1 40 25
Maud	1 46 29		

SECOND CLASS.

Ada	1 50 36½	Paul	2 00 43½
Undine	1 58 34½	White Maud	2 09 50

THIRD CLASS.

Arrow	1 50 30	Violet	1 57 06

SECOND DAY.—FIRST CLASS.

Cheemaun	1 55 54	Estelle	2 00 57½
Maud	1 58 55½		

SECOND CLASS.

Ada	1 56 27	Undine	1 56 44

THIRD CLASS.

Arrow	2 37 56½	Violet	2 14 40

THIRD DAY.—FIRST CLASS.

Cheemaun	1 55 54	Estelle	2 00 57½
Maud	1 58 56½		

SECOND CLASS.

Ada	1 56 27	Undine	1 58 44

The judges were Messrs. E. D. Sabin, George Alba and J. W. Travess.

SIZE IN YACHT MEASUREMENT.

Editor Forest and Stream:

In your issue of last week I asked you to answer the following question: "In what respect is size different, when boats are in question, from what size is in other things?"

As you have frankly admitted your inability to solve the problem, and request me to do so, I have to say that the size of a boat is her cubic measurement. Of course, the entire boat below her deck should be included, such as keel, centerboard and rudder.

It has been the habit of some persons to speak of a yacht's size as referring to her length, or depth, or some other dimension, without considering the fact that they are talking nonsense and calling things by wrong names.

Concerning the "rating fad," I would say that there are still living a few of us "ancient mariners," and we cannot avoid being amused at the periodical attacks of mental epidemic disease which afflict our modern yachtsmen. No sooner are they well cured of the cutter mania than forthwith appears a new and peculiar malady which apparently impels them to think that the sail area of a boat is a part of her length on water line, and that 4x20x10, is less in "size" than 10x20x4. *Hinc illæ lacrymæ.* THOMAS CLAPHAM.

Roslyn, L. I., March 25, 1892.

Mr. Clapham has given a very good schoolboy's definition of size, practically the length, breadth and depth of a solid body multiplied together; it now rests with him to show how this "size" in any way measures the many factors of speed which are under the control of the designer, the total of which factors it is the aim of all systems of measurement to estimate correctly.

It has been proven repeatedly in practice that neither the displacement, the cubic contents, nor any combination of the three dimensions, length, breadth and depth, will give a rule under which yachts may be built and raced satisfactorily. Under Mr. Clapham's definition, if we take any good boat, of whatever type, Beatrice, for instance, it would be possible to build a boat that even he would pronounce larger, as well as more powerful, and yet that would measure just the same "size" in cubic feet. Such a boat would probably be several feet longer on the waterline, as wide or wider, and deeper by several feet, but with a very hollow section. The freeboard would be reduced considerably, the overhanging sides would be almost entirely cut off, and every possible cubic foot of bulk would be spread out in the three directions of length, breadth and depth, as excess of mere lineal dimension in either of these directions is a far more potent factor of speed than bulk properly distributed to give internal accommodation and seaworthy qualities. The product of such a rule would almost inevitably be a yacht of great length and beam but of shoal body and low freeboard, with great depth of keel, she would have little accommodation below, nearly plumb stem and stern, and a very large rig, a fast boat under the conditions of ordinary summer racing, but a most undesirable one.

The yachtsmen who are interested in this controversy are not looking for a dictionary definition which, in practice, amounts to a mere quibble over words, but for some definition of what is known in a general way as "size," but which in this connection has always been understood as including the power and ability of the boat; a definition which can be utilized in the form of a measurement rule as Mr. Clapham's cannot be.

Mr. Clapham is again in error in diagnosing the sailing length movement as periodical and epidemic. As early as 1882, almost at the beginning of that "cutter craze" which has finally resulted in such boats as Gloriana, Oweene, Gossoon and Pappoose, the so-called "cutter cranks" took up the subject of measurement, attacking boldly the length rules then in vogue, and also the "cubic contents" rule then used by the New York Y. C. So far from being periodical and intermittent, the fight has been carried on steadily and persistently, until after ten years the length rule and the cubic contents rule have been completely wiped out of all club books, and not only all the important races but the great majority of races are sailed under a length and sail area rule; not only is this so in America, but the same measurement has extended to Great Britain. The old Thames tonnage rule has gone to join the mean length and cubic contents rules; and this "new and peculiar malady" has long since become an established fact. We shall be glad to hear anything from Mr. Clapham that will tend to show the weak points of the length and sail area rule, or that will suggest a better one, but we fail to see that his last contribution has thrown much light on the subject.

SEAWANHAKA COR. Y. C.

THE change of location of the Seawanhaka Cor. Y. C. has involved the laying out of a number of new courses off the club station at Oyster Bay, and at the third regular meeting, on April 5, the following amendment to the constitution, adopted at the previous meeting, was passed. To amend Article XXVIII., entitled "Annual Race," to read as follows: "There shall be an annual corinthian race to be sailed on such date as may be determined at the second regular meeting."

The race committee will move the amendment of Rule XX. of the racing rules, entitled "Courses," to read as follows:

Sec. 1. The courses for all races shall be as the race committee may direct for each race. The course selected shall be stated on the blank form of entry sent to each yacht owner in the club, as provided for under Rule VII., Sec. 1.

Sec. 2. The race committee shall have the power to change the courses, or amend the instructions on or before the day of the race, provided notice of such change is given to each yacht before the preparatory signal is given.

Sec. 3. The annual race of the club shall be over such of the following courses as may be specified by the race committee.

LONG ISLAND SOUND COURSES.

Note.—The committe offers herewith for consideration and selection the various courses which follow, will start and finish across an appropriately designated line off Oyster Bay:

Penfield Course.—To and around a stakeboat off Penfield Reef Light, keeping it on the port hand and return. Thirty-five nautical miles.

Crane Neck Course.—To and around a stakeboat off Crane Neck, keeping it on the port hand and return. Thirty-four nautical miles.

Shippan, Matimicock, Shippan Course.—To and around Shippan Point buoy (or stakeboat), keeping it on the port hand; thence to and around Matinicock buoy (or stakeboat), keeping it on the port hand, and return over the same course. Twenty-five nautical miles.

Shippan, Matinicock, Oyster Bay Course.—To and around Shippan Point buoy (or stakeboat), keeping it on the port hand; thence to and around Matinicock buoy (or stakeboat), keeping it on port hand; thence returning direct to finish. Eighteen nautical miles.

Captain's Island, Matinicock, Captain's Island Ccurse.—To and around a stake boat off Captain's Island, keeping it on the port hand; thence to and around Matinicock buoy (or stakeboat), keeping it on the port hand, and returning over the same course. Twenty-one nautical miles.

Captain's Island, Matinicock, Captain's Island Course.—To and around a stakeboat off Captain's Island, keeping it on the port hand, thence to and around Matinicock buoy (or stakeboat), keeping it on the port hand; thence returning direct to finish. Sixteen nautical miles.

Shippan, Larchmont, Shippan Course.—To and around Shippan Point buoy (or stakeboat), keeping it on the port hand; thence to and around a stakeboat off Larchmont Harbor, keeping it on the port hand, and return over the same course. Thirty one nautical miles.

Shippan, Larchmont Course.—To and around Shippan buoy (or stakeboat), keeping it on the port hand; thence to and around a stakeboat off Larchmont Harbor, keeping it on the port hand, thence returning direct to finish. Twenty five nautical miles.

The Shippan Point mark in all cases will be the Cow's Buoy.

NEW YORK BAY COURSES.

Section 4. The following shall constitute the club's New York Bay courses, their starting and finishing line being between the race committee's boat and Craven Shoal buoy, or a stakeboat anchored as near thereto as practicable.

Courses A, B and C, same as heretofore.

Section 5. The courses for open yachts shall be as the race committeee may direct.

YACHT AND LAUNCH BUILDING AT NYACK.

A LARGE number of boats is now under construction at the works of Charles L. Seabury & Co., Nyack-on-Hudson. The first on the stocks is a fine cruising steam yacht for Mr. Walter Luttgen, of August Belmont & Co., which will be launched about May 15. Her dimensions are 85ft. over all, 72ft. l.w.l., 14ft. beam, 5ft. draft. The main saloon and staterooms are located aft of the machinery, and consist of two large double staterooms, fitted with dressing cases, toilet rooms, etc. The one on the starboard side has a bathroom attached. These rooms are finished in ivory white enamel paint, with gold trimmings. The saloon is aft of the staterooms. It has four large folding sofa beds, which may be used as seats during the day. At the forward end of the saloon on the port side is an upright piano. The machinery consists of a Seabury compound engine and a Seabury safety water tube boiler. Linta is the name of this craft, and she will be enrolled in the Corinthian Y C. and the Ranway Y. C., of which Mr. Luttgen is commodore. The Linta will have a complete electric light plant.

Next on the stocks is the 44ft. launch for the Seawanhaka C. Y. C., almost ready to launch. The hull is finished, and a Seabury boiler and a Seabury compound engine are in place. The cabin work and painting will be completed in about two weeks.

Alongside of the Seawanhaka is the small steam launch Anemone, a shoal draft boat specially designed for family use on Lake Erie, near Buffalo. She is the property of a well known official of the N. Y. C. & H. R. R. and has a seating accommodation for a party of 18 to 20.

The next launch is the Flyer, 42ft. long, with a 50-horse power Seabury triple expansion engine and Seabury safety water tube boiler, with a guaranteed speed of 15 miles per hour. This launch will be used principally on the Passaic River, lower New York Bay and Staten Island Sound. It was built for a Newark yachtsman.

Among the unfinished boats which are well advanced are launches for R. Lincoln Lippitt, of Providence, R. I., and John H. Rutherford, of New York, also a 37ft. boat for J. Monroe Shoemaker, of Elmira, N. Y. It is designed for a party launch and has accommodations for 25.

One of the first boats to be launched is W. H. Granbery's 30ft. launch. It has been newly fitted with a Seabury compound engine and Seabury boiler. The machinery is a duplicate of the plant which Messrs. Seabury & Co. supplied with the launch they built for W. K. Vanderbilt's steam yacht Alva, which won the race against the Duke of Rothschild's launch Eros at Nice on the 13th ult. Mr. Granbery's boat is about the same size as the Alva's launch, and will be used on Schroon Lake.

THE AMERICAN CENTERBOARD SLOOP.

Editor Forest and Stream:

Once more I ask indulgence in your impartial paper to say a word for the centerboard sloop, which according to the outlook has become nearly obsolete. Why is this so? Surely the past season is not conclusive evidence against the centerboard sloop, the victories of Beatrix over Oweene, Mineola, Sayonara, Nautilus and Jessica, all keels, should count decidedly in favor of the board, leaving the performances of Gloriana out of the question, as Beatrix more resembles the Burgess keels, being from the same designer's board, his last effort. Beatrix has the same long entrance and the same heavy quarters, the same shoal forefoot and the same overhang, carrying a lead keel at the lowest point. In what way could the question of centerboard vs. keel, broad beam and shoal draft as against narrow beam and deep draft, be more satisfactorily settled?

As to the question of superiority between Gloriana and Beatrix it has never been settled by actual contests, as in their only meeting Beatrix came to grief in the early part of the race. But I do not think that even had Beatrix no accident that she is the equal of Gloriana in point of speed in what would be a scupper breeze for the latter.

Gloriana comes nearer to the idea of what a perfect keel yacht should be than Beatrix is to what a perfect centerboard yacht should be. Beatrix has the same shoal forefoot and scant forebody of her keel sisters. These yachts with long entrances and full quarters are fast in smooth water, reaching or running in light winds at moderate angle of heel, but when driven at high rates of speed in heavy winds and rough water they bury and choke. Such a yacht in a heavy wind and sea has no chance with a yacht that has not this weakness, and why designers will copy the defeated Thistle instead of the victorious Volunteer passeth all understanding.

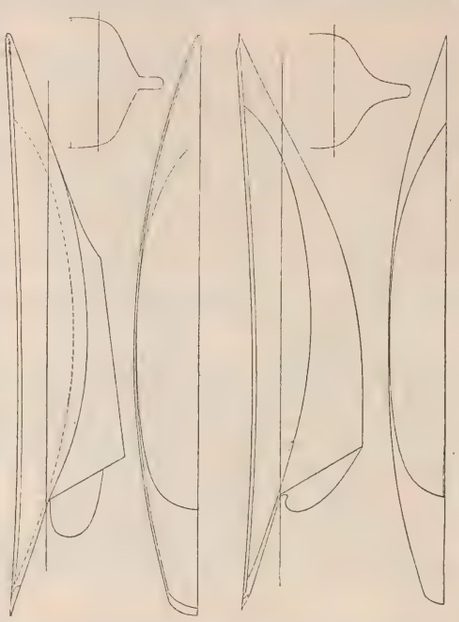
The proportion of beam to waterline length in Beatrix is not far from right, and I feel confident that a Beatrix of 15ft. beam, 46ft. waterline and 7ft. draft, with a centerboard part wood and part iron, dropping bodily to increase her stability, less weight on the keel than she now has, a midship section less hollow in the floor, with a harder turn at the bilge near the waterline, making a section with nearly a straight line from turn of bilge to garboard, where the keel should meet it at right angles, of considerable depth (but not beveled away as is customary); this section to be placed a little forward of the center of load line length, leaner buttock lines with the tuck lower down under water to escape the flattening tendency of tucking in too rapidly, deeper forefoot, the slack in her barpins filled out fair and consequently better bow lines. With a mainsail considerably narrower at the head than the one she has at present, although hers is an improvement on all others I have seen in her class in this respect. There is a waste of effort in these broad-headed sails with their low hoist, they lack concentration in driving power and are not as effective as sails of more hoist and less head on any point of sailing.

It is amazing the effect that overhangs have on some of the designers, there is a perfect stampede for them hit or miss. The fact that Gloriana had an extreme forward overhang seems to give the impression that her marvelous speed should be attributed entirely to that. Although Gloriana has more overhang forward above the waterline, she is fuller and deeper under the mast than any of the yachts of her class, and her beam is nearer her center of load line length. In Oweene we find the opposite, and I am of the opinion that a Gloriana with 2ft. more beam and a centerboard, and 2ft less draft would easily outsail all the keels in existence or now building.

The yachts built of late years with extreme depth of heel and slack forefoot with shoal forebody, require large mainsails and small head sails, consequently a main mast far forward. I think this an error, as the mast should be nearer amidships and by a proper proportion of and location of the center of lateral resistance nearer the center of the vessel that she will steer better at all points of sailing on or off the wind, especially in rough water, and will carry her sail better. I do not think that a sloop yacht in order to sail to windward effectively should have an immense mainsail and small head sails. This theory was exploded in Alborak as well as other theories. By the way, I think that if General Paine should reduce the lead say to eighteen tons, deepen her forefoot, give the sternpost less rake and give her a smaller suit of sails, narrow head, with the mast well aft, that she would push them some yet; not forgetting to remove those hideous channels, which he could do with the mast further aft. I hope this will be done, I am confident it would improve her. Also let us see one more centerboard in the field. LOYALTY.

[Will Loyalty kindly send his present address to this office.—ED.]

DESIGNING.



THE first thing the beginner naturally gropes for is some scientific formula that will enable him with unerring pen to draw in such lines as will insure a successful craft, and it naturally seems odd to him that with all the knowledge that has been gained, all the experiments that have been made, and all the experience of accumulated years, that a mathematical calculation is not in existence that will put doubt to flight and make the student master of the art of designing. Many have applied to us for this royal road to success, and been hard to convince that no such road exists. Our attempts to point out the qualities necessary to make a first rate design have undoubtedly dispelled in a number of minds a notion that existed of our infallibility, and our very efforts have reduced us to the ranks of those who know no more than a very ordinary person. It is perhaps as well so. Had we all the possession of the infallible rule, a level of uniformity would be reached that would abolish one of the greatest charms of our sport, that is its unending possibilities and its entertaining and wondrous variety. That no "Golden Rule and Simple Plan" exists, is amply proved by the continual development in Yacht Designing that is ever appearing, with fresh and even startling features, under the magic touch of the skilful Naval Architects, that from year to year compete to overthrow each other's productions, and although data is of absolute necessity to success, it comes home to us that exact science is as far away from design as the man in the moon. Too many influences exist in the conditions which surround yacht racing, and model yacht racing, to allow of one kind of type being successful, and the man who has digested the conditions under which his craft will have to sail, has taken a big stride in the direction of success. To deal with model yachts, which is our present object, it is of the greatest importance that the size of the pond, or lake or whatever it may be, on which the boat has to sail should be taken into consideration. Small ponds mean small waves and large waters mean large waves, the first short buffets, the second long plunges and big knocks. A boat of moderate displacement and depth will do well on the small waters, and larger displacement and greater depth will be advantageous on the more extensive waters. It is necessary to bear in mind that the waves kicked up by the wind must have opposed to them that form of hull which offers the least resistance to their buffeting. If these waves can get under a sharply turned bilge, each lift they give being exerted against the buoyant hull above them, they will so to speak shoulder a boat to leeward, and by every sideway push destroy her headway motion, whereas if they come against a gradually turned side which when the boat is heeled presents no part for them to lift at they will comparatively expend their force in vain.

This being the case, we come at once to two opposing factors: beam is wanted for stiffness, depth of body is wanted to get a clean, easy turned bilge. We cannot have both, as such a combination would result in so large a displacement as a judicious sail plan would not drive at great speed, and such a form would offer too great resistance to be successfully driven. You ask at once what is a judicious sail plan, and here again the same kind of difficulty presents itself to be determined. The depth and ballast of the boat provides a lever to keep her upright. The sails provide a lever for the wind to press her over. If to get sufficient sail for the big displacement hull you go too high with the sail lever you destroy the effectiveness of the sails, because they are easily canted over by the wind to such an angle as to their power of resistance, and the less lose resistance they offer the less effective they are to propel the boat. There is another view of the same factor, the sail lever, which must be noted. It is a lever being pressed forward by the action of the wind as well as canted over, and with a long sail lever the boat's head is put down more with the forward pressure than by a shorter one. This latter view at once suggests that the form of the hull must be made to resist a pressure which puts the head of the boat down too much, and this as well as the sideway pressure is why we have introduced the question of sail plan in at this point of our remarks.

Now the form best qualified to resist forward pressure and head submerging would be that which had the beam carried a long way forward, and at this stage we are at once brought up by the fact that we must cut it away forward to get a bow sufficiently sharp to divide the water with small resistance, thus we have two desirable factors opposing each other again. In the after body we want a clean run for the water to close in easily, but here we also want to continue beam as far aft as possible to get stiffness. Next we are posed by the question of freeboard. A good freeboard gives us a bit of side to support the ship when she is pressed over, but a good freeboard offers resistance to the wind when sailing to windward. On the question of the length of the sail lever it might be said, keep the sail plan low and spread it well out fore and aft, but the answer to this is that it lengthens the levers fore and aft of the center of lateral resistance of the hull so as to make a boat unsteady on her course. So it is all through, every quality desirable as a separate item is obstructed by other considerations, and this brings us to the absolute state that actual experience is the most necessary thing to make a successful design, as the harmonizing and balancing of these opposing factors is the fruit that grows on the tree of knowledge only, and the man that rears the tree is the most likely man to get the right kind of fruit.—*The Model-Yachtsman and Canoeist.*

MODEL YACHTING.

THE American Model Y. C., of Brooklyn, is preparing for an active season, a number of new boats being on the ways. The accompanying sketches show two of these, one designed by Mr. Herbert Fisher and building for his own use, and the other designed by Mr. F. Nichols and building for Mr. James Sheridan. The former is 70.75in. over all, 45.77in. l.w.l., 13.5in. beam, 10in. draft and 53lbs displacement. The latter is 71.15in. over all, 45.65in. l.w.l., 15.5in. beam, 9.70in. draft and 53.50lbs. displacement. The design was originally intended for a centerboard boat, the board to be of $\frac{3}{16}$in sheet brass, but the plan was changed to make a keel boat. At a meeting of the

club on April 1 at the residence of Mr. Geo. W. Townley the following officers were elected: Com., W. V. Hanson; Vice-Com., G. W. Lyons; Treas., G. W. Townley; Sec'y, H. Melvin; Meas., F. Nichols. The opening races will be held on May 30.

The Philadelphia Model Y. C. is also preparing for a larger amount of racing, the interest in model yachting being decidedly on the increase. The sailing rules of this club are as follows:

1. The yachts shall be divided into four length-over all classes as follows: First class, 36in.; second, 30in.; third, 24in.; fourth, 18in. Beam and depth in each class optional.

2. If the length of a model be between the class measurements it shall be classed in the higher class for racing.

3. First: The course on Centennial Lake may be triangular or straightaway and return. Second: The course shall be decided by the sailing committee.

4. Each match shall consist of two hours sailing.

5 The course must be sailed over as often as possible within the prescribed time.

6. An interval of five minutes will be allowed between the finish of the second boat in one round and the starting of next round.

7. First: The last round shall be started in sufficient time before the expiration of the two hours to allow it to be finished within that time. Second: The mean time of the previous round shall be taken as the probable duration.

8. All yachts entered in a match shall take their stations by lot, No. 1 to windward and the others in sequence.

9. The leeward yacht of the first round shall be the windward yacht of the second round, and so on. The other yachts shall retain their relative positions.

10. Each yacht shall retain its position in the line at starting, even though yachts above it do not start in the round.

11. No pole shall exceed 6ft. in length.

12. The pole must be used only for steering the yacht when standing on shore.

13. Any member infringing the sailing rules shall be warned once, and upon a repetition of the offense shall be declared by the umpire out of that race.

14. At all club races the yachts must pass between two flags, the position of which shall be decided by the sailing committee.

15. The yacht winning a round shall score two points. The second yacht in a round shall score one point. The highest score at the end of the two hours' sailing shall take the first prize, and the next highest the second prize, and so on.

16. All races sailed on or during race days shall start at 3 P. M. sharp. On regatta days the starting time shall be fixed by the sailing committee. In inter club races one starting time shall be agreed upon by the racing committee of the several clubs participating.

CONDITIONS OF THE "COUPE DE FRANCE."

ART. I. The "Coupe de France," established by the "Comité du Yacht Français," is the prize for an international race, to take place in 1892, in which all yachts which conform to the conditions announced below, may take part.

Art. II. This cup is and remains the property of the "Union." The club or the owner of a yacht which may be the holder, shall have but provisional possession.

Art. III. The races shall take place in French waters, between July 1 and Oct. 1; in a locality designated by the "Union" prior to March 1 of each year.

Art. IV The racing rules will be those of the "Union des Yachts Français."

Art. V. The races will be open to yachts of all nations, and of all rigs, and both fixed keel and centerboard, of which the tonnage is over 5 tons and not over 20 tons, French measurement.

Art. VI. Foreign yachts, to be admitted, must be constructed in the country under whose flag they sail.

Art. VII. Of French yachts, only those will be admitted of which the design has been made by a French designer, and which have been constructed and equipped, including sails, in France, and which are manned by a French crew.

Art. VII. Foreign yachts desiring to send a challenge shall give notice, through a yacht club of their country, before April 1 of each year.

Art. IX. Yachts desiring to send a challenge to a foreign club holding the cup, shall notify it through the "Union des Yachts Français," also before April 1 of each year.

The notice of challenge shall contain, first, the name of the owner; second, the name of the yacht; third, the dimensions necessary to calculate the measurement, or the certificate of measurement given by the "Union"; fourth, the rig of the yacht; fifth, her origin, the date of her construction, and her build—wood, iron, steel or composite; sixth, the *fac simile* of her racing flag; seventh, a promise to have no recourse to the decision of legal tribunals for the settlement of any dispute which may result from the various incidents of racing, and in consequence to sign in such a case an agreement for friendly arbitration.

Art. X. When a challenge shall have been sent to the club holding the cup, this club shall make known the names of the yachts which will defend the cup, prior to June 1 of each year.

Art XI. If no challenge shall be received prior to April 1, the races will be postponed until the following year. The same shall be done if none of the yachts which have sent the challenge present themselves to race.

Art. XII. If no yacht presents itself to oppose the challenge the cup will be delivered to the club of the yacht which has sent the challenge; if there are several yachts concerned, they shall race among themselves to determine the winner, as though the challenge had been taken up.

Art. XIII. The contest shall include races, the details of which shall be published each year in a special programme prepared by the "Union des Yachts Français." The course for each trial shall be not less than 20 nautical miles, and the yachts shall cover it at a speed not less than three miles per hour, otherwise the race shall be declared off. A yacht coming in first in two races shall win the cup; if she wins the first two matches the third shall not take place. If each of the matches is won by a yacht of a different nationality, or by different yachts of the same nationality, a fourth trial among the winners shall decide the final winner. If on the three trials, two are won by the same nationality, the final trial shall take place only between these two yachts.

Art. XIX. The club which shall have sent the challenge, or the "Union des Yachts Français," may intrust the cup to the owner of the winning yacht, on condition that he gives sufficient guarantees.

Art. XV. The starts shall take place at exactly the time announced, unless, first, that there is not sufficient wind; secondly, that no accident occur before the start, in which case the judges shall decide whether it is proper to accord a reasonable delay for the reparation of damages.

Art XVI. The "Union des Yachts Français" shall delegate to some local nautical society the management of the races.

Art XVII. The "Union des Yachts Français" reserves the right, as long as it or a French club may be holder of the cup, of modifying or changing the conditions of the races, prior to Feb. 1 of each year.

Art. XVIII. The letters of challenge shall be accompanied by an engagement to be present at the place of entry, which will be indicated in the programme.

The programme for 1892 is as follows:

The foreign yachts desiring to send a challenge for the "Coupe de France" should notify, through a club of their country, the "Union des Yachts Français," before the first of April, 1892. The trials will take place if a challenge is sent, on Aug. 27, 29 and 30, at Havre.

The entrance fee is fixed at 50 francs ($10).

The sum of 1,000 francs ($200) will be awarded to the winner of the cup. Further, the "Union" will present to all holders of the cup who may be obliged to deliver it to a new winner, a miniature copy.

A yacht arriving first in a race but not winning the cup, and of a different nationality from the winner of the cup, shall take a sum of 500 francs ($100); and if there should be two yachts in this case, they shall divide the 500 francs.

NEW JERSEY Y. C.

THE twenty first annual meeting of the New Jersey Y. C. was held at their club house, foot of Tenth street, Hoboken, on March 31, and brought out a large attendance of members.

The reports of the various outgoing officers were read, that of the treasurer being one of the most important; it explained at length the total amount of receipts and disbursements for the past year and the amount or balance on hand. The most important report, however, was that of the trustees, in whom the property of the club is vested. It told of the improvements made during the season just closed, and particularly those made inside the club house, the room having been handsomely decorated and several new models and paintings added to the club's collection. The report suggested important alterations and improvements to the outside of the club house and to the annex club house. The club late in the evening authorized the alterations and improvements made as suggested.

The New Jersey Y. C. has now attained its majority, having been organized in 1871 and incorporated in 1878. For the information of those of our readers unacquainted with the club's present location we would say that they at present, and for more than ten years, have occupied the club house, situated on the brow of the hill, just above Castle Point, and in the historic Elysian Fields, which was built by the late Com. Edwin A. Stevens, its first commodore, for the New York Y. C., and for many years occupied by them; the races of the latter club being started off this club house, and the outer mark being then the southwest spit buoy. This was in the days of the famous sloop Maria.

At present, in addition to large club house occupied by the New Jersey Y. C., they have an annex on the beach in front, in which are kept the yacht tenders, and which is also used as a work shop. The annex has an ample float in front of it. Adjoining the latter on the north, the club possesses a fine sandy beach, with ample room for a dozen boats at a time, and also substantial ways for hauling out. The anchorage is unsurpassed by any club around New York, being a basin with 11ft. depth at mean low water, having ample accommodations for laying any number of yachts. New York can be reached by way of Fourteenth street ferry, four blocks above, to Fourteenth street, or by Barclay or Christopher streets respectively in 15 minutes from the club house.

The club opens this season with a membership close to 100, and a fleet something like 40 craft, of all sizes, from the little 10ft. cat to the 90ft. steam yacht.

For the 21st annual regatta, Monday, June 20, has been selected, the courses being those of this club in the upper and lower bays. An ample sum for prizes was appropriated at the meeting. It was also decided that club go into commission on May 1. The following officers were elected:

Com., John Ortlieb, cabin cat Henry Gray; Vice-Com., Frank S. Ketcham, sloop Charm; Rec. Sec'y, James E. Clark; Fin. Sec'y, Benjamin A. Deetjen; Cor. Sec'y, Louis Wunder; Treas., Edward W. Ketcham; Meas., Henry Snyder. Trustees, Edward W. Ketcham, Edwin A. Stevens, John Ortlieb, Alfred Wenzel, and Paul Creeger. Regatta Committee, Edward W. Ketcham, Gilbert S. Brown, and James E. Clarke. Delegates to New York Yacht Racing Association, George E. Gartland, Frank S. Ketcham, Louis Wunder.

YACHT NEWS NOTES.

At Wintringham's yard the old sloop Crocodile is on the ways for a new stern 5ft. longer than the old, with new decks and general repairs to hull. In the lower shop a handsome 21ft. l.w.l. cruiser is partly planked, a deep centerboard boat with long ends. She will carry a 300lb. plate of Tobin bronze, hung with counter weights so as to be easily handled. The 46ft. catboat, for Mr. C. T. Pierce, owner of the catboat Dot, is about finished, and another cat has been commenced. A steam launch of 50ft. has also been started in the boat shop.

The twenty-fifth annual meeting of the Columbia Y. C. was held on March 28, at the Boulevard Hotel, Broadway and Seventy-fourth street. The officers elected are: Com., Charles T. Wells, Mistral; Vice-Com., A. Y. Tringle, Nautilus; Rear Com., R. P. H. Abell, Armina; Sec'y, George Parkhill; Treas., James A. Weaver; Fleet Surgeon, Dr. Henry M. Griswold, Venture; Meas., J. F. Mitchell; Steward, Thomas O. Spear. Board of Trustees: Ex-commodore William H. Rowe, John B. Haskins and J. M. Vail.

The sails for the two Herreshoff yachts that are to go abroad, the Clyde 2½-rater and the Solent half-rater, were made by Wilson & Silsby, of Boston, who made the sails for Gloriana and Wasp. The same firm is busy with a new outfit of canvas for Puritan in which some new ideas will be tested.

Messrs. Chas. L. Seabury & Co., the designers and builders of steam yachts and launches, will on May 1 remove their offices to 52 Broadway, where they will have increased accommodations for exhibiting a larger variety of yacht models and designs.

Manning's American Yacht List, which will shortly be ready, will be still larger than last year's book, while special effort is being made to secure accurate returns and make the book still more complete.

Peerless, schr., is fitting out at Boston for a trip to New York, having been sold to New York yachtsmen. She was built at Gowanus for Mr. J. Rogers Maxwell, making her reputation as a racer under his flag.

The new Stewart & Binney 21-footer has been named Sirocco by Mr. W. P. Fowle. The boat is spoken of as a very stylish craft, and she has shown up well on her trial trip in a strong breeze.

Verona, 40ft. centerboarder, designed by Mr. Burgess in 1889, has been sold by Mr. Waterhouse to Com. A. E. Austin, R. I. Y. C., who has sold his 30 footer Shark to go to Switzerland.

Messrs. Adams, the new owners of Beatrix, have changed her name to Harpoon, making a fourth in the series of double ciphers, Pappoose, Baboon, Gossoon.

Alborak, Gen. Paine's 46 footer, has been hauled out at Lawleys', where her lead keel will be removed and re-cast and other important changes made.

Marguerite, schr., is out at Lawleys' and her keel has been removed and re-cast, while her foremast and bowsprit have been lengthened.

The spring regatta of the Corinthian Navy will be sailed on June 11 from the grounds of the Hempstead Harbor Club, Glen Cove, Long Island.

The new Stewart & Binney centerboard 21-footer will be named Catspaw, while the Taylor catboat will be named Typhoon.

Stewart & Binney have an order for a 25ft. l.w.l. cruiser.

LADY MEMBERS IN THE A. C. A.

THE following amendments were proposed last fall by the special committee appointed by Com. Lawson They are now published in order to give the required two weeks' notice prior to their final adoption:

The committee recommend the following changes to the constitution, viz.:

I. By inserting a new section numbered 2 in Article IV. to read as follows: Sec. 2. Ladies may be elected associate members by the executive committee when proposed by a member of the committee and seconded by an associate member. Practical canoeists only are eligible, and they can be elected only after publication as provided for active members. The associate membership list may be revised at any time by the executive committee.

Insert Section 1 after Article IV.

II. By adding, in Art. VII., after "same" in fourth line the words: To prepare and promulgate rules and orders to govern the general and ladies' camps; to appoint for a general meet an associate member from each division, with an active member at large as a committee to have charge of the ladies' camp.

III. By adding in Chap. I, Sec. 2 of the by laws after "expenses" in sixteenth line: Visitors when accompanying members may be admitted to the general camp at the discretion of the commodore and the secretary-treasurer, and to the ladies' camp on the invitation of an associate member, at the discretion of the committee governing it, provided that if they spend more than two nights in camp the members introducing them shall pay two dollars for each visitor, but this shall not preclude the admission of any of the immediate family of a member.

By striking out all after "expenses" in sixteenth line and inserting above.

IV. By inserting the word "active" before "member" in every article and chapter in the constitution and by-laws where the honorary or associate member is it specially mentioned.

Signed by the committee, Lincoln B. Palmer, W. P. Stephens and Robert J. Wilken, chairman, and approved in report by executive committee October, 1891, Albany, N. Y. This now needs only vote by committee and publication.

A. C. A. PRIZES.

Editor Forest and Stream:

The regatta committee of the American Canoe Association begs to acknowledge receipt of contributions, or promises of contributions, for prize flags as follows and to cordially thank the respective clubs:

Pittsburgh C. C.	$5
Hartford C. C.	5
Puritan C. C.	Prize flag
New York C. C	5
Springfield C. C.	5
Deowainsta C. C	5
Wm. R. Huntington	5
Carillon C. C.	5
Bulwagga C. & B. C.	5

The circular was as follows. It is repeated here in the hope that it may be a reminder to some of the clubs which have not yet responded.

CIRCULAR TO CANOE CLUBS.

FEB. 6.—The A. C. A. regatta for 1892 at Willsborough Point, Lake Champlain, N. Y., will be held commencing Monday, Aug. 15, according to the programme published under this date in the official organs.

The regatta committee appeal to each canoe club for one prize flag. There will be about 55 flags required. The regatta committee will obtain the flag on behalf of any club desiring to contribute five dollars ($5) for that purpose instead of the flag itself, and all flags obtained by the committee will be according to a regular system of color and design.

The return of the subjoined blank at an early date is urgently asked.

ROBERT SHAW OLIVER,
H. LANSING QUICK,
FORD JONES,
E. H. BARNEY,
R. W. GIBSON, Chairman, 18 Wall St.

The..... agrees to contribute... ..... prize flag for the A. C. regatta, 1892, and will forward the same to the regatta committee on....., 1892.

(Signed).....

Or the following if preferred:

The.....agrees to contribute five dollars ($5) for the purchase of a prize flag on its behalf, and incloses..... herewith.

(Signed).....

R. W. GIBSON, Chairman.

CANOE NEWS NOTES.

The many readers of the FOREST AND STREAM who have enjoyed the song "Necken," published several years since, will learn with regret of the death of Mr. Lundberg, who first introduced the song to Americans. Mr. Lundberg was at one time a resident of Albany, and a member of the Mohican C. C., but for two years past he had been in New York as superintendent of a large manufacturing concern. He had attained high rank in his profession of mechanical engineer. His death took place on March 31, at the age of 37. His body will be sent to Sweden, his birthplace.

Com. Winne was entertained by the Amsterdam C. C. on March 30, the members of the club turning out at the reception. On Saturday night he visited the Yonkers C. C., spending Sunday in New York. The book is now in press and will shortly be sent out. The commodore reports an unusual amount of enthusiasm in all quarters over the coming meet.

A. C. A. Membership.—Central Division: W. D. Goeney. Eastern Division; W. S. Phelps, Burlington, Vt.

We call attention to the paddling canoe advertised in another column, a new boat of the latest model.

Rifle Range and Gallery.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest March 29, at Geo. McCune's shooting gallery, Chicago. The conditions were 25 shots, 25yds., open sights, free off-hand position, Massachusetts paper target:

A McBean	273	Geo McCune	263
Roy Taylor	258	W J Gibbs	265
Thos Ford	261	W J Frisble	256
H S Burley	265	J Hosie	258
F Erickson	253	C A Hankle	264

In a sweepstake, open to all comers, Mr. Hankle won. The contestants were W J Gibbs, Geo. McCune, Roy Taylor, H. S. Burley, Chas. McCune, J. Samieson, W. H. Montgomery, C. Curley.

Turtle Bay Rifle Club.

NEW YORK, March 31.—The final shoot of the continuous match of the Turtle Bay Rifle Club was finished on Tuesday night. The shoot was a handicap one, open to all members, for three months, best three targets of 10 shots to count, 25-ring target. The prizes were handsome and the winners gave a collation to their friends:

	First.	Second.	Third.	Total.	Handi- cap	Final Score.

C Meyner	225	W. GILBERT, Sec'y.	

Wurfflein Rifle and Pistol Association.

PHILADELPHIA, March 26.—J. G. Dillin put up the top score of the Wurfflein Rifle and Pistol Association, and one that will stand a long time as a "star," one that will not be reached for a long time—249 off-hand. Below find full scores of 10 shots at 25yds, off-hand, 1¼in. bullseye, ¼in. rings, possible 250:

J G Dillin	247	E L Gardiner	240	E C Goddard	235
H J Mehard	244	E Travis	240	J B Newton	231
J J Mountjoy	243	L Woods	239	T F Shopert	229
W Wurfflein	243	A J Yergey	238	J C Wurfflein	228

Zettler Rifle Club.

NEW YORK, March 30.—The annual gallery shoot, for cash prizes, open to all comers, held under the auspices of the Zettler Rifle Club, Pres. B. Walther, at their headquarters, 219 Bowery, on Sunday, Monday and Tuesday, the 27th, 28th and 29th inst., proved a great success and closed amidst the greatest excitement among the shooters, and resulted in a bruising finish among the contestants for the 5 best prizes, 2 best tickets to count; and not until the last crack of the rifle had died away was it finally settled who would come in under the wire first on the ring target. G. E. Jantzer, who on Sunday in a great spurt reached the top notch with a score of 74, 75, total 149 out of possible 150 rings, was caught within 10 minutes of the closing of the shoot by that cool and expert shooter Hy Holges, score also 149, and they divided first and second prize. M. Dorrier and Pres. B. Walther shared third and fourth prize alike, with scores of 74, 74, total 148. Wm. Rosenbaum, Dr. J. A. Boyken and G. Snellen split up fifth, sixth and seventh prizes with tie scores of 73, 74, total 147. Eighth prize was won by L. Smith with 74. Ninth, tenth, eleventh and twelfth prize was divided by F. Ross, J. Coppersmith, M. B. Engel, C. Percival and C. Hutch with scores of 73. Fourteenth and Fifteenth prizes were divided by G. Nowak, C. G. Zettler, F. Lindkloster and V. Steinbach with tie score of 72 out of a possible 75 points.

The programme was as follows: Prize shoot, open to all comers, tickets 50 cents, 3 shots, entries unlimited, only one prize obtainable by one shooter, any 22cal. rifle, any sight (except telescopic), off-hand, on the 25-ring target, 15 prizes.

Bullseye target, open to all comers, same conditions as above, on the 4in. bullseye, tickets 50 cents for 3 shots, entries unlimited, for the best center shots by measurement, 10 prizes.

C. W. Horney made the best center shot by measurement and obtained first prize, closely pushed by G. Nowak and C. G. Zettler, who obtained second and third prizes respectively. F. Ross and B. Walther tied for fourth and fifth. W. Rosenbaum sixth, Dr. J. A. Boyken seventh. Butcherking eighth. V. Steinbach ninth. H. Holges and F. Smith tied and divided tenth prize.

A collation was served on the evening of the last day's shoot. Each and everybody drank to the health of each and everybody's good health, and all declared that shooting was the best factor in bringing together good fellows from all over the country and uniting them in the sweet bonds of friendship. In the wee small hours of the morning they all parted, their sights a little bit foggy, but otherwise all right. GUS NOWAK.

Massachusetts Rifle Association.

BOSTON, April 2.—The regular weekly shoot of the Massachusetts Rifle Association was held at its grounds to-day. The day was dark, and the wind rather strong and changeable from 6 to 11 o'clock. The attendance of riflemen was good. Messrs. Prescott and Brackett won association medals. The seal cup matches, that run from Jan. 1 to April 1, have closed, and names of winners will be found below with their winning positions. Next Thursday, Fast Day, the range will be open all day for rifle and pistol shooting. Following are the scores made to-day, distance 200yds., standard American target, all being re-entry matches:

Seal Cup Off-Hand Match.

Second Class.

J H Kruse	25	25	25	25	24	24	23	23	20	20	—234
A Thurk	25	25	24	24	24	23	23	23	20	19	—230
G Freitag	25	25	24	24	25	23	23	22	21	20	—230
J M Bach	25	25	24	23	23	23	23	22	22	20	—230
R Zoch	25	25	24	24	24	23	23	21	21	18	—228
F Kloepping	25	25	24	24	23	21	21	20	20	18	—221
W T Taylor	25	25	24	24	23	22	20	20	17	16	—216
W Forkel	25	24	24	22	22	20	20	20	17	16	—210

Third Class.

A Stadler	25	25	25	25	25	25	22	22	21	20	—235
H F Meyer	25	25	25	24	24	22	21	20	20	18	—224
H Seltenreich	25	24	23	22	22	20	19	19	19	18	—212
H Vanderheyden	24	23	22	22	22	20	19	18	18	14	—202
F Drewes	25	24	22	21	20	20	19	18	18	14	—210
F Kammel	25	23	21	21	20	18	18	18	18	18	—200

The present medal shoot closes next week. The winners will be Dave Miller, J. H. Kruse and H. Seltenreich in the first, second and third class respectively. Kruse will be placed in the first class and Seltenreich in the second.

Every Friday evening the Millers headquarters are placed at the disposal of the wives, sweethearts and sisters of the members. The ladies are practicing for the Millers shoot at Schuetzen Park, when the best lady marksman will be presented with a handsome gold medal.

A hundred shot match is being arranged between Robert Zoch and H. Frederick Meyer of the Miller Rifle Club. The latter did not fire a shot out of a rifle until two months ago, and but for his picking up the "knack" so quick one would naturally wonder at his idea in challenging Mr. Zoch, who has been shooting for the past ten years. The latter is looked upon as the winner although he will have to "shoot" to win.

A hundred shot match took place last Sunday afternoon between Captain Henry Wirth and Frederick W. Kroeger, at the headquarters of the Hoboken Schuetzen Club, 223 First street, Hoboken. Mr. Kroeger has appeared in many well known variety theaters, he making a specialty of "trick, fancy and difficult shooting," under the professional name of Captain Fred Leroy. He had all he could possibly attend to in tackling the genial captain, who defeated his opponent by only a few points. The scores are appended below. The conditions being ten strings of ten shots each, 25-ring target, possible 250 points, the distance was 100ft.:

Captain H Wirth	23	25	23	24	24	24	26	25	24	25—242
	24	23	23	25	25	25	25	25	21	25—241

George Schlicht and Ernest Fischer, of the Miller Rifle Club, will shoot a 100 shot match at headquarters, 80 Hudson street, Hoboken, Sunday afternoon, commencing at 3 o'clock, for $20 a side. Both men have hosts of friends and backers and close scores are expected. This is the first time these gentlemen have come together in a 100 shot match, and it can be safely predicted that both men will do their best to win.

The wives, sweethearts and daughters of the members of the Miller Rifle Club, Hoboken, assembled at headquarters, 80 Hudson street, last Friday evening for practice. Some excellent scores were made, running from 225 to 244 out of a possible 250. The ladies numbered 30, and those present expressed the intention of calling a meeting for the purpose of forming a ladies' section of the Miller Rifle Club. The latter will then place their headquarters at the disposal of the ladies every Friday evening. The next practice night will be on the 8th inst.

The Greenville Rifle Club will soon inaugurate its regular outdoor shooting season at Ambruster's Schuetzen Park, Greenville. Next Saturday afternoon Captain William Robidoux promises to bring forth a likely looking lot of shooters, as this is not their first attempt at this sort of shooting, and predicts that the club will this season clipse all former efforts. The "boys" are looking to their season's out-door shooting with extreme pleasure.

The following scores were made in matches at Thurk's rifle range, Hoboken, during the past few days:

D Van Zant	25	25	24	—74	F Miller	25	25	25—75
Mrs H F Meyer	24	23	15	21	21	—116		
Miss K Borne	23	24	24	20	24	—115		

Last Saturday evening Geo. Baker broke 14 dancing glass balls in 15 shots, at a distance of 50ft.

It is said that a ten-men team match is being arranged between the Our Own Club, Newark, and the Miller Rifle Club, Hoboken, to take place on May 3 at the conclusion of the regular five-men team FOREST AND STREAM match. These clubs have met several times with the Our Owns as victors.

The Hoboken Schuetzen Club, Capt. Henry Wirth, has just completed all arrangements for its annual ball at Russell & Roedel's Schuetzen Hall, 223 First street, Hoboken, on April 24. The gold medal to be voted for and presented to the most popular captain, has brought quite a number of candidates to the field for the honor of winning the handsome and costly medal. Among them are Capt. Joseph Schauer, of Freischütz Company No. 53; Germania Schuetzen Bund, N. J.; Capt. John C. Reinhardt, of the Palisade Rifle Club, Jersey City Heights, and Capt. Wm. Forkel, of Ernest August Company, Germania Schuetzen Bund.

The Jersey City papers last week had several accounts about an alleged match to be shot between Colin Boag, of the Greenville Rifle Club, and William Watts, of the Our Own Club, of Newark, for $25 a side, at the Metropolitan Hall ranges, Greenville, last Thursday evening. Mr. Watts was met in Newark by the writer that evening, and denied all knowledge of such a match being made between him and Mr. Boag. In fact, it was a surprise to him to know he was to shoot a match that evening. The Jersey City publications the next day came out with the announcement that the match was deferred owing to Mr. Watts's illness. There is a colored gentleman concealed in the woodpile somewhere.

The Puritan and Greenville Rifle Clubs recently met in an eight-men team match at the conclusion of a regular five-men FOREST AND STREAM tournament team match, in the Puritan's headquarters, Newark. It was shot on the regular 12-ring target, which is largely used in Newark. The Greenvilles were victors in both matches, they winning both the five and eight men matches.

There is no prospect of a match being arranged between the Palisade Rifle Club, Captain John C. Reinhardt, and the Jefsen Rifle Club, Captain William Jefsen, notwithstanding the acceptance of a challenge of the Palisades, published in the last copy of FOREST AND STREAM, signed by Wm. Delger, secretary, and dated March 23, as the Jefsen club hasn't a proper ten-men team, one that could not be relied upon for a good score. The Jefsen club is still busily engaged in renovating its headquarters, which will soon be just as handsomely fitted up as any other in the county.

Greenville Rifle Club, Capt. William H. Robidoux.—The following scores were made in the medal competition. The conditions were ten shots off-hand, 25-ring target, possible 250; distance 75ft.:

C Boag	25	25	25	25	24	24	24	22	20	—238
J Purkess	25	25	24	24	24	24	23	23	21	—237
H Chavant	25	25	25	24	24	23	23	23	22	—237
H Barr	25	25	24	24	23	23	23	22	21	20—230
W C Collins	25	24	24	24	23	23	22	21	21	20—227
Jos Kaiser	25	24	24	23	23	22	22	22	21	21—227
H Spohn	25	25	23	23	23	23	22	22	21	19—225
J Hill	25	24	24	24	22	22	21	21	20	19—222

The medal competition of the club will soon wind up, for the outdoor season is rapidly approaching, besides it is becoming too warm for indoor shooting.

The indoor shooting of the Excelsior Rifle Club, at headquarters, 78 Montgomery street, Jersey City, will close at the end of this month, as also the weekly competitions for the several handsome and costly class medals. The shooting for the latter has produced much friendly rivalry and will be productive of several close finishes.

The outdoor shooting of the Excelsiors commenced last Friday at the Greenville Schuetzen Park. L. P. Hansen led in the scores with a total of 226, with Wm. Weber and Geo. C. Varick close behind. The scores are appended below. The conditions were: Ten shots off-hand, 25-ring target, possible 250, distance 200yds.:

L P Hansen	23	24	25	20	19	17	24	25	25	24	—226
W Weber	20	24	23	21	21	20	19	18	16	25	—208
Geo C Varick	20	20	19	21	23	20	18	19	21	19	—200
T Hughes	18	18	18	23	22	20	17	19	21	16	—192
H Chavant	15	17	21	25	20	17	18	19	19	19	—190

The outdoor shooting will be held every Friday at the above park, and already the men are deeply interested in the matter, as outdoor shooting is one of the club's strongest "holts."

The programme of the Miller Rifle Club's shoot and festival at the Union Hill Schuetzen Park on Decoration Day will be given in FOREST AND STREAM next week. Money aggregating $500 will be distributed among the best marksmen. Gold medals will also be given in the athletic games, such as the one-quarter, one-half and mile run, mile walk, wheelbarrow race and three-legged race. Altogether the club's annual picnic promises to be a big event. Already the members are looking to their uniforms, and their parade promises to have more participants than in former years, when only thirty or forty would put in an appearance. At the last festival a couple of hundred people stayed away to witness a Hoboken Firemen's Monument unveiling and the park looked rather drear. In fact, the dancing platform was the only crowded place in the park, excepting the shooting house. JAY H. KAY.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

April 7.—C. Detlefsen vs. C. E Morris, at Woodlawn Park, Long Island; 100 birds for $150 a side. Return match at West End, Coney Island, April 21.

April 7.—New York County Gun Club monthly shoot, at Dexter Park, Long Island.

April 7-8.—Union Gun Club tournament, at Springfield, Ohio.

April 9.—South Side Gun Club, weekly shoot at artificials, Newark, N. J.

April 9.—Sewaren Land and Water Club, team and individual contests at artificials, at Sewaren, N. J.

April 9.—John Erb's Old Stone House grounds, live bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J.

April 9.—Sweepstake shooting at Watson's Park, Burnside, Ill.

April 9.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.

April 9.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.

April 10.—Lincoln Gun Club, tournament at Alameda Point.

April 12-14.—Staunton Gun Club tournament, assisted by Interstate Manufacturer's and Dealer's Association, Staunton, Va.

April 14.—Unknown Gun Club, monthly shoot at Dexter Park, Long Island, for two trophies and three prizes in money. Henry Knebel, President.

April 14.—Newark Gun Club, monthly prize and open shoot, at live birds, John Erb's, Bloomfield avenue, Newark, N. J.

April 15.—Fourth shoot of Connecticut Shooting Association, at Union Grove, Hartford, Conn.

April 15.—Jeanette Gun Club monthly shoot, at Dexter Park.

April 15.—New Jersey Trap-Shooter's League, third team contest, on grounds of Brunswick Gun Club, at New Brunswick, N. J.

April 16.—Parkway Gun Club, monthly shoot at Dexter Park, Long Island.

April 16.—New Utrecht vs. Amersfort Gun Clubs, team match, at Woodlawn Park.

April 16.—Atlantic Rod and Gun Club, semi-monthly shoot at West End, Coney Island.

April 18.—Paterson Rod and Gun Club, regular shoot, at Paterson, N. J.

April 19.—Albany Gun Club, bluerock tournament, under management of Paul North, at Albany, N. Y.

April 19-20.—Eagle Grove Gun Club tournament, at Eagle Grove, Ia.

April 19-21.—Elk Park Shooting Tournament, two days at artificials, third day at live birds, Royersford, Pa. Address H. E. Buckwalter, Royersford, Pa., or Harry Thurman, Germantown, Pa.

April 19-21.—Detroit tournament, Detroit, Mich. Address John Parker, Manager.

April 20-21.—Onondaga Rifle and Gun Club, bluerock tournament, under management of Paul North.

April 21.—Essex Gun Club, monthly prize shoot, Jersey City Heights Gun Club grounds, Marion, N. J.

April 21.—Falcon Gun Club monthly shoot, at Dexter Park.

April 22.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.

April 27.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.

April 27.—John Erb's grounds, Newark, N. J., open to the world sweepstake, at 50 live birds per man, $50 entry; beginning at 10 A. M.

April 28-30.—Al Heritage's annual tournament; two days at targets, third day at live birds; Marion, N. J.

April 28.—Emerald Gun Club, at Dexter Park.

April —.—Third team contest of the New Jersey Trap Shooters' League, New Brunswick, N. J.

April —.—Ridgewood Gun Club tournament, at Ridgewood, N. J.

April —.—Territorial Sportsman's Association, first annual tournament, at Las Vegas, N. M.

April —.—Grand sweepstake, open to the world, 50 live birds, $50 entry, birds included, twelve entries, four moneys; sixteen entries, five moneys; twenty or more entries, six moneys. John Erb's, Bloomfield avenue, Newark, N. J.

May 2-7.—Fifteenth annual tournament of the Missouri State Fish and Game Protective Association, Kansas City, Mo. W. V. Reiger, Sec'y.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

Aug. —.—Interstate Manufacturers' and Dealers' Association tournament, at Auburn, N. Y.

DRIVERS AND TWISTERS.

THE tournament of the Staunton (Va.) Gun Club, assisted by the Inter-State Manufacturers' and Dealers' Association, promises to be one of the greatest affairs of the kind on record. The shoot will take place on Tuesday, Wednesday and Thursday, April 12, 13 and 14. Shooters from all over the country will be on hand and a large time is assured by the members of the Staunton Gun Club. The ladies of the Methodist church are to give the meals on the grounds and this fact ought to go a long way toward attracting the shooters. The citizens of the town, young and old, are enthusiastic over the affair and promise to give an exhibition of the famous Virginia hospitality to all who attend. Staunton is an entirely new field for this branch of sport and should be a very prolific one. It is an incorporated city of over 7,000 inhabitants, is the county seat of Augusta county, with telegraph offices, money order offices, etc., and is situated in one of the most attractive parts of Virginia. During the shoot the Virginia Hotel will be headquarters for the sportsmen. The grounds are within easy reach of the hotel and conveyances will be at hand at all times. The majority of Eastern shooters will start for Staunton on Sunday night.

* * *

Several quiet little sweeps were shot on John Erb's grounds in Newark, last Saturday. They were all at four live birds; $5 entry. In the first, Harry Smith, C. M. Hedden, and John Erb grassed 4 each, while R. Smith killed 3 and hurt 2. In No. 2, the same three men as above again got clean scores, while Hunt lost 3. In No. 3, Harry Smith and Hunt killed 4 each, and Hedden and Erb lost each 1. In a miss-and-out which followed Hedden scooped the pot on six straight; Harry Smith going out on the sixth round; Erb on the second and Brown on the first. R. Smith and Caleb Wells then shot a $25 match at twenty-five live birds each, Smith killing 17, to Wells' 14.

* * *

The Wawaset Gun Club, of Wilmington, Del., have elected the following officers for the ensuing year: President, Robert Miller; Vice-President, T. D. Buckmaster; Recording Secretary, W. J. Tussey; Financial Secretary, Walter E. Buckmaster; Treasurer, Thomas Weldon; Captain, R. Miller; Quartermaster, Charles M. Buckmaster; Directors, N. B. Hill, G. W. Miller and J. R. Fitzgerald. All communications can be addressed to W. J. Tussey, Rec. Sec'y, No. 214 King street, Wilmington, Del.

* * *

J. Howard Brouse, of the Philadelphia Shooting Association, recently won a breech loading shotgun at Flourtown, Pa., by breaking 20 bluerocks straight. Mr. Brouse is one of the best shots in the above association and is a genial chap as well, as can be vouched for by the writer.

* * *

A letter from Hal Penrose states that no shoot of the Inter-State Association will be held at Savannah this spring, and that the Pittsburgh shoot will be held during the first week instead of the second week in May as previously announced. The Brooklyn, N. Y., shoot will take place the second week in June, and the Watertown, N. Y., shoot the second week in July. The Association will hold a shoot at Auburn, N. Y., in August on dates to be announced later.

* * *

On Friday, April 15, the third team contest of the New Jersey Trap-Shooters' League will take place on the grounds of the Brunswick Gun Club, at New Brunswick, N. J. The shoot will be a great affair, as at least ten teams will enter. An attractive programme of sweepstake events will be arranged by the Brunswick Club, who will also have an abundant lunch on hand. And by the way, this would be a good time to still further increase the Bandle monument fund by arranging a one-target contest.

* * *

The Williamsport Rifle and Gun Club announces that its fourth annual tournament will be held at Williamport, Pa., on May 3, 4 and 5, and that an attractive programme will be offered. Previous advices gave the dates as May 10, 11 and 12. It was hoped that these dates would be adhered to, as the Pittsburgh tournament of the Interstate Association will take place on the 3d, 4th and 5th.

* * *

Advices from A. C. Collins, of the Colt's Hammerless Gun Club, predict a great time at the club's grounds at Hartford, on April 15, when will be held the fourth monthly contest of the Connecticut Shooting Association. The main contest of the day will be for the trophy presented by Hal. Penrose, of the Standard Keystone Company, this being open to teams of three men each from any club in Connecticut, each man to shoot at 50 Keystone targets.

* * *

D. H. Terry, of Plainfield, and L. B. Campbell, of Little Silver, shot an interesting match on the grounds at Marion, N. J., on March 31. The conditions called for 35 birds per man, modified Hurlingham rules, for $50 a side. Campbell was shot out on the thirty-third round and the race ended there. The detailed scores were as follows:

| | | | | | | | | | | |

t hat will do better work than my Greener, I am ready to buy it for cash and shoot it."

* * *

Eddie Collins, of West Hoboken, and Robert Schrafft, of Newark, shot a series of interesting contests at Wiedenmayer's Park, in Newark, on Saturday, the honors resting about even. The first contest was at 10 birds each for $10 a side, in which each scored straight. This was shot off in a miss and out, Schrafft winning on 10 straight. In a miss and out, $5 entry, Collins won on 5 kills; in another Schrafft won on 5 kills; in a third Schrafft won on 4 kills, Collins's fifth bird falling dead out of bounds. The final tussle was a double bird miss and out, in which Collins killed 4 and won. August Kraemer then shot three $5 matches at 5 birds each against W. Hoag, winning the first, 4 to 3; tieing the second on 5 each, Hoag winning the third on 5 to 4. The birds were a fairly good lot.

* * *

Those shooters who fancy a fairly long race with a good-sized lot of purses at the end, will have an opportunity to find both at John Erb's "Old Stone House" grounds on Bloomfield avenue, Newark, N. J., on April 27. The attraction will be a sweepstake at 50 live birds per man, $50 entry, open to the world, modified Hurlingham rules to govern. The division of the purse will be on the basis of one money for every four entries, this giving nearly everybody a chance to save himself. The shooting will begin promptly at 10 o'clock A. M. John Erb says he will have an abundant supply of birds, and will also have a little cash to back his birds against a clean score. A large number of Connecticut, New York, Pennsylvania and New Jersey shooters have promised to be present for this event, the largest ever projected in this section. Ten men have already given a positive promise to enter, and as many more are expected.

* * *

The tournament of the Elk Park Shooting Association, to be held at Royersford, Pa., on April 19, 20 and 21, is attracting a great deal of attention among shooters all over the country. The following letter, signed jointly by those well-known sportsmen H. E. Buckwalter and Harry Thurman, will give a good idea of the tournament arrangements and the grounds: "As this is a new place for a tournament, the people in the surrounding country are very much interested. We expect a large attendance of new by shooters each day. Royersford is situated half way between Philadelphia and Reading, along the Schuylkill River, and can be reached by either the Pennsylvania or Reading railroads. Passengers coming on the Pennsylvania Railroad will stop at Spring City—just across the river. Both railroads run trains so that you can come or go at almost any time you desire. Elk Park is built on high level ground, and gives excellent light for shooting; has a board fence built around it, and a nice large club house erected on the grounds. We have put in a set of the latest electric pulls. All shooting will be under American Association rules. Targets will be thrown at three cents each, to be deducted from purse before dividing. All purses to be divided into four prizes—40, 30, 20 and 10 per cent. Shooting begins each day at 9 A. M., sharp. After the programme is finished each day extra events will be shot to suit shooters. Experts will have to shoot under expert rules in amateur events. In the open-to-all events there will be no handicap. There are three first-class hotels and five restaurants in Royersford where you will be well cared for at a very reasonable price, and all are situated within ten minutes walk of the grounds. Cabs will run to grounds each day. An eating stand will also be erected on the grounds."

* * *

On March 31, Miss Jennie Smith and J. E. Weaton shot a match at Pine Brook, each shooting at fifty bluerock targets for a $50 purse. Miss Smith broke 46 to Wheaton's 38. On the same day in a match between Frank Class, of Pine Brook and L. Campbell, of Dover; Class killed 25 to Campbell's 19. On April 1, Miss Smith and L. Castle shot a match at ten live birds each, and tied on straight scores.

The Trap on Long Island.

Dexter Park, March 30.—Glenmore Rod and Gun Club. Fine weather, bird good, fair shooting for the Adam Eppig diamond badge and three special class prizes given by Peter Sutter, John Y. Van Wickler and J. Bennett.

R. Phister, Jr. and E. Helgans tied with seven each for the first class prize. Helgans withdrew in favor of Phister. Leonard Eppig and E. Hayder tied in class B, the latter withdrew, Eppig taking the prize. C. Englebrecht with 7 took class C prize.

Referee, J. Pentz. Scorer, W. Walther.

The Oneida County Sportsmen's Association.

A beautifully clear sky, a bright and warm sun that enabled one to stroll about without carrying an overcoat, a left-quartering wind strong enough to cause kingbirds to take some erratic flights and to make pigeons feel like making quick flights: these were the conditions on Tuesday, March 29, when the writer drove out to the shooting grounds of the Oneida County Sportsmen's Association, at Utica, N. Y. This association, one of the most enterprising and prosperous of the kind in existence, had arranged for a kingbird tournament to be held on the above day, and as an additional attraction they had arranged for an exhibition match at 100 live birds each between E. D. Fulford, of Harrisburg, Pa., and Dr. W. H. Booth, of Utica, president of the Oneida County Sportsmen's Association.

The grounds of the club are situated about fifteen minutes ride by electric cars from the business portion of Utica, and while they are all that could be desired for artificial target shooting they are in no way adapted for live bird events. On the front and left the boundary is close to 100yds., while on the right it is scarcely 30yds. Even under American Shooting Association rules it is necessary to extend the line beyond a rail fence and a fringe of trees to get the distance on the right. It is not probable that many live bird events will take place there, unless the boundary is kept within Monaco limits. Beyond the above objection the grounds are admirable. They have been only recently acquired by the association, which intends making very extensive improvements. They are connected with the grounds of the Cottage Hotel, a well-known and popular roadside hostelry, where the shooters were served with fine dinners on the day of the above shoot. The association has a temporary house which gives plenty of room to the shooters, but within a few weeks this will give way to a more modernly constructed shooting house, with all the latest improvements.

On the day of the shoot, both while travelling to the grounds and after arriving there, the striker was compelled at last to believe the recent press reports which had given such glowing accounts of the heavy snow-storm which had recently visited upper New York State. Several times on the trip were sleighs of various kinds encountered, the sleighing being tolerably good beyond the city proper. The path leading from the Cottage Hotel to the shooting house had been cut, for a part of the way, through snowbanks, the snow being piled up on either side to a hight of several feet. All around the hills were covered with a white mantle and taken in all the surroundings were such as to lead one to believe that he had suddenly been transported to a wintier clime. The height to which the sun has climbed, however, will soon carry a way the mantle and lay bare the green beneath.

It was a few minutes after nine when the sport was begun and not until the targets became almost indistinguishable on account of the fading light did the shooters put up their paraphernalia of war. The attendance was very large, all the cities within reach having sent delegations. Among the more prominent visitors were Milton F. Lindsley, of Hoboken, N. J., the great exponent of American wood powder, who shot in great form both at live birds and targets; Frank Allen, of Tawais City, Mich., rattling good shot of the all around style and who was formerly a resident of Utica; Fred Mosher, of Fulton, N. Y., who not only makes lots of sales and friends for the Hunter Arms Company, but who can do great work with the company's L. C. Smith Gun; Will Cruttenden, the inventor of the famous kingbird target by which he swears, as does his partner, Mr. Card, both of Cazenovia, N. Y.; Horace B. Derby, the well known sporting scribe of Albany, who edits the "Rifle, Rod and Gun" of the Albany *Argus*, and wields a facile pen; Chas. H. Mowry, of the *Sporting Goods Gazette*, of Syracuse, a first-class all around shot, a clever entertainer and writer; A. G. Courtney, of Syracuse, who for several years has been in the business of talking up the Lefever guns; Geo. Luther, another good shot from Syracuse and a jovial companion wherever met; Lew Deavitt, of the Auburn Gun Club and captain of Auburn's "Big Four;" Chas. Tuttle, also of the Auburn Gun Club, for the members of whom he sets a tremendously hot pace either in live bird or target shooting; Dr. W. Cavana and W. Cavana, Jr., the latter only fourteen years old but able to break targets well up in 70s; W. E. Hookway and Geo. Halloway, both of Syracuse; E. D. Fulford, of Harrisburg, Pa., fresh from his recent visit to Chicago; Geo. Corning, another good-paced shooter from Auburn; H. C. Gates, attorney for Oneida county, president of the County Association, one of its most expert shots and a royal entertainer, and A. S. Hunter, secretary of the association, who looked after the cashier's office and drew commendations from all for his business-like methods in promptly settling up the events.

The kingbird traps were used, and these gave general satisfaction, as did the targets, which were thrown in good shape. The scores in the target events averaged very high, every man in the party apparently being in the best of fettle. A feature of the day's work was the shooting of young W. Cavana, who broke 27 out of 35 targets shot at, this being a good pace for a boy of 14 years, particularly when he is making his initial appearance before the traps. With a little more experience he will make a dangerous antagonist.

The programme announced that at 2 o'clock Dr. W. H. Booth and E. D. Fulford would shoot an exhibition race at 100 birds each, but the old axiom that "man proposes and God disposes" held good in this case, as Dr. Booth, owing to a severe attack of illness was unable to shoot. When it was found that the Doctor could not appear, it was decided that Mr. Fulford should shoot alone, as birds were rather scarce. This he did, beginning at 2:30. The birds at which he shot were rather an uneven lot, just the kind, in fact, to fool the most expert. Some would dart away from the trap like rockets the instant the rope was pulled, then would come perhaps several "duffers," which would need considerable flagging, and then again would come another run of fast twisters, etc. Some of his shots were equal to any I have ever seen, while in trying to make others, he showed conclusively that he has lost his form. This was particularly noticeable in shooting at birds bearing to the right. The official score shows 90 birds killed out of the 100. Of the ten birds missed two were right-quartering drivers, four were circlers to the right, one an incomer, two circlers to the left and one a left-quartering driver. The two circlers to the left and the left-quartering driver were birds which no man had any license to kill, but the loss of the seven others was due entirely to bad shooting. In nearly every instance in shooting at a bird bearing to the right his first barrel was practically useless, and even where he grassed these birds with his second barrel he "slobbered" them down instead of making clean kills.

Formerly these birds were "cheap meat" for his pot. In all he got 57 birds of the right-bearing breed, and only in eighteen instances did he kill with his first barrel. His work on birds flying in other directions was fully up to his old form, some of his shots on ugly birds which twisted and zigzagged being exceptionally brilliant. Taking all things into consideration, I feel perfectly justified in saying that he is from 6 to 8 birds below the proper form, that he has, in fact, "gone stale," as have many noted cracks at times, and that he has no business with any of the cracks at this time. The proper medicine for him would be the same as is administered to athletes who have suddenly and unaccountably gone "off-form," viz., drop the game for a few weeks and then begin over again.

Taken as a whole, the tournament was a grand success, both from a shooter's standpoint and socially. Everybody was in a holiday humor. The members of the association were untiring in their efforts to give everybody a good time, and I think I voice the opinion of all when I assert that they were more than successful in their efforts. In the target events the entries numbered 21, 30, 37 and 33 respectively, and in the live-bird events there were 22 and 19 entries. There were 2,000 targets and 350 live birds used, this making a good showing, when it is considered that five different changes of traps were required; this work of course consuming some little time. The entire management of the affair was first-class, and the future shoots of the association should bring out at least 100 entries.

Below are given in detail all the various events:

No. 1, 10 kingbirds, $1 entry:

Trap at Watson's Park.

Burnside, Ill., March 30.—Score made here to-day by H. Bee vs. George Burns, 50 live pigeons each, for cost of birds, American Association rules:

H Bee	11111122212221222211212120122022212120202122222—46
Gorge Burns	21012221212121011230022022201110111222212222202021—42

Ten birds each for birds:

Burns	2112211111—10	Bee	1011121121— 9

Ten birds each for birds:

Burns	1120120001—6	F A Place	2110101011—7
R O Heikes	1022121221—9		

Eight birds each for birds:

Burns	11122110—7	Heikes	21211222—8

April 1.—Score made to-day by the Chicago Shooting Club, for club medal, 20 live pigeons each, Illinois State rules:

A J Atwater	12122211202211202—15
B Rock	10001282121112120—15
R O Heikes	10111100120120102220—13
* O Van Lengerke	23112121212101021202—17

* Guest.

Ties on 15 at 10 birds each:

Atwater	2022110220—7	Rock	2022221212—9

Atwater and Rock were tied for the medal last shoot, and to-day's shoot was to settle it, thus Rock wins both times.

Bluerock medal, 25 each: Heikes 16, Atwater and Rock 17. Will settle the tie next shoot. Ravelrigg.

Boston Shooting Association.

Wellington, Mass., April 2.—A strong and changeable wind blew across the traps at the grounds of the Boston Shooting Association this afternoon, giving lots of speed to the targets and assisting a large percentage of them to escape the numerous pellets of lead sent in pursuit. There is considerable sport shooting at targets in a strong wind, but it isn't often thake even the experts are able to break all their birds, for there is a good deal of guesswork as to where and how fast the birds are going. The breeze was strong enough to-day to keep the scores down, and many of the men failed to break more than half their birds.

Merchandise match at 15 singles and 5 pairs—Class A: Cowee and Perry 16, Barrett and Hill 14, Stanton 13. Class B: Gore 17, Daniels and Bradstreet 16, Climax 15, Stone and Warren 14. Class C: Hardy 14, Coughlin 10, Peabody 4.

Over a dozen sweeps were shot.

At a business meeting held during the afternoon seven new members were voted in. The Association will hold an all-day shoot Fast Day, April 7.

The Budd—Fulford Report.

Editor Forest and Stream:

A few words in regard to Mr. Hough's alleged "garbled" report of the Budd-Fulford shoot. Before I noticed Mr. Hartley's flag of truce I had read Mr. Hough's account of the shoot with considerable pleasure and a small amount of regret.

Mr. Hough's style pleases me. He says what he has to say. I did regret to know that Mr. Fulford was beaten so soon after having won his well-earned honors. I am not sorry by any means that it was Mr. Budd who did it. One thing I failed to observe in the account of the shoot was anything of an offensive nature to any one mentioned in it.

It may have been there. I will not say it wasn't. The feathers in our scalp locks are so long that they wave round and often obscure our vision.

Mr. Hartley has issued his defi, and done it fearlessly it seems. I hope that we shall soon hear the safe doors at Billy Mussey's grind as they did once upon a time for Mr. Fulford.

The morning papers state that Mr. Fulford is pining for the American Field championship cup, and has challenged our J. A. R. Elliott, who now holds the cup.

We are told that the shoot will occur within thirty days and will occur in this city. That's good. There is a large number of our sportsmen who would like to see Mr. Fulford shoot. We are inclined to believe that he will leave Kansas City empty handed so far as the cup goes, although he can get some side shoots for a small purse without a doubt if he wants them. Brinkstine.

Kansas City, Mo.

LOOK OUT FOR IT.

Something new in reporting a trap shoot. It will surprise and please you. Look out for it in an early issue.

The Big Shoot at Wilmington.

SOME great sport was enjoyed by members and friends of the Wilmington (Del.) Gun Club on Tuesday, Wednesday and Thursday of last week, experts and novices from all over the country being present. The shoot took place at Riverview Park, about ten minutes' ride from the town. The grounds face the east and are well adapted for shooting purposes. The weather on the first and second days was fine, excepting about noon on Tuesday, when a high wind interfered somewhat with the flight of the targets. The members of the club had but little opportunity to shoot, as they were kept busy entertaining their guests and keeping affairs running smoothly. A feature of the second day was a subscription shoot, the proceeds of which are to be devoted toward the purchase of a monument commemorative of the memory of the late Albert Bandle. The scheme was proposed by Thomas H. Keller, who made a speech eulogistic of Mr. Bandle, who during life was an esteemed friend of "Tee Kay." Each man in the party paid in $1 and shot at one target. The money was placed in the hands of W. Fred Quimby, and it is sincerely to be hoped that the amount will be swelled by the proceeds of like events at other tournaments.

Among the well-known shooters who took part in the tournament were E. D. Miller, of the Standard Keystone Target Company; W. Fred Quimby, of New York; Eddy Collins, of West Hoboken; Neaf Apgar, of Plainfield; T. H. Keller, of the United States Cartridge Company; W. R. Hobart, of Von Lengerke & Detmold; Capt. Cranmer, of Jersey City; W. Wagner, J. Baltzley, G. S. Atwater, J. H. Gulick, W. Mattingly, R. Rothwell, Jr., J. H. Hunter, of the Washington Gun Club; Major R. Heber Breintnall, of Newark, N. J.; R. T. Clayton, of Tamaqua, Pa.; H. and W. Davids, of Philadelphia; Harry Thurman and Wm. Green, of Germantown, Pa.; J. H. Landis and the celebrated Wolstencroft brothers, William and James, of Philadelphia.

The full programme of scheduled events was shot on the first and second days, but at noon on the third day a heavy rain storm cut short the fun as the sixth event was being shot. The tournament, outside of this stoppage was a grand success in every particular. Below will be found detailed scores of all events:

The First Day.

No. 1, 10 singles, $1 entry:

Colt Hammerless Gun Club's Medal Shoot.

HARTFORD, Conn., April 2.—The following scores were made by members of the Colt Hammerless Gun Club at their grounds today. Conditions: 25 Standard Keystone targets per man, 3 angles:

E Decker	1111111111111111111111—25
M F Cook	1111111011111111111111111—23
C H Sterry	1111111111011111111111111—23
Fred Risley	1111111101111011111111111—23
John Alger	1111111101111011111110111—21
A "Wood"	1011111011111111111111101—21
O B Treat	0101111111101101111111111—21
Wiley Hills	1111111111111111111001111—21
Chas L Hotchkiss	1111011111111111111011101—21
Fred Green	1111011111111111111111110—20
J J Pe'rd	1011011101111111111111101—19
F H "Whit"	1111011111111111111101010—19
Edward O Goodwin	1011010111011111111101011—19
M E White	1101011010110101011100111—16
A D Parsons	0111001111010101010011111—16
S T Colt	1011001101100110010011001—13

After the medal was shot for the following sweeps were in order: Nine Standard keystone targets, entrance 25 cents:

Fred Risley	111111111—9	O B Treat	010111111—7
C H Sterry	111111111—9	L Olmstead	110110111—7
A Wood	111111111—9	C Baker	111010111—7
F H Whit	011111111—8	John Alger	110111100—6
C L Hotchkiss	111101111—8	E O Goodwin	111110000—5

Second sweep, same as above:

C H Sterry	111111111—9	John Alger	111110001—6
L Olmstead	111110111—8	F H Whit	000011111—5
A Wood	111101111—8	E O Goodwin	000110001—3
M F Cook	111111011—8	A C Collins	100010010—3
O B Treat	111001101—6		

A. C. COLLINS.

Florida Gun Club.

FLORIDA, N. Y., April 2.—Match at 10 bluerocks:

C Vernon	1111111111—10	W Rammage	1010011111—7
J Stage	0111111011— 8	H Sprague	1011010001—5
J Degraw	1110111101— 8	W Gross	0000101111—5
D Boyd	1111011100— 7		

The Auburn Gun Club's Great Day.

THE pretty little town of Auburn, N. Y., has a number of wonders, chief among these being the Auburn Gun Club, the "Big Four," and the Osborne House. The order in which these wonders rank depends somewhat upon the object of your visit. If to shoot put the club No. 1; if to eat, drink and rest in good style, the hotel occupies the premier position; but if you go there to shoot and have a good time the famous "Big Four" will be pointed out to the visitor as perpetual possessors of the right of the line, regardless of the only of those who are crowded to the wall. The great Auburn Prison, the fine shaded drives, the handsome and well appointed hotels, stores, etc., the chain of beautiful lakes within reach of the town, all these pale when compared to the attractions pointed out by the magic quartette. If you want to skin over the road at a 2.25 clip, Eddy, Parker's pacer and sidebar buggy are at your disposal in a jiffy. If you are in the humor for a skim over the water, Lew Devitt knows just where to find a yacht ready to start. If hunger assails you, Eddy Cosgrove can show you a model restaurant, where "all the comforts of home" will be placed at your disposal, and if you want anything in the way of sport and frolic, Jack Titus will assist the above mentioned three in guiding you to theatre or club room. Yea, verily, the "Big Four" are a great institution who are bowed down to in homage by the rest of the Auburnites.

But it was not the above jolly quartette alone which prompted Milt Lindsley and the writer on March 30 to take a train at Utica and stop off at Syracuse to shake hands with jovial George Luther, go to Fulton to meet whole-souled Harvey McMurchy and sedate George Mosher, and be conducted through the colossal gun plant of the Hunter Arms Company, Mr. McMurchy meanwhile giving a practical working illustration of the method of manufacturing the L. C. Smith gun, of which history I shall have more to say in the near future. Harvey's California road-runner and his boa-constrictor skin, the trophy won during the great trip of the U. S. Cartridge Company, and other interesting relics all came in for their share of attention at the factory. Then came the return trip to Syracuse, the meeting with handsome Al Spangler, who does all the high-grade engraving on the L. C. Smith gun, and with Charley Mowry, who says the *Sporting Goods Gazette* is booming. Next in order was an enjoyable hour at the table in the Burns House, Harvey being the host, Al Spangler, Milt Lindsley, and your humble servant being guests. After supper hurried "good-byes" were uttered and soon "we two" were speeding toward Auburn to be on hand the next day when Paul North, of the Cleveland Target Company, was to show New Yorkers how to throw bluerock targets from the new expert traps by aid of the North electric trap pull, and also give a practical illustration of the working of his recently concocted system of handicapping.

When the American Wood Powder and FOREST AND STREAM reached the Auburn Gun Club grounds, on the morning of Thursday, the fun was well under way and a big crowd was present. There were many there who had been met at Utica two days before, these including Messrs. Tuttle, Luther, Mosher, Mowry, Holloway, Courtney and Hookway. In addition there was rosy-faced W. E. Park, of Athens, Pa., who looks after the road interests of the Wilkesbarre Gun Company's Parry gun; Harry E. Whitney, the world-renowned "boy wonder," who hails from Phelps, N. Y., and shoots in his same old winning pace; James Montgomery and Wm. Ashton, of Syracuse; A. C. Babcock, Stewart and Newton, of the Rochester Rod and Gun Club; and McCormack, of Ithaca. There was also genial D. M. Lefever, of the Lefever Arms Company, of Syracuse, who shoots a stiff gait and overflows with good nature; and Paul North, looking as rugged and bright-eyed as ever, despite a troublesome cold. The local club was represented by nearly a score of shooting members, Chas. E. Tuttle being the chief hustler. The sky was slightly overcast during the day, giving the favorite gray shade, and the air was raw and damp. Shortly after noon the clouds began to look threatening, but fortunately the rain did not take a hand and spoil the game.

The grounds where the shoot took place are situated about a mile and a quarter from the center of the town and are owned by the Auburn Gun Club. They have a shooting house about 40×20ft. with a 15ft. roof. Extending the whole length of the building and about 10ft. in width is a porch from which the shooting can be viewed and where the shooters can be protected from the sun when not at the traps. The above mentioned house is to the right of the entrance, to the left of which is a 10×15 building for the storage of traps, targets, etc. The club has arranged for one of the tournaments of the Inter-State Manufacturers' and Dealers' Association to be held on these grounds during the latter part of July or early in August, before which time they propose expending several hundred dollars in needed improvements to houses and grounds. The foreground is fine for target work, although I am inclined to think that they would not be a grand success for live bird events, the ground pitching in a dozen different ways between the traps and the boundary fence.

The shooting was done from 5 expert traps, under the rapid-firing system, about 4,500 bluerock targets being thrown. Out of this number I doubt if more than 25 were broken, and for some of these breakages the trappers were directly responsible. The North electric pull worked perfectly as usual, and taken all in all Paul North was fully entitled to the congratulations showered upon him after the shoot. His new system of handicapping, however, was what proved the most interesting to the shooters. The system was tried for the first time, and I am inclined to think, with all due respect for those who conceived the famous expert-amateur system, that the North system would supersede all others if given an impartial trial. The expert-amateur system is such as to perpetually handicap a man who shoots above a given percentage, even though a high average one day may be a clear case of luck on the part of the shooter. For instance, at the Williamsport tournament last summer, one amateur on the first day rolled up an average of (I think) 94 per cent. On the next day he was moved into the expert class, the result being that as he was a steady loser in shooting at unknown angles he withdrew from the ranks, so far as the circuit was concerned. This is only one of a number of instances where men have drawn out rather than shoot under a system which handicaps to be sure losers.

The Paul North system does not place a perpetual handicap upon an individual because he chances to "fluke" into a phenomenal gait in a few sweeps, but simply handicaps a man as long as he shoots into first or second position. For instance: In Event No. 1, at Auburn, each man shot at 10 targets from known traps and known angles. G. C. Luther and Paul North broke 10 each and took first money; Chas. Tuttle, Geo. Mosher and R. Peterson broke 9 each and took second money. This made these men experts for the next event. This was at 10 targets. The "experts" shot first from unknown traps at unknown angles, the amateurs, or those who failed to get in first or second position in No. 1, following at known traps and known angles. In event No. 2 of the five "experts," Mosher broke 10, Luther 8, Tuttle 7, Peterson 7 and North 6. Of the amateurs, Carr broke 9, no one else getting more than 8. The result of this was that Mosher (first money in No. 2) and Carr (second money in No. 2) comprise the experts in No. 3, in which event Tuttle, Luther, Peterson and North (experts in No. 2) were returned to the ranks of the amateurs.

No. 3 was at 15 singles, Lindsley breaking 15 and getting first money while second money went to Whitney on 14 breaks. Mosher (first money in No. 2) did not enter; Carr (second money in No. 2) also kept out. This put Lindsley and Whitney in the expert class for No. 4. This explanation gives a clear idea of the working of the system, the great advantage of which is that it handicaps a man only when he wins a first or second position and relieves him of the handicap as soon as he fails to secure either of those positions. Thus a man may be able to go above 90 per cent at all times in shooting at known angles and may not be able under any circumstances to win a place shooting at unknown angles. In a ten-event shoot this man has a chance to win a place in every alternate shoot when the North system is used. Take North and Lindsley in the above events. In the first and seventh events North won a first or second position with the amateurs. In No. 2 he shot as an expert, failed to get one of the above positions and went back to the amateur ranks. In No 8 he won second position as an expert, shot as the same in No. 9 and failed to be placed, which returned him once more to the amateur ranks. Lindsley got into first position as an amateur in No. 3, failed to get a place in No. 4 as an expert, and was put back with the amateurs. In No. 8 he again got a place and in No. 9 broke 5 as an expert, which sent him to amateurdom once more.

After carefully studying the workings of the system and weighing the opinions of those who tried it at Auburn I can form no other opinion than that it is the most equitable yet devised and that a fair trial would give it a firm hold on the shooters of the country.

There is one thing, however, to be considered in shooting under this system and that is the number of targets in the event. If possible all the events should be at 15 or 20 targets each. A man may be able to hold himself together to break 10 straight and yet may be unable to hold anywhere the same pace in a 20-bird event. It is scarcely fair to compel a man to shoot at 20 targets from unknown angles and traps because in the previous event he has broken 10 straight as an amateur. This matter can, of course, be easily regulated by the clubs using the system. I should be well pleased to see the system tried in various parts of the country and hear expressions of opinion from all shooters in regard to its merits or demerits.

During the day's shoot a bountiful supply of sandwiches, pies and hot coffee was kept in the shooting house and was done full justice to by all the visitors. The members of the club exerted themselves to give everybody a good time and pleased all around.

Quite a number of prominent people were at the grounds during the day, among them being the mayor of the town and several alderman. One of the latter, Alderman E. D. Parker, was impressed into the position of trap-puller, and for an hour he held the battery on his lap and pressed the buttons. It was a great day, not only for the Auburn Gun Club but for Paul North and the bluerock people as well. In several of the events the score-sheets show considerably above thirty entries. In the evening the club gave an informal reception to a number of the visiting sportsmen at their club rooms in the city. They occupy three very large rooms, which were at this time undergoing extensive repairs. One room is to be converted into a billiard and pool room, another will be the sitting room and library, which will also be utilized as a meeting room, while the third will be a general lounging room, equipped with tables for cards, chess and other games. A number of the members are enthusiastic rifle and pistol shooters, and for their benefit a range will be constructed. When completed these rooms will be as well equipped as any in the country. Below will be found detailed scores of all events shot:

Ten singles, $1: White 9, North 7, Hadden 5, Pelton 7, Vanderloo 5, Carr 9, Park 8, Whitney 8 Tuttle 8, Whitt 7, Goodrich 5.

Same conditions: White 8, North 8, Hadden 3, Vanderloo 4, Carr 10, Park 9, Whitney 9, Tuttle 7, Goodrich 6, Allen 1, Peet 1, Peterson 9.

Cleveland Gun Club.

CLEVELAND, March 3.—There was an excellent afternoon of sport at the Cleveland Gun Club traps to-day, which was thoroughly enjoyed by the large attendance. In the regular club shoot Tamblyn won the first badge in Class A after a tie Redwing and Holt won the second badge in the same class after tieing with Saffold. Watts won first badge in Class B and Albert second. The following are the scores:

Redwing	1111111110101011011111111111—26
Tamblyn	1111110111011111111111111101—26
Elworthy	1111110101110111111111101010—22

Gaylord	13	Joe	18 McDonald 15
J I C	22	Judge	16 Hart 24
Davis	8	Alex	20

Shoot-off for first badge won by Tamblyn; for second badge by Holt.

Two teams were chosen at the end of the club shoot, and the result was one of the prettiest team races that ever was shot on the grounds. In the first Redwing's side won by 2 birds, and was defeated in the second by 5. The scores are as follows:

First Shoot.			
Redwing	1101011111111—10	Tamblyn	1010010111101— 7
Hart	1111111111111—12	Alex	1001111110111— 7

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

W. E. L., Peoria, Ill.—1. I have noticed that many of the green-winged teal shot here have the under parts very much tinged with reddish while others are not. I have noticed it on certain canvasbacks too, but cannot account for it. Could it be owing to the water they were in? I have seen pools of water that were so full of iron or other mineral substance that they would color a handkerchief if placed in it. Would somebody explain it? 2. How can one distinguish the lesser scaup or little bluebill from the greater scaup or big bluebill? Duck shooting is fairly good and the weather fine. Ans. 1. The matter of the rusty coloration of water birds' feathers has been much discussed, and the opinion is that expressed by our correspondent. It is possible that the decaying vegetation in the standing pools may also exert an influence in this coloring, but mineral matter is the chief agent. 2. Size is the distinguishing character.

L. W., Concord, N. H.—What flies and of what size should be used in the Adirondacks, in vicinity of Fulton Chain of Lakes, about the middle of June? Ans. For brook trout use red and brown hackles, red-ibis, royal-coachman, queen-of-the-waters, professor and medium-sized flies in general. To these you might add the jungle-cock, grizzly-king, great-dun, brown-hen, Canada, Montreal, abbey, white-miller, cow-dung and stone-fly. Use No. 8, 10 and 12 hooks on streams, No. 4 and 6 on lakes and ponds. Lake trout, as a rule, can be taken best with small minnows or by trolling with the spinning minnow in deep water. Among the numerous flies are the silver-doctor, scarlet-ibis, gray-drake, black-June, royal-coachman, professor, Seth-Green, Montreal, silver-king, Jock-Scott and Adirondack. For large fish you will need hooks equal to No 6-0 to 10-0 O'Shaughnessy; for smaller ones 4-0 to 5-0 will answer.

J. H. S., Mechanicsburg, Pa.—1. Are the shad commonly called "hickory" one-year-old shad, and the larger size or roe two years old; or, are the "hickory" a distinct and separate variety? 2. Do shad spawn once or more than once, and do they die after spawning? 3. Do they die in spawning streams or down in salt water? Ans. 1. The hickory shad is a distinct species; it is smaller than the shad and has a long lower jaw that projects far beyond the snout when the mouth is closed. It is inferior in quality for food also, but takes the hook more readily than the true shad. 2. Some shad die after spawning, but most of the spawning fish go back to the sea and return when again ready to reproduce their kind. 3. Shad die in the rivers after the spawning season is closed, but most of the fish descend safely to the sea, unless stopped by the deadly fish traps.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 126 pages. Price $1.00.
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

ANTI-STIFF

STRENGTHENS THE MUSCLES

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting, and stimulating effect on all weak or stiff muscles and sinews. Quick in its action, cleanly and pleasant in use.

Rub it into the muscles every night for a fortnight, and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.

Price 20c. and 35c. per box.

ONTARIO FISH AND GAME INTERESTS.

THE Province of Ontario has gone about the revision of its game statutes in a very sensible and systematic way, and one which cannot fail of good results. In 1890 a commission was appointed to investigate the game and fish supply and to recommend necessary changes in the laws for its preservation. Of this commission Dr. A. G. McCallum was made chairman and Mr. A. D. Stewart secretary, and these gentlemen have done their work with a degree of interest, devotion, public spirit and efficiency worthy of recognition and commendation.

The special subjects of inquiry were (1) as to the advisability of dividing the Province into districts, with close seasons for the respective divisions; (2) as to the deer supply and suggestions of a practical nature for more effective protection of that game; (3) the game laws of the neigboring States with reference to their bearing on the game of Ontario. The commission was empowered to summon witnesses, and to take testimony under oath or by declaration. A comprehensive series of printed questions was prepared, the design being to elicit the fullest possible information from all persons fitted to supply it, and to secure abundant material on which to base suggestions for legislation.

The Commission gave nineteen public hearings in as many different towns, and took down a voluminous store of testimony. This was supplemented with the printed question blanks, which were answered by 650 witnesses as to deer, 503 as to fish, 487 as to birds; general questions by 600, and the inquiries as to other animals than deer, caribou and moose by 576. A most gratifying interest in the inquiry was manifested in all portions of the Province; and while some of the responses were manifestly dictated by selfish motives and were therefore rightly counted as valueless, and while others came from improvident pessimists who declared that there was little game left now and it might as well be made the most of while it lasted, the true sportsmen of the Province have uniformly demonstrated their readiness to sink all smaller considerations of present and personal profit in a desire to insure the greatest permanent good to the greatest number.

The results of the inquiry are embodied in the preliminary report to which we devote several columns today. This report does not show a gratifying condition of things. From all sides, say the Commission, has come "the same sickening tale of merciless, ruthless and remorseless slaughter;" and the work now undertaken should have been done long ago. The recommendations of new laws are such as, it is hoped, may provide the remedies. In compliance with those suggestions, a bill introduced into the Legislative Assembly, and we are informed, enacted into a law, protects moose, elk and reindeer to Oct. 15, 1895; makes the deer close season Nov. 15 to Oct. 15 following; permits hounding only from Nov. 1 to Nov. 15; limits one person to two deer in a season, and protects does and fawns at all times; protects grouse, pheasants, partridge, woodcock, snipe, plover, ducks, hares, rabbits and squirrels from Dec. 15 to Sept. 15 following; quail and wild turkey from Dec. 15 to Oct. 15; swans and geese from May 1 to Sept. 15. Wild turkeys may not be killed before 1897. The sale of quail, snipe, wild turkey, woodcock and partridge is forbidden for three years. Non-residents of Ontario or Quebec must take out a $25 license. A board of five Fish and Game Commissioners is provided, with game and fish wardens.

APRIL DAYS.

AT last there is full and complete assurance of spring, in spite of the baldness of the woods, the barrenness of the fields, bleak with sodden furrows of last year's plowing, or pallidly tawny with bleached grass and untidy with the jetsam of winter storms, and the wide strewn litter of farms in months of foddering and woodhauling.

There is full assurance of spring in such incongruities as a phebe aperch on a brown mullein stalk in the midst of grimy snow banks, and therefrom swooping in airy loops of flight upon the flies that buzz across this begrimed remnant of winter's ermine, and of squirrel cups flaunting bloom and fragrance in the face of an ice cascade that with all its glitter gone hangs in dull whiteness down the ledges, greening the moss with the moisture of its wasting sheet of pearl.

The woodchuck and chipmunk have got on top of the world again. You hear the half querulous, half chuckling whistle of the one, the full-mouthed persistent cluck of the other, voicing recognition of the season.

The song of the brooks has abated something of its first triumphant swell, and is often overborne now by the jubilant chorus of the birds, the jangled, liquid gurgle and raucous grating of the blackbirds, the robin's joyous song with its frequent breaks, as if the thronging notes outran utterance, the too brief sweetness of the meadowlark's whistle, the bluebird's carol, the cheery call of the phebe, the trill of the song sparrow, and above them all the triumph of the hawk in its regained possessions of northern sky and earth.

The woods throb with the muffled beat of the partridge's drum and the sharp tattoo of the woodpecker, and are filled again with the sounds of insect life, the spasmodic hum of flies, the droning monotone of bees busy among the catkins and squirrel cups, and you may see a butterfly wavering among the gray trees soon come to the end of his life, brief at its longest, drowned in the seductive sweets of a sap bucket.

The squirrels are chattering over the wine of the maple branches they have broached, in merrier mood than the hare, who limps over the matted leaves in the raggedness of shifting raiment, fitting himself to a new inconspicuousness.

RESULTS OF PROTECTION.

THE recent reunion of the Pennsylvania Fish Protective Association, says the Philadelphia *Times*, furnished the occasion for a statement of the work of the State Fish Commission, which must be gratifying to every citizen, and which more than justifies the creation of the Commission and the appropriation of liberal sums for its maintenance. The restocking of inland lakes and streams with choice food fishes, the passage and enforcement of laws to protect them in the spawning seasons, and the removal of fish baskets and other traps that have for years depleted the rivers and have destroyed the young fish in countless numbers, have resulted in a rich fishery harvest for the people of this Commonwealth. The combined efforts of the U. S. Fish Commission with that of the State has completely restored the shad fishery of the Delaware. While in 1881 the value of the shad taken in that river was but $80,000, in 1891 it was $700,000.

The *Times* goes on to say that "Gratifying as the results of the work of the State and Federal Fish Commissions have been, the science of artificial fish propagation is but in its infancy. Some means should be found for restoring the shad fishery of the Susquehanna, once the most prolific shad stream in the State. Every stream, pond and lake should be restocked with the fish native to the State, and they should be protected by law against all unsportsmanlike fish traps, and in the breeding season against everybody. With so good a beginning the Association should be encouraged to co-operate with the Fish Commissions with greater zeal than ever. What has been done demonstrates the possibility of making Pennsylvania waters to swarm with fish again, and what is possible in this direction should be done."

SNAP SHOTS.

THE New York Fish Commission car Adirondack rolled into Kingston, April 5, with brook trout fry for the streams in Delaware and Rockland counties. For the region around Stamford and other localities on the line 75,000 fry were sent up the Ulster & Delaware R. R. Elias Orser met the car at Kingston and received 30,000 for brooks in Rockland county. The distribution of trout will be much more rapidly and safely done than by the old messenger shipments, and when the Commissioners fall into line with the modern system of distributing yearlings instead of baby trout, blobs and darters will grow leaner and there will be more big trout for those who go a-fishing.

The New York game bill has been reported and will probably be discussed by the Senate this week. It has been badly mangled in committee. The woodcock season exception has been restored so that the opening date will be Aug. 1 instead of Sept. 1 in counties of Jefferson, Oswego, Lewis, St. Lawrence, Warren, Fulton, Herkimer and Saratoga. The counties of Onondaga, Wayne, Oneida, Cayuga, Wyoming, Genesee, Niagara and Monroe are exempted from the snipe law. The deer hounding season has been extended ten days, from Sept. 10–Oct. 11 to Sept. 10–Oct. 21. Deer are protected five years in Ulster, Greene, Sullivan and Delaware counties. The counties in which quail are protected for five years now comprise Genesee, Wyoming, Orleans, Livingston, Monroe, Cayuga, Seneca, Wayne, Tompkins, Tioga, Onondaga, Ontario, Steuben and Cortland. The close season on wild ducks is made May 1 to Sept. 1 (instead of April 1 to Sept. 1); boat shooting is permitted in Great Sodus Bay. The opening date on Long Island is Nov. 1 (instead of 10) for woodcock, grouse, hares, rabbits and squirrels. In its present form the bill does not embody the sentiments of the sportsmen of New York as expressed at the Syracuse convention.

There are sportsmen in Rochester so firmly set against spring shooting that they are coming out in print in criticism of President Harrison and others high in office who practice spring shooting, while thousands of sportsmen voluntarily abstain, under conviction that immunity at this season is absolutely essential to saving the parent stock. Comment of like character comes from Canada. Dr. Malloch, of Hamilton, Ont., tells us that the good results of spring protection are so manifest, in those localities where it has been most faithfully tested, that wildfowl shooters are firmly convinced of its substantial benefits, as shown by the greatly increased numbers of fowl which return in the autumn. The spring shooting question, experience shows, may be summed up in these few words: Shall we have an uncertain but surely lessening supply of game in spring and fall, or an abundant and certain supply in fall only?

At the meeting of the New York Association for the Protection of Game, last Monday, the treasurer reported that a restaurant keeper named Proctor had paid a fine of $125 for unlawful sale of game, and the Hotel Bartholdi Company a fine of $225 for a like offense, neither of them standing suit. If these concerns enjoyed the same sort of a pull that gives Delmonico protection, probably they would not have bothered to settle up for breaking the game laws. If Delmonico's is to serve its guests forbidden woodcock in July, why would it not be a sensible move to incorporate into the game law a specific exemption in favor of the Fifth avenue restaurant? Then people would understand it and cease blaming District Attorney Nicoll for failing to prosecute.

There is now before Congress a bill to prohibit newspaper publication of a certain class of disgusting medical quack advertisements now so common. Such a law would have no bearing on the FOREST AND STREAM; its advertising columns are as pure as snow.

The Sportsman Tourist.

AN EXPERIENCE AT VERMILLION.—I.

MEMORANDA OF THE EXPEDITION OF H. W. AND T. TO VERMILLION LAKE, MINNESOTA.

ON Aug. 31, Sam and myself left Chicago. At Milwaukee we were joined by Harvey, and thence proceeded to Duluth, Minn., where we arrived at 12:45 P. M. the next day, Sept. 1. The train for Tower left Duluth at 9:50 P. M. While waiting for the train we dispatched Sam back to the city to procure some grub. At Two Harbors, where we arrived at 6:30 P. M., we again transferred our baggage and took a caboose at the end of an ore train. Had no supper other than the crackers and grapes procured by Sam in Duluth. At 12 o'clock at night we reached Tower Yards. Turned in about 1 o'clock in the morning pretty well fagged out.

On the following day (Sept. 2) L. B. Cleaves, with whom we had been in communication on the subject of guides, etc., came to the hotel before we had had our breakfast, prepared to outfit us to any extent. We bought from Cleaves a birch canoe for $7 and rejected the guide whom he had sent us, his price, $5 per day and found, being altogether too steep.

A wagon carried our traps down to the landing, and there we made a dicker with the wharfinger in charge to hire us an extra canoe and man to carry our outfit to our first camp, which we had resolved to locate at or near the mouth of the stream leading from Vermillion to Trout Lake. We also picked up a guide, Chas. Jessmore by name, who seemed to be a clean, gentlemanly sort of fellow, and whose ideas as to the value of his services ($3) were moderate enough to suit us. It was about 10 o'clock when we started. Our packs, tents, provisions, etc., were divided between the two birch canoes. Jessmore occupied the canoe purchased from Cleaves and carried with him most of the provision boxes. Sam, Harvey and myself followed in my cedar canoe, Harvey being at the oars, Sam wielding the steering paddle, and myself holding the map and conning the course. The day was bright and warm, with a rather fresh breeze blowing from the southeast. Our course lay westerly between Ely's Island and the southern shore, between the islands that taper off Crate Point, through the narrows of Minnesota Point, and the western extremity of Pine Island; then due east between the northern shore and the mainland for about two miles.

It was two o'clock, and we were hungry and wearied, and no indications of our destination could be seen. The canoes were far astern and would not close up, and in sheer desperation we at last ran ashore at the first available clearing, and announced that we would camp there. It was not a good camping ground ("It was the worst place on the lake"—comment by the guide), being too shaded; but we were in no mood to look further for a better location. The canoes landed, we took a hasty dinner, our supernumerary departed, and we set about making camp. Jessmore took the axe and struck into the wood to cut browse for our beds. The rest of us cleared the ground of the underbrush, erected one tent, and succumbed. Our energies were about exhausted for that day, and for the several hours succeeding we simply lay around doing as little as possible—that little being of the selfish character pertaining to personal comfort. We turned in that night about eight o'clock.

The day following (Sept. 3) my eyes opened on the world about 5 o'clock A. M. I had slept well and was feeling reasonably comfortable. I got up, took the cedar and rowed eastwardly along the shore, and at not more than a quarter of a mile distant from our camp found the small indenture of Trout Lake River. Up this stream, through the rushes which clustered at its mouth, I rowed until my boat became entangled among the rocks incumbering the channel, where a small rapid betokened the presence of the falls, whose roar I could hear not far distant, but could not see as they were concealed by a turn in the stream. I returned to camp. The boys were up, and Jessmore had the breakfast well under way. I essayed to help Jessmore, and attempted to make the usual flap-jacks out of corn meal and flour, but my success was *nil*. I had forgotten all that I ever knew about cooking, and thenceforth meddled no more in that department. We all fell to work clearing up the camp. There was considerable underbrush to be cut away before we could have room to turn around. That done we set up the other tent, carried the provisions, boxes and kettles in there, and turned the whole outfit over to Jessmore. Out own tent was given an additional layer of browse; some poles and racks for our various belongings were fitted up, and that done Sam and I put off in the cedar and dragged a trolling line along the western shore until six fish, wall-eyed pike and pickerel, rewarded our patience.

In the afternoon Harvey and Jessmore paddled off to a distant point in the west, where Harvey landed, and shouldering his shotgun started off through the woods for partridges. Jessmore returned to camp. Sam and I went down to Trout Lake River in the birch canoe and ascended the stream to the falls. It is a small affair. The total fall is not more than ten feet. There were the ruins of a dam and swamp—mill on the falls, evidently destroyed by fire. Returning to camp we found Harvey already there. He had had no success and a hard tramp through the tangled wood.

Sept. 4.—A rather lowering day. Harvey and Sam went fishing, Jessmore and I took the birch canoe and camera and started for Trout Lake. At the falls I exposed a plate, but probably with no success. Around the falls is a portage of about forty rods leading over a hill and through the woods. Jessmore took the canoe on his back and started up the hill. I followed with the camera and rifle. At the end of the carry I arranged Jessmore in the canoe and took a photograph of him. Entering the canoe we paddled up the stream, pushed out on the lake, and paddled up to the first point, where we turned about and returned. Jessmore's wrist pained him from an old strain, and the clouds looked rainy, otherwise I should have voyaged further. The other party had coasted the shore westward but had caught nothing.

Jessmore got up dinner, a very fair one, biscuit, tomatoes, ham, coffee, etc. In the afternoon Sam and I took the cedar and coasted along the northern shore of Pine Island to the western point, crossed the narrows and landed on the mainland beyond, and then I took the oars and pulled along the main shore back to camp. On the way Sam hooked three pickerel, which we put back into the lake as soon as we had hauled them aboard for inspection. Jessmore avers that at this season pickerel are not good, hence our rejection. He is wrong, but *n'importe*. A huge fish was hooked off an island about a mile from camp, but he broke the line and went off with my best spoon before we could discover his quality.

Rather chilly in the evening. An owl alighted above our heads as we were sitting about the camp-fire, but vanished after dodging two or three pistol shots. I confined myself in the black tent and filled the plate-holders.

Monday, Sept. 5.—The wind still holds in the southeast with disagreeable persistance, and the clouds gather, break and gather again in constant menace. Our camp is very unfavorably situated. It is on an exposed point, swept by every wind except the north. In that quarter it is sheltered by the dense and tangled forest. Wood is plenty and the lake water is of fair quality. Our outlook over the lake and the bordering shores is beautiful, but there the enumeration of our advantages ends. Into the woods about us it is impossible to penetrate except by the hardest tramping and liberal use of the hunting knife. The ground is soft and almost boggy, somewhat like a cedar or tamarack swamp, and covered with moldering trunks of fallen trees, pine needles, dead leaves and the rotting *débris* of former vegetation; and out of it has sprung up a goodly growth of underbrush, young cedars, red willow, maple saplings and white birches. A few pines and hemlock trees loom up column-like among their smaller comrades, and the white birch gleams everywhere, a shaft of marble. It is pleasant to look at, and pleasant to write about, seated here as I am at the foot of a mighty hemlock, and looking from my page to the glories of the forest, bathed in the bright sunlight; but attempt further and closer inspection, and the sense of woodland beauty vanishes with the first switch of a birch bough across the eyes.

Since we have been in this camp (which we have named the Camp of the Three Pines, for the reason that there are about a dozen of those arboreal forms around our tents) I have not been 100yds. into the wood. In fact it is impossible to get anywhere except by canoe along the shore of the lake. On this day Harvey and I took the cedar canoe and rowed along the shore, trolling for wall-eyed pike. An hour at the oars and some three miles of water yielded us one large pike and several pickerel, which latter, in deference to Jessmore's prejudices, we threw back into their element. Those wall-eyed pike make excellent eating, and Jessmore understands exactly how to get them up. The sky cleared as we finished our dinner, and we decided to spend the afternoon in making a small expedition to Trout Lake. We left Jessmore in charge of the camp, took the birch canoe and paddled down to the portage. Sam and Harvey took the canoe on their heads and I followed with the camera and other traps. We paddled up the lake about a mile and landed on a small island at the northern bend of the lake. Harvey and Sam amused themselves picking raspberries, and I undertook to photograph a small island which rose out of the water just north of us. The water of Trout Lake is much clearer than that of Vermillion, but the character of the shores much the same. You see the same forest crowding down to the water's edge, and the same moss-covered rocks outcropping gigantically on every promontory. About 5 o'clock we returned to camp. Sam and Harvey went fishing and caught two wall-eyed pike. In the evening, after the usual chaff about the camp-fire, I retired to the black tent and filled the plate-holders.

Tuesday, Sept. 6.—A mighty rain swept down on us last night, but no damage. The wind has shifted to the west and is blowing a small gale with considerable more frost in its breath than is agreeable. After breakfast (a good breakfast of hot johnny-cake, eggs, bacon and coffee, the memory whereof still lingers in my mouth), Sam and I took the cedar and pulled across the arm of the lake which separates us from Pine Island. As we had explored the westward coasts of this particular sea last Sunday, we now turned our bow eastward. I threw a trolling line over the stern and caught a small pickerel. We wound in and out among the bays and islets until we reached an inlet whence apparently a stream led up into the island. We pushed in through the wild rice, and found ourselves in another arm of the lake, leading far into the island. At the further end was a portage trail, evidently leading across the island to its southern shore. We returned to camp about ten o'clock. The wind had increased and it was growing colder, though the sun still shone brightly. We hugged the camp for the rest of the morning. It was too rough to go fishing, and into the forest we could not go without more labor than we cared to expend.

In the afternoon Sam, who seems to have more activity than the rest of us, took Jessmore and went back into the woods to hunt partridges. While they were gone Harvey undertook to have a swim in the lake, but fearing the slippery bottom and distrusting his own powers of swimming he induced me to hold a rope wherewith he had girded himself to prevent accidents. While I was sitting on the rocks watching Harvey shiver in the cold water and still colder wind, I happened—and just happened—to see that the camp-fire before our tent was running through the dry moss and pine needles on the ground, and under the urging of the gale gathering strength and volume as it ran. I dropped the tow rope and ran up to stamp it out, but had no sooner got there than I saw that there was another fire creeping along the edge of the guide's tent. The coffee-pot, half full of cold coffee, was the first available thing I could lay hands on, and dashing that on the fire with no effect, and seeing that the flames had caught the canvas and that the provision boxes within the tent were blazing, I yelled to Harvey and tore open the canvas and began to drag out the boxes, burning my hands in the operation. Harvey, naked as a Greek god, came scampering over the rocks, burning his bare feet in the smouldering fire, and we soon had two buckets watering the ground. For one exciting moment, maybe two, things looked serious; but by that time we had saved the day and the provisions. The tent, however, was burned on one side to such an extent that we forthwith laced down the fly and used the burned place as a door.

This was about 3 o'clock, and we had finished our salvage work, when Sam and Jessmore returned (without a partridge, of course). The west wind brought up a slight rain and forced us to keep close to the tent until 6 o'clock, when it cleared off and we got supper. We were favored again with a glorious sunset, the second of most wonderfully brilliant color which we had had since we have been in camp here. Sam estimated it to be worth at least seventy-five cents as a chromo. We spent the evening around Jessmore's fire, being there more sheltered from the cold wind, and discussed strikes, Pinkerton police, dynamite, pauper emigration, Know Nothingism and kindred subjects until the darkness hid even the trunks about us, and the camp-fire flickered and died in its embers.

STORIES OF THE OZARKS.—III.

[*Continued from Page 318.*]

"HOW did you get that scar on your cheek?" one of us asked of the old hunter.

"Oh, I got that in a fight with an old buck over in Rippley county. I got more than one scar in that fight."

"Tell us about it."

"Well, you see the old woman and me had just been married, and we had a comfortable cabin and a right smart truck patch in one o' the valleys; and as I could easy get all the game we wanted for meat, we were 'bout as happy as new-married folks generally are. One afternoon in the fall o' the year after we'd had a frost or two, I picked up my gun to take a stroll 'long down the bottom where a crick branch put in.

"I reckon I'd gone about three miles, and seein' nothin', had climbed up on top of a high ridge, where I had an open view for a good distance all around, and sat down with my back agin a tree to rest a bit.

"I didn't sit long, for in lookin' the ground over I saw one o' the biggest bucks I ever set eyes on, but he was too far to shoot, so I slipped back behind the ridge to get the wind of him and got up within a hundred and twenty yards, and saw him standing quartering to me with his head partly behind a tree. I drew a bead to shoot him behind the ear, let her go and he dropped in his tracks.

"Taking him by the horn with one hand, my knife in the other, I turned him over to cut his throat. How it happened I never knowed, and I'll never tell ye; but quicker'n you could bat your eye the knife went whizzin' out o' my hand and I was on my back with the buck standing over me; his hair bristled up like a hedgehog and his eyes as green as grass, but I clung to his horns with a death grip and then the circus commenced.

"It's a fact, pardners, and you may believe me or not, that buck would swing me round as a cat would swing a rat, trying to shake me off; and then he'd beat a tattoo with his hoof on my carcass that was anything but funny and every blow left a cut or a bruise.

"We had it round and round, hammer and tongs and I was gittin' the hammerin', but I stuck to him like a blood-sucker. I was much of a man them days; and if I do say it, I had my share of grit.

"The buck would stop now and then to get his wind, and I was awful glad of it, for I wanted to get my wind, too. Then he'd go at it agin, cuttin' me with his hoofs and tryin' to get at me with his horns. The fracas hadn't been on for five minutes, when I'd been glad to call it even and let him go, but was afraid to do it, for if he'd got a rip at me with them horns o' his'n he'd let the daylight into my innards; and I knew it; and the wolves would pick my bones afore any one could find me. I thought of the old woman at the cabin; and took courage and tightened my grip.

"I was getting weaker all the time, and so was the buck; that was some satisfaction at any rate. How many times we fought over that ground I couldn't tell. Several times I thought I'd have to let him go and take my chances. I felt faint and dizzy; and all at once it began to grow dark; but a sudden motion o' the buck brought me to my senses, when I seed my huntin' knife within my reach. Mebbe you think I din't grab that knife in a hurry. I clutched it as if my life depended on it and I reckon it did; and with one stroke cut his throat and let him go and dropped back in a dead faint.

"I don't know how long I laid there, but when I came to my senses agin I took a good look at myself, and I was covered with cuts and bruises from head to foot; and all the clothes I had on me was the binding to my shirt collar. [His exact language.] The blood from the buck flew all over me, and with the blood from my own wounds, I was bloody as a butcher.

"Gents, I don't say wrong when I say I was in that fight at least an hour, and it was the longest hour in my life, and we had fought over at least a half an acre of ground, as I knew by the gravel bein' torn up and the breakin' down o' the brush.

"The buck left a trail of blood, which I followed a little way down the ridge, where he dropped dead. I'd made a good job a cuttin' his throat if I was in a tight place. The next thing was to hang him up out o' the way o' the wolves; but I couldn't make it; he was too heavy for me, or rather I was too badly used up; but it would a been no trick at all if I'd been at myself. So I left him to feed the wolves.

"I hunted up my powder horn and bullet pouch, that had been torn off of me in the fracas; but I didn't have a bullet to load my gun with; the pouch was empty. But it didn't make no difference nohow. I'd got enough huntin' for one day; and gettin' my traps together I started for home. But which way was home? I was kind o' dazed, I reckon, and for a few minutes didn't know which way to go; but soon got my bearin's and struck out, sittin' down purty often to rest up. When I got in sight of home, the old woman was working in the truck patch; and when she seed me she gave a scream and run to the cabin and barred the door. I s'pose she thought I was the angel Gabriel come to tote her home. A purty angel I was 'thout a feather in 'ary wing. I reckon I looked a heap more like that other feller that runs the brimstone mill.

"It was some time afore I convinced her I was the man that belonged to her and the truck patch, and though badly damaged was good for many more fights if they came in my line o' business. She finally let me in; and then she scarcely knowed me. She said my voice didn't sound nat'ral, and I reckon it didn't; and when I looked in the glass I scarcely knowed myself. The old woman poulticed and plastered me up in good shape; but it was several weeks afore I did any more huntin.'

"The first trip I made was where I killed the buck; but the wolves had picked the bones clean and scattered 'em about for rods. I found the horns and packed 'em home,

and nailed 'em up in the cabin to hang my rifle on. On the butt of one o' the horns was the mark of a bullet, but no sign of a bullet anywhere else, so I allow I just creased it, and that was the cause o' the fight. If I'd loaded my gun and stood at his head waitin' for some signs of life I could a give him another ball and that would a settled him; but I've learnt better since and take no such chances now. I reckon huntin' is somethin' like religion —a man knows a heap more than he puts in practice."

CAMERON.

ELSAH, Illinois.

THE ABANDONED FARMS.

WHY hasn't it struck some of the city residents who are lovers of country life, with its attendant hunting and fishing opportunities, as being a good thing to buy up the old worn-out and abandoned farms of New England so freely offered for sale at prices that are merely nominal, an almost nothing at all, and convert them into summer homes for their families, and shooting boxes and preserves for themselves? Last fall I shot over an extent of country that a few years ago was a thriving farm, but now, alas, run down and deserted, everything was going rapidly to ruin and decay. Some old timber still offered an asylum to gray squirrels, coons, wildcats and foxes, while the heavy growth of white birches and alders on the high lands as well as low lands afforded good cover for grouse, woodcock and snipe. The pastures and meadows, now grown to ragweed and hazel clumps, with osier pigeon berry and bittersweet hedges by the old rail fences, made good hidings and furnished forage for quail and grouse, and we found them plenty too, with no board signs of "Shooting not Allowed" to distract or make afraid. Swamps furnished an agreeable variation from the dry uplands; flight birds here found inducements to linger, and any sort of a season is generally propitious to the sportsman, as both wet and dry lands are apt to be found on these old farms. In May and June I know where there are brooks that sing and babble their way through beautiful green meadows as sweetly as when the farmer lads wooed them with their birchen rods and eyed Limerick hooks; and though only stranger feet tread these banks now, the little streams are neither shy nor selfish, but give up their speckled treasures to native and alien alike.

The old homestead and barns on these old farms are quite often in a good state of preservation, and by the judicious expenditure of a small sum of money could be made even luxuriously comfortable. A broad, long piazza across the front of the house; a bow window where it would catch the first gleam of the morning sun and offer a cool retreat in the hot afternoon of a summer day; a little paint selected in good taste, in colors and shades of soft grays; a clematis and ivy or two—and your old comfortless farmhouse becomes a manor house, and sleeps in cool, soft shadows the long, sunny summer day through, a thing of beauty and joy to its new occupants.

And these old farms are often offered for a song. The neglected appearance—so wearing to the practical farmer —has a wildly picturesque look to the lover of nature, who is not practical. The old place I have spoken of is perhaps too far away from railroads (about three miles) to suit some, but it is beautiful to me and I enjoy every moment of my visit to it. I put my horse in its large empty barn (where once its owner fed his "thirty head" or more), and he stays contented until he hears my footsteps or Ponto's bark on our return.

Last fall when I visited the place a good crop of what in June was prime timothy waved its dry stalks and seedless heads in the whispering breezes, which seemed mourning for those who had left the old home forever. Acre after acre I saw with the grass still standing, waiting for the hand which would never come. What, I thought, could be the history of this neglect? By what subtle influences could these changes have been brought about? Off on the hills a dense growth of forest trees partially shielded the setting sun from my view, but an occasional ray shot out through the branches and fell with a sweet sad grace upon the valley below. Beautiful sight! How many an eye had looked at the setting sun in joy and sorrow, woe or pleasure, in the earlier days from the very spot on which I now stood?

After a day's sport I sat down in the large meadow which lay between the house and the country road, which ran zigzag up the hill to the west, and gave myself up to reverie. A crow flew leisurely across the broad expanse of sky to the wooded height, cawing a hoarse note to some followers of his. A hawk wheeling gracefully on almost motionless wing hung high in air. My eye took in the beauty, and my soul was full. Down deeper in the valley I heard the mill stream chatter and brawl in self assertive cascades; the old mill below I knew had long since gone to ruin. Down by the rickety log dam was a swirl covered with flecks of foam, out of which I had coaxed many a trout in days gone by. With what patience have I whipped the pool, trying one after another of the varied flies on my hat, until no longer able to withstand the temptation there came a rush, a strike, the musical click of the reel, a rapid rush and playing out of line, a glimmer of a silver side, and then the landing of a whopper after almost exhaustion on my part as well as that of the trout.

Don't talk to me of the joys of the mountains and lakes of Upper Maine and the wilderness of New York, I grant you more grandeur and larger game, but give me the pastures, woods, rocks and hills of the old New England farms. There you will find wilderness and beauty, quiet and rest, pleasure, joy and peace. Not so far away but that you are within easy driving distance of railroads, telephones, telegraphs and post-offices.

I am not booming any particular section of country; I have no old farms to sell, I have no reason to offer for writing this article other than my interest in and love for these old neglected places, which appeal to me so touchingly whenever I pass them. Neglected, they are yet full of beauties and loves of the years that are past and gone forever; here it is a lilac bush or an old-fashioned cinnamon rose straggling and blossoming in its wild beauty, or there an old orchard with its trees gnarled and twisted: but they appeal to you almost humanly; and I long to see kind hands again tenderly pruning and training into new growths of grace and beauty the many mute survivors of those who tended them once, and who long since, alas, have moved away or been laid in their narrow homes in yonder graveyard. ALBERT LEWIS.

CONNECTICUT.

THE MORTGAGED FARM.

I.

He bought, in 1665, a farm of stumps and stones,
His name was God-Be-Glorified, his surname it was Jones.
He put a mortgage on the farm, and then, in conscious pride,
"In twenty years I'll pay it up," said God-Be-Glorified.

The mortgage had a hungry maw that swallowed corn and wheat;
He toiled with patience night and day to let the monster eat;
He slowly worked himself to death, and on the calm hillside
They laid beyond the monster's reach good God-Be-Glorified.

And the farm with its incumbrances of mortgage, stumps and stones,
It fell to young Melchizedek Paul Adoniram Jones:
Melchizedek was a likely youth, a holy, godly man,
And he vowed to raise that mortgage like a noble Puritan.

And he went forth every morning to the rugged mountain side,
And he dug as dug before him poor old God-Be-Glorified:
He raised pumpkins and potatoes down the monster's throat to pour,
He gulped them down and smacked his jaws and calmly asked for more.

He worked until his back was bent, until his hair was gray;
On the hillside, through a snowdrift, they dug his grave one day:
His first-born son, Eliphalet, had no time to weep and brood,
For the monster by his doorstep growled forever for his food.

He fed him on his garden truck, and stuffed his ribs with hay,
And he fed him eggs and butter, but he would not go away;
And Eliphalet he staggered with the burden and then died,
And slept with old Melchizedek and God-Be-Glorified.

Then the farm it fell to Thomas, and from Thomas fell to John,
And from John to Eleazur, but the mortgage still lived on;
Then it fell to Ralph and Peter, Absalom and Paul,
Down through all the generations, but the mortgage killed them all.

About a score of years ago the farm came down to Jim,
And Jim called in the mortgagee and gave the farm to him.
There's no human heart so empty that it has no ray of hope,
So Jim gave up the ancient farm and went to making soap.

He grew a fifty millionaire, a bloated, pampered nature,
He owned ten railroads, twenty mines and the whole State legislature;
And thousands did his gruff commands and lived upon his bounty,
And he came home, bought back the farm and the entire county.

—Clipped from the New Orleans Picayune.

THE NARRATIVE CONTINUED BY "FOREST AND STREAM" POETS.

II.

Now, Jim found the "honors easy," and he quickly fixed a slate,
Which sent him to the Senate, to misrepresent the State,
Where he opened on "farm mortgages" with such a woeful howl,
The country thought him either mad, or frightened by an owl.

But the farm was still a puzzle, for he found his little "pull,"
Though very good for politics, refused to work on wool;
So he thought of "Swedish emigrants," and how 'twould do no harm
To try raising Swedish turnips on the long-abandoned farm.

So Jim brought out a colony, and on their marrow-bones
They soon worked in the turnip seed, between the stumps and stones;
But the crop grew up so woody that the men picked out the best,
And converted them to "skaees" and migrated to the West.

When Jim came home from Washington and found his Swedes all gone,
And turnips just as profitless as pumpkins, hay or corn,
He cursed the land, and dammed the brook, which through one corner ran,
And said he'd start a game preserve, and be a happy man.

The neighbors' boys shot all his birds and stole his little trout,
The muskrats burrowed through his dam and let the water out;
They left him of his fish pond but a lot of slimy bogs,
And all the game that Jim could get was turtles, snakes and frogs.

As he gazed in desperation on the stony, sterile soil,
Whereon for years his grandfathers had wasted time and toil,
He was forced to the conclusion that this truth would do no harm,
That the Lord had ne'er intended all New England for a farm!

So he left the land in idleness, that every autumn breeze
Might scatter freely over it the seeds of native trees;
That winters' snows and summers' suns, with nature's helping hand,
Might restore the primal forest, which of old had clothed the land.

CHARLESTOWN, New Hampshire. VON W.

III.

Then Jim became disgusted with his turnips, rocks and "sich,"
Which might be "nuts" for other folks, but didn't make him rich;
So he took a Gov'ment "quarter" of Louisiana pine,
Sold off the timber, pulled the stumps, and tried the horticultural line.

He planted and he planted, with vim and zeal galore,
A hundred thousand orange trees, and half as many more
Of figs and lemons, guavas, goumi, *Diospyros kaki* too,
With plums and pears from far Japan, and the famous *Oon-shi-u*.

But soon curculio found him, and also the cottony-cushion-scale,
The codling moth, and the bitter rot, and erinose, slim and pale;
While the *Cimbex americana* and the *Doryphora decem-lineata*, and
the anthracnose, and the powdery mildew, and a million other
bugs, and worms, and blights, and rots, each the happy possessor of a twelve-syllabled Greek or Latin name,
All came a-trooping to the feast till Jim gave up the game.

LAKE CHARLES, Louisiana. H. P. U.

IV.

Now, when Jim Jones bought back the farm with shekels made from soap,
(I don't know what to rhyme with that unless it's mope or lope),
He reorganized the farm house, turned it into a Queen Anne,
And altered things according to a unique and Jonesy plan.

He had a forty-acre lawn with plants and trees galore,
A cut-stone wall which stretched along a half a mile or more
In front of all this grandeur; and all the country side
Would stop and gaze with bulging orbs and honest local pride.

He had peacocks screaming loudly and eke the Guinea hen,
With terra-cotta deer and dogs and a black bear in a pen;
He had bronze and marble maidens considerably in the nude,
Which by the women folks who passed quite furtively were viewed.

He built a big King William barn to match his fine Queen Anne,
With a bulldog fierce to watch the place, also a black and tan,
And a mastiff and a collie, and aristocratic cats,
That patronized the butcher, but ne'er disturbed the rats.

There were chicken yards and hen coops in the very latest style,
And dandy houses for the pigs, and pots in which to bile
The pumpkins and potatoes (when the winter bleak should come)
With which to feed the porkers, and a rumty-tumty-tum.

When he'd got his buildings finished and fixed up to his notion,
He scoured the country far and wide, and even crossed the ocean,
To secure the finest thoroughbreds that ever were begot,
And when he got them safely home he had a lovely lot.

There were Percheron-Coomassies and Pekin-Plymouth rocks,
Likewise the dainty bantam buck and lordly Berkshire cocks;
Here stood the Jersey Suffolk Punch and there the Aylesbury ram,
That butted all the other stock with a rib-cracking "ker-blam."

A Chester-White-Stoke-Pogis and a short-horn stallion rare,
Made as fine a pair of animals as ever stepped on air;
While Holstein-Friesian gobblers and Clydesdale Wyandottes,
With Poland China Dominiques went cavorting round the lots.

His lovely Shetland Brahmas took the honors at the fairs,
While his Hambletonian mulies and his spangled Hamburg mares,
With all the other thoroughbreds of aristocratic birth,
Made the finest show of gilt-edged stock that ever stood on earth.

He fed 'em and he bred 'em and he nursed 'em night and day,
But with all his loving care and fuss they hadn't come to stay;
For disease with its insidiousness in all its varied phases,
Got in among his blooded stock and killed 'em off like blazes.

His golden Polish coachers were afflicted with the rot,
While on all his Morgan Leghorns there was not a single spot
That the scab had not pre-empted, and his Hampshire-Down Toulouse
Had glanders and distemper just too bad for any use.

Pleuro-pneumonia took a hand and cholera sailed in,
While Texas fever, roup and lice combined the ranks to thin,
'Till all the vets in those 'ere parts were kept upon the rack,
But all their skill availed nil, professional or quack.

Jim's income from his soap works meanwhile was growing small,
He'd mortgaged all his property, hypothecated all
His stocks and bonds, while bank accounts were perilously low,
But still he stuck to live stock, he was bound to make it go.

And go it did, in *tempus*, in a year or two or three,
His cherished stock had vanished, his prosperous soap works he
Had seen absorbed by creditors; dried up the plenteous source,
He bade farewell to live stock hopes and petered out of course.

Now what became of live stock Jones, what further him befel,
How fared he in the strife of life I haven't time to tell;
I'll pass him on to "Ahwahsoose" and he will tell about
Jim's history in graphic style without a bit of doubt.

NEWTOWN, Pa. O. O. S.

V.

Ah do' dnow what for dey'll sen' dat storee 'long to me,
For Ah'll ant never write no rham dat anybodee see;
If M'sieu Mumsin was be here, he'll fix it off fus' rate,
But he'll gone off for veesitin' on Massachusin State.

Ah'll tol' you what, Ah b'lieve he do, dat man hees nem be Jeem,
If he was kan o' sensibly, wen hees farm it ant pay heem;
Hees bloody stock be all die up, hees soap be spill de pot,
He'll can' gat sen' for legislate, on foot he'll had for trot.

He'll cut some pole, he'll deeg some wum, an' 'way he go for feesh,
An' he was took so comfort den, dey not'ing lef' for weesh;
He lislin of de song of bird, he'll smell de posy blow,
An' all de tam he'll wonderin', why 'fore he ant do so.

He fool de traout, he pull de paout, jes' sem de slippy eel,
An' wen he luggin' home hees string, so reech he never feel;
An' he ant miss one bit de frien' dat use for shook hees han',
But lef' heem wen day fan' he'll ant gros riche of soap an' lan'.

Den wen it come de fallin' year he took hol' Glorify hees gun,
Dat ben a hanging on de hook mos' sen de year o' one,
An' he'll go hunt in hwood an' pon' for patteraige an' duck,
'F he can' gat dem he ant feel 'bove shoot squirrel an' hwoodchuck.

He'll let hees farm all grow up hwood an' he was happy be,
Jes' sem as be was be a bird or ant-do-not'ing tree;
An' for all de ting he ever loss, he mos' sorry was for dese,
He'll have let go, wen he'll maght had, mos' any tam he please.

An' wen he'll sit biffore hees fire, dis man dey call it Jeem,
A-t'inkin' baout mos' ev'yt'ing, an' read hees FORES' STRIM,
He'll b'lieve dat if hol' Glorify an' all dat foller he,
Live more lak dis, dey ant dry up, biffore dey was buree.

VI.

LITTLE FORD was reading the paper to Uncle "Thuse," and came across an account of abandoned farms in New England. The old man broke out with, "Whar's de niggers? Whar's de niggers? Dey'd wurk 'em. Dey'd wurk 'em——ef dey had ter;" continuing:

Dere's er lot er young niggers wat's loafin' roun' der stor',
Bodderin' ebery body dats comin' 'fore der do'r;
Sartin, dey's good fer nuffin, en sure ter come ter harm,
Der propper place fer dese niggers is on a 'bandon farm.

Dey'd hev ter hustle es sure es you're born,
Fer dey wouldn't hev der hoe cake ef dey didn't raise der corn;
Es der norven peeple's scrumshun en der darky'd hev ter work,
Fer *dey* wouldn't find his hoe cake en *he* couldn't steal his pork.

BOSTON, Massachusetts. REIGNOLDS.

H. P. UFFORD.

Editor Forest and Stream:

I have just got a copy of the FOREST AND STREAM and am very sad indeed to see that H. P. Ufford, whose familiar signature has been so often appended to articles which I have very much enjoyed, has answered to the last roll call, has been "mustered out." At the same time I am much pleased to see that the Confederate veterans turned out to attend him to his last resting place. Such evidences of fraternal feeling are very grateful to us old soldiers who wore the blue, and always strengthen the bond which binds us closer together as American brothers. O. O. S.

PORTLAND, Oregon.

Natural History.

TAMING HUMMINGBIRDS.

ST. AUGUSTINE, Florida, April 1.—*Editor Forest and Stream:* You some time ago requested me to contribute a chapter on hummingbirds for the natural history department of FOREST AND STREAM. As that is a subject on which I feel quite competent to write, I do it with pleasure in an hour snatched from business.

From early boyhood I have been almost a monomaniac on hummingbirds, and there is probably very little regarding their habits that I do not know. When a small boy I indulged in a feeling of contempt for the ignorance of a person who captured a hummingbird and fed it on "a paste made of wine biscuit and sugar"—the nearest approach to their flower food being simply sugar and water. They cannot live exclusively on insect food, but they cannot live for more than a week or two without it. I dissected one in South America and washed out the crop in a basin of water, when scores of minute insects floated through it. The amount of sugar and water consumed in a day by those we have tamed is surprising—almost a teaspoonful.

Every well informed person knows that the hummingbirds are found only in the New World and the adjacent islands. When Mr. Gould, the famous English ornithologist, came to this country, and at Philadelphia had his first sight of a live hummingbird, his enthusiasm nearly created a doubt of his sanity, and he could scarcely sleep till one was captured for him, which he carried around the streets in a small wire cage attached to a buttonhole in his coat. His great work on the hummingbirds of South America was not made up from personal knowledge of their character and habits, but gathered from travelers and explorers. He never set his foot on South American soil, the habitat of this large family of birds. Yet his descriptions of them are very interesting and reliable, so far as my own observations extend, and I have been several times to South America.

We have but one species, the ruby-throat, this side of the Rocky Mountains, and about a dozen in the west and southwest, while South America has several hundreds already known, and new ones are discovered every year. The long-tailed hummingbird of Jamaica (*Trochilus polytmus*) has been tamed by Gosse, the ornithologist, in confinement, which is a very easy matter; but to tame them without their being captured is far more difficult and interesting, and this I have frequently done since I have taken up my residence in Florida. On one occasion I had undoubted proof of their memory.

On a warm spring day, as my wife and I were sitting on the piazza, she called my attention to one that was at the flowers near us, and almost instantly he darted down and hovered inquiringly around our faces. I knew at once that it was one of our pets of the previous year, and I filled the same tiny bottle with sugar and water that he had been accustomed to feed from. In a few minutes he returned, and when I held the bottle up he helped himself without the slightest hesitation.

We were delighted of course, but our delight was not of long duration, for he was on his way north, accompanied by his mate, for the purpose of rearing a small family. He only called once more, and then left, like a well-trained husband, in the wake of his lordly little wife.

They are the most inveterate little warriors, two seldom coming together without a conflict, and when one has found a field that is worth protecting he stations himself on the nearest dead twig and holds possession until driven off by a stronger bird. Taming them requires a little patience, as they are naturally very shy, but as soon as their confidence is gained they seem to be utterly fearless. To attract them to a bottle a favorite flower must at first be put in so that the end of the corolla reaches the water, and when they once find out that the supply is inexhaustible they pay it very frequent visits and soon want to dispense with the flower altogether.

When we spend the summer here we always have them tamed so that they come to us anywhere around the place. As my room is always open they pay me very frequent visits, and when we are at the table they come in and take a seat with us—on one of our fingers.

I have found it useless to attempt to do anything with them while on their way North. If they are bent on going to a certain place they go, and no attractions will detain them. An occasional pair stop here to rear a family, and when a young bird makes his appearance, about June, we are quite sure that we can keep him and at once set about it. On more than one occasion when we have had a pet, and a stranger has attempted to drive him off and take possession, I have come to his rescue and shot the aggressor. It is impossible to have more than one tame one at a time.

It seems as if there could be no apparent difference between them, but there is, and some of them we have found so uninteresting that we have wanted to get rid of them after taming them.

We usually select a young male, which I know instantly, although no ruby feathers are seen. At first the breast is white, with almost imperceptible gray specks, and in about two months the ruby spots begin to appear, one at a time.

The first ruby feather in one of our pets came exactly in the center of his throat, looking like a ruby breast pin. In the spring all the male birds are in gorgeous attire, and although there are some more magnificent specimens in South America, there are but few more beautiful. It seems to me that they are becoming scarcer every year, and I can only attribute this to their slaughter for ladies' hats; but the dealers will not stop buying them, nor the ladies wearing them; and until they do, the slaughter of the innocents will continue.

It is utterly useless to attempt the protection of anything by law, for ninety pet cent. of every legislative body in the United States knows only politics—simply that and nothing more. Think of appealing to the present Legislature of New York to consider a means of preventing the total destruction of all the song birds in the country! A great majority of them, if they even gave it a thought, would apply for Hill's opinion, and if he should see nothing in it to benefit his party he would answer, "Birds are of no more consequence to me than fish; let 'em slide."

It is very seldom that a hummingbird's nest is found, though the pugnacious little male is apt to betray it if his mate is setting, for his anxiety to drive away intruders attracts attention, and if he is watched he may be seen to alight by the side of the nest to receive the thanks of his mate for his heroism.

When I was about starting on one of my visits to South America, Prof. Agassiz requested me to procure for him from 50 to 100 eggs of hummingbirds, to be used for scientific purposes, apparently ignorant of the fact that one of their nests is seldom found, even in South America where they are most numerous. DIDYMUS.

YOUNG WOODCOCK IN MARCH.

NEWBERN, N. C., April 8.—While looking over stumpage on the edge of a thicket, some seven miles from town, on March 29, I happened upon an old hen woodcock very much fluffed up and flustered, and concluding she had a nest of eggs near by, I commenced a search, when I was astonished to discover three fine young squabs, well feathered and nearly ready to fly. "Reckon they must have took wing next day and are boring somewhere around the slash now," as the old timber hunter who was with me remarked. Presently we mentioned the circumstance to a man whom we found breaking down some cotton stalks near by, and he gave tongue:

"What! them there night snipe? Law sakes! There are slathers of 'em about chere all the time, but I didn't reckon as they were any account. Nobody bothers about hunting of them."

As there is no law in the State of North Carolina, that I can discover, touching the protection of woodcock, which are not recognized as game by the natives, it "looks like there would be a right smart chance" for wing-shooters around here in the course of a month or so.

I notice that the laws of Virginia and South Carolina, to the north and south of us, permit shooting of woodcock until April 1, which is obviously six weeks too long for the open season, judging by the time the birds are known to pair and nest in these parts.

CHARLES HALLOCK.

WILD BOARS FOR THE ADIRONDACKS.

Editor Forest and Stream:

I would like very much to hear your views and get some information from the readers of and correspondents to your valuable paper in regard to the desirability of introducing the wild hog of the Black Forest in Germany into the North Woods, or Adirondacks, this State. I have been thinking of it for some time, and it seems as if there is plenty of food there for them.

I have heard that some of these wild hogs, or, as they are called, wild boars, are in the south part of the Catskills that were brought over for some private park and have escaped and are now running wild there. I think that through your paper some one who knows about this matter might give me some information. I would very much like to have the subject discussed that I may form an opinion in regard to it. TOWNSEND COX,

President Forest Commission.

NEW YORK STATE FOREST COMMISSION, Albany, April 7.

WILD ANIMALS AND SNAKES IN INDIA.—In the report on the Administration of the Bombay Presidency for the year 1890-91 is to be found the following interesting account of "The destruction of wild animals and venomous snakes:" The whole number of people killed by wild animals and snakes within the Presidency, including Scind, during the year 1890, was 1,122 as compared with 1,160 in the previous year. The number of deaths caused by tigers and leopards was twenty only, of which sixteen occured in the Khandesh District. In the previous year forty-seven persons were thus killed in that District. In the Broach District seven persons were killed by wolves and three by other animals. The mortality from snake-bite was slightly lower than in the previous year. The most deaths from this cause occured in Scind, there being 497; the fewest in the Central Division, but 105. In the Northern and Southern Divisions there were 241 and 232 respectively. The number of wild cattle killed by beasts of prey and snakes decreased from 2,188 in 1889 to 1,883 in 1890. In Kanara, however, the number of cattle killed in 1890 was 939, exceeding the record for the past ten years. The total number of wild animals destroyed during the year was 836, and of snakes 406 092; this was 27,703 fewer snakes than in 1889. The total amount paid as rewards for the destruction of wild animals and snakes during the year was 12,655 rupees, 13 annas and 2 pice (about $5,695.15).

A CARRIER PIGEON AT SEA.—Old Dominion Steamship Company's Steamship City of Atlanta, New York, April 11.—*Editor Forest and Stream:* When the City of Atlanta was on her southbound trip last Sunday, she was visited by a little wanderer—a carrier pigeon—which seemed completely exhausted. I had no trouble in taking the bird up, and have cared for it ever since. I tried to induce it to fly away to its home, but I can't make it leave the ship. The bird is very pretty, and I judge a nice one. I think it must be a Philadelphia or Baltimore bird, as it came to me off the Capes of Delaware. Stamped in red ink on a wing is the name "John Meskins," a tag on the leg has the letters "H. N. B., No. 1." I am very anxious that the owner should have it. He can do so by proving property.—R. H. LUCE (First Officer S. S. City of Atlanta, New Pier 26, N. R., New York).

MONGOLIAN PHEASANTS.—Portland, Ore., March 18.—The Mongolian pheasant article published by you recently has brought me numerous letters from Eastern sportsmen. I am glad to see so much interest manifested in the subject. I have had the pleasure to inform inquiring ones that Mr. John Denny (brother of the Hon. O. N. Denny, who introduced the birds into this country) has fourteen now in captivity and for sale. John Denny's address is Lebanon, Ore. The Judge informs me that the flock is composed of three cocks and eleven hens, and he thinks John will want about $100 for them.—S. H. GREENE.

LEAST BITTERN.—Our correspondent "Sancho Panza" sends us, from Patterson, Pa., a small bird, which he says "Evidently belongs to the heron family, but no person about Juniata county knows what it is." The specimen sent is a male least bittern (*Botaurus exilis*), of general distribution in temperate North America, but seldom seen by the casual observer on account of its secretive habits.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

BRANT AT MONOMOY.

BOSTON, Mass., April 11.—The Monomoy Brant Club is one of the institutions of Boston gunners. They have their shooting boxes and camps at the beach of the same name on Cape Cod. The club has a large number of members, so large that they do not all attempt to go shooting, either in the fall or the spring, at once or promiscuously, but they are divided into squads of eight and the time for each squad is mapped out before the season opens. They have fine camping accommodations, which the club owns. They employ men, whom they call "gunners," to take care of their property, cook and take them out to the shooting boxes or sinks, which are boxed-up holes in the sand, some of them so far out that at high tide the sand washes in and fills them. Some of them are so far down that they can only be entered at low water. The gunners keep these boxes shoveled out and move about on the beach all that is necessary to pick up birds and keep watch. They are dressed in suits of a mud or sand color, and are thought to frighten the birds the least possible. The only object of the club is to shoot brant, as the name implies, and the rules are so strict that other birds must not be shot at in the branting season. The club had a record of 92 brant killed in 1891, while the record is yet blank, or rather not completed, for 1892. There is a rumor that a large number of brant were sent last week over to the Monument Fishing Club from the Monomoy. This may be true, for the birds are invariably given to the gunners after the sportsmen have had the few they need in camp, with possibly now and then one to send to friends. The gunners can sell them and get what they can out of them, but members of the club do not sell brant.

There is also another report which came up Friday and disturbs the members of the club a good deal. The story that a mink had got into the coops of live decoy brants and killed three or four of the best ones. If this is true it will be a good deal of a loss to the club. These decoy brant are obtained by picking up the wounded birds after shooting, and if not too greatly injured, saving them alive. It is a curious fact that these captured brant never become tame. Whey they are used as decoys they have to be confined with a string, else they will regain their liberty. They have never been known to produce eggs in this sort of captivity. They are fed on corn and waste food from the camp almost the same as native geese.

Three or four squads of the Monomoy Brant Club have already been down on their spring shoot, and the fifth squad or party is to start April 20. This party is made up of Mr. Joe Dorr (I do not know his business); Harry Colburn, superintendent of the rope works at Newton; Harry Reed, of the flour and grain trade; Mr. Plympton, a grocer at Walpole; Robert Gray, a wool dyer of Walpole; E. Frank Lewis, a wool scourer; Harry Simonds, of the wool trade; N. E. Arnold, a last manufacturer of Abington, and H. H. Wright, superintendent of the water works at Abington. This squad is termed the Monomoy Guards. The annual meeting of the guards was held at the Boston Tavern, March 25, when branting was thoroughly discussed. A burlesque programme was issued to members, with shooting matches, songs and dances by members of the guards. Carriages were not called till 11. At this meeting 100 brant was the number set for 1892. SPECIAL.

"HELL GATE" OR "DEER LICK"?

Editor Forest and Stream:

I notice in your issue of March 18 that a number of Colebrook gentlemen who have purchased and contemplate changing the name of the late Amasa Ward's "Hell Gate Camp," on the Diamond River, to "Deer Lick Camp," and I cannot refrain from entering my humble protest, in the name of all that is most dear to those sportsmen who have visited that camp, against the change of a name which has been identified with that spot so long that it has become a part of it. Separate them, and the place becomes substantially an unknown quantity, unheard of alike by sportsmen and the tenderfooted portion of mankind, a place where popularity must be in a manner re-established, a place which without the prestige of old "Hell Gate" must start a long way back on the "tote road" of that reputation which the latter has so justly attained under a name, than which none can certainly be more appropriate, though possibly the one chosen may be a trifle more euphonious.

I pray you, gentlemen, desist, for laying all sentiment aside, would it not be poor judgment as a business venture to change a name by which it has been so long and favorably known, as almost to have become a trade-mark?

If there was anything disgraceful or disreputable connected with the camp that would tend to render its identity under the old name in any degree obnoxious or objectionable, there might seem to be some good reason for disguising it under a cleaner title, but in this case where those familiar names of "Hell Gate Camp," "Hell Gate Falls," "Amasa Ward's Old Camp" and the "Dead Diamond" are synonymous for all that is desirable and enjoyable to a true lover of the woods, to change the name of either of them would banish from the mind all connection with those visions of delight which their bare mention is so certain to invoke; then let us pause and consider whether the old name is not just as good now as it ever was, and whether a change would not be detrimental to the location. C. A. B.

BOSTON, Mass.

Editor Forest and Stream:

There seems to be some objection on the part of some, former patrons we suppose, to change the name of Hell Gate Camp to Deer Lick Camp at Hell Gate, on the Dead Diamond River. "Old Injun" may have made the camp and its surroundings all it is, but his creditors have a faint idea that they assisted in doing so. Ward may have been a "good entertainer" and have brought the camp into prominence; but when he passed away and the camp came into new hands it seemed desirable to change the name. One thing the syndicate expect to do by the proposed change is to emphasize the fact that this is a sport-

ing camp in the full sense of the term. It is not merely a trouting camp, but a gunning camp. The deer lick near by gives the new name. This is the "lick" of the surrounding country, and is also the "run" for deer. It is the desire of the new management to bring this camp into prominence as an all year round sporting camp, and hope that the name will suggest this. There are no better fishing grounds anywhere than on the Dead Diamond, last season one man taking three trout in a very few minutes that weighed 11½lbs. from one hole. This can be duplicated. Then the gunning is not to be decried. The deer that have been killed here makes it a sporting paradise. The wish of the new proprietor is to have it understood by sportsmen that this is fine grounds for gunning as well as the rod. With all due respect to Ward, and a just appreciation of what he has done for the lover of either rod or rifle, the new management still think the change in name desirable, and that it is a far better one than the former. And they expect to show to former patrons, with new ones, an appreciation of their patronage.

HALFORDE.

DEER LICK CAMP, New Hampshire.

IN THE GRANITE STATE.

Editor Forest and Stream:

Concerning the hunting of deer, which is largely indulged in during the fall, one of the principal guides of this section remarked recently that they were more plenty this year than they had been for a long time. As a general thing both the people of northern New Hampshire and those coming from other States are for some reason led to believe that there are few, if any, deer among the hills of the Old Granite State. This belief has prevailed for so long that, with the protection from the game laws, deer have multiplied until now there are enough to furnish almost unlimited sport.

During the winter months fox hunting and fishing through the ice constitute the principal feature of entertainment for the sportsman. Littleton can boast of almost as good a gathering of sportsmen as is generally found in a town of its size. Many of them own valuable hounds and every winter and spring trips are made into the northern part of the State. Among those mentioned to the writer who are most prominent in the sport are: Frederick Cheney, Geo. S. Whittaker, George Billous, Henry Nurse, L. T. Hyde, Geo. Wilmot, A. J. Barrett, Chas. H. McCarthy, E. F. Bowker, "Zip" Twombley and F. M. Richardson. L. E. Collins, of Woodsville, who has two fine hounds, is generally found among the number present, while on their hunting trips. The Gale River valley affords the best hunting grounds in this vicinity.

This section abounds in several well stocked ponds and lakes, and often on winter and spring mornings parties may be seen starting out with ice chisels and lines for a day's sport. It is seldom that they appear empty handed.

There are two veteran sportsmen in this town who have followed the trail of bear and deer for years. Your correspondent will ere long give a brief sketch of their lives, for it cannot fail to be of interest to sportsmen in this section.

W. STANHOPE HUSTON.

LITTLETON, N. H.

A STRANGE GUN DISORDER.

NOT long ago I was sitting in a blind on an island of the Father of Waters, when a mallard flew over me in such a way that I had to lean back until my shoulders almost seemed to touch the ground and shoot back of my head. Well, I killed the duck and wondered. A little while after a pair of mallards came driving up to my decoys and just as they saw me, began to back up and climb. I killed one of them, and as the other climbed upward, almost presenting a stationary mark, I carefully sighted—and never touched it. I am certain that I aimed correctly, and that the distance was less than 40yds. I then remembered that I had not been "on" that first overhead mallard. I had aimed off at one and killed it and aimed on at the other and missed it. Lastly, I was sober.

The reader may doubt these statements of fact, but I did not, for I went ashore, and for the first time in a good, long while, I began targeting my gun, which shows that I am sincere in my belief that somehow my gun did not shoot straight. I shot at trees, repeatedly, in each case at a paced distance of 28yds., off-hand and with a rest, and the right barrel shot off to the right, the edge of the load cutting the side of the tree, usually a tree of about 2ft. in diameter, and the left barrel to the left. The divergence was so great that I thought that at 40yds. the gun might be screwed in a vise and shot with both barrels at once and the gun might be aimed at Mr. L. J. Gaines, for instance, without doing any more harm than to scare him, which I hoped it would. It was so strange that I simply called myself a liar, and although I am a medium sized man and easy to lick, found I didn't resent it in the least. Indeed, I made the test all over again. The result was the same. I now blamed that miss of the climbing, poised mallard on the gun. At about this time I also became more candid with myself, and really believed I had never aimed at that overhead one. I also began to remember a lot of unaccountable misses I had made since I had shot with that gun. I have heard so many imitation sportsmen blame things on their poor guns that I long since got into the habit of blaming my misses on a too pious nurture when I was young, and letting the gun off; but in that luckless moment I fell from grace, and, at one fell swoop, I blamed that gun with all the misses I had made since I owned it, and about seventy-five that, I have since reflected, were made before the gun was. The next day I wrote to the above-mentioned gentleman describing the trouble with my gun, which was one made at his factory, and informing him that any gun maker who would send a man a straddle-legged gun ought to be made stand at one side of it when it went off, instead of either directly in front or directly in the rear, the only safe places. I also threw out a few side remarks about "me and Mr. Budd," thinking it might influence him to lend me one of their old style hammer guns with the rod sticking up between the hammers all the time it was open (and invented by one of the post-pliocene Parkers to show the shooter that it was open, and if he didn't shut her up before he shot, it was even bets he wouldn't hit anything), while he was fixing mine up. He wrote me back a very polite letter, saying they would fix it for spuds, a word I never use myself, but which I take this opportunity to insinuate he does because he was so polite he left me in doubt just what word he did mean, and this is probably the one he had in mind. He also delicately suggested that if I would try the gun some time after having taken a heavy and dreamless sleep and one drink I would find it didn't shoot so cross-eyed as I tried to make out. I thought this was a likely suggestion and waited around two or three weeks trying to hit just the right time to carry it out, but that one drink kind of stuck in my craw and I had to give it up. I took it out of the case day before yesterday, though, and examined the brazing along the ribs, and just as I got through finding nothing the matter with it, I found a little shred of brass, looking like something that had come off an imperfect shell head, adhering to the flat part of one of the barrels where it rests on the breech or action. I left it there and put the gun together and snapped it shut and discovered it did not quite shut close up. The least appreciable bit of the extension rib stood above the breech. You could feel its edge with your finger and catch on it with a knife blade. Then I took the sliver out and the gun closed tightly and smoothly, and when I proceeded to put it through a similar test to the one which started the investigation, the gun, *mirabile dictu* (which is the Latin for the kind of spuds he would have got from me for fixing the gun) the gun and its delighted owner shot straight again.

If any of the readers of the FOREST AND STREAM can explain this without advancing any hypothesis liable to be thrown out by the editor as being likely to hurt my tender feelings, I would like for them to do it. If failing to get a gun properly and completely closed makes it shoot out of true it would surely interest us all to know it.

GEORGE KENNEDY.

ST. LOUIS, Mo.

MIKE

THOSE who have followed the delightful chapters entitled "Trouting in the Cascades," by Judge S. H. Greene, of Portland, Oregon, will recall the frequent references to the setter Mike; and will be interested in this portrait which Judge Greene has sent us, as that of "one who, though 'dumb,' has for more than eight years been my constant, honest and happy companion among the gray mountains and placid lakes of Oregon and Washington."

CHICAGO AND THE WEST.

CHICAGO, Ill., April 8.—Duck shooting and duck season apparently draw to a close together. The late heavy storm has sent the birds on ahead of it, but they are passing north, high and wild. Up to date, Hennepin Club has, so far as known, had the best shooting of any of our localities hereabout. Up to April 1, the members of that club had bagged 1,631 ducks this spring. Top bag was made at that club by Mr. C. D. Gammon, 115 in one day. Mr. Gammon and Mr. McFarland had ten days of very good shooting.

Messrs. F. C. Donald and C. S. Burton went up to Mukwanago, and as predicted, found good sport. They bagged 74 ducks in six hours.

One party brought down from Fox Lake last week, 50 dozen ducks.

At Cumberland Club Mr. Geo. T. Farmer got 29 ducks one day last week after one o'clock in the afternoon. That same afternoon Mr. John Gray and Mr. Geo. Maillet also got 29 ducks.

The most important bag, or the finest, of which I have heard, was made by Charlie Willard and Ed Bingham on their trip to Koshkonong Lake this week. They bagged 110 ducks, of which 29 were canvasbacks. The shooting was point shooting, easy and pleasant, on "Lizy Man's Point," right in front of the Bingham home. A soft cushion to sit upon, warm meals at all hours of the day, combined with the heavy flight, made this occasion one with which both gentlemen express themselves as perfectly contented.

The great amount of water now all over the country has scattered the snipe, but there are numbers of these birds in now, all over the country. One bag of 105 jacksnipe was made on a cornfield near Washington Heights, a suburb twelve miles out, this week. The birds have not yet gone to the marshes and wet meadows, which are too cold. They have been found this week almost entirely on the highest and warmest ground. Acting on a quiet advice from Italian Joe, our famous snipe and plover shooter, a small party yesterday investigated a certain field near Summit, twelve miles south of town, bagging thirty-two birds in all.

Messrs. F. A. Place and R. A. Twitte are now at Summit after snipe. Many parties are now out in different directions with the same intent. There will be good shooting this week if the weather turns warmer.

Italian Joe starts to-night for Wolcott, Ind., where he will shoot plover for the market, with that notorious market shooter and purchaser of game, George Beard. The birds are there, or Italian Joe would not be there.

Last winter Italian Joe made a very nice penny by selling "reed birds" to the restaurants here. He trapped his reed birds, which most folks would call sparrows, right in the edge of Chicago. Nicely plucked, a snow bunting makes a very good reed bird. Joe scorns the imputation that he would use English sparrows as reed birds. Indeed, he always carries in his basket one English sparrow. "I show-a de diff'," says Joe.

Wm. Brown, keeper of the Gilham's Lake Club, of St. Louis, whose grounds are in Illinois, on April 1 arrested the two Southard brothers, market shooters, for trespass on the club grounds. The trial takes place to-morrow at Mitchell, Ill.

April 10.—At Fox Lake day before yesterday, Mr. B. Dicks bagged fifty-three ducks, high bag reported from that locality. Tommy Miller, of Chicago, who was with Mr. Dicks on the trip, had the rare good fortune to kill a fine specimen of the trumpeter swan. This is the first specimen killed hereabouts since Mr. Cleaver's, killed on Grand Calumet two years ago. There has been a flock of eighteen of these birds about Fox Lake for over two weeks. Tommy snuk up on 'em.

Messrs. Turtle and Place succeeded in accumulating nine jacksnipe in their late hunt at Summit. The cold wind had driven the birds out.

E. HOUGH.

IN THE SNOW.

THE depth of snow in these northern mountains often changes the winter sport of the hunter into arduous toil, when success is purchased only by the most strenuous endeavor, and when the staying power of the hunter's legs proves the prime factor in the problem of the successful chase of the fleet and flitting deer. While the more open ground of other snow-covered mountains permits the use of the Norwegian "ski," or long, narrow, board-like snowshoe, the dense thickets of low evergreen cover common to all our hills and ravines

Where the deer lie under the pines,

necessitates the use of the web shoe, and for the service of one hampered by the objectionable weight of forty pounds of superfluous avoirdupois (as in the case of a certain asthmatic old uncle) the shoe must be made extra large; and if any one fancies that it is an easy job to follow the plunging flight of a deer through soft snow three or four feet deep he is sadly "off his base."

Some years since, when the snow had fallen to a greater depth than usual, I ran down a large buck, which, after a most determined struggle, lasting for nearly half a mile through the deep snow, fell a victim to our love of venison; and, during the past winter, when again the snow fell to a depth rather greater than common, forgetful of the lessening vigor of my "decreasing leg," I essayed to play the old game again.

After a long and tiresome search two deer were jumped, and for a mile or more of desperate effort I endeavored to tire out the graceful creatures, but though they grew exceedingly weary and at last could jump only about four feet at a plunge, the discouraging fact now confronted me that the old uncle had by this time become so exhausted that he could not jump one, and the frightened beauties made good their escape, while a completely "tuckered out" old monomaniac, who, it appears, can never hope to outgrow his folly, laid down under a fir tree and pondered upon the proverb which asserts that "there is no fool like an old fool."

When, "after many days," the old enthusiast had entirely recovered from the fatigues of the exhausting chase, and found himself not yet completely discouraged, a hunt was planned for a famous hunting ground some twenty miles distant, where the snow was not so deep. Two of my sons, Byron and Bruce, went with me, and we were accompanied by a tenderfoot acquaintance, eager to distinguish himself by the slaughter of game larger than the familiar Bob White of his Eastern home. Although but moderate success rewarded our efforts, we had a glorious time, save for the cold of the nights when we slept out of doors in the forest, and tried to keep from freezing around fires much too large for comfort. My eldest son and I each killed a fine deer, while the other boy killed the only specimen of the genuine cottontail rabbit I ever heard of being killed in the State of Washington. He reported seeing another which he failed to get. The tenderfoot got nothing.

On our way to the hunting ground the tenderfoot had repeatedly insisted upon his ability to clip the heads of grouse with bullets from his rifle, and proposed to show us some fine work on deer; yet when, during the hunt, a big mule deer trotted boldly up and stood broadside to at 65yds. distance from him, and poor Johnny, resting his gun against a tree to make "assurance doubly sure," shut both eyes, pulled—and missed him clean, his heart was broken; and on his return to camp could account for his failure only on the plea of an attack of what he called 'idiocy!" His full statement I hesitate to write out, but most old hunters have doubtless heard similar ones. My own humiliation was yet to come.

On the last day of our stay, on returning to camp first after the morning hunt, discouraged with my ill success, and being thirsty, I laid the faithful Sharps aside and taking an ax and water bucket set out to get a bucket of water from the ice-covered creek, 150yds. below the camp. Coming back from the creek, just as I cleared the bushes along its banks I met four beautiful and unsuspecting deer face to face, and, oh, aggravation unspeakable! squarely between me and my rifle.

The leer upon their faces as they carelessly passed me by was heartbreaking, and I could only laugh according to an old-time threat of my righteously indignant father, "out of the other corner of my mouth." There are some griefs which can never be told in words.

Once again the old Sharps hangs on the hooks in the cabin in waiting for the coming time when the deer will again be "ripe." My little son, while driving up the cows last evening, met two big deer less than half a mile from the house. The beautiful motto of our young State is embodied in the Indian word *Alki* ("By and by").

ORIN BELKNAP.

VALLEY, Washington.

Three young men living on the Middle Fork of the Payette in Idaho went out on horseback recently and lassoed a large six-point elk, weighing about 700lbs. They got him into a corral, where they are now feeding him.—*Evening Post.*

ONTARIO GAME AND FISH INTERESTS.

THE major portion of the report of the Ontario Game and Fish Commission is here given practically in full:

DEER.

We find that the deer, while still found in comparatively large numbers in some portions of the Province, are not nearly as plentiful as they were some years ago. This is easily accounted for, the clearing up of the land, the improvements in modern firearms, the ravages of wolves, and the ceaseless and indiscriminate slaughter in and out of season, appears to have well nigh exterminated this noble animal. The extent to which yard-hunting and crust-hunting is practiced is incredible; not only are the bucks killed for food purposes, but small fawns and does heavy with young are remorselessly butchered, either out of pure brutality or for the sake of the almost valueless skin.

It is generally admitted that to distinguish between a buck and a doe or a doe and a fawn when the animal is running at full speed and a momentary glimpse is only obtained, is a difficult matter, but we desire to impress upon all true sportsmen the necessity of sparing the smaller and weaker animals as far as possible, even if the sacrifice should cause them the loss of a shot.

In some counties deer are almost extinct, and we recommend that deer killing be entirely prohibited for a period of five years in the counties south and west of the northern boundaries of the counties of Bruce, Grey and Simcoe, as far north as the Severn river and the eastern boundary of Ontaria.

The use of hounds has proved one of the most vexatious questions, and although the answers of the witnesses show a large preponderance in favor of the use of dogs, it must be remembered that many of the answers were given solely from selfish motives, and are wanting therefore in weight and accuracy. The Commissioners are themselves evenly divided in opinion on this question, five being of the opinion that dog hunting is neither injurious to the deer nor the cause of extermination, while the other five are of opinion that to the use of dogs is principally attributable the steadily growing scarcity, as well as the awful slaughter of the deer.

The still-hunters who disapprove of the use of dogs assert that deer chased by dogs are rendered unfit for human food after the long chases to which they are subjected; that the deer are driven out of localities which they would otherwise inhabit; that much loss of life is caused by the chasing of does heavy with young, and that the almost invariable method of killing dog-chased deer is by shooting them through the head while in the water, a procedure which is neither sportsmanlike nor clever.

Those, on the other hand, who believe in the use of dogs, assert that the still-hunter's bullet too often wounds without killing the deer, allowing the animal to escape and die in agony in lonely places where it can never be found and where the flesh is never recovered to be eaten. They assert further that the still-hunter does more damage single-handed and kills more deer than any party of hunters could possibly do.

After long and careful consideration we have determined to recommend: 1st. That the present open season from Oct. 15 to Nov. 20 be shortened five days so as to be from Oct. 15 to Nov. 15. 2d. That the hunting of deer with hounds shall only be lawful from Nov. 1 to 15 inclusive in each and every year.

This, if adopted, will, it is thought, be found highly beneficial, inasmuch as it will shorten considerably the present open season, thus affording a better chance to the deer; besides which the hunting of deer with hounds will stop with the end of the season.

Illegal killing of deer is practiced by all classes of the community, and the law regulating the number of animals to be killed each season by each hunter and which is popularly known as the "party clause" is entirely and utterly disregarded. By subdividing into smaller parties, and by joining more than one party in a season, sportsmen are enabled easily to avoid the law in question and many more deer are therefore killed than the law allows. The "party clause" should be abolished and sportsmen allowed to kill two deer each per season, and no more.

We have found a very strong feeling against allowing the continuance of the shooting of deer in Ontario by foreign sportsmen, nor is this feeling unreasonable, when deer are annually becoming scarcer and there is a danger that few may be left in the near future to supply the wants of the home market. On the other hand it must be remembered that foreign sportsmen put much money into circulation and very materially help the residents and business men in sporting localities. If it is not thought wise to entirely prohibit foreigners from killing deer in the Park a permit should be obtained and a fee paid for the privilege. All dogs found running deer out of season should be allowed to be killed at sight.

The wanton slaughter of deer could be very largely curtailed by the appointment of an efficient force of game wardens. At present the enforcement of the law is not the particular duty of any particular person, and it is found very difficult for that reason to reach those who break the law. If the deer in Ontario are worth preserving they must be preserved thoroughly, and this should not be delayed for a single day.

The appointment of an efficient force of game wardens would be of incalculable benefit to the country, and go far toward protecting and preserving the game and fish of the whole Province.

It has been suggested to us that a law ought to be passed allowing pioneer settlers to kill deer for their own family food at all seasons, but we cannot recommend such a measure, as it would almost certainly lead to abuse and tend toward confusion.

MOOSE, ELK AND CARIBOU.

The evidence taken, points conclusively to the fact that the protection lately extended to this noble animal has had the effect of materially increasing its numbers, but illegal slaughter still continues. The hunters who kill the moose to-day in Ontario do so principally for the sake of the flesh, or for the sake of gratifying their desire to kill large game. Neither the skin nor the head can be openly disposed of or kept, and these are generally sunk with heavy weights into deep waters to prevent the possiblity of detection, while the flesh of the slaughtered animal is eaten as a delicacy. Special efforts should be made to continue the protection of this animal and to mete out strong punishment to the human assassins who continue in their efforts to exterminate it.

BIRDS.

The supply of game birds is growing gradually less in the Province. The difference in the close seasons for the various birds has unquestionably much to do with this, as many birds are shot out of season by hunters who are pursuing other game, which at the time may be lawfully shot.

The extent to which the game birds of the Province are being slaughtered for exportation to the United States of America is almost incredible. Boys are hired by stage drivers, train hands, commission merchants, and others, to bring in as large a supply as possible, and the extermination goes on incessantly, although the price paid for the birds brought in is often hardly enough to pay for the powder and shot used in their destruction. The American hotels and restaurants are liberally supplied with Canadian game, while in Ontario only those who are rich can afford the luxury of a game dinner. The exportation of all kinds of game from the Province should be prohibited. Much game is sold out of season by game and fish dealers, under the pretense that it has been imported. We are therefore opposed to the unrestricted importation of game, unless it can be so marked or labeled at the Custom House as to be easily identified. This method would go far toward stopping the sale of birds shot out of season, and we recommend that the Dominion Government be memorialized on this subject as well as on that of the exportation of game.

We recommend that five days and no more be allowed to dealers for the sale of their stock of game after the close season begins. The time at present allowed is too long, and allows of game being received after the close season begins. The sale or exposure for sale of quail, snipe, wild turkey, woodcock and partridge should be prohibited all over Ontario for a term of three years.

The law which forbids the spring shooting of ducks should be strongly enforced, but as to geese and swan, there is no reason why these birds should not be shot in spring.

Duck shooting from sailboats and steam yachts should be strictly forbidden.

The destruction of ducks in some sections of the Province, especially where private preserves are established, is enormous. We recommend that no individual sportsman be allowed to shoot more than twenty-five ducks in any one day.

Foreigners residing outside of Ontario should not be allowed to shoot birds in the Province except upon payment of a license fee.

With a view to preventing the shooting of game birds and smaller animals in part of their close season, all shooting except quail should begin on Sept. 15 and end on Dec. 15. The quail season need not be interfered with, and can stand as at present.

In the matter of the protection of birds, the establishment of a force of game wardens would also be very beneficial, and the indiscriminate slaughter now complained of could be much curtailed.

The burning of marshes, which interferes with the nesting of game birds and other animals, should be strictly forbidden.

The permits issued for so-called scientific purposes, should be strictly limited in number, and not given except under very stringent conditions, and to those who are known to be *bona-fide* scientific men.

The present trespass act should be amended so that persons found trespassing on farms or other private property where game is preserved, should be liable to a heavy penalty.

Referring to Revised Statutes of Ontario, Chap. 321, Section 7, that the words "and all other waterfowl" be struck out.

Shooting between sunset and sunrise should be strictly prohibited, as much damage is done to partridges and other birds on moonlight nights by pot-hunters who, with the aid of their dogs, disturb the birds and then shoot them in large numbers from beneath the trees.

The open shooting season should include the first and last days specified. At present many hunters shoot and otherwise destroy game after the close season commences, excusing themselves for so doing by the plea that they were not sure as to the correct interpretation of the law.

The wild turkey should be closely protected for a period of five years.

FISH.

The subject of the protection and preservation of fish has been the most difficult presented for consideration. Owing to the fact that the Province has not at present the right to control all its waters, and as the Dominion and Provincial laws vary considerably, much confusion is found to exist. The laws are not generally enforced, and although it appears that a few of the fishery inspectors endeavor to discharge their duties faithfully, it is equally apparent that the majority of them take little if any pains to prohibit illegal fishing and to protect the valuable stock intrusted to their care.

The extent to which fishing is carried on in the close seasons is alarming, and the exposure of fish in the markets of the larger towns and cities of the Province during the close seasons is open and defiant.

The extent to which netting is carried on is also inconceivable, and the spawning grounds are stripped year after year, until in many places where fish abounded formerly in large numbers, there is no yield now at all. If a force of game wardens was appointed, this matter could be vigorously looked into, and the slaughter and destruction could be very considerably lessened.

The value of the fish yield is enormous, and too much pains cannot be taken to preserve what should always be a cheap food supply for the masses.

A whitefish hatchery as well as a trout hatchery should be established in the Province by the Ontario government. This would be both useful and popular, and would pay for itself over and over again.

The visit of your Commissioners to the trout hatchery of the State of Michigan abundantly satisfied them as to this. A few years ago the streams of that State were depleted, and not a trout could be found therein; the same waters are now teeming with fish. The farmers and dwellers along the banks readily assist in preserving them, and the railroad companies furnish free transport for the Commissioners' car when fry is being sent from point to point. No pains are spared to restock the streams and increase the supply of fish, and the State is now reaping the benefit of the wise outlay made in the first instance. Your Commissioners found much to admire in the systematic course pursued by the Fish Commission in the State of Michigan in regard to its work. Every lake and body of water in the State is regularly inspected at stated periods, the condition of the water and weather at the time of inspection are contained in the inspectors' report; the depth of the water, its temperature, the conditions of the bottom, the number and kind of fish taken, are all carefully noted, and the result is that when the waters come to be restocked only such fish are put in as are supposed to be able to thrive there. The consequence being that waste and loss is minimized, and much good accrues from the thorough and systematic labor.

Your Commissioners regret that they cannot make any special recommendations as to the close season for the various fish found in the Province. The evidence taken points to the fact that nearly all the waters in the Province are more or less depleted.

Saw-dust, dynamite, improper fish-slides, indiscriminate netting, and the cutting down of shade trees, have all done their deadly work, and to add to the general discontent, there is no reason to doubt that the seasons now set are not universally approved of.

The close season for one particular fish, in one particular district, appears to be perfectly unsuitable to the same kind of fish in another part of the same district. This is easily accounted for by the differentiation in the conditions of the waters, some being deeper and therefore colder than others, and some containing a lack of proper fish food.

The only satisfactory way in which the fish seasons can be properly set, is by the establishment of a permanent Game and Fish Commission, whose members will give the matter special and thorough study. This a work which cannot be done in a day, and a vast work which lies ahead of such commission, but it is a work which can be made immensely profitable for the Province, and which will have the hearty sympathy of all classes of the community.

Pound nets should be entirely abolished in the waters of the Province, and that no gill netting should be allowed except by special permission from the Game and Fish Commissioners.

Careful attention should also be given to the matter of winter spawning in landlocked waters. There are some waters in which no harm can possibly result from this pastime, besides which many fishermen depend entirely for their winter supply of food on the fish taken in this manner. On the other hand, there are many bodies of water in which this practice is most pernicious and detrimental, and this is a matter which should receive very careful attention.

Many fish are destroyed by camping and fishing clubs for the mere sake of making big catches, so that the number of fish taken are far in excess of what is required for food purposes. By such means as these many of the waters of the Province are being depleted, and your commissioners therefore recommend that a limit be placed upon the size or weight of the fish allowed to be taken. Unless some such step is taken the indiscriminate slaughter which has been going on for years will soon deplete the waters of the Province entirely.

In the meantime, pending the possible appointment of a permanent Commissioner, your Commissioners feel themselves quite unable to offer any suggestions as to close seasons, although they are of opinion that the present laws, for the reasons above given, are not satisfactory.

HARES OR RABBITS.

These animals should only be killed from Sept. 15 to Dec. 15, so that one general shooting season may be observed.

SQUIRRELS.

Squirrels should be shot only from Sept. 15 to Dec. 15 in the proposed general shooting season. At present the slaughter of these animals is indiscriminate, and the black squirrel has almost disappeared from the Province.

FUR-BEARING ANIMALS.

The beaver, otter and fisher are growing very scarce in Ontario, and should be strictly protected for five years, during which none of these animals should be allowed to be taken or killed. The present trapping season should be shortened one month, so as to end on March 31 instead of April 30. The present season is too long, and interferes with the breeding season.

WOLVES.

Much harm is done to the deer and larger game animals of the Province by wolves. The trappers and hunters assert that the wolf is an animal which can only be taken with great difficulty, and the bounty at present paid is altogether too small, to induce them to follow the animal. The bounty should be raised from $6 to $12, and the same arrangements made for the payment of the bounty in unorganized districts. No bounty is paid for the destruction of wolves, except in organized districts or within one mile of settlements. Those who live in unorganized districts, suffer much from the depredation of the wolf, but the authorities are too poor to pay a bounty, and consequently, no effort is made to kill the destroyer.

FOXES AND OTHER VERMIN.

Your Commissioners recommend that $1 bounty be paid for each fox destroyed, as this animal is a great destroyer of young game. All vermin not specified and protected by the game laws should be killed at sight.

GENERAL QUESTIONS.

The close seasons for game and fish are not generally respected throughout the Province, the laws being broken by all classes of the community, principally, however, by settlers, Indians, boys and pot-hunters. A Provincial force of game and fish wardens or protectors should be established. Sub-wardens should be permanent residents of the localities under their supervision, because they are intimately acquainted with the game districts and the residents of the neighborhood, and would naturally hear more of what was going on than a stranger could possibly do.

Sub-wardens should be appointed by the chief warden, who in turn should be appointed by the Game and Fish

Commissioners and might or might not be residents of the localities where they are stationed. Much good would undoubtedly result from the appointment of such a force of game wardens, every county or district in the Province should pay a certain sum annually, say $50, to the Government toward the support and maintenance of the force aforesaid, this fund to be supplemented by the Government an equal sum. The fines imposed for infractions of the game laws should be largely increased and that the law should provide distinctly that each case must be charged separately, without any option in the matter to the magistrate or prosecutor. One-half the fines should go direct to the Government and the other half to the informer. As an additional means of assisting in the maintenance of the force of game wardens, a $25 license should be collected from all foreign sportsmen, and which would entitle them to shoot or fish during the open season in the Province.

Dealers in game and fish should be required to take out licenses, so that their premises may be subject to search at any time, at the hands of the game wardens, the license fees thus received to go direct to Government.

The suggestion that every owner of sporting firearms should be required to register his weapon and pay a nominal fee therefor is intensely unpopular and we cannot recommend it.

Many sportsmen are of opinion that shooters and anglers, when sporting in counties where they do not reside, should be required to take out a local permit at a small fee to go toward the expense of supporting the local game and fish warden. This suggestion is a useful one, and may in time be acted upon, when a permanent Commission has had time to elaborate its work. In the meantime, however, on account of the difficulty which it is thought would exist in the way of finding the game warden, and the loss of time to which sportsmen would be put, it is not deemed wise to recommend it.

In some localities dogs are not taxed, and a large number are kept, in consequence, for the purpose of hunting deer. We recommend, therefore, that all dogs throughout the Province be licensed. The license need not be taken out in any particular city or town, but the dog must be licensed somewhere.

Sportsmen in the various counties and districts should form associations to protect game and fish therein.

The formation of close or exclusive game and fish protection associations, which cover marshes by freehold or lease, is intensely unpopular, and should not be encouraged.

All police officers, whether city, county or Government constables, and all Government bush rangers, should be wardens under the act for the purpose of enforcing the game laws. Wardens should have power to arrest offenders on sight without a warrant, and should have power to try cases themselves, this power, however, to be only exercised in localities where the services of a magistrate cannot be conveniently obtained.

Persons arrested by the wardens should be tried before the nearest magistrate without having to be taken back to the place at which the offense was committed. In the event of the establishment of a permanent Game and Fish Commission, the members of the said Commission should be made magistrates under the game act for the purpose of taking evidence on oath and trying cases brought before their notice from time to time.

Your Commissioners unanimously and very strongly recommend the formation of a provincial game park, in which protection could be afforded to the game and furbearing animals of Ontario. The establishment of such a preserve would be the best means of restocking the Province. The preserve should, however, be Provincial in its character, and under the control of the Government and not in private hands.

THE VERMONT LEAGUE.

A COMPACT and useful handbook of the Vermont Fish and Game League has been prepared by Secretary John W. Titcomb. Its contents comprise the constitution of the league, a roster of the members, and the text of the fish and game laws of Vermont. The admirable purpose of the book is set forth in the preface:

> Many citizens of Vermont think that fish and game laws are made entirely in the interest of sportsmen. While this belief may be natural, it is a mistaken one. Many citizens are prone to consider all fish and game protective associations as organized for selfish purposes only. While this imputation is a natural one it is untrue in the case of the Vermont Fish and Game League. Of its large membership only a small majority shoot and fish, and of those who do many go to more favorable localities for their sport.
>
> There are an abundance of laws on our statute books aimed at the protection of fish and game. Many of the general laws for the protection of fish have become ineffectual owing to the innumerable private bills which have been added from year to year. Whatever good game laws we have are rendered ineffectual for the reason that there is no special provision for game wardens or officers whose duty it is to look after their enforcement.
>
> With a view to accomplishing some of the objects set forth in our constitution, this book is published. In order that all who are interested in improved fish and game legislation may read our present laws intelligently, this book contains a compilation in concise form. No attempt has been made to include the special laws which burden our statute books, and cover so many of the public waters of the State.

The compilation has been well done, and the book reflects credit upon Secretary Titcomb. Copies may be had on application to the secretary, whose address is Rutland, Vt.

A QUEER OLD GAME LAW.—Newbern, N. C., April 8.—In searching some old records recently I happened upon the draft of a game law which was passed by the Colonial Legislature of North Carolina in 1777, in the second year of the American Revolution, which provided that any person caught hunting deer by night should be put into the Continental army for three years. At this same session a bill was passed for the organization of the State militia. If such a law were in operation in some sections of the United States at the present time there would be no occasion to appeal to patriotism in order to fill up the ranks of the militia. The night-shooters would furnish the quota.—CHARLES HALLOCK.

THE PORT JERVIS DEER CASE.—The game law case of the people vs. Ernest Wollner, of Port Jervis, N. Y., for having sold venison out of season, was brought to trial last week. The case was tried before a jury, District Attorney Hirschberg appearing for the people and John W. Lyon, of Port Jervis, for the defendant. The witnesses for the prosecution were Edgar Wells, C. E. Barton and W. H. Crane, of Port Jervis. According to their testimony the defendant had received the carcass of the dead deer by Wells, Fargo & Co.'s express from Shohola, Pa., along the line of the Erie Railroad. Dr. Willett Kidd, of Newburgh, the fish and game protector upon whose complaint the suit was brought, gave testimony. He told a straightforward story about the case, although Mr. Carr, in cross-examining him, tried to make Dr. Kidd believe that he should have brought the suit against the Wells-Fargo Express instead of his client. John Hess, a trackwalker on the Erie at Shohola, told of the carcass of the deer having been found along the tracks at 4o'clock one morning last December. At this point Mr. Lyon moved for a dismissal of the case and argued to show that his client did nothing wrong in disposing of the venison. He claimed that the deer had fallen from a precipice eighty feet high, had been mortally injured, and that it was no crime to dispose of the meat in the way his client had done. The court decided against the motion. At the close of the trial the court ordered a judgment against Wollner for the full amount of the fine, $100, which the jury rendered without leaving their seats.

A DEER'S ESCAPADE.—ARCATA, Cal., March 31.—Last Sunday a deer was driven out of a swamp near town, and being closely pushed by the hounds it made for a railroad track. After going up and down the road bed several times it fell through a cow catcher, and being helpless and losing its antlers in the struggle, it was an easy prey for some boys who appeared on the scene, and putting a rope on it they took it home, where it was left in the woodshed for safety. The boys had neglected Sunday school that day and their appearance in the house was the beginning of a general thrashing to all concerned. During the fracas the deer got out of the shed and finding its way into the house it knocked over the stove and furniture all about the place. A general stampede was the result and the people could not get out of the way fast enough. The deer saw a friendly window, and jumping through it bid adieu to family broils. With his white flag waving he sped away over the hills to his freedom, no doubt vowing for the future to keep clear of Sunday school boys and hounds.—F. P. NYE.

SPRING SHOOTING. — Chatham, N. J., March 28. — *Editor Forest and Stream:* At the last meeting of the Chatham Fish and Game Protective Association the members present agreed not to shoot any duck or snipe on their preserve grounds this spring, it being the second season the Association has given protection to these birds. With a marvelous instinct found only in birds, the wild ducks quickly discovered a refuge on the flowed land near here and have flocked to it this spring in numbers far greater than any other season for the last twenty or thirty years. The Association has good reason to hope that the lean, wary bird of the spring will return early in autumn fat and gentle with increased numbers, more especially so as it is now being shot at and frightened away from almost every other place.—WM. E. BUDD.

MAINE DEER.—Portland, April 2.—I received yesterday a letter from one who has been my camp companion and guide in the Washington county woods, relative to the prospect for next fall, and quite an interesting item: "I have been in the woods all winter; got home last Saturday. I was on township 36, near Fletcher Brook; landed our logs on first lake of main river. We've had a lovely winter for the deer: the snow has not been very deep until recently, and then came a crust that would hold a horse anywhere. That made it good for the deer; they could go anywhere they wanted to. They must be in good condition this spring. There were plenty of them up there; new tracks every day, and they come in to the tops every every night."—S.

WASHINGTON, D. C., April 11.—A great many woodcock are being sold in this market at present. They are shot, it is said, in Prince George's county about ten or fifteen miles from Washington. Another bit of lawbreaking was accomplished last Friday, April 8, by a man who shot sixty-six bluebills on the Mount Vernon flats, Potomac River, in spite of the fact that the close season commenced April 1. A great many ducks are on the eastern branch of the Potomac, and these are ever and anon receiving a death-dealing salute from the all-the-year gunners.—BENGIES.

Camp-Fire Flickerings.

"That reminds me."

FOR a long time I stood proof against hunters' yarns and fishermen's lies, but constant reading of sportsmen's letters—some in FOREST AND STREAM—and almost daily communication with those who fish and hunt, caused me at last to become contaminated. However, I have never been able to quite equal others in putting on the imaginary embellishments. One day, though, I was satisfied I had conceived something good and proceeded to relate it to a select few of those who were in the habit of rivaling me in such talk. I had just returned from an April turkey hunt in the swamps just above Vicksburg, Miss., and while a fair bag had been secured, the chief feature of the trip had been the myriads of mosquitoes that harassed us at all times, except when under a good bar. Any one who has hunted in a Missisippi swamp during rather warm weather in spring, on land from much of which an overflow has recently receded, will understand what a pest they are. At such times it becomes necessary to wear a coat and gloves, and to protect the face, ears and neck by a piece of bar or otherwise, however much such apparel may handicap the sportsman. In talking of the pests, I determined to do justice to the occasion and to be bold in my remarks. So one day I told G. H. D., who is no insignificant talker himself, that the mosquitoes were so thick that one sweep of my hat through the air filled it to the brim. A twinkle in D.'s eye led me to suspect he had not swallowed the thing altogether. I went to my companion on this hunt, W. L. W., not knowing that he had a development of talent in this line, and told him that I had been telling a tolerable stout one about our turkey hunt and that I wanted him to substantiate my remarks.

"P., I'll back up any remarks you may chance to make about that trip," was his prompt and spirited reply, sufficiently assuring me that he could be relied upon in an emergency of this kind.

I then proceeded to tell him what I had told D. about sweeping a hat through the air and catching a hatful of mosquitoes.

W. drew himself up and said, apparently without reflection or effort: "P., you could have done better than that," with a marked emphasis on the word "better." "You could have swept a quart cup through the air and caught a gallon."

I was thus put to rest as to my anxiety for proof to D. and at the same time vanquished in my ambition to excel as an artist in telling a hunter's lie. W. L. P.

VICKSBURG, Mississippi.

A large dealer in fish in the market, who frequently takes a "flyer" in stocks, remarked to a friend the other day that he never went short on lobsters. REIGNOLDS.

BOSTON.

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

BOSTON ANGLERS.

THURSDAY, April 7, was Fast Day in Massachusetts, and the day was pretty generally improved by anglers, either in looking over their tackle or in actual contact with imaginary trout on the streams. The weather was fine—too fine, in fact, for the tender skins of indoor life, and the burnt and reddened noses and wrists were not the exception among those who were out, even a part of the day. Mr. J. W. Chickey, subscription agent of the Boston *Herald*, likes trout fishing as well as the best of them. He went, with a friend, up to a brook in Sharon, where they hoped for success. The result was one trout for Mr. Chickey and two for his friend. But they got the burned noses and hands, and the outing. The last was greatly enjoyed by both. The brook was almost crowded with fishermen. Mr. Chickey thinks there must have been at least twenty on the stream. Such was the case with most of the streams in the vicinity of Boston, and it is worthy of note that not yet has a good catch of trout come to my notice. When the fishermen are successful you are pretty sure to hear from them after their return, otherwise they are silent.

Mr. A. W. Tompkins, with Foster, Weeks & Co., on Clinton street, took Fast Day for a visit to the camp on the Sudbury River. His partners in the camp, Messrs. A. S. Hartwell and John Tolman, were with him. They invited "Nick," who owns "Nick's Camp" on the same river, to accompany them. Everybody in the field sporting business knows "Nick." He was there, and they fully intended to try the trout, but there were too many fishermen already on the brooks and the banks were too deeply indented with footprints. They gave up the idea of fishing and came back to first intentions—fixing up the camp, painting the boats, etc.—and they really enjoyed the outing. "Nick" took hold with the others, and now he will invite them to his camp, on the first opportunity, for the same purpose—that of putting it into shipshape for summer. These gentlemen really get a deal of pleasure out of their camps. The distance is not so far from Waltham, where they reside, but what they can drive up, even in the evening; and many is the jolly party of gentlemen and ladies who make these excursions. The boys usually take turns at the cooking.

The Eugene Clapp party to Lake Mooselucmaguntic for trout fishing, must now be called the Wadsworth party; for Mr. Clapp has gone to visit happier fishing lakes and streams in the better world. This party, besides Mr. Wadsworth, Mr. Montague and Mr. Paine, mentioned in the FOREST AND STREAM last week, will be increased by the addition of Mr. George White, of the leather trade, and Mr. Augustus Parker, of Boston Highlands. Part of the company will be off as soon as the word comes that the ice is out of the Rangeley Lakes. They are as impatient as the record of each year shows. But the older hands at the business, like Mr. Wadsworth and them do not care to start till the ice has been gone several days. They enjoy a touch of spring, with green trees, even more than angling for trout in snow water with the mercury down below freezing every morning.

I have no particular information as to the departure of the ice from the Maine lakes. The unusually hot weather for April last week is reported to have taken off a great deal of the snow from the surface of the ice-bound lakes, and this is looked upon as favorable for an early departure of the ice, since it gives the sun more chance to work. But at last accounts they were hauling lumber over several of the lakes. The ice is out of the Penobscot up as far as Bangor, and the salmon are jumping. The anglers have also begun to try for them in the Bangor Pool. But up to date I have no reports of salmon taken with rod and reel. The first Penobscot salmon of the season arrived last week in the Boston market, and sold for $1.50 per pound. This fish, with four others, was taken in nets "down river."

Mr. John G. Wright, who, with other members of the Commodore Club, has lately returned from a visit to the club's property, on Moose Lake, in Maine, finds that the Maine Fish and Game Commissioners are willing to do all they can for the Commodore Club in the way of stocking the lake with landlocked salmon or trout. The matter of this restocking was the principal object of the visit of Mr. Wright and the other members of the club to Maine this time. Commissioner Stanley tells them that they shall have their share of fish that have been hatched by the State this season, but that the number must necessarily be small, for the reason of the low water last autumn at the time of taking the spawning fish. It is probable that the next Maine Legislature at its next session will be asked to close permanently one or two of the trout streams that lead into Moose Lake, the nurseries of the trout that are to supply the lake. The club proposes to set off a part of one of these streams to receive and rear the small fry, that they hatch or obtain, till they are large enough to set at liberty with some sort of assurance that they will not be destroyed by other fish.

SPECIAL.

THE CANADIAN SALMON RIVERS.

Editor Forest and Stream:

Your leading article of March 31, on the salmon anglers' petition, shows a misapprehension of the true point at issue. You say:

> The Canadian Government leases to Canadian and American clubs and individuals a number of rivers for salmon fishing. It asks and receives for these privileges a substantial rental. Those who pay the rents are quite reasonable when they demand that they shall receive that for which they pay. * * * The lessees of many streams have naturally come to feel that the Dominion Government is—unwittingly it may be, but none the less effectually—perpetrating an imposition on them when it takes their money and gives them no fair return of fishing opportunities.

In taking the liberty of correcting your statement, I may, as one of the signers of the petition, perhaps afford some information to my fellow salmon anglers on a subject which does not seem to be very clearly understood, especially by our brethren in the United States.

The Provincial Governments issue the leases for and receive the rental from salmon angling. They own the salmon rivers, except, of course, where the exclusive right of fishing has been granted by them or where, in Quebec, it belonged to seigniories. The Dominion Government does not issue any such licenses, and receives no rental from salmon anglers in any way.

The misconception arises from not understanding that each Province of Canada is, within its own sphere, as independent of the Dominion as each State in the Union is of the United States. Each Province has its own government and its own legislature. The Government of Canada and the Parliament of Canada deal with matters affecting the Dominion as a whole.

In 1867, by "The British North America Act," Canada, Nova Scotia and New Brunswick, then in separate colonies, were constituted the Dominion of Canada. And what had formerly been the Province of Canada was divided into the two present Provinces of Ontario and Quebec.

Before Confederation the Government of the old Province of Canada owned and leased the ungranted salmon rivers in the Province. From 1867 to 1882 the Dominion Government, continuing this practice and relying upon the clause in the B. N. A. Act which says that the Dominion Parliment has the power to legislate on the subject of "Sea Coast and Inland Fisheries," assumed that the ownership of all ungranted fisheries was vested in the Dominion. The Dominion Government accordingly issued licenses for salmon angling in Quebec and New Brunswick Rivers, and maintained fishery overseers and wardens for the protection of what is supposed to be its property as well as for the enforcement of its laws as to times and modes of fishing.

In 1882 it was decided by the Supreme Court of Canada, in the case of Robertson vs. The Queen, that the Dominion Government's view of the case was wrong. The Court held that the clause in question gives the Dominion Parliament the right to legislate on such subjects as are essential to the protection and preservation of the fisheries, *e. g.*, times and modes of fishing, but that the right of property in the fresh-water fisheries is vested in the Provinces or their grantees. That is to say, the owner of the fishery, whether that owner be the Province at large or an individual, holds, enjoys and disposes of his fishing just as he does any other property, according to the law of the Province on such subjects; the Dominion Parliament tells him when and how he shall or shall not fish. Since 1882 the Provinces of Quebec and New Brunswick have been disposing of their angling rights. At first some of these were sold outright, but of late years they have merely been leased for a term of years. Nova Scotia and P. E. Island have not done anything in this way, but in those Provinces most of the fishing rights of any value were granted with the land long ago.

The Dominion Government, however, still assumes to own and adminster as the public property of the Dominion the fisheries in the estuaries and on the coast, regulates netting there and issues licenses and leases for such netting. The principle of the decision in Robertson vs. The Queen would seem to show that these estuary and coast fisheries are also Provincial property. The question has not been formally raised between the Provinces and the Dominion, though it has been mooted. Had Mr. Mercier not come to grief his government in the Province of Quebec would probably have attempted to get control of the tidal fisheries as well as of the angling.

The judgment in Robertson vs. The Queen has been acted upon by the Provinces of Quebec and New Brunswick for ten years. The Dominion Government has seemingly acquiesced therein by leaving the Provincial grantees and lessees undisturbed, and by withdrawing their officers except those engaged in supervising the fish hatcheries and the estuary and coast nets. In effect they said to the anglers, "You choose to hold from the Province, well, you can protect yourselves or get the Province to protect you."

Yet it should be clearly understood that this judgment was not a final settlement of the difficulty. If the question were again raised and carried to the court of last resort, the Judicial Committee of the Privy Council in England, that judgment might possibly—I do not say probably—be reversed, and all these Provincial grants and leases of fisheries be declared invalid. On the other hand, as said above, the Dominion might lose the ownership of the net fisheries.

This view of Robertson vs. The Queen was probably the occasion of the protest by the Canadian Department of Fisheries, which was served upon all lessees of fishing rights obtained at Quebec in January, 1890. The protest would be evidence that the Dominion of Canada did not surrender any right which it might have or acquiesce in the leasing.

From the above it will be evident that the Dominion Government might, if it chooses, treat the salmon anglers as persons whose titles to fish it questions, in fact denies, and might bid them look to their grantors, the Provincial Governments, to make their holdings worth having. There would not be much comfort to be got from that source.

It will be equally evident that your view of the case, though well meant, is misleading and could only result in misunderstanding and disappointing. The true ground to be taken, in my humble opinion, is that set forth in the petition, viz., that the request is in the real interest of all concerned, the Dominion at large, the Provinces, the net fishermen and the anglers. It can be proved that there has been serious falling off in the catch of salmon both by netters and anglers; that the main cause of the decrease is due to improvident and ill regulated netting; that Canada is thereby in danger of direct and great commercial loss; that the large sums annually spent among the people by anglers will also be lost; that the net fishermen themselves have more to gain from the proposed change than have the anglers, and that the large amount of capital invested in Canada by salmon anglers, which is indeed greater than that of the salmon net fishermen of the two Provinces concerned, deserves consideration and protection. These points and the others which can be made and proved, are quite independent of any question as to who owns the fisheries or who gets the revenues, and if urged properly upon the Minister of Marine and Fisheries will doubtless receive the consideration that he is always ready to give any question within his jurisdiction and affecting the public interests in Canada. The subject is a broad one, it involves many considerations and interests which seem at first to conflict. It would be a grave mistake to treat it from any narrow or mistaken standpoint. Thanks to Mr. Blanchard, the salmon anglers have now an opportunity to show that not merely their own sport but the preservation of the salmon fisheries on the Atlantic coast of Canada from extinction is in question, and to secure the thorough consideration of this in a business-like way. Such an opportunity is not easily got and it ought to be made the most of. The way to do that and make the case good is to present facts and figures which cannot be controverted; to meet the objections of ignorance, prejudice and self interest with no partial knowledge or mere opinion, but with a working command of the whole subject; to have a practical acquaintance with the actual conditions of the Canadian salmon fisheries as a whole, both the netting and the angling, and to be able to apply the experience of other countries where these questions have been and are being worked out.

OTTAWA, Canada, April 4. J. G. A. CREIGHTON.

Editor Forest and Stream:

You say the petition presented by the anglers to the Minister of Marine, to the effect of forcing the net fishermen to take away their nets three days in the week, is just and reasonable, and you advise the Minister of Marine and Fisheries to comply with their request.

I am sorry I cannot agree with you no more than I could with Mr. D. H. Blanchard, representing the cause of the anglers. The reason on which I base my opinion I have already given in a letter published in the issue of the Montreal *Star* of March 26 last, when I urged the Honorable C. H. Tupper to adopt a course totally in opposition to that counselled by you.

Yours is a serious, weighty, well-informed and ably-published newspaper, but it seems, on this occasion, to have gone on the wrong track. I quote your article of March 31 last:

> The Dominion Government leases to Canadian and American clubs and individuals a number of rivers for salmon fishing. It asks and receives for these fishing privileges a substantial rental. Those who pay the rent are quite reasonable when they demand that they shall receive that for which they pay.

This argument crumbles at the outset, inasmuch as all fishing privileges enjoyed in the tidal parts of rivers are rented by the Provincial governments, and by the riparian owners in any other part; nay, more, a great many rivers in the Provinces of Quebec and New Brunswick are the exclusive property of amateurs and the central government does not derive the least benefit from that source.

You go on to say: "As a matter of fact, the salmon have been decreasing and the fishing has been growing poorer and poorer."

Although the decrease of salmon found in our rivers is not so great as alleged by the petitioners, let us, for the sake of reasoning, say that angling is not so successful as it was ten years ago. Does this militate against net fishing? I have already denied it, and again I say, no.

It stands to reason that if net fishermen were allowed to fish but four days in the week a greater quantity of salmon would go up our rivers, but this would uselessly ruin an industry by which thousands of persons get their living, and which figures in our export trade to the amount of three millions of dollars.

It is knowingly I use the term "uselessly ruin," because in net fishing is not found the chief cause of the evil they want to stamp out. It is found first in the poaching going on every year in our salmon rivers, in spite of officials generally well paid to guard against it, but more or less faithful and watchful in the fulfilment of their duties; second in the fact that all anglers are not sportsmen in the real meaning of the word. Many of them, in order to make money, allow persons often unfettered by notions of what is right to fish in our rivers very late in the season, to track salmon mercilessly, several miles from the shore, and even catch them in their spawning places. I speak here with a full knowledge of the case. And how many other reasons might be brought forward to account for the decrease of salmon in our rivers. The heavy rains in fall, an early shove of ice, the floating of wood, the pollution of the water by refuse thrown in it, all this seems purposely to be forgotten by those who want to make a stronger case against the poor net fisherman who is less guilty than many others.

I strongly favor the protecting of salmon fishing or any other. It is necessary. But I would like to see justice meted out equally to all. Let salmon nets be made the subject of strict regulations with regard to their shape, let trap nets be forbidden, not increased. All this I entirely approve of. But let angling be restricted by equivalent measures; let it not be allowed to kill salmon in the places where they spawn, after the net fisherman has left them a free passage. Above all, let poaching be put down by every available means.

You further say: "This petition is not a call to the feelings but to common sense. It is just and reasonable and ought to be granted."

It is for this very reason that it clashes with reason and common sense that I oppose it, as will all those who are at all versed in the matter and wish to treat it in a disinterested manner; and therefore, the Minister of Marine and Fisheries is bound to overlook the prayer contained in it. L. Z. JONCAS, M. P. for Gaspe.

OTTAWA, April 5, 1892.

[Our error was an inadvertent confounding of the jurisdiction of Dominion and Provincial authorities. But this in no wise affects the claim that the petition asks only for what is wise and just and essential to the true interests of all concerned, the Dominion, the Province, the angler and the net fisherman.]

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., April 9.—The meeting for organization of the State Fish League, to be held at Springfield next Wednesday, April 13, promises to be fairly well attended, if postal card promises count for ought. There are at date twenty-three absolute promises from points outside of Chicago, and many more than that number should be on hand from among the possibilities and uncertainties.

Warden Buck, who was sent down the Kankakee River on another trip since the raid on the nets at English Lakes reports that the case against Brown, one of the offenders, is now disposed of. Mr. Dennis, the State Fish Commissioner, agreed to waive fine provided Brown would permit the destruction of the nets. The latter were burned by Brown's consent. This was the LaPorte county case. The case against Auge, in Stark county, went before a justice and Auge was fined $20 for having nets in possession. The case for setting nets and taking fish is before the grand jury, Buck as a principal witness. An investigation of the river from Mak-saw-ba Club up to the B. & O. bridge disclosed no nets, but three more were found in English Lake. Warden Buck naively remarks: "Auge says he is going to fish, but I don't think he will."

The Kankakee River is very high, as indeed are all our streams, by reason of the recent extraordinarily heavy rains. The pickerel are working in the shallow water, and many are being speared. Mr. O. M. Harlan writes me from Momence as follows:

"At the present time there is a great deal of spearing going on here. I have reported several cases to your association, but nothing was done. I do not feel it my duty to incur expense in having these parties apprehended when there is an association backed with the necessary funds to prosecute offenders. Every night a dozen or more lights are to be seen along the river, and as to fish being speared, there is no doubt. The members of the Kankakee Association do not molest nor remonstrate against violation. It is an easy matter to make arrests."

Mr. Harlan also sends me a local paper item in regard to a 19lb. pickerel alleged to have been taken on hook and line at Momence last week by Parish Logan, but assures me that the fish was really speared, as he heard the man say so.

All this is unfortunate, of course, but I do not think Mr. Harlan should be too impatient with the Association. There will be done only what can be done, and that is everything, of course. At present the limited fund of the association is being applied along the upper part of the Kankakee, in the country which furnished most of the funds. In a short time if there is any money left, Warden Buck will drop down the river and look after a few of the spearers.

In the Fox Lake country the waters are out of bank and channel. A gentleman lately back from Grass Lake says he never saw so many pickerel as he did along the shallows of the overflow from that lake. The natives were shooting and spearing them by hundreds. Where is Warden Jeff Smith?

Earnest and even petulant complaints in regard to the tremendous destruction of game fish on the Kankakee at Aroma have just come into my hands through Dr. Bartlett, of the Illinois Commission. These are chiefly from the Indianapolis Club, with quarters at this point, which is only eight miles below Momence. The illegal netters are known and help is wanted. As usual, the local men are afraid and the local club men are shy about $25 apiece, as usual, by way of practical getting at the trouble. Let these timid local men and these bold club men raise one-fourth of the necessary fund, and the Kankakee Association will supply the balance and send a man down who will jerk their nets and netters for them. Money talks. Cash has a pleasant sound in its voice. I do not notice this sound in the wail from Aroma, neither the harsh grating noise of even a little bit of sand.

A trip down the Kankakee to the mouth is needed very much. The fishway at Kankakee is reported to be not working. It is said that the grating across the top is only 1¼in. in size.

Some bass have already been taken on the fly on the lower Kankakee. A few bass have been taken in the Fox Lake chain on bait. The high water has come at just the right time, for the warm weather has unquestionably started the run of bass. We would have good angling this spring and summer, if the fish were given a chance.

Mr. Charles Norris, traveling agent of the Kankakee Line, is formulating plans for an early trout trip into the wilds of Wisconsin, probably April 16.

Mr. A. C. Ely, one of the most enthusiastic and widely-traveled anglers of Chicago, has gone to the Castalia Stream of Ohio for some trout fishing. Mr. Ely had only been one day back from Florida, where he spent the winter. In Florida he had the exciting experience of being towed a mile or so by a huge devilfish, into which he put sixteen bullets from a .45 without much visible effect, although the creature was finally landed.

Fishing in Crève Cœur Lake and other waters near St. Louis has begun, and some good catches have been made, mostly of croppies.

Mr. Arthur Woods, of Grand Rapids, Mich., writes me that Mr. D. F. Sweet, of that city, has perfected an electric motor so compact as to be easily applied to fishing boats, and that he expects to have a boat so fitted.

The first annual meeting of the Chicago Fly-Casting Club will be held at the Grand Pacific Hotel, parlor A, Monday next, April 11, at which time many interesting questions will come up, among others that of adopting a complete set of rules for competitions. This was touched upon last week. An esteemed contemporary published at this city also has touched upon this, and that with no light hand. The e. c. in question thinks it doesn't matter whether the reel is above or below the hand in fly-fishing. The e. c. also gravely asserts that success in fly-fishing depends much upon the "insulation of the fly and angler when on the water." This leaves us in some doubt, inasmuch as it does not state whether or not the angler should be insulated when off the water. The e. c. is evidently trying its best to get at it, however, and that is the main thing. Instance where it speaks of "imbuing" the fly with motion. It might be easier to imbue it with a little cochineal dye, or maybe even plain shoe blacking, but of course, if a fellow wants to "imbue" a fly with motion, he can try. E. HOUGH.

The New York Fish Commission has authorized the netting of pickerel from Meacham Lake.

"WITH FLY-ROD AND CAMERA."

It is characteristic of the stately volume by Mr. Edward A. Samuels, "With Fly-Rod and Camera," that the angling reader may open its pages at random and find himself at once in the company of congenial spirits, as thus, page 118:

"SURE enough," said Hiram. "Many's the good fish I've seen lost by the best fishermen, and sometimes the oldest hands have the hardest luck. But come, gentlemen, the pool is well rested now, and there is a beautiful ripple on the water, and see the drift of clouds that is coming over."

Rising from our recumbent positions in the shade at his words, we found that a breeze had sprung up, and taking our rods we prepared for another trial in the pool. The wind was rippling the surface of the water beautifully, and the chances seemed good for a speedy rise. Frere now took a position in the rapids at the head of the pool, wading out to a depth of two or three feet, while I began casting above the eddy, across the pool.

This was a fair "turn and turn about" for us. It was much easier to cast down the pool from the head, but the chance for a salmon was best in the deep water near the foot. Frere had had his opportunity, and it was my turn now. Lengthening my line at every cast, I soon reached the coveted spot, and putting my fly in the curl of the water, I rose and hooked a grilse.

"Cre-e-e!" how the reel sang, as the fish darted up and down the pool, leaping high in the air, sometimes three or four times in succession.

William seized the landing net, the gaff not being needed for a grilse, and stood ready to land my fish.

A shout from Frere, who was standing in the rapids, attracted our attention, and his bent rod indicated that he, too, had hooked a large fish, which a leap at that instant showed to be a salmon.

"Don't give the grilse any more time, Doctor," exclaimed William. "We must get him in before that salmon runs down here and crosses your line."

I did not need his counsel to see the urgent need of such action, and in a very short time the landing net passed under the grilse, and he was in the hands of the guide.

Frere was fast to a noble fish, and his heavy rod, bent into an arch, showed that he was endeavoring to keep him up in the pool, away from the dangerous rocks where he had lost the first fish.

It was a grand fight! Frere, immediately on striking the fish, left his position in the rushing water, and took his stand upon the point of the beach near by, thus obtaining a perfect command of the entire length of the pool.

The salmon in the first rush took out at least 60yds. of line without stopping: then, with a mighty leap, sprang into the air, his red eyes gleaming like rubies in their silver casing. Like a rock he struck the water, throwing it up with a heavy splash in all directions. As the fish fell, Frere relinquished his heavy strain upon the rod, dropping the tip a foot or two, in order that the salmon might not free himself by falling upon a taut casting line.

It was only for an instant, however, that the line was slackened, and the fish had hardly returned to his native element when the drag of the rod was again put upon him. Again and again the salmon leaped high in air four times in rapid succession; but Frere met his every effort with the consummate skill of the perfect angler.

For at least a quarter of an hour did the salmon course up and down the pool, now keeping it in a boil with his gyrations, now swimming deep, and apparently trying to chafe the line against the rocks at the bottom; then darting with the speed of lightning to another part of the basin, where he repeated his maneuvers.

Fortunately he did not endeavor to reach the rapids below as the other fish had done, but contented himself with the deep water in the middle of the pool.

At length it was evident that the steady strain of the rod was telling upon the fish. His leaps grew less frequent, and his rushes less spiteful. He began swimming in circles, and once or twice almost turned on his side.

"He's done for," shouted William, who, gaff in hand, was following the fish back and forth along the beach.

"Don't be too sure, sir," said Hiram, who had been watching the contest with the keenest interest. "Many's the salmon lost when he keels over on his side."

And Hiram was right; it is often one of the most critical moments when the salmon turns on his side. The fisherman, perhaps in the certainty of his prize, unconsciously relaxes his lift upon the rod; or the fish secures an unexpected buoyancy, and thus attains an unlooked for leverage; or the hook, in his new position, twists out of its fastening, which had been worn wider and wider by the struggles of the fish: either or all of these combined have time and again in my observation turned the exultation of the fisherman to bitter disappointment and chagrin, as the salmon, with no apparent effort, sank back into the water, and the fly "came home."

In Frere, however, the salmon found his conqueror. With superb skill he met every effort of the fish to escape; relaxing not a moment his command of the rod, he kept the same steady strain upon the line; reeling in when the fish yielded a foot, and holding all he gained throughout the struggle.

The salmon, in turning the third time upon its side, gave Frere the opportunity he had desired; without attempting to use the reel, he stepped back quickly away from the pool, the "lift" of the rod dragging the fish at the same time toward the shore. In a flash the gaff was in the glittering prize, and the fish was borne up high on the beach, away from the dangerous proximity of the water.

"Indeed, but he was well hooked," exclaimed Hiram, as he opened the mouth of the salmon to remove the fly.

"Sure he was so," assented William, as he endeavored to take out the fly. "The hook is clean through the roof of his mouth."

So securely was the hook fastened that it was found necessary to cut it out, the tough skin of the palate holding it with the greatest tenacity.

"Shake, old chap," I said, grasping Frere's hand, as I congratulated him on his first salmon of the season.

LANDING A SALMON.

Next to killing a good fish myself, I love to see a friend take one, and I can honestly asseverate that I have time and again had more pleasure in helping a comrade to a royal fish than I should have had if it had fallen to my own rod. It is only a "fish hog" who wants it all himself.

It was now high noon, and the guides began preparations for dinner, and before long an abundant meal was spread out upon our rustic table. And such appetites as we had, as we helped ourselves liberally to the delicious viands! The active life, the bracing mountain air, the excitement altogether, had stirred our blood in such a way that we were absolutely hungry, a condition that the city dweller knows but little of. We had a little more variety than at breakfast, the canned soup, etc., lending assistance, but I contented myself with a third helping of boiled sea trout and potatoes. These are always good enough for me in the woods, if they are flanked with good bread and butter and a good dipper of tea.

Why is it that tea has such a relish on such occasions? Usually I am very abstemious of it, in fact hardly ever using it, but in my outings it is quite different, and coffee, which at home constitutes my regular beverage, loses its relish. And I have noticed time and again that guides and canoemen also prefer tea to coffee, and it is astonishing how much they are dependent on the cup that "cheers but not inebriates." Indians and white guides are the same in this respect, and many a time has my canoeman, without a word from me, glanced up to the noonday sun, pulled silently ashore, and lighted the fire for "b'iling the tea kittle." A pint dipper of strong tea with a biscuit or two has, in a hurried journey, proved sufficient, if followed by the inevitable pipe; and the paddle or setting pole was resumed with renewed vigor.

"Well, Frere," said I, as we arose from our bountiful repast, "what shall it be, stay here to-night or move on up the river?"

"It is hard to decide," he replied. "We know there are fish here, and don't know there are any above."

"Oh, plenty above, no trouble," exclaimed the guides with one voice, evidently anxious to be moving; like all guides I have ever met, they were not satisfied to remain long in one place.

"We might, if that is the case," replied Frere, "go on as far as the fifth pool, stop there to-night, and then move on to the upper pools to-morrow. What do you say?" he asked, turning to me.

"All right," I replied, "we are sure to find sport in some of the pools, and even if we don't we have an abundance of food."

"Indeed ye have, and more," exclaimed Hiram, "but I thought if we got up the stream to the farms in the upper settlement, we could send out to the hotel a lot of fish for your folks to eat."

"Well, boys, break camp," said I, "and we will pack and start."

In a short time all our belongings were packed in the canoe, and we were ready to start.

For quite a distance up the river the water was so shoal that all of us had to wade, the canoe barely clearing the rocky bottom, with no other load than our camp equipage and stores. After that there were at intervals stretches of a third to a half mile where there was water sufficient to float us. In fact in many places it was too deep to be waded.

We fished the best pools on the way up, but succeeded in getting only a few sea trout, although we saw many salmon. The sun was too bright and the water too clear for us to expect old *Salar* to come to the fly at that time of day.

Frere and I took our stands upon the rocks by the side of the pool, and cast for at least an hour, but we rose only a few trout, and we responded willingly to the announcement from William that, "Supper's ready, gentlemen."

With rousing appetites we disposed of the feast spread out before us, and then, once more stretched out before the camp fire, we burned our incense in comfort and contentment with all the world.

"After all, Doctor," said Frere, "there is no pleasure like that the sportsman enjoys."

"Right you are," I replied, "and no other sportsman gets the solid satisfaction that the fisherman does."

"I believe you are right," he replied, "there is nothing I enjoy so much as angling."

"No, I've tried almost everything, have shot almost all kinds of game, and have had my share of yachting and hunting, but I find nothing that begins to offer a comparison with salmon fishing."

"No," said Hiram, "it's a king's own sport, altogether."

"It is so," said William, who had been busy at dish washing, but who had now joined our group at the fire, "and it's the thing that proves the nature of a man better than anything else I know of."

"You're right, William," said I. "I want only a few hours on the stream with a man to find out exactly what he is. If he is a gentleman, bred in the bone, he will not fail to show it."

"And if he is the other thing, he cannot hide it, neither," replied William.

"Many's the quare divil we've been out with, and many's the hog we found out among them, hey, Hiram?"

His brother grunted an assent, but made no other reply.

"Yes, there's nothing like a fishing trip with a man to show his true character," said I.

"I remember an incident that will illustrate this. I was once fishing a river in Nova Scotia with a man whom I had always considered a perfect type of a gentleman, but inside of three days he exhibited traits that I would not have supposed he possessed.

"We were stopping at the same hotel and had the river all to ourselves. At the beginning we agreed to draw lots for pools, and it being my first choice, I took the first pool from the salt water, he the second, I the third, and so on through the whole five miles of fishing that we had.

"I noticed that his countenance seemed to show dissatisfaction when the choices were made, but as nothing could possibly be fairer than our arrangement, I took no notice of his discomfort. He had fully as good pools as I had, and I could think of no more equitable way of dividing them.

"Well, our first day on the river was one to be remembered. We left the hotel together and walked to the river, a mile or so, chatting pleasantly and enjoying the delightful morning hugely. But when we reached the river, and I began rigging for my first cast in my pool, instead of going along to his own, he sat down on a log and began grumbling like a bear with a sore head.

"'It's just my infernal luck,' he said, 'to have you get this pool. I always liked it, and in fact it's a favorite with me.'"

"That was a good starter," ejaculated Hiram.

"Yes," I replied.

"'Well,' I said to him, 'I don't mind, you take my

pools and I'll take yours to-day, and to-morrow we will change.'

"'No,' replied my friend, 'that will give you the fourth pool to-day, and as that is the best pool on the river, and it has not been fished lately, I am sure of a salmon in it.'

"'Very good,' I answered, 'we'll stick to the original programme.'

"By this time I was rigged and ready to begin casting. My friend still sat on his log, although I suggested he had better take advantage of the early fishing.

"I began casting, and rose a beautiful fish at the third cast. I missed him, and then such a growl as my companion uttered would have tried the patience of Job.

"'Just my infernal luck. Oh! what a beautiful fish. If I had had this pool. Cuss the luck,' etc., etc.

"I waited a few minutes and then began casting again, and soon rose and hooked my salmon. It was a bright silvery fish just from the sea.

"Such a look of absolutely green jealousy and envy as I caught on the face of my friend I had never seen before, and it destroyed all the pleasure I was expecting. However, I played the fish as well as I could, but I felt nervous, for I had never before had such an experience. Alas, my casting line parted in the middle of one of the furious runs of the salmon, and he was free.

"'Too bad, too bad,' exclaimed my friend, but his countenance belied his words, for if ever I saw a face lighted up with satisfaction his was.

"He took his rod and guide and started off for the second pool.

"After repairing damages—the fault was in the casting line, a flat place only an inch in length in the gut having broken, all the rest of the leader being perfect—I cast in the same pool again for a while, but without any success.

"At length I reeled up, and with my guide moved along up to the third pool, which was my next one. As we passed the second my friend was busy casting, but he had no rises, as his guide informed us.

"At the third pool at my second cast I hooked and killed a grilse, and soon after rose a fine salmon, hooked and played him, and my guide was just on the point of gaffing the fish when my friend joined us.

"He came down the path with a bound, and as we killed the salmon he burst out with a loud 'I congratulate you; I congratulate you!' but he looked ready to cry.

"All this made me so uncomfortable that I said I would give him the balance of the river for the day, for I had had all the fishing I wanted, and with my guide carrying my salmon and grilse, I returned to the hotel."

"Ha, ha!" shouted Hiram, "that man wanted the earth."

"Well," I continued, "the next day it was the same story, and the next. Nothing would satisfy him, and on the evening of the third day I told him that on the next morning I was going to another river a few miles away and he would have this stream all to himself, and even that did not satisfy him, for his last words when I left him on the following day were:

"'Don't kill all the salmon in the river, for I expect to fish it in a few days.'"

"He was a hog clean through," exclaimed Hiram.

"He was," assented William.

"Yes, there is nothing like going fishing with a man to give one a true insight into his character," said Frere.

"Sure," responded Hiram, "and it don't take a guide long to find him out."

"Right you are, Hiram," said William.

And the brothers were right, no one can size up a fisherman as correctly and quickly as an old guide, and I confess I always make my first casts with that trepidation when I am out with a new man, knowing, as I do, that my every movement is scanned with the keenest scrutiny and my every word weighed in a balance that is unerring.

ANGLING NOTES FROM PORTLAND.

PORTLAND, Me., April 2.—The Sebago fishing for landlocked salmon is looked forward to this spring with more than usual interest. Reports from all sources last fall were favorable to an increase in the number of fish running up the tributaries to spawn. Our local anglers are overhauling their tackle and getting paint on their boats, to lose no time when the ice leaves, which will not be for some weeks yet.

Poaching and wanton slaughter of spawning fish have reduced the Sebago waters to a state of depletion which will require years of careful management to make good, but local sentiment is now better than for years past, and we are hoping there may be a return of the days when a day's trolling would give a fair return. If any of your readers care to visit us, it should be done with an understanding that it means a great deal of time and labor with no surety of fish.

Your correspondent will be glad to afford any inquirer through your columns such information as he can from time to time acquire.

Black bass have increased wherever they have been placed in our State and afford plenty of sport. The nearest pond for Portland anglers is Duck Pond, distant about eight miles, and a few of us who persist in following it up, find plenty of fish. So far as my observation has been supplemented by experience, our Maine bass are not partial to the fly. This mode of fishing captures small ones, but the three and four pounders of Duck Pond, Lovell's Pond, the waters at Norway and Waterford, refuse anything which is not alive. How it is with the fish at the Belgrade, Winthrop and Pushaw ponds I cannot affirm, having never fished there. At the other ponds mentioned I have taken a great many, but must confess that I have never yet landed a bass without regretting that his name, color and flesh did not make him a trout.

SPURWINK.

WISCONSIN ANGLERS WANT FISHWAYS placed in the dams obstructing the ascent of fish to the upper waters of Fox River. They are seeking also to prevent the wholesale destruction of fish by mill refuse, against which existing laws afford no protection. The paper mills are especially active in causing fish mortality. There is no good reason why corporations and individuals for whose benefit streams are obstructed should not be compelled to introduce fishways at their own expense, and everybody who is interested in fish and fishing should aid in securing legislation compelling dam owners to provide a free passage for fish to their spawning grounds.

BIG TROUT AT CASTALIA.

APRIL 2 Mr. John Sweeny, of Detroit, caught in the waters of the Castalia Trout Club, with a fly, a brook trout weighing 4lbs. 1oz. This is the largest fish on record in Castalia waters, Mr. Yale, of Cleveland, having previously led the score with a trout taken from the part of the stream belonging to the Castalia Sporting Club weighing 3lbs, 3oz, and Mr. J. W. Oswald, of Toledo, having been high rod in the upper club (first named) with a fish of 2lbs. 8oz.

There has always been a spirited, but good-natured, rivalry between the two clubs as to which could produce the largest fish, and it will now behoove the brethren in the lower association to excel Mr. Sweeny's prize, if it is a possibility. The Castalia Sporting Club has the best part of the natural stream originally, but the upper club have greatly improved their territory by the construction of the artificial stream already fully described in FOREST AND STREAM. The membership of the upper club is in Sandusky, Detroit and Toledo, while that of the lower organization hails mostly from Cleveland. JAY BEEBE.

TOLEDO, O., April 9.

FISHING AT THE WORLD'S FAIR.

THE classification of the fishery exhibits at the World's Fair will be as follows, being Department D., Fish, Fisheries, Fish Products, and Apparatus of Fishing.

Group 37.—Fish and other Forms of Aquatic Life.

Class 218. Aquatic life—scientific collections and literature. Works on aquatic zoölogy and botany. Maps illustrating geographical distribution, migration, etc., of fishes and other aquatic animals. Specimens and illustrations representative of the relations between extinct and existing forms of life. Specimens (marine and fresh water), fresh, stuffed or preserved, in alcohol or otherwise, casts, drawings, and representations of objects named in the following classes:

219. Algæ, genera and species, with localities. 220. Sponges, corals, polyps, jellyfish. 221. Entozoa and epizoa. 222. Oysters, clams and molluscs of all kinds; shells. 223. Starfishes, sea urchins, holothurians. 224. Worms used for bait, or noxious; leeches, etc. 225. Crustacea of all kinds. 226. Fishes, living or preserved, or represented by casts, drawings, or otherwise. 227. Reptiles, such as tortoises, turtles terrapins, lizards, serpents, frogs, newts. 228. Aquatic birds. 229. Aquatic mammalia, otters, seals, whales, etc. 230. Characteristic plant and animal life at great depths. 231. Fishing grounds.

Group 38.—Sea Fishing and Angling.

232. History of fishing, fishery laws and fish commerce.
Ancient fishing implements and their reproductions.
Models, pictures, books, emblems.
Charters and seals of ancient fishermen's guilds.
Fishery laws of different countries.
Copies of treaties, conventions, etc., dealing with international fishery relations.
Reports, statistics and literature of fish, fishing and fisheries. Reports of acclimatization of fish, and of attempts in that direction.
233. Gear of every description and of all nations, used in trawl, herring, long-line, hand-line and every other mode or system of fishing, fishing lines and rigged gear.
234. Fish hooks, jigs and drails.
235. Fishing rods and reels for lines and nets.
236. Nets and seines, rakes and dredges, and materials used in their manufacture.
237. Fish traps, weirs and pounds.
238. Fishing stations and their outfit.
239. Knives, gaffs and other apparatus.
240. Illustrations of special fisheries. The whale and seal, cod, mackerel, halibut, herring, haddock, pollock, menhaden, swordfish, bluefish, oyster, sponge, and other sea fisheries.
241. Fishing boats and vessels.

Group 39.—Fresh-Water Fishing and Angling.

242. History and literature of angling. Waltonian literature. Folk-lore. Anglers' trophies.
243. Salmon nets and fixed appliances for catching salmonidæ in all their varieties.
244. Salmon rods, reels, lines, artificial flies and baits, gaffs, spears, creels, etc.
245. Bass, pike, perch, rods, reels and tackle, artificial spinning baits, etc.
246. Traps, nets, bucks, wheels, and all kinds of apparatus for catching eels, lampreys, etc.
247. Anglers' apparel of every description.
248. The anglers' camp and its outfit.
249. Illustrations of special fresh-water fishery. Shad and alewife, sturgeon, eel, salmon, whitefish, the Great Lake fisheries, etc.

Group 40.—Products of the Fisheries and their Manipulation.

250. Models of fish-curing and canning establishments. Methods of and models, and other representations of any appliances for drying, curing, salting, smoking, tinning, cooking, etc. 251. Fish, dried, smoked, cured, salted, tinned, or otherwise prepared for food. 252. All products prepared from fish, such as oils, roes, isinglass, etc. 253. Antiseptics suitable for preserving fish for food. 254. Oils, manures, and other products prepared from fish. 255. Methods of, and models, other representations of appliances for preparing oil and manures from fish. 256. Sea and fresh-water pearl shells; mother-of-pearl, manufactured; pearls sorted. 257. Preparation and application of sponges, corals, pearls, shells, and all parts and products of aquatic animals, etc., to purposes useful and ornamental, with specimens. 258. Appliances for carrying fish, and for preserving fish during transport or otherwise, and models of the same. Models of fish markets and appliances connected with the same.

Group 41.—Fishculture.

259. The history of fishculture.
260. Hatching, breeding, and rearing establishments, including oyster and other shell fish grounds.
261. Apparatus and implements connected with fishculture, and for transporting fish and fish ova. Food for fry.
262. Representations illustrative of the development and progressive growth of fish.
263. Models and drawings of fishways and fish ladders.
264. Diseases of fish, with special reference to their origin and cure. Models and drawings.
265. Processes for rendering streams polluted by sewage and chemical or other works innocuous to fish life. (Illustrated by models and drawings.)
266. Physico-chemical investigation into those qualities of salt and fresh water which affect aquatic animals; investigation of the bottom of the sea and of lakes, shown by samples; aquatic plants in relation to fishing, etc.; researches into the aquatic fauna (animals of the several classes, preserved in alcohol or prepared, etc.); apparatus and implements used in such researches.
267. Acclimatization of fish. Marking of introduced fish for purposes of identification.
268. Statistics of the results of fishculture. Specimens of fish artificially propagated or introduced.

STRIPED BASS AT HAVRE DE GRACE on Saturday, April 2 were unusually plentiful, we are informed by Mr. W. de C. Ravenel. Several thousand were seen in one lot and these were nearly uniform in size, weighing from 3 to 5lbs. All of those examined by Mr. Ravenel were males of remarkable fatness. Philadelphia and Baltimore at the time were glutted with striped bass. About the same date white perch were taking the hook pretty freely at Washington, D. C. The bait used, worms. Shad are running in the Potomac and excursions for planked shad have begun.

TROUT KILLED BY LIME.—The discovery of thousands of dead trout, from 2 to 14in. long, on the banks of the Homowack and Mountaindale brooks when the ice went out about the beginning of April, caused intense indignation among the anglers of Ellenville and Newburg. The destruction of the fish was total and was due to placing lime in the streams by way of revenge upon the New York gentlemen who were endeavoring to protect leased portions of the brooks. This so-called infringement of natural rights of fishery at any and all times by warning off trespassers led some fiendish residents of the localities to the perpetration of a dastardly outrage. Let us hope that Fish and Game Protector Kidd may identify the miscreants and turn them over to the scorn of their honest fellow men and the penalties of the law.

POTOMAC NOTES.—Washington, D. C.—Anglers are getting ready for the white perch fishing. Some have already been hooked, and a larger number netted. A good run of shad occurred in the river April 1, and seines thirty miles down did right well. A good many rockfish and perch were also taken in the seines. Sunday, April 2, was a very warm day, and Monday, too. A big run of fish is now expected. Many things pro and con are heard here concerning close season for black bass in the Potomac. While many anglers are ready and only waiting for clear water, a few others are willing to hold off and give the fish a chance to spawn. The Legislature of Maryland has passed a protective law for bass; it now remains to be seen whether or no it will be enforced. We hope so.—BON.

NEW YORK BAY FISHING.—Shad flies have been swarming along the shore of the bay since the latter part of March, and old fishermen regard them as a sign of a great run of fish. Striped bass are to be expected in force if we may judge from their abundance in waters not far distant. Deputy Harbor Inspector Capt. F. A. Tappan is steaming about the bay looking after the garbage dumping scows in order to protect the fishermen, and offenders against the law will find swift punishment for their misdeeds.

LAKE TROUT FOR LAKE GEORGE.—The new fish car Adirondack arrived at Lake George, March 31, with 500,000 lake trout fry from the Caledonia hatchery. The fish were deposited in the lake the same day by John D. Walzer, and the car left the lake April 1 on its return trip. The trout were secured through the efforts of Gen. Robert Lenox Banks, president of the Lake George Fish and Game Club.

NOW THAT WARM WEATHER is at hand, and the snow has gone, the brooks are clearing themselves and we go a fishing. But where? It is not time yet to go north or northeast, and so our choice is limited to southwest or west. No railroad running out of New York offers greater facilities for the angler than the Erie line, which in its windings through the Alleghenys as it proceeds westward approaches or crosses a thousand lakes, rivers, creeks and brooks which abound in splendid fish. The angler may take his choice of worms, minnows or flies, he may try for sunnies, pickerel, black bass or trout, and if he is patient, industrious and earnest, as each faithful disciple of old Izaak should be, he will not return empty handed from his quest. The angler's pleasure during his outing depends in very large measure on his surroundings. If his journey is comfortable and he is well provided with the necessaries of life while on his trip, a fair degree of success will leave him none but pleasant memories and a wish to repeat his excursion. The Erie road furnishes accommodations so comfortable as to leave nothing to be desired by its patrons. It is a favorite line not only for those anglers who wish to visit near-by waters, but also for such as are on their way further west to wet a line in the blue waters of Lake Superior, or in the grayling rivers of the Michigan peninsula, or in the hurrying streams which pour down from the continental divide. Shooters and fishermen traveling westward should try the Erie.—*Adv.*

New Fishing Tackle.

Rudolph's Ventilated Tackle Boxes, Pocket Tackle Box, Glass Minnow Trap, Adjustable Bait Box, Chain Fish Stringer, Floating Minnow Buckets, Floating Live Fish Net, Floating Minnow Pocket. Ask your dealers to let you look at these, it will pay you, or send for illustrated circular to RUDOLPH MFG. CO., Chicago.—*Adv.*

THE LITTLE DAISY MINNOW TRAP is a labor-saving machine; it saves you time and trouble, working for you while you wait and sparing you the trouble and annoyance of wading about through the mud and water. It is no trouble to use it, and it catches the minnows sure enough. The inventor, Mr. Ed. C. Wilson, is prominent in business and politics in Richland county, Ill.—*Adv.*

Fishculture.

FISHWAY CONSTRUCTION.

Editor Forest and Stream:

I am pleased to see that the fishway question is beginning to receive the attention it deserves by both press and people. This is demonstrated to me more particularly by the increasing inquiries from many foreign countries, as well as the United States, and also by the universal demand for the "common sense" fishway bearing the name of the Rogers.

The conditions presented by Hon. Marshall McDonald in his recent letter are certainly some of the chief conditions upon which fishways should be constructed when practicable; but he has not carried the conditions far enough. Light and simplicity should be added as very important fundamental principles. Light particularly, for many fish will not enter a dark passage, as I have demonstrated by experiment. A reasonable amount of light should always be provided—the more the better. The advantage of simplicity will be shown further on.

All of those conditions, together with the above, were, years ago, covered by the principles of the Rogers fishway, and it is to-day the only one having the entrance for the fish on a line with the dam, this feature being covered by my original patent. I will endeavor to give a brief outline of some of the most important modes of construction, without the use of illustrations, which are too large and numerous for presentation here.

When I began the study of this question, more than twenty-five years ago, the first principle I found necessary to master was the production of a simple artificial brook, to represent nature as nearly as possible, with a current sufficiently easy to allow any and all fish to ascend, and yet with sufficient depth, volume and force of discharge to attract the fish to the entrance. This thoroughly mastered after years of experiment, the next problem was to devise some means of placing the entrance on a line with the dam, a principle which had ever been overlooked in all former devices. This obstacle was overcome in a number of ways, to the utmost satisfaction, and marked a new era in fishway construction.

By placing the fishway above the dam, on an incline of about one foot in nine or ten, from the lower face of the dam, through and up to within a foot or eighteen inches of the surface of the water (the walls rising about as many inches above the surface), the whole being inclosed in cribwork and covered with strips of timber with spaces between for light, and with a suitable ice-head, this perplexing problem was overcome so far as small wood dams were concerned. Some other means, however, must be found fo

heavy wood and stone dams. This is most satisfactorily accomplished by building the fishway on a parallel line with and against the lower face of the dam, and running on same grade as above until the top is reached, where a turn at right angles is made through or over the top of the dam. The whole is constructed in crib and covered in such a way as to be as strong as the dam itself, light being admitted from the lower side.

On extra high obstructions it is found very effective and economical to construct as above to half the height of dam, then make a direct turn upon itself, reaching the top directly over the entrance below. This makes a staunch and model structure and saves great expense in timber, etc. At the turn of this fishway is a square flume, into which the upper part empties, and from which the lower part gets its supply of water—which always remains at the same depth as the water at the upper entrance, and may be considered almost still water. Thus is provided a "half-way house" for the fish, in which they are known to congregate in large numbers. This same mode of construction is sometimes used against the wall of the mill feeder, with the entrance for the fish at base of dam, the fishway running down stream to half its height, then reversing, delivering the fish directly over or through top of dam, or over the feeder wall, where they pass through the gates to the river above.

All of the above applications are of superior merit for the accommodation of all kinds of fish, but to overcome certain conditions sometimes met with, another mode of application is used, which is also doing good work. It is as follows: Two fishways placed side by side with a channel from 7ft. to 12ft. wide between, discharging a strong and far-reaching current, which the fish are sure to find and ascend until the force becomes too great for further progress, when they drop out at either side into the inviting streams from the fishways, of which they at once take advantage and proceed on nature's mission to their spawning beds above.

As to the interior construction, it is very simple and entirely devoid of all "Chinese-puzzle" principles, which break up the stream into little eddies, with no direct current for the fish to follow. It gives a stream of sufficient volume to accommodate the largest salmon, and at the same time so easy in its descent that the most sluggish fish has no difficulty in passing through. That the current is easy and the course direct, is proven by the fact that a man can go through from bottom to top, without difficulty, as was done by workmen on the fishway at Mechanicville, N. Y., against a full head of water, encountering many fish of different species on the way.

It will be seen by the foregoing brief outlines, that the Rogers fishway covers all of the many conditions essential to success, all of which have been gained by hard labor and practical experiment, simple theory not having entered into the researches.

As to the "measurable success" of which Mr. McDonald speaks, it is only necessary to say that if increasing the catch of fish on a small stream (the Clyde, in Nova Scotia), salmon, from 350 to 3,750lbs., alewives, from 35 to 450 barrels per annum, in a very few years; increasing the catch of salmon on the Gaspereaux River, in Nova Scotia, from 300 to 2,000lbs, alewives, from 8 barrels to 1,800 barrels per annum; passing salmon and all other fish over the 16 and 12ft. dams at Mechanicville and Northumberland on the Hudson; passing shad and other fish over the dam at Lackawaxen, on the Delaware, to the waters above, where they are caught in quantities; passing alewives and shad over a natural fall of 60ft., as at St. George, New Brunswick; passing salmon and shad over dams too numerous to name here, I ask if these few citations from many of like nature, do not bespeak success immeasurable, what then is success?

The greatest novelty claimed for this fishway is its striking simplicity, which enables it to be located in any place and under all conditions, being invariably ice and freshet proof. In overcoming natural falls it may be twisted around cliffs and rocks, without in the least disturbing the interior arrangement or affecting the perfect and easy current, which, no matter what length the fishway may be, runs no faster at the bottom than at the top. W. H. ROGERS.

AMHERST, N. S.

MINNESOTA FISHWAYS.—About twenty owners of dams on Cannon, Chippewa, Fish Hook, Pomme de Terre and Zumbro rivers, in Minnesota, have been notified by Game Warden Stetson to put in fishways or suffer the penalty for violation of the law. He gives them from thirty to sixty days' time to complete the work. The Shaw fishway is the model adopted and its cost is said to be trifling. This way consists of a series of rectangular compartments arranged spirally at different levels and varying in number with the height of the dam. The width of the opening in each compartment is about one-fourth the length of the box. The amount of water introduced from the dam is regulated by a gate in the top compartment. The designer, B. F. Shaw, was formerly Commissioner of Fisheries of Iowa, and probably first undertook the rescue of food and game fishes from sloughs and ponds in the Mississippi basin. Persons who know of dams without fishways are asked to notify the State Fish and Game Commission of which Dr. R. O. Sweeney, Sr., at Duluth, is president.

FIXTURES.

DOG SHOWS.

April 13 to 16.—Third Annual Dog Show of the Continental Kennel Club, at Denver, Col. R. W. Isenthal, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

FIELD TRIALS.

Nov. 8.—Second Annual Trials of the New England Field Trials Club, at Assonet, Mass. Geo. E. Stickney, Sec'y.

NATIONAL BEAGLE CLUB.

Editor Forest and Stream:

An executive meeeting was held at 266 Washington street, Boston, Mass., April 1.

President Chapman, Vice-President B. S. Turpin, and W. S. Clark, W. A. Power and R. V. Jamieson were present.

Minutes of executive meeting held Feb. 6, 1892, read and approved. The president reported his interview with the Bench Show Committee of the N. E. K. C. while acting as a committee of one, and it was voted that the special as printed in the N. E. K. C. catalogue be approved.

Vice-President Turpin reported in relation to auditing of the club's book to Jan. 1, 1892, in fulfilment of a vote of the club. A misconstruction of the vote of the club by the secretary delayed the fulfilment of the vote, and he read two letters from secretary and treasurer, who held that the club's books should not go out of his possession, and that nothing in the vote of the executive committee so instructed him, and he therefore respectfully declined to send books out of his possession until such vote therefor was taken. He furthermore invited Mr. Turpin to his house to audit the books or would bring them to any meeting of the club. In relation to above it was resolved that Mr. Turpin be sent the books, papers, vouchers, etc., by express. The same to be returned by express one week from date of receipt. No report from committee on constitution. Report of committee on running rules was read by Mr. Turpin, who acted in place of the chairman, he being absent, and the report was accepted. Meeting adjourned.

The regular quarterly meeting of the N. B. C. was held at Mechanics' Hall, April 7. President Chapman called the meeting to order at 8:15. Minutes read and approved. Treasurer's report to April 1, 1892: Total receipts from all sources, $95.91; total expenditures, $23.73; balance in treasurer's hands, $72.18. Voted that report be accepted. Communications read and filed.

The following communication from Mr. F. C. Phoebus was read and on motion was referred:

BOSTON, April 7.—Gentlemen of the National Beagle Club—As unfortunate circumstances prevent me from being present at your meeting to-night, which fact I earnestly and seriously regret, I feel it my duty to address you not only for the purpose of expressing such regrets, but at the same time to express an opinion on a certain matter which will no doubt come before you, viz., raising the standard of measurement, and changing the value of certain points in scaling our little favorite, the beagle hound, who in times past not only contributed to our pleasure in the field, but has often loaded our game bags in a manner most surprising.

I am of the opinion that our present standard of fifteen inches should be raised to sixteen inches. Beagles seldom exceed the latter height, while many do exceed the present standard, and often the choicest puppies of the litter, as they reach their growth, become practically useless for bench show purposes, though symmetrical in form, and perfect specimens of the beagle types, yet they pressed the standard too strong, and must be ruled out or suffer disqualification. There is no question but that this idea is becoming a firmly fixed one. Nothing in universal nature is actually a fixed fact. Though certain laws governing such nature may seem to be fixed, changes are constantly taking place.

But I do not care to trace an argument increasing the standard of this class of dogs through all the realms of natural causes, but suffice it to say, it is a subject upon which we can harmoniously act, inasmuch as those of us favoring the small dog have asked for and obtained permission to increase the original standard from 12 to 13in. We who favor the larger dog can reasonably expect that they will assist us in pressing our claim to an added inch in our choice, which, to keep the proportion of the previously existing standard proportionate, should really be 16¼in. I recall distinctly, though then not a member, that when the matter of increasing the standard of the 12in. beagle to 13in. was brought up, I suggested that three-quarters of an inch be given to the smaller type, while a whole inch be given to the 15in. class, merely to preserve the proportionate difference.

Being honorable gentlemen, and members of the same club, we are compelled to admit that consistency, as regards this matter of measurements in the different beagle classes, loses none of her virtues or prestige as a jewel. Then let us adopt this extra inch rule; by so doing, our many visiting friends at our various entertaining displays cannot be barred from seeing such members of this class on the bench as are now relegated alone to the field, though almost perfect in symmetry, grace of action and qualification to attract attention and call forth admiration.

On the second proposition, viz., Points of scaling: As such scale exists to-day, the head of the beagle is given 35 points—more than one-third of the entire value of the whole dog. While I desire that our beagle should have exclusively beagle type, as to head, that fact can be just as well expressed in its full value by 25 as by 35, giving the 10 points so taken to the running gear, viz., legs, feet and hindquarters, which, with the prestige of another inch at shoulder, would give better form for the bench, and substance competent to stay in the chase; besides increasing his will, desire and ability, for many repetitions when each preceding chase was over.

During my experience of 18 years in breeding and handling beagles, the best specimens of the dog for field quality and general appearance were from 15in. full to 15½ full—viz., "Punch" and "Dead," winners in Washington, D. C., in 1882; "Old Racer," Dorsey's "Mars," Phoebus "Cæsar," and hosts of others, all disqualified under the present standard, though never beaten in the field. It may never be my privilege to participate in any of the events which will arise under your management, yet I am none the less deeply interested in the improvement in this breed of sporting dogs, who, when in full cry after the fleet Mollie, stir the most lethargic soul into activity as the chase goes by, and stand enraptured at the many-noted tongues.

Perchance, in the future state of existence, these grand favorites may be our companions. If so, when free from care and worriment, injury or anxiety, we can condone the present suffering and denials in view of the opportunity then before us.

Let me, in conclusion, thank the gentlemen of this club, for courtesies extended to me during my sojourn here, and should my health improve, I shall hail with gladness the time when Boston's dog show day again dawns. Truly yours, F. C. PHOEBUS.

Mr. James T. Flannelly, 444 Hanover street, Boston, elected to membership.

Voted, that running rules be adopted as read, and following amendment be added: Entries: Rule 3, Sec. 2.—Entries shall be mailed to the secretary in sealed printed envelopes (to be mailed with entry blanks) indorsed Field Trial Entries. All entries so received to be opened and acted upon at an executive committee meeting.

Voted, that where the N. B. C. offer a special prize, whether it be cash or silver or whatever the prize may be, said special prize be sent to Bench Show Committee, previous to opening of show, and any such prize not awarded be returned to club. Messrs. Brooking, Clark, Turpin and Rutter in affirmative; Messrs. Power and Jamieson in negative.

That copy of standard of N. B. C. be sent to whoever may be the accepted judge at every show. That Mr. Phoebus' letter be published over his own name in connection with report of this meeting. That $5 for best dog and $5 for best bitch be donated to the Toronto bench show, open to members of N. B. C. only. That a sufficient number of copies of the running rules be printed. Meeting adjourned.

H. V. JAMIESON, Secretary.

"SPECTROSCOPIC" JUDGING.

Editor Forest and Stream:

Your covert dig at me, by connecting my mention of the "Spectral" incident with the "Moses" slander on me, is most unkind. I had a good reason for giving the real facts as to "Spectral" illusions in an English, instead of in an American paper: it made a good running mate for that incident of the "led in" black and white pointer. Perhaps you may think that it is only a piece of "Moses" for me to be concerned in how setters are judged, but if so, you are wrong. Setters, as such, have no earthly interest to me, but as a lover of dogs and dog shows, it does interest me that no breed shall be judged, year after year, in a way to arouse storms of ridicule and scorn. The disappointed exhibitor will always be with us, and the judge who is always right will never visit us, but the snarlings of the disappointed exhibitor and the frank and honest differences of opinion, are immensely different in results from the wrathful indignation that has been provoked by the English setter and pointer judgings at New York show for many years. The "disappointed" is accepted as an inevitable nuisance, and the honest differences of opinion are vastly beneficial, but the almost invariable butcherings we have had for several years, and the contempt thereby engendered for dogs, dog men and dog shows in general, is most mischievous. Surely it is not necessary to go into any argument to prove these propositions. W. WADE.

HULTON, Pa., April 9.

MT. WASHINGTON KENNELS.—Pittsburgh, Pa.—*Editor Forest and Stream:* Please state that Joe Lewis has ceased to be my kennel manager, and that I have secured Vern. E. Wallace, of Waynesburg, Greene county, Pa., to manage and handle my dogs in the future; and all the dogs have been removed to Waynesburg, where the kennels are now situated.—MT. WASHINGTON KENNELS (S. L. Boggs, Proprietor).

POINTS AND FLUSHES.

CHICAGO, April 9.—The celebrated prize-winning English setters Cincinnatus and Toledo Blade will be included in the kennel partnership of Messrs. Dager & Osthaus, so that the interests of these two gentlemen in kennel matters are now jointly identical.

Col. Cody's greyhounds, which were presented to him by Col. North, have been resting in the Leland Hotel stables, this city, this week, during their owner's sojourn here.

The recent wolf-killing match, which ended so ridiculously on the plains of Colorado, has done more to injure the interest of the Barzoi in his struggle for popularity in this country than the care of years can remedy. If a scheme had been devised to ruin the Barzoi's reputation and cast complete discredit on his wolf-killing capabilities, it would probably have fallen short of the late match in planning effectiveness and execution. To make good fighters, a long and varied experience is necesary for the dogs to learn how to fight wolves. They must know the most effective manner of attack, fighting as individuals or as teams; and they must as a matter of course know how to evade attack.

Mr. E. Hough, Western correspondent of FOREST AND STREAM, made a very accurate forecast of the outcome of this match in his communication to FOREST AND STREAM of Feb. 25, under the caption of "Chicago and the West." He wrote as follows: "Mr. Roger Williams, who will be one of the judges in the forthcoming wolf race between the Eastern Barzoi and the Western greyhounds or deerhounds, raises an interesting question when he asks whether 'wolf' means coyote, and if not, where shall any better sort of wolf be found? Western Kansas is suggested. There are plenty of coyotes there, but no gray wolves, unless one by mere chance passes through. On the cattle ranges of the Indian Nations the grays have been hunted and poisoned so systematically that they are hard to find. If that now celebrated race is to be decided on a genuine gray wolf basis, the hunt will have to go to a cattle country, and that means either Texas or Montana, the former probably the better country in practical features, though inconvenient for the owner of the Western dog who lives in Montana. If they jump a regular gray, either a Texas loper wolf or a Montana timber, the contest will be easy of judging if only two dogs are slipped, and the owner would do well to take a basket along to carry back the fragments. Even a big coyote will make a good fight with twice that many good dogs.

"It would be pleasant to see this wolf race deferred until it has grown to larger proportions. It is a long way to Montana to see three or four runs. If some of the older wolf hunters of Kansas, Mr. Luse, for instance, should become interested, and a few of the old wolf dogs of the greyhound packs be gotten together, we would have a great meeting of genuine sport, new and exciting in its variety. Greyhounds will go to a wolf ahead of either the Russian wolfhounds or the deerhounds, and if the better class of experienced wolf-dogs of greyhound breed can now be found, they should win in such a contest. The greyhound Yonder He Goes, which is named as one of the dogs Mr. McDougall will enter against the Barzoi, is of recent experience, if any, in wolf killing. In Kansas, before Mr. Luse sold him to Montana, we knew him as fairly fast only, a little crafty on jacks, but a tremendous stayer. He could run all day apparently. If he has since then been killing wolves, big wolves, gray wolves, he is the dog to pit against the wolfhounds. If not, he is simply an unknown factor. The dog which will actually run into and close with a big wolf is a very different animal from the one whose owner thinks he would do so if he had a chance. Two dogs will have a serious time with a gray wolf.

"I have at my table a fine gray wolf skin, 6ft. 5in. in length, given me by Mr. D. R. Streeter, whose cattle range is just below Kiowa, on the line of the Cherokee Strip. Two greyhounds ran into and threw this wolf, but he rose and was fairly dragging them both, one on each side, when Mr. Streeter ended the fight with a pistol shot, not wanting to see his dogs cut up. These dogs were a blue and a red fawn greyhound, either of which would weigh over 70lbs., I should think, the largest greyhounds I ever saw. Wolf hunting, if the quarry be the gray wolf, is wild sport enough to make the blood tingle. I should like to see this contest, if it were so handled that a number of good dogs could compete in a practical country, where something larger than coyotes can be found. But I shall not care to see less than four dogs slipped on a gray, for less would not render the fight equal to a point less than cruelty to good servants."

Mr. Hough's practical experience in hunting big game and animals in the West through many seasons, and his knowledge of the fighting powers of both dogs and wolves, derived from personal observation, enabled him to predict the result to a certainty. It was also mentioned in these columns that the high altitude of Montana as compared with that of Pittsburgh, would affect the Barzois' wind and endurance if they were not given time to become acclimated. In the match to kill a gray wolf inside of fifteen minutes, both showed pluck, judging from the reports of the matter, but both were forced to quit, presumably from exhaustion, as it is stated that both were exhausted. Briefly, all the dogs had no proper training in hunting wolves, a gray wolf is too formidable for two dogs to kill, the Barzois were not acclimated, and none appeared to be naturally endowed with the pluck which is ascribed to its breed.

In the West the greyhound is the favorite for big game hunting, and, indeed, the experience of hunters seems to justify this preference. The killing powers of a team of good greyhounds is something most formidable. Mr. H. C. Lowe, of Lawrence, Kan., has a strain of greyhounds which in size, strength and courage are admirably qualified as big game hunters. Last year Master Peter (Lord Neversettle—Partera), with four of the Neversettle—White Lips litter, killed a large gray wolf, the skin of which was mounted and can now be seen at the Kansas State University. Mr. M. E. Allison, of Hutchinson, Kan., had a famous pack of greyhounds which would not hesitate to tackle wolves, bears or any large animal, and in the words of a sportsman who had seen them hunt, "A wildcat was pie for them." Mr. D. C. Luse, of Great Bend, Kan., has also had great experience in wolf killing with his greyhounds. Both these gentlemen could write most instructively on this subject and inform the public just what the greyhound's capabilities are in this matter. I think that the greyhounds, now bred with a view to coursing, are lighter in weight and smaller in size than those formerly used for large game hunting.

Mr. George LaRue, secretary of the Pointer Club, was in this city on the 8th inst. From here he goes to Minneapolis.

From letters received I learn that the weather has been very bad in the South, snow, severe storms and unsettled weather obstructing the work of the dog trainers seriously. The best part of the training season is now over for this spring, so that there will soon be a lull in training till the summer work begins, when several dozen more winners will be in order. B. WATERS.

Mr. F. H. Perry tells us that the Des Moines (Ia.) Poultry and Pet Stock Association will hold a bench and poultry show the second week in January, 1893. A first-class man will judge each department.

"He isn't a very pwetty dog," said Freddie, "but he follows me every wheah, you know." "Indeed?" returned Freddie's broker. "What do you suppose makes him do it, affection or curiosity?"—*Washington Star.*

BOSTON DOG SHOW.

ANOTHER Boston show has come and gone, and the show of 1892 must be counted one of the most successful of the series. The show, as usual, was held in the Mechanic's Building, but the locality is being built up so rapidly that it no longer occupies a somewhat isolated position as in former years. There was a steady attendance from the opening of the show, April 5, till the closing hour of April 8. Many visitors well-known in dogdom were to be seen strolling round the aisles. Among those I noticed at the N. E. K. C. luncheon the first day were Messrs. Geo. E. Osborne, J. H. Long, L. Seabury, James Mortimer, H. Clay Glover, J. M. Taylor, V. Haldeman, E. H. Morris, Wilson Fiske, Jean Grosvenor, A. Loveland, John Davidson, J. W. Newman, C. L. Symond, Frank Dole, H. A. Harris, H. W. Smith, George A. Fletcher, W. Atherton, W. A. Power, E. H. Moore, C. A. Parker, Geo. Raper, E. B. Elliott, Harry Twyford, Walter J. Comstock, F. Blackwood Fay, and about a dozen others whose faces I did not know. During the week I noticed Dr. James E. Hair, T. R. Cartland, C. T. Brownell, W. H. Harris, "Cy" Wilcox, George Jarvis, C. D. Roberts, W. H. Hyland, F. W. Chapman, H. V. Jamieson, O. W. Brooking, B. S. Turpin, H. M. Parry, W. F. Rutler, Jr., F. C. Phœbus, Jas. E. Green, Arthur Trickett, Ed Booth, George Bell, C. F. Browning, Herbert Merriam, Harry Tallman, W. H. Ledyard, E. B. Sears, Henry Brooks, Edward Brooks, Clarence Rathborn, John E. Thayer, and others. In fact it was a very representative gathering. The four rings were large and well placed, and were well served, there being no lack of attendants.

Under Mr. John Read's careful superintendence aisles were kept clean and dogs well exercised. The ventilation at times might have been better as in some parts there was considerable aroma, the weather being oppressively warm the early days of the show. Spratts benching was nicely arranged and well put up. The committee, as usual, were very successful in their labors, Messrs. E. H. Moore, F. Blackwood Fay, F. C. Curtis, H. A. Harris, C. S. Hanks being most noticeable in their efforts. The judges, Messrs. James Mortimer, John Davidson, H. W. Smith, and Dr. J. S. Saunders did their work well and there was less grumbling than at many other shows this spring. With the exception of dachshunde and the specials all the awards were published in FOREST AND STREAM last week.

MASTIFFS (*Judge, James Mortimer*).—Dry rot seems to have set in among the mastiff classes this year judging from the poor showing they was making, and Boston was no better than the others. Sears' Monarch was the only challenge representative, and he was looking extremely well. Open dogs had an entry of seven—Ingleside Maximillian being marked N. F. C. The winner turned up in Merlin II., looking better than at Washington. Ilford Caution II., more of the type in vogue seven years ago, came next; long in head, he needs more chest, but his forelegs are very nice. Ben Hur, third, is pale in markings, feet turn out, and pasterns are weak, eyes light: his best part is the body. Bruce, vhc., is another fiddle-headed one, but has good bone. The contest in bitches lay between Madge Minting and Gerda II., the former winning, but I cannot tell how, as Gerda beats the other everywhere but in muzzle, and especially in straightness of forelegs, bone, body, depth and breadth of chest and loin. Ruby Gem, c., is flat-faced. First was withheld in puppies, and the only entry, Punch, had to take second; he is too coarse in coat, ears are thrown back, legs good, but he is light in loin. He was afterward consoled by winning Mr. Wade's prize for the best mover, and certainly he is all right on his pins. The kennel prize did not fill.

ST. BERNARDS (*Judge, James Mortimer*).—Outside of the well-known winners, who stood out prominently from the others, there was little that deserved more than passing notice. In challenge dogs, Aristocrat and Plinlimmon, Jr., faced each other, and it was a close contest. It was thought that Plin's better legs and body would offset Aristocrat's advantage in expression, for many liked the shape of Plin's head the best, though his expression gets worse as he puts on wrinkle. They were placed as named, but the decision is liable to be reversed. In the next class there was little work for the judge, Lady Livingston being so much superior to Manon, who moved queerly behind. In open dogs Sir Bedivere simply watched the fun, and the croakers about this dog's collapse should have seen him here, as barring a very slight ragginess in coat he was looking as strong and well as when he landed. He has put on more muscling behind, the result of steady walking exercise. Lord Melrose, the giant, looking a little thin but very healthy, was some distance from the winner. Jim Blaine, third, as at New York, I preferred for the place. Lothario, the unlucky, as usual kicked himself because he is so small, barring this he would not be long in the "reserve" list. A new face in Imperator came out, an Aiton pup, a big dog with good legs and coat, bit weak in pasterns, skull fair but too dished in foreface, and muzzle not deep enough, nicely marked, light in loin, and would do with ribs being better sprung. Prince Draco, hc., head fair, but legs not as they should be; his color is against him, and he is straight in hindlegs. Rex Withington looks too much like a collie in body, shows quality in head, but muzzle is too weak. Rhoderic Dhu is small and weak in pasterns, narrow skull, wide front and coat curly. Leo, c., is poorly colored and is straight-faced. The bitch class had about twenty entries, the winner being the beautiful Lady Gladwyn, who beats Lady Sneerwell in legs and shape of head and expression. Hepsey occupied an unwonted position in third place, the judge not liking the shape of her head, it is a bit too short and lacking in feminine softness, but Lady Sneerwell is not much if any better in the latter respect. Lady Adelaide II., reserve, was well placed, and Princess Saffron, vhc., is light in coloring, a bit leggy, rather plain in head, and big in ear. Altonette, vhc., was in her proper place, and Lady Melrose could not hope for more. Florette, in the same division, is rather plain-faced, though head well formed, shows the haw too much, has good bone and were she better, ribbed would have a good body. Dorothy IV., hc., moves a little tied behind, but is better than when shown at Providence, she is a nicely formed bitch and could have had another letter. Lady Vaughan, also hc., is faulty in head and legs. Bayadere, c., has a mean expression, is long-faced, has good bone, but badly formed—flat at sides of legs and body is too short. Geraldine is rather dished, or rather too much stop, has good straight bone, is light behind, and when I took her off the bench could not walk. Wyoming Prince, a nicely made youngster, by champion Hesper, easily beat Milo in head and bone.

SOME POPULAR HANDLERS.

JOHN BRETT. CARL HEIMERLE. W. E. CONNERS (½).
BEN LEWIS. JOE LEWIS.
JOE MYERS. DONALD MONROE. HARRY L. GOODMAN.

Empress of Contoocook reigned supreme in smooths, and was the only challenge entry. She looked particularly well, I thought. Leicester's good build and intense quality could not be denied in open dogs, he again beating one of the famous Alton—Judith litter, Alton II., a brother of Melrose, that was shown at New York. The youngster is another well-formed one, well marked, with a good head and legs; needs time. Arthur tells me these two are only pups, the others in the litter being St. Bernards; so we must expect something grand in years to come when the *chef d'œuvres* of this famous litter are shown. Mr. Moore is wise in keeping them back. Belisarius came in for third; he was first last year in a worse class. Scottish Leader needs a little more time in that delightful orchard at Germantown and should not be shown; he has lost flesh and was not so good-looking as at New York or Philadelphia. Earl of Beaconsfield, hc., is very dish-faced, nice ears, lacks shadings, weak in pasterns, feet turn out, rather roach-backed and is not a good one at all. Pluto, c., is faulty in ear, has a long, narrow head, is weak in pasterns, a bit bow-legged and bad behind, but with it all he shows some quality. In bitches Judith, first, is not a bitch one would pick out as the mother of such good pups as the Alton litter referred to, as she is short in body, nearly all white, has nice forelegs, but straight behind; head of fair shape, but needs more shading. Lady Hanway is flat-faced and long, ears not set on well, good legs and bone. Alton II. was alone in puppies. Mr. Sears won the kennel prize.

GREAT DANES (*Judge, James Mortimer*).—These did not show up so well either in numbers or quality as in former years. In dogs, first was withheld and second given to Thorolf, whose legs and body redeemed a poor head showing too much stop. Rubey, a pup not mentioned, had little or no type. Belley, first in bitches, a litter sister to Rubey, had better pretensions to good form, but was only so-so.

BLOODHOUNDS (*Judge, John Davidson*).—Mr. Glazier's well-known dog, Jack the Ripper—this name is a libel on such a dog and should be changed for the good of the the breed—was alone in challenge class. In open dogs Belhus had no difficulty in beating the leggy Bruno, who loses to the former in wrinkle, peak, leather and feet. Benison, the winner of second at New York, was alone in bitches, and looked very well.

DEERHOUNDS (*Judge, H. W. Smith*).—It is many years since Mr. Smith donned the judicial ermine, the last Newark show I believe was the time, but that his eye is not out can be seen by the careful way he judged his classes. In challenge dogs Clansman had to give way to Robber Chieftain; the latter excels in quality, head and shoulders, Ramola was rightly placed over the aged Wanda. In dogs, Hillside Raven scored on his kennel mate Alpir in body and ribs, the latter having the better head and loin. Tosso, vhc., is soft in coat and snipy in muzzle, a bitch-headed one, fair otherwise. In bitches Hillside Ruth won over Hillside Sylvia; both are well known. Scotch Mist, vhc., has a weak muzzle, a good front, but turns her hocks in: back rather weak, but quarters well formed. Phyllis, hc., has a short, snipy head, and is light in bone. Of course the kennel prize went to Mr. Thayer's kennel.

GREYHOUNDS (*Judge, H. W. Smith*).—This breed was well represented, most of the old faces being on hand, if I except Ornatus, who, unfortunately, as related last week, got into difficulties with a hot bed frame and was so severely cut in back tendons that it is doubtful if he will face a judge again. Greyhound men will sympathize with Mr. Purbeck over the accident that deprives us all of such a good dog, but I trust he may still be seen out again. In his absence Bestwood Daisy, she of the delicate form, was unopposed in the challenge class. In open dogs Pious Pembroke, barring his head, had an easy time of it with Imperator, who loses in quarters and ribs to the older dog. Lilly of Gainsboro and Lady Clare was the order in bitches, and rightly so. Marguerite, vhc., losing in head, ribs and front to the second winner. The puppy prizes were withheld from a poor lot of scrubs.

BARZOIS (*Judge, H. W. Smith*).—I head this breed as it is named in the catalogue but suppose now that the N. G. C. has taken action in the matter and ordained they shall be called Psovoi, plural Psovie, Psovie they will henceforth be; at Boston they were Barzois. In the challenge bitch class Svodka was, of course, alone, and the first of the breed to attain challenge honors. The open dog class furnished the tug-of-war, however, for Leekhoi had regained his good form and was looking even better than at Chicago, having more feather and coat. The judge was clearly nonplussed, as most of us are in the absence of an acknowledged standard True to the instincts of a greyhound man he leaned toward the dog that in his opinion more truly conformed to the build of that breed, and after considerable examination plumped for Argoss, who certainly, though he has many of the Russian attributes of Leekhoi, such as coat and head, is different in formation of back, ribs and hind parts, in which he more nearly resembles a well developed greyhound. Arguing, as he told us afterward, that if Leekhoi was the proper type then he must throw Argoss out and give the other two the prizes, or, judging from a greyhound point of view, plump for Argoss. He did the latter. Now the question arises which is right? If we are to keep the Russian type as represented by such dogs as heretofore seen before Argoss's advent, all well and good, and such dogs as Argoss, built as a greyhound should be, and this means a dog that is built on the accepted lines of speed and staying power must go by the board. This would be manifestly unfair to such a grand dog as Argoss is conceded to be, and a dog that has in his native country won high honors. The question then arises how could he gain this honor if the other is the accepted type, for the dogs are clearly different. Mr. Hanks maintains they should be fish-sided and that their great depth of chest gives them the lung and heart room that the swell of ribs in the greyhound gives to that animal. A greyhound is not deep-chested, a deep chest being a detriment to his low style of running. The longer legs of the Psovoi allow of greater depth of chest, and his peculiar, stilty lope is entirely different to that of the low-running greyhound, who shoots himself along the ground in the trip or wrench. The sickle-back is another characteristic that is highly developed in Leekhoi but not in Argoss, and like the greyhound, the latter dog has most of his propelling power behind, as his grand quarters denote; here Leekhoi's muscling is different, his muscles are not so bunchy but are longer, clothing the legs down to the rather straight stifles. It has been said the Russians have not bred for uniformity of type, but rather for the best wolf tackler, whether they have or not the fact remains that Argoss is the first of the greyhound type yet sent to this country. This question of type had better be settled at once, and if one or the other is distinctively Russian let neither one or the other be lost by a mixture of the two types, as would seem to be the danger now. It is in order now that the different authorities get together and define an international standard that shall be a guide to the breeders of the three countries chiefly interested. If this is not done the breed will suffer even more than it has done already at the hands of the "wolf killers." To resume—Argoss won and Leekhoi took the red ribbon, followed by Napoleon, a dog that somehow has come over unannounced and that is of the same type as Leekhoi, but showing too much stop: he has however, good legs and is built like Leekhoi in body, though there is not so much of it. Flodeyka was alone in bitches. She is another of the Hanks type of dog. A good object lesson of the confusion that will occur in type if something is not soon decided was afforded in the awarding of the specials when Argoss won the medal for the best dog and Svodka that for the best bitch.

DUKE OF DEXTER.

First at Boston, 1892.

CHESAPEAKE BAY DOGS (*Judge, John Davidson*).—Only

two showed up, Cleveland being truer to the type of these dogs which also seem to be an undecided quantity. The winner is better and stronger in head, muzzle especially, is of the correct sedge color and has a dense water-resisting coat. Wave R. is dark liver in color.

POINTERS (*Judge, John Davidson*).—The judge must have felt gratified to receive such a representative entry, for nearly all the well known cracks were on hand. The capitally built dog Lad of Kent won well from Pontiac, who, with his heavy shoulders and thick neck, should have given way to Tempest in the minds of many. King of Kent was absent. Revel III. was unopposed in the ladies' division in the absence of Lass of Bow. The New York winner, Duke of Dexter, was the winner in the dog class. He is a bit leggy, is rather pinched in muzzle and his light eye spoils his expression somewhat, otherwise he is well built. Dare Go, heavy in shoulders and none too good in head, came next, Count Graphic, in nice condition, was third; he is well known. Devon Banner, not Ranger, as in catalogue, was given reserve; he was at Washington; he is still light in body, looks leggy and throws his elbows out in moving; his head is fairly well formed. In the vhc. lot, Grandee is leggy, rather straight-faced, stands on good legs, but falls away too sharp in quarters. Spot R. is throaty, nice skull, but muzzle not correct, rather scooped out, is wide in chest, body fairly well ribbed. Hc.: Murat is not quite straight in front; has a common, thick head and is loaded in shoulders, good action. Van of Dare is faulty in head, heavy and coarse, and rather straight in stifles. Nox, c., poor head, shows the haw too much and is very light in eye and has a butterfly nose, but his running gear is good. The sweet headed Patti proved the winner in bitches over Lass of Kent; the winner is rather light-weight for this class and I understand a protest was filed on account of her being some pounds under 50lbs., but as it was not entered till some thirty-six hours after the judging the protest was not sustained. She beats Lass in head and expression, hindparts, ears and muzzle; she is very straight in forelegs, and was shown in tiptop shape. Ruby IV., third, is Mr. Symonds's new bitch, shown altogether too fat and with evident signs of the coming litter to Naso of Strasburg; she has good legs, a nice head, though a trifle cheeky, but her body one can tell little about at present. Peggie, reserve, might be better ribbed, nice head, though ears don't hang right, legs good, though a trifle long. Mam'zelle, vhc., was the winner last year; her ears are wrong and muzzle faulty, good legs and feet. In light weight challenge dogs Ossining was alone, and Belle Randolph, looking quite herself, was unopposed in the corresponding class. A cracking nice dog in Arthur won for Mr. Heath in open dogs; his eyes are rather large and light colored, and is a little too much cut out before the eye, a little throaty, but has excellent body, quarters, legs and feet, and was placed in the ring in beautiful condition; in fact, all Mr. Heath's dogs did credit to their handler, "Cy" Wilcox. Graphic Topic came next: he has been mentioned before, and so has Mr. Connell's dog Rock II. Ridgeview Dazzle is another, and was well placed. Grousedale, vhc., third at New York, would do with a better head and more rib. Skip, hc., a black dog, has a fairly good head, but is light behind. Dashing Grenade, in the same division, is broad in skull. Bloom, the winner in bitches, could be better in muzzle, feet are not just compact enough and ears don't hang close; otherwise a well-formed bitch, with sweet expression and lots of quality. Patti Donald's poor head handicaps her good body and legs. Bronx Valley Revel, third, is spoilt in head by a light eye, almost white; fair legs and feet, body and hindparts her strong points. Donna Diana of Alta Vista, I regret to say, I could not find at home. Ossining's Flash, vhc., has a rather mean, flat head, excellent forelegs and feet, and nice ribs. Bella, vhc., faulty in head and front. Claucarty, hc., has a very poor head, and was not shown in as good shape as she might have been. Lass of Kippen, hc., has a fair head, nice ribs, but legs could be improved. The puppies were a fair lot. Pinckney, the winning dog, has good legs and feet, is a little coarse in coat, but body well formed. The winner in bitches, Wild Lilly is a promising bitch, nice head and good bone. Mr. Heath's level lot won the kennel prize.

ENGLISH SETTERS (*Judge, John Davidson*). — These crowded the ring, large as it was, in the different classes. The handsome Kent II. was alone in challenge dogs and Albert's Nelly, looking as well as I have seen this small but well formed bitch, was also the solitary entry in her class. The well known Corsair won this time, his general style better suiting this judge's idea of an English setter. I liked the second, Mr. Raper's new dog called Rockaway in the catalogue, better in head; Prince L., third, is faulty in hind parts, nice front and head. Royal George, reserve, was not to be found; in fact, the way some of these dogs were benched was a disgrace to any show; there was no attempt at rotation, and in the pointer aisles it was even worse, there being only two dogs benched consecutively in a long row. Raven Oak, vhc, has not enough stop, ears not well set on, eye light, and he needs more swell of rib. Sir Frederick, the unfortunate, was vhc., and so was the well known Rowdy Rod, whose short neck, heavy shoulders and plain head could hope for nothing more. Norman, hc., has a coarse, thick head but nice body, legs and feathering. Warwick Rake, hc., was second at Albany. Open bitches was another grand class, the winner, Blue Nell, repeating her victory of last year under the same judge; she was in good form and beats Spectre, who keeps pace with her "tail," in head and back only. Blue Jennie, third, is short in body, head fair, but ears not hung right. Queen Kent, reserve, is a little pinched before the eye and hardly straight enough in front. Lillian B., vhc., not very good in expression, not enough stop, throaty, nice forelegs. Jessie Noble II. and Tan's Lassie are fairly good, the former being rather heavy in front and the latter is weak in pasterns, ears faulty and muzzle plain. Nettie Morris is weak in pasterns but showed herself very shyly. In puppies Rosecroft Matador won; he is open in coat, feet turn out, fair head, but light in loin and body. There were two or three others preferable in the class. Kent Noble, second, being better in legs and feet and head. Victor Hugo, reserve, though a well formed youngster, is a bit coarse in head and should stop growing, as he is on the large size now. Doretta, the winner in bitches, had gone home when I called; the others call for no particular mention. The kennel prize went to Mr. Fred H. Clarke.

IRISH SETTERS (*Judge, John Davidson*).—These classes were also well filled, and with some of the best that we have. In challenge dogs five noted ones were brought out; only one could win, however, and that was old champion Tim, who carries his years very well. He beats Duke Elcho, reserve, in head and ear, but loses in condition. Inchiquin was looking well. Champion Laura B. held sway in the bitch class with none to oppose her. Pride of Patsy, second at Chicago this year, was picked out the winner in open dogs. He is cut out before eye too much, needs more rib, has good legs, color and coat. Rockwood Dandy, second, was at New York and Pittsburgh. He has only a fair head, is thick in neck and none too good in quarters. Kildare Glenmore, third, is a dog of nice type of head, a bit weak in pasterns and feet not true and is rather light in body. Exile II., reserve, was the Washington winner. Blue Rock, vhc., is a well-formed dog but rather large and coarse and a bit strong in head. Sarsfield, Jr., vhc., falls away behind and is flat ribbed. Montauk, also vhc., is faulty in quarters and hind legs only. Rex S., hc., was second at Pittsburgh and there described; should have done better here. Huntington, hc., has a fair type of head, not good enough in front or ribs, color good. Sport, c., has not stop enough. Edna H. won again in bitches, her old antagonist, Norma, being out of the way, second going to the same kennels' Alice Kent, whose name must be well known now. Maid of Borstal, third, I saw last in a different role, trying to spot the elusive quail at High Point, N. C.; she turns her feet out a bit, has a rather English type of head, a nicely formed body and fair color. Mollie Asthore has a fair head and commendable legs, though feet turn out a trifle. Bonny Kathleen, vhc., is snipy in muzzle and body needs more rib, chest and depth of loin; good color. Gynette is rather leggy and narrow-chested; her excellent type of head is her strong forte. The others need no particular mention. Puppies had the winner in Minnie L.; has a fairly typical head, good bone and color, ears are not set on well and ribs need more swell, but this, perhaps, will come. The kennel prize went to Mr. F. C. Fowler's kennel.

GORDON SETTERS (*Judge, John Davidson*).—Gordons were surprisingly strong in local entries, the crack dogs, however, being conspicuous by their absence. Medals in Ben's idea don't pay the freight, or he could have helped the quality along wonderfully. Tyrus was the winner last year and was alone in challenge classes; he is a bit straight behind, but has a nice head and forepart, tan rich on head. In open dogs Ranger B. beat Heather York in head and body. Count Noble, a small-sized dog, with nice tan markings and good body, was third. Dash L., reserve, is not a good specimen and must be considered lucky. Duke C., vhc., has a rather short, coarse head, good bone, but is a bit straight behind. Rex was another vhc. dog; better in head than the other. Gordon Grouse and Gordon Dash were placed in the hc. lot; the latter is rather throaty and faulty behind. Flomont and Countess Roxie were placed as named, the balance of good looks being in Flomont's favor. Lady Gordon, third, fails in muzzle, nice tan. Nell, reserve, I did not like in head, eyes prominent and set too obliquely, giving a peculiar Japanese look to the face. Queen Noble, vhc., has a nice head, but could be better ribbed—but she is a well-known winner. Josephine II., light of tan, broad in skull and throaty, was given two letters. A promising pup in Duchess was the only occupant of the puppy benches.

BEAGLES (*Judge, John Davidson*).—This was as usual an excellent showing, a number of good typical dogs being on hand. The gigantic Storm got in again in the challenge class, and having been pulled down in weight considerably, scraped under the 15in. measure, the one that was used, consequently when it came to correct formation Tony Weller was not in it with him, and Frank Forest has gone off in front and was lame. The charming Lou had her class to herself. A new dog came out in the next class, Pulboro Crafty, and won; he is rather on the large size, has a well shaped head, too much hair on lips, looks as if he had brushed against one of Mr. Nutt's rough-haired beagles sometime, is throaty, ears nicely hung, rather heavy in shoulders, feet a little open, and could be better ribbed up, and should be deeper in body, a bit leggy, but moves well and handles his brush correctly. Puzzle, second, is coarse in skull, thick ears, short, thick neck and too much loose skin, being very throaty, otherwise well formed, but a trifle large. Niagara Boy, reserve, is coarse in skull and a bit out at elbow. Spartacus, vhc., was absent, having been lost before I got round to his stall. Thunderer, hc., is too long cast, head long, but has good running gear. Belle of Woodbrook, looking very well, scored again in bitches, followed by Lufra, also well known. Fanny, third, is cheeky, broad in skull and too fine in muzzle, wide in chest and soft in coat, heavy shoulders and neck. Juno II., reserve, is only fair, and I liked Marvel, vhc., better for the place, though plain in head; and Fitzil, hc., we saw at Pittsburgh. Under 13in. dogs, Clyde, much improved, but still light in body, was alone. In bitches Topsy S., very typical, though not straight in front, won nicely from Tony II.; too heavy in shoulders and fine in muzzle. Forest Daisy, third, is too spiky in muzzle and not straight in bone. Lonesome, reserve, beats Ruby, vhc., in head and compactness of body. Thunderer won in puppies, followed by Rattler, reserve going to Mouche, weak in pasterns and a bit dish faced, good bone. A nice beagle in Charm won in bitches; not filled out enough in body yet, excellent forelegs, face a little long; the others call for no particular mention. The kennel prize went to the Somerset Kennels.

MR. JOHN READ.

SPANIELS (*Judge, John Davidson*).—There is little new to be said of the entries in this breed, most of them have been seen during the circuit. Beverly Negus, in challenge class, was well placed over Newton Abbott Laddie, beaten in head and length, but has the straighter front. In open fields, Newton Abbott Farmer had no competition but was well prepared. In bitches Nancy Lee Obo's fat body should have thrown her out; Rosedale Bess, faulty in muzzle, good front, came in for second; the position might have been reversed. Challenge cocker dogs gave the judge plenty to do between Cherry Boy and Fascination, the latter won beating the other in head, but it is a mere touch, Boy being a little higher on the leg and deeper in body, but then Fascination is but a pup. Ch. I Say had a good time beating Black Duchess. In open dogs first went to the well known Jersey Obo, who beats Victor, second, in type, as he is nothing more than a small field spaniel, much too long in body, head not a cocker's and besides too curly round ears and neck; Black Baby had gone home when I came round; Sancha Panza is high on leg and coarse in head; Ben Rabbi and Brush both h.c., are only moderate specimens Woodstock Daisy, second at N. Y., wes placed over Woodstock Dora who is a little longer in body and not so good in muzzle; Queenie W., reserve, was the Chicago winner and was well up with the others, losing in front somewhat; Lady, v.h.c., has too much stop and skull is too round; Beatrice, h.c., is a fair stamp, but too high in skull, rather light in body and elbows should be truer; Bessie Beard deserved better treatment than h.c., she was at New York. In any other color, Bessie the winner, is faulty in muzzle, nice forelegs; Daisy, second, is too long in head and dips behind the shoulder. Mike O'Donahue is a fair Water Spaniel, lacks curl, coat too open, good topknot, muzzle faulty, good legs and correct tail; Curley, is too flat headed, lacks topknot, tail all wrong, a bad second; Fascination and Woodstock Daisy made a good pair of winning cocker puppies.

DACHSHUNDS (*Judge, John Davidson*).—Zulu II. was a good winner in a rather ordinary class of both sexes, followed by Fraulein Waldrech II., short in ear, fat, short body, nice loose skin, crook and chest. Punch, reserve, is very coarse in front and light behind. This denotes the rest of the class.

FOXHOUNDS (*Judge, John Davidson*).—Nothing very commendable about these, type being a mixture of English and American. Dave Crockett is a well-built hound, that could stand on better feet and is a bit fine in muzzle. Willie H. loses in bone to the winner. Waltham Jewel, a well-known winner on bench and field, was reserve. The others need not be particularized. Modest Girl proved the winner in bitches. She is a sort of heavy American type, with a good hound coat and excellent pins. Madame Nordica, second, is a light, weedy animal.

COLLIES (*Judge, James Mortimer*).—This breed had a good representation, though not up to the class of former years as a whole. Roslyn Wilkes and Cora II. furnished the winners in the challenge classes. Most of the winners in dogs are well known. Ormskirk Shep again proved himself equal to the occasion, downing Renown, who is a bit coarse in head, but is fairly good behind it; Prince Wilkes beats him in head and I like him better all round, barring size. Royal Scot, reserve, has a poor expression, gets his ears up almost prick and is rather broad in skull. Roslyn Conway, looking better, I liked as well, if not better; he is getting a nice coat now. Scotson, vhc., is a little coarse in head, but has an excellent coat. Scotsman, hc., the new Canadian dog, is too high in skull, but has an excellent coat and good legs. Robley, hc., is wooly coated and coarse in ears and head. Highland Floss, the winner in bitches, is a nice stamp, nice head and good dense coat, ears well carried. The merle Blue Ruin, a noted winner on the other side, is a bit full in eye and high in skull, nice legs, frill and coat, a very handsome animal, shown in nice trim. Mother Shipton came in a good third, her sweet expression and collie character being very noticeable. Helen Douglas, another new one of Mr. McEwen's, won well from Roxie in head and coat in the puppy class; others were small. Seminole Kennels won the kennel prize.

POODLES (*Judge, James Mortimer*).—Dexter had no difficulty in beating Black Jack for his new owner, excelling in head, cords and loin. Bean, vhc., is light in loin and wooly coated. Bell, hc., would do with more rib and a better coat, smart action.

BULLDOGS (*Judge, James Mortimer*).—A small entry but choice. Saleni furnished the only challenge entry and looked none the worse for her narrow escape. Pathfinder had no difficulty in accounting for Handsome Dan, who in turn beats Carisbrook in head and bulldog character, being more broken up in face. Adiscombe Gipsy, owing to the death of Carrie, had a bloodless victory.

BULL TERRIERS (*Judge, James Mortimer*).—A rattling show of these dogs faced the judge but of course many of the winners are too well known to need description. Carney had no difficulty in scoring over Prince Bendigo, who loses to him in eye, muzzle and is heavy in shoulders and cheeky, having gone off considerably lately. Stretham Monarch was absent. Edgewood Fancy had an easy victory over Marguerite, who has passed her prime. Edgewood Flyer, getting in good shape, not so light in body, was lucky in meeting Diamond King in such poor shape after his narrow squeak from suffocation; the dog could hardly stand up and should not have been shown; he had a hard fight for his life, but under Dr. Glover's doctoring he was in a fair way to recovery when the show closed. In bitches, heavy weights, Winning Wagtail put another first to her credit, beating British Queen in front and ribs. In the light weight dogs the New York winner, Dusty Miller, was again placed: Slavin second, having a fair head, but is not good enough in forelegs. Lumont Kit was the winning bitch; she stands a bit out in front, and feet and pasterns could be improved. Edgewood Flyer was the only puppy shown.

BOSTON TERRIERS (*Judge, Dr. J. S. Saunders*).—This was a regular field day for these dogs, their enthusiastic admirers getting together the largest entry yet seen of the breed, but I do not agree with the methods used to display this local breed; buntlug and six-foot signs may do for a circus, but are out of place in a dog show. One cannot but admire Dr. Saunders' idea of merit; with such a large entry there was lots of room for a distribution of cards, but this judge was very chary of his commendations, giving vhc., hc. and c. to one dog only in order of merit, thus these cards had as much significance as the prize cards. Tumbler, last year's winner, scored equal 93, I believe, with Prince Walnut, but the latter being brindle and white had to succumb to the all brindle. Ben, third, is round in head and has a bull front when he should be straight. Tom Sayres is a taking looking dog, brindle and white and looks fit for business. In bitches Miss Thora is a very natty youngster, beating Daisy in head and front according to the standard, which in some of the winners I could hardly follow. It strikes me they require to breed more of the bull out of these dogs. Nellie hardly has stop enough and looks plain in head to some of the more finished specimens. Daisy, third, was last year's winner. In the under 20lbs. dogs Rossie Richards was scored the winner over Grip and Groton Tiger came third. The standard calls for a short, fine tail, but few of them had more than a bull screw tail. The winning bitch Famous is a very natty little lady, but has not the flat skull that is called for. Trixy and Peg came in the order named and the former is nice and straight in front with a well turned head. Puppies were not so good. The judge scored the dogs and had a formidable task as the entries numbered about 60. It would be interesting to know what their scores would be if brought in a few hours after and the programme repeated. If the standard is well defined comparison should be a much easier and satisfactory way of judging.

FOX-TERRIERS (*Judge, James Mortimer*).—Boston generally has a capital display in this breed, and this show was no exception. New men are coming into the breed and help to keep the interest up, no matter what the older exhibitors may think about the decisions in the judging ring, and this will always be the case in any popular breed, and especially this one. If judges were all of one opinion then would it be time to squeal in the interests of our bench shows. In challenge dogs, contrary to rumor, Blemton Victor II. turned up as lively as ever, looking a trifle delicate, but no invalid by any means, his kennel mate Lucifer coming next, a place that Raby Mixer was entitled to, better in head and front. In bitches Dona downed the crack Rachel, who did not look as well as she used to. In open dogs, Starden's King, looking well, won from Raby Pallisy, who is a trifle loaded in shoulders, big in ear, nice long head, eye a trifle large, pasterns could be stronger, but good in body and quarters, plenty of coat but soft; just off the ship it was hardly a fair show for him, in color he is all white; the puppy Vandal, a very smart little chap, well deserved third honors, good head, eye, front and coat, faulty in stifles and hocks. Dobbin came in reserve. Ebor Spendthrift and Brockenhurst Tyke were the vhc. dogs, together with the good dog Blemton Valor, whose eye and ground-down teeth should hardly put such a good terrier so far back, as the points of the teeth are the only parts gone, and he still can hold his own and as much more as he could get hold of in a scrimmage. Blemton Volo, hc., is not straight in front, and Sashly Verderer is too round in skull. Peverwyck Rebel, heavy in shoulders and coarse in skull, might still have had another letter. Miss Dollar could not be denied in bitches; Grouse II., a bit too fat, came next, a little pinched in muzzle, ears not carried close enough, good body and quarters; Spinster, well known, was third. Dudley Toilet, reserve, is full in muzzle, fair front, good body and coat. Woodale Regina we spoke of before. Suffolk Teazle won in wire dogs over Risca, who beats him in legs but is too round in skull, wide in front, good coat and bone. Tic Tac, vhc., is not straight in front and is snipy in muzzle. Vandal won well in puppy dogs, followed by Beverwyck Punster, who afterwards won the Apollo Stakes. In bitches the New York winner scored well, beating Seacroft Boaster in head and bone. Blemton Kennels won the kennel prize, though with Dona, Starden's King and Miss Dollar, to say nothing of the others, Mr. Thayer had more than a look in.

DANDIE DINMONT TERRIERS, ETC. (*Judge, James Mortimer*).—King o' the Heather turned the tables on Sir Robert this time, followed by Heather Madge, vhc.; but Sarah, with c., is quite as good a bitch, better in arch of loin and stronger head. Scotch terriers saw the new dog Kilroy win for Mr. Brooks. This breed is making rapid strides. Kilstor, second, loses to the other in bone and head, scoring in ear, eye and short body. Scotch Hot, vhc., was the New York winner. Kilbar, hc., loses in body and head.

IRISH TERRIERS (*Judge, James Mortimer*).—A capital lot of these daredevils; Dunmurry being alone in challenge class. Box IV. and Hanover Boy was again the order in

dogs, with Jack Briggs reserve. Shaun Boy, vhc, too black on face and coarse in head, good coat. Breda Choice, hc., little cheeky and sharp in muzzle. Crate won well from Little Maid in bitches, who is too round in skull, full in eye and feet turn out, but has a good coat. Puppies were only middling, Colleen Ruth being well ahead of the others.

BLACK AND TAN TERRIERS (*Judge, James Mortimer*).—All the entries are familiar to readers of FOREST AND STREAM. Mr. Comstock had a big innings, claiming all the money in both classes, Salisbury beating Jasper easily in head and front. Prince Raglan, vhc., runs the latter close and would beat were he not so badly breeched, which, though it shows the honesty of the kennel, cannot be allowed to pass into the higher circles of black and tandom. Queen III., big and lusty, again overcame her kennel mate, Louie, in markings, bone and head.

SKYE TERRIERS (*Judge, John Davidson*).—Sir Stafford beat Lovet; that is all that need be said; a nice one, just imported, Islay, getting vhc., losing to the dogs in coat and length; good head and carriage.

YORKSHIRE TERRIERS (*Judge, James Mortimer*).—Not a very good lot. First was withheld in open 5lb. class from Don who is mixed in blue, has Skye ears and light tan. In bitches Venus won as she liked. In the small size class Charlie repeated his Philadelphia victory over Prince; better in tan though dark in blue. Some indifferent toy terriers were shown.

PUGS (*Judge, James Mortimer*).—These, on the whole, were a poor lot, and that such dogs as Cassina and Curtis should attain challenge honors is a travesty on the present system. Curtis won. Neither showed up well or can boast a curl. In dogs, Robin Hood had all he could do to beat Tip Top, who is better in wrinkle, muzzle and skull, but not so good behind this as the winner. Kash, Jr., got reserve, and deserved it, over Budge, who keeps going yet with all his weight and years. Midget won in bitches from Lena, who is too fat. Midget has a nice ear and fair head, though skull could be better. Tip Top won easily in puppies.

TOY SPANIELS.—In challenge class Nanki Poo, the "Jap," had to give way to Calumet Ben d'Or, the King Charles. In open class, Cockney Charlie, who is something of a poet, beats Dora in face only, the latter beating in coat and tan, Charlie being rather curly. Tiney, only a fair Blenheim, won over Little Lady, faulty in muzzle, leggy and light in body. Prince, the winning "Jap," is too long in muzzle, but good in skull, rather large-sized, nice coat.

In the miscellaneous class for over 30lbs., the Pomeranian Sheffield Lad won over some indifferent Dalmatians, and in the light weight class the whippet Boston Model disposed of a fair Italian greyhound, whose bad ears were his worst feature. H. W. L.

DACHSHUNDE.—1st, Edward A. Manice's Zulu II; 2d, Philip Dexter's Fraulein Waldeck II. Reserve, Louis Reveillaud's Punch. Very high com., Guy Lowell's Bumble and Louis Reveillaud's Linda. Com., Philip Dexter's Bismarck.

SPECIALS.

MASTIFFS.—Best mover, H. A. Harris's Punch.

ST. BERNARDS.—Best kennel, Wyoming Kennels. Best American bred smooth dog, under 12 months, E. H. Moore's Alton II. Rough dog over 12 months, E. H. Moore's Lord Melrose; bitch ditto, E. H. Moore's Lady Melrose. Rough dog under 12 months, Wyoming Prince. Best in the show, E. B. Sears's Sir Bedivere. Second best, Dan Foster's Leicester.

DEERHOUNDS.—Best dog, J. E. Thayer's Robber Chieftain; bitch, J. E. Thayer's Hillside Romola.

BORZOIS.—Best dog, H. W. Huntington's Argoss; bitch, C. S. Hanks's Svodka.

GREYHOUNDS.—Best dog, A. W. Purbeck's Pious Pembroke; bitch, A. W. Purbeck's Bestwood Daisy.

POINTERS.—Best kennel, Chas. Heath's. Best American bred dog in show, Chas. Heath's Arthur.

ENGLISH SETTERS.—Best kennel, Fred H. Clarke's.

IRISH SETTERS.—Best kennel, Oak Grove Kennels.

GORDON SETTERS.—Best kennel, Inwood Kennels.

SPANIELS.—Best kennel, J. P. Willer's.

BEAGLES.—Best kennel, Somerset Kennels. N. B. C. specials—Best beagle bred and owned by exhibitor, Waldingfield Kennels' Lufra. Best dog in show, Glenrose Kennels' champion Lou. Best dog in open class, Waldingfield Kennels' Pulboro Crafty; best bitch ditto, Somerset Kennels' Belle of Woodbrook.

COLLIES.—Best kennel, Seminole Kennels. Collie Club specials—Best American-bred dog in open class, F. R. Carswell's Prince Wilkes; best bitch ditto, J. P. Morgan's Blue Ruin; best in puppy class, McEwen & Douglass's Helen Douglas.

BULLDOGS.—B. D. C. specials—Best in show, Wheatly Kennels' Saleni. Best American-bred dog, A. B. Graves's Handsome Dan; best bitch ditto, no entry.

BOSTON TERRIERS.—B. T. C. specials—Best kennel, Auburn Kennels. Dog 10 to 20lbs. John Shepard's Grip; bitch ditto, E. A. Bigelow's Famous. Dog 20 to 35lbs., J. T. Taylor's Tumbler; bitch ditto, A. Tyner's Miss Thora.

FOX-TERRIERS.—Best kennel (2), Blemton Kennels. A. F. T. C. specials: Best in show, Blemton Kennels' Blemton Victor II. Best bitch in open class, J. E. Thayer's Miss Dollar. The Apollo Stakes, Beverwyck Kennels' Punster. Home bred Puppy Stakes, Beverwyck Punster. Yankee Stakes, puppies born between March, 1889, and March, 1890, Blemton Victor II.

DANDIE DINMONT TERRIERS.—Best dog or bitch, Ed. Brooks's King o' the Heather. Best brace, E. Brooks.

SCOTCH TERRIERS.—Best dog or bitch, Henry Brooks's Kilroy. Best brace, H. Brook's Kilroy and Kilbar.

IRISH TERRIERS.—Best American bred dog, P. R. Clancy's Shaun Boy. Best bitch (2), T. Wise, Jr.'s Colleen Ruth; also puppy special.

UNITED STATES FIELD TRIALS CLUB.

Editor Forest and Stream:

At the annual meeting of the United States Field Trials Club, in Chicago, Feb. 11, a committee was appointed by the president to select grounds on which to hold the club's second annual trials, which will begin Monday, Nov. 7. The committee decided at its first meeting to consider only a central location. As the date precluded the possibility of a successful meeting being held in the far South, this decision left but three localities to be considered, viz, Earl Park, Ind., Carlisle, Ind., and Elizabethtown, Ky. The Earl Park preserve being mostly prairie, the committee decided to pass it by, leaving Elizabethtown and Carlisle in for first. These places were visited and found to be very desirable; the citizens afforded us every opportunity for a thorough examination. The grounds at Carlisle are without question the best in Indiana and possibly may have more birds than the grounds at Elizabethtown, but the latter place has the advantage in larger and better watered fields, with more railroad and hotel facilities.

After canvassing the matter thoroughly we have decided to give the preference to Elizabethtown. Elizabethtown is located at the junction of the Chesapeake & Ohio and Louisville & Nashville railroads, forty-two miles south of Louisville, is central in its location and easy of access from all parts of the country.

The preserve consists of about 60,000 acres, which is sufficient to set apart a certain amount for use of handlers to train and exercise their dogs on without entering the grounds selected for the trials. Some of the fields in the preserve contain 300 acres, which will enable a wide-ranging dog to display his quality.

The preserve set aside for the trials will be posted immediately and the usual penalty will be enforced against all trespassers. The grounds will be stocked at once with 500 quail, and as fifteen bevies have been found on these grounds in a day's hunt with two dogs, owners and handlers of dogs can rest assured that there will be plenty of birds. Visitors will find a genuine Kentucky hospitality awaiting them.

WM. M. KERR, } Committee.
P. T. MADISON. }

INDIANOPOLIS, Ind., April 9.

Why is a dog's tail like the World's Fair? Because it is something to occur.

DOG CHAT.

THE Boston management, though they did not make a pile out of their show, felt just as happy when they found that there would be no deficiency to make up, but rather that they were about $300 ahead. A wet day or two plays the mischief with their show and once or twice they have run behind on this account so that there is some excuse for the committee not wishing to rush into a large expenditure. The weather this last week was beautiful throughout, the rain keeping off till midnight on Friday. Throughout the four days there was a steady stream of visitors and Fast day (Thursday) had a noticeable crowd. The building is however so large and rambling that any ordinary dog show crowd would be lost in it.

The show was well managed by the committee and John Read. There is one subject however on which we must speak plainly. The way the dogs were benched, especially in the sporting classes, was a disgrace to any well regulated dog show. A Gordon was even benched with the English setters for convenience sake. Such an annoyance to the public, who pay for the show, should not be allowed for one moment. For instance in pointers one could find a light weight dog benched alongside a heavy weight, and next to that a puppy, all belonging to one kennel. The spectator must turn and turn the leaves of his catalogue time and time again until he loses all track of how it was the winner beat the second and so on. It is needless to point out the needless trouble and the source of inaccuracy that it is to the reporter, let that pass: reporters can look out for themselves. This matter of benching in rotation should be taken up by the A. K. C.; they handled the late entry question without gloves, let them do the same on this. In one long row of pointers in the Mechanics Building there were not more than two numbers in rotation.

On Thursday a marked catalogue was issued, and was just fairly accurate. During the week a number of sales

MR. JAMES MORTIMER AND KING OF KENT.

took place, and business among the principal kennels was reported good, with a fair demand "in futures."

Mr. E. B. Sears sold his Wyoming Prince (champion Hesper—Princess Gilder), first in puppy class at Boston, to Mr. John L. Graham, of New York city. The dog will not be exhibited, as his owner wishes him simply for a companion. The price was a large one.

We did not suppose that Mr. Raper would take his Raby Palissy back with him, as the chance to buy a good imported dog fresh from the old soil is not often offered to our "young men." Therefore, Mr. H. A. Harris, of Wilmington, Mass., who has dabbled considerably in bull-terriers, concluded the purchase of Raby Palissy the night Mr. Raper left the show, giving $300 for him; some said $800, but the other will do. This dog is by Raby Potter out of Maize, and has won a number of prizes on the other side and should do well for his new owner. Mr. Raper was also commissioned to buy a good bitch for Mr. Harris, as the latter intends leaving the bull-terriers for the smarter breed.

Frank Dole was busy, too, for he sold two of the newly imported bull-terriers. One, Edgewood Robin, to Mr. D. Dreisacher, Philadelphia, Pa., and Lilly White to Mr. H. Fred Church, Taunton, Mass.

Edgewood Flyer, that has been doing so much winning, we reported before as sold and has been delivered to Mr. G. W. Wills, of Pittsburgh, Pa., who is much pleased with him. Mr. Dole has all Mr. F. P. Comstock's black and tan terriers in his hands for sale, too.

Mr. Ed. Booth, manager of the Duchess Kennels, sold his St. Bernard dog Imperator, vhc. in open class, to Mr. J. J. Downing, Boston, Mass.

The Oak Grove Kennels intend to take a hand in the field trials, and to that end have engaged Mr. Joe Lewis, who has been so long associated with Mr. Boggs's kennel, to manage their kennel of Irish setters and train them for the field. Joe Lewis takes charge this week. The other Lewis, "Ben," will still handle dogs on the show circuit, and with this strong combination the kennel is well equipped for the fray. The Oak Grove Kennels have also purchased the Irish setter bitch Norma, that has been a thorn in their Edna H.'s side this past show season. This makes them well nigh invincible in the bitch classes, as at present.

During Boston show the noted spaniel Rosedale Bess was bred to Beverly Negus on April 7. This reminds us that Mr. Geo. Bell's cocker Obadiah will stand at the Chestnut Hill Kennels for some time to come.

Two dogs were lost out of the building during Boston show. One, Mr. L. F. Clarke's pug Lena, second in bitch class, and then John Doneby's Spartacus, vhc. in the open class, got out in some mysterious manner and neither had been seen up to the time the show closed.

Mr. Geo. Jarvis entered a protest at Boston against Mr. Heath's winning pointer bitch Patti for being under weight. As the protest was not handed in till some thirty-six hours after the judging the protest was not sustained. Mr. Wilcox, who had the bitch in charge, claimed she was correct weight when she started from home, but to make assurance doubly sure he should have claimed his privilege and had the bitch weighed on arrival. She weighed about 45lbs. when protested and must have been dangerously near the limit when shown. The matter gave rise to considerable feeling and one little tussel arose out of it in which, during the scrimmage, George Thomas lost his watch and up to the call of "time" he had not regained it.

There was some talk of protesting the spaniel kennel award, as when Mr. Davidson awarded the kennel prize to Mr. Willey he was told there was no other kennel to compete. Mr. Donovan, who had another good kennel, felt rather sore about it, but as Mr. Davidson had left en route to Denver, nothing, we believe, was done.

We have received a catalogue of the California Kennel Club's show, to be held May 4 to 7. Mr. James Mortimer will judge all classes. The prizes in the 171 classes are $5 for first and diplomas for second and third. Then most of the breeds get a kennel prize of $5 and a diploma. Kennels to be composed of not less than one dog and two bitches of one year or over. Then the list of specials is a large one, ranging all the way from flavoring extracts to a box of macaroni, including pretty nearly everything that man or woman desires. It is worth reading so send for a catalogue. It is the biggest special list we ever saw. The show will be held in the new Republican Wigwam and entries close April 30 with W. G. Cue, 436 Montgomery street, San Francisco, Cal.

Mrs. Wangle—How have you been getting on since I last saw you, Mrs. Bangle? Mrs. Bangle—Not very well. I have had so much care. Mrs. Wangle—I hope none of the children have been ill! Mrs. Bangle—Oh, no. But Fido is such an invalid!—*Frank Leslie's Weekly.*

In our list of awards sent from Boston, Manatang Kennels greyhound bitch was marked hc. It should have been vhc.

Patti is herself again. Mme. Diaz, wife of the president of Mexico, sent the diva a new Mexican to take the place of the lately deceased Ricci. At the Metropolitan Opera House, New York, April 6, there was a brilliant audience, and after the divine Patti had simply outsung herself, the presentation was made in full view of the audience by Col. Lozana, ex-Mexican Consul General, who came into view and handed her the little dog. A look of surprise, then pleasure overspread her face, and as she kissed the morsel of a brute on his black nose, little tear drops—real tears—were to be seen in her eyes. This won much applause, and after handing the dog to Nicolini, the diva stepped to the footlights and sang "Home, Sweet Home." The dog was sent from Chihuahua and took five days to get here. He is black and white and weighs about a pound and a half. He was in a little basket, quilted with crushed strawberry satin and decorated with real lace. Around the little animal's neck was a real lace collar and the Mexican national colors.

We hear that Mr. J. M. Nicholson has purchased from Mrs. J. K. Emmett her late husband's St. Bernards Jura and Gloria. The latter bitch is by Rector out of Jura. Gloria, we are told, is a good bitch, and well marked; Jura is, of course, well known in St. Bernard circles. These dogs will materially strengthen the Mount Zion Kennel.

Mr. C. H. Smith, of St. Stephen, N. B., is going into Skyes and showed at Boston, Islay, a bitch lately imported by him and whose picture appeared in the *Stock-Keeper* Feb. 12 last. She was bred to Post before shipping but kept too long before starting for this side and lost the litter as soon as she landed. Mr. Smith is daily expecting another bitch from the other side.

Mr. E. A. Manice, the dachshund enthusiast, is in earnest about his proposed challenge cup, value $250. The arrangements for the competition for this trophy will be in the hands of the FOREST AND STREAM. The conditions in regard to the competition for the Dachshund Challenge Cup are as follows: 1. It shall be for the best dachshund entered. 2. It shall be competed for twice annually—at New York and Boston. 3. The entrance fee for each competition shall be $5 per dog, and shall form a sweepstakes for the winner each time. 4. The cup to become the property of the exhibitor winning it five times.

It is suggested further that the bench show committees of these two shows should be given ample notice, so that a separate class for this trophy could appear not only in their catalogues but also in their premium lists. The entries will be received by the FOREST AND STREAM. Such a handsome trophy should go far to boom this breed, and by next year, doubtless competition would be very keen.

The following communication should settle the American end of the name the Russian wolfhound is to be hereafter known by: "The National Greyhound Club has officially adopted the name of Psovoi instead of Borzoi. Authority for doing so is statements in *Gazette* of January and February, 1891, of the Russian Imperial Society.—H. W. HUNTINGTON, Sec'y (April 7)."

Mr. George Raper sailed for the mother country last Saturday afternoon on the S. S. Umbria. He had a rousing send off by the many friends he has made over here, and we shall all be pleased to see that familiar "nod" among us again. He is a good all round judge in its fullest sense.

The account of the "wolf coursing" in FOREST AND STREAM was eagerly read by the dog men at Boston last week, and naturally caused much amusement. Others it put on their mettle, and our remarks in "Dog Chat" went home, for Mr. John E. Thayer told us he intended to have some of his dogs properly entered as puppies on his ranch in Nebraska, and see if the lost laurels could not be retrieved. As soon as Mr. Hanks heard this, he remarked that when he bred some pups from his Psovies he would like to send a brace out with the deerhounds. This is the proper way and the only way to manage these things. From what we gather, the only reason we get these hounds over here is because the Russians have found them wanting in pluck, or at least not sufficient to tackle a wolf. That is why we have Leekhoi with us, and we admire Mr. Hanks' honesty in telling us so.

Among the new kennel advertisements this week we notice that C. H. Kimber offers pointer dog for sale; E. A. Carrier, trained pointer; C. S. Donner, pointer Legerdemain; Andrew Laidlaw, cocker spaniels; Pottinger Dorsey, beagle pups; C. E. Glass, English setter pups; Berlin Kennels, greyhounds. At stud: Bull-terrier Streatham Monarch; Jos. H. Hunter's pointer Black Wonder and English setter Tyne. Boarding kennel: Austrian Dog Kennels.

Retrieving at Field Trials.

WE have several interesting and valuable communications on this topic and shall print them next week.

BLACK AND TANS AT PITTSBURGH.—New Rochelle, N. Y.—*Editor Forest and Stream:* In answer to Mr. A. W. Smith, who criticises Mr. Raper's judging in the black and tan terrier class at Pittsburgh, where he reversed his New York opinion by placing my bitch Broomfield Madge over Mr. Comstock's Louie, I will say that Madge at New York was judged in less than forty-eight hours from the time she had whelped and was in a thoroughly relaxed condition, hence her wideness in front, hollowness of back, pendulous abdomen, etc., etc. At Pittsburgh she had regained her normal tone and was seen in perhaps better shape than at any time she has been shown in this country. —H. T. FOOTE.

CAMPBELL SETTER TYNE.—Washington, D. C.—*Editor Forest and Stream:* I have just purchased of Hon. Joseph McKenna, ex-M. C. and now U. S. Judge for District of California, his great dog Tyne, who is a brother to Daisy Hope and Daisy Hunter. I got him for his blood, as I believe the Campbell setters are the greatest bird finders on earth. He is a great hunting dog and cuts his work out like his good sisters. I have shipped him to Brother John at Sandborn, Ind., who will get him ready for this year's field trials. If he don't make them all hustle you can put another brier under my horse's tail at High Point this fall. —JOSEPH H. HUNTER.

THE RECENT "WOLF COURSING."—*Editor Forest and Stream:* You are a bit too hard on Mr. Macdougall. I happen to know that he went into that match, prompted only by his affection and admiration for his dog, Alan Breck, a most praiseworthy feeling you will admit, and if this feeling led him into a position certainly a bit ridiculous, surely he ought to be "let down" as easily as possible? His shooting his newly purchased dog that had so deceived him was a hasty act, but cannot you couple the condonation of hasty temper with your condemnations? You have known Mr. Macdougall long enough to know that he is not cruel.—W. WADE.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Cashier's Son and Lady Cashier. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dog and bitch, whelped Feb. 22, 1892, by Eberhart's Cashier (champion Kash—Lady Thora) out of Pegey Pryde (Eberhart's Cashier—Flossie II.).

Kensington Verdict. By H. D. Kensett, Eastville, Va., for fox-terrier bitch, whelped Aug. 1, 1890, by Regent Brisk out of Roslyn.

Kensington Flint. By H. D. Kensett, Eastville, Va., for fox-terrier bitch, whelped Oct. 9, 1891, by Dusky Trap out of Roslyn.

Desert Kennels. By T. A. Holcomba, Salt Lake City, Utah, for his kennels of bull and fox-terriers.

BRED.

☞ **Prepared Blanks sent free on application.**

Kensington Verdict—Regent Tippler. H. D. Kensett's (Eastville, Va.) fox-terrier bitch Kensington Verdict to Regent Kennels' Regent Tippler, Feb. 2.

Dela—Bow of Portland. C. H. Newell's (Portland, Me.) pointer bitch Dela (Bang Bang—Zanetta) to H. F. Farnham's Bow of Portland (Graphic—Zitta), March 19.

Topsey—Black Dufferin. Chas. Searls's (Hamilton, Ont.) cocker spaniel bitch Topsey (Black Graff—Chien) to Luckwell & Douglas's champion Black Dufferin (champion Brant—Bonita), March 29.

Cachan—Black Duke. Chas. Searls's (Hamilton, Ont.) cocker spaniel bitch Cachan (Bob Obo—Topsey) to Luckwell & Douglas's champion Black Duke (champion Obo II.—Woodland Queen), March 28.

Fannie K.—John Bull. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Fannie K. (champion Kash—Flossie II.) to their John Bull (champion Loris—May Queen), March 30.

Daisy—Walhalla. G. Batch's (Brooklyn, N. Y.) King Charles spaniel bitch Daisy to Central Kennels' Walhalla (Roscius—Twinkle), Nov., 1891.

Ruby—Tutti Fruttt. Central Kennels' (Jersey City, N. J.) King Charles spaniel bitch Ruby (Salem Charley—Juliet) to their Tutti Frutti (Roscius—Twinkle), Feb. 27.

Twinkle—Floracelle. Central Kennels' (Jersey City, N. J.) King Charles spaniel bitch Twinkle (Don II.—Duchess of Albany) to G. Klee's Floracelle), Jan. 18.

Daisy—Tutti Frutti. Central Kennels' (Jersey City, N. J.) King Charles spaniel bitch Daisy (Roscius—Wenchy) to their Tutti Frutti (Roscius—Twinkle), Nov., 1891.

Florence Gladstone—Gath's Mark. Poston & Burdell's (Columbus, O.) English setter bitch Florence Gladstone (Gladstone—Flounce) to Blue Ridge Kennels' Gath's Mark (Gath—Gem), March 15.

Speckle Gown—Gladstone's Boy. Poston & Burdell's (Columbus, O.) English setter bitch Speckle Gown (Count Noble—Nannie Gladstone) to Dr. Geo. Ware's Gladstone's Boy (Gladstone—Sue), Feb. 16.

Latonia—Dan Gladstone. Poston & Burdell's (Columbus, O.) English setter bitch Latonia (Count Noble—champion Dido II.) to Blue Ridge Kennels' Dan Gladstone (Gladstone—champion Sue), Feb. 6.

Model Bondhu—Antonio. A. H. Bassett's (Somerville, Mass.) English setter bitch Model Bondhu (Gus Bondhu—Model Druid) to champion Antonio (Roderigo—Bo Peep).

WHELPS.

Fly. Geo. Meister's (Jackson, Mich.) Gordon setter bitch Fly, March 28, nine (three dogs), by ——.

Lassie Faust. Frank Caton's (Randolph, O.) pointer bitch Lassie Faust, March 25, ten (six dogs), by Dr. Daniell's Lord Graphic.

Twinkle. Central Kennels' (Jersey City, N. J.) King Charles spaniel bitch Twinkle (Don II.—Duchess of Albany), March 20, one dog, by Floracelle.

Daisy. G. Batch's (Brooklyn, N. Y.) King Charles spaniel bitch Daisy, Jan. 15, five (two dogs), by Central Kennels' Walhalla (Roscius—Twinkle).

Daisy. Central Kennels' (Jersey City, N. J.) King Charles spaniel bitch Daisy (Roscius—Wenchy), Jan. 25, three (one dog), by their Tutti Frutti.

Blue Belle. W. D. Blenn's (East Berlin, Conn.) greyhound bitch Blue Belle, Feb. 20, nine (four dogs), by A. W. Purbeck's Pious Pembroke (Nelson—Acalia).

SALES.

☞ **Prepared Blanks sent free on application.**

Bob White. Orange and white pointer dog, by Sir Anthony out of Portland Lily, by A. S. Aborn, Wakefield, Mass., to Hon. E. S. Bradford, Springfield, Mass.

Wymona. Silver fawn pug bitch, whelped Oct. 1, 1891, by Douglas II. out of Lady Verne, by Eberhart Pug Kennels, Cincinnati, O., to G. E. Reinman, Pittsburgh, Pa.

Royal Roy. Black and tan King Charles spaniel dog, whelped Nov. 20, 1889, by Jumbo II. out of Olivette, by Mr. McGovern, New York, to Central Kennels, Jersey City, N. J.

Daisy. Black and tan King Charles spaniel bitch, whelped January, 1890, by Roscius out of Wenchy, by Central Kennels, Jersey City, N. J., to Miss Churchill, Greenwich, Conn.

Jimlimmon. White and orange St. Bernard dog, whelped Feb. 4, 1890, by Pinlimmon, Jr. out of Maude, by Central Kennels, Jersey City, N. J., to Mr. McGovern, New York.

Fancy. Black and tan King Charles spaniel bitch, by Max out of Beauty, by Central Kennels, Jersey City, N. J., to F. J. Boesjer, Cleveland, O.

Santa Claus. Black and tan King Charles spaniel dog, whelped Sept. 10, 1891, by Roscius out of Twinkle, by Central Kennels, Jersey City, N. J., to Jos. F. Gans, Philadelphia, Pa.

Roy K. Imported lemon and white Blenheim spaniel dog, by Central Kennels, Jersey City, N. J., to Mr. McCahill, St. Thomas, Brazil.

Bob White. Orange and white pointer dog, by Sir Anthony out of Portland Lily, by A. S. Aborn, Wakefield, Mass., to Hon. E. S. Bradford, Springfield, Mass.

Messrs. McEwen & Gibson, Byron, Ont., have sold during February and March the following collies:

Metchley Wonder II. By Sefton out of Minnie, to Virgil Brandt, Chicago, Ill.

Mistletoe. By Metchley Wonder II. out of Holly, to B. L. Smith, Chicago, Ill.

Daylight. By Caractacus out of Pitch Dark, to J. L. Lincoln, Jr., Chicago, Ill.

Strathearn. By Bonnie Dunkeld out of Daylight, to John Dupee, Jr., Chicago, Ill.

Eglinton. By Metchley Wonder II. out of Marigold, to W. L. Vance, Chicago, Ill.

Fury. By Metchley Wonder II. out of Merry, to G. Tarbell, St. Joseph, Mich.

Rex Rufus. By Corston out of Bonnie Doon, to H. Ellis, St. Thomas, Ont.

Black Prince. By Christopher out of Jess, to H. H. Clough, La Force, Fla.

Lady Wellington. By Metchley Wonder II. out of Dawn, to H. H. Clough, La Force, Fla.

A dog pup, by Corston out of Bonnie Doon, to H. Butterworth, Brantford, Ont.

A dog pup, by Metchley Wonder II. out of Madge, to H. L. Jeffrey, Stratford, Ont.

A bitch pup, by Christopher out of Jess, to H. L. Jeffrey, Stratford, Ont.

Gwynne. By Bonnie Duntroon out of Rosette, to T. Greenwood, Douglas, Man.

A dog pup, by Metchley Wonder II. out of Madge, to W. N. De Grauw, Jr., New York city.

Oliver. By Metchley Wonder II. out of Marigold, to Rev. Dr. Van De Water, New York city.

A dog pup, by Metchley Wonder II. out of Dawn, to John Fixter, Schrieber, Ont.

A dog pup, by Metchley Wonder II. out of Bonnie Scot, to A. W. Thyne, Howell, Mich.

Cumming. By Metchley Wonder II. out of Holly, to G. M. Hord, Chicago, Ill.

Sheriff. By Metchley Wonder II. out of Madge, to Johnson & Stokes, Philadelphia, Pa.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

C. W. L., Cincinnati, O.—I have a fine pointer bitch who will whelp in a short time. As she is a very handsome animal and a household pet, I wish to counteract the effect the birth of the puppies will have and keep her as trim and sightly as she is now. A friend advised me (after the puppies have been weaned) to bathe her chest and stomach with alum and water, in order to dry up the teats. If this is a good remedy, what proportion of alum and water shall I use and at what age must the puppies be weaned? For the last day or two she has been greatly troubled with her ears, and almost continually shakes her head. She will stand very quietly and seem to be eased greatly of pain if I place one hand on each ear and press tightly. There is no inflammation that I can discover, and seems to be nothing the matter but some half-dozen small raw and bleeding places in each ear. If she was not so well kept and cared for, I should think that it might be fleas, but am afraid it is canker, do you think so? Ans. Do not allow her too many puppies to bring up and wean them as soon as possible (from five to six weeks), leave the rest to nature. For the ears use the following: Ung. hyd. nit. ʒi, fl. amygd. ʒi, a few drops to be poured into the ear twice a day (warm the lotion first).

Playing Cards.

You can obtain a pack of best quality playing cards by sending fifteen cents in postage to P. S. EUSTIS, General Passenger Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

Yachting.

SAILING LENGTH.

Sailing length, commonly called "corrected length," is obtained by adding together the length on waterline and the square root of the sail area, and dividing the sum by 2, the result being in lineal feet. In this method of measurement, adopted by the Seawanhaka Corinthian Y. C. in 1884, and since known as the "Seawanhaka rule," the sail area is measured from the spars, club topsails not being included. The principal clubs now using the Seawanhaka rule are the Seawanhaka Corinthian, New York, Larchmont, Atlantic, Eastern, Beverly, Hull, Massachusetts, Philadelphia, Riverside, American, Knickerbocker, Royal Canadian, Royal Hamilton, Queen City, Oswego, Rochester, Marine and Field, Corinthian of New York, Marblehead, Philadelphia, and Corinthian Navy and Corinthian Mosquito Fleet. The full details of the rule were published in the FOREST AND STREAM of Feb. 25, 1892.

RATING.

The rating of a yacht is obtained by multiplying the length on waterline by the sail area, and dividing the product by the constant number 6,000, the result being a measurement in cubical units approximating to the old Thames tonnage. In this method of measurement, adopted by the Yacht Racing Association in 1887, the sail area is calculated from the drawing of the sail plan, such topsails, working, sprit or club, as are carried being included in the measurement. The established rating classes and the varying proportions of length and sail found in practice, are as follows:

½ rating.....16ft. l.w.l.×183 sq. ft. sail to 17ft. l.w.l.×178 sq. ft. sail.
1 rating.....18ft. l.w.l.×333 sq. ft. sail to 20ft. l.w.l.×300 sq. ft. sail.
2½-rating.....25ft. l.w.l.×600 sq. ft. sail to 28ft. l.w.l.×536 sq. ft. sail.
5 rating.....28ft. l.w.l.×1071sq. ft. sail to 33ft. l.w.l.×909 sq. ft. sail.
10-rating.....34ft. l.w.l.×1765sq. ft. sail to 36ft. l.w.l.×1666sq. ft. sail.
20-rating.....43.5 l.w.l.×2637sq. ft. sail to 46.5 l.w.l.×2580sq. ft. sail.
40 rating.....59ft. l.w.l.×4067sq. ft.
60-rating.....64ft. l.w.l.×5625sq. ft. sail to 68ft. l.w.l.×5294sq. ft. sail.

The rating rule is used exclusively in Great Britain, but is used in America by only one club, the Royal Nova Scotia Yacht Squadron, of Halifax, N. S.

CLASSIFICATION.

In America yachts are classed by some clubs by their waterline lengths alone; in others by their sailing length.

In Great Britain all yachts are classed by their rating, and not by waterline.

FIXTURES.

THE annual list of drownings from capsizable boats will be a heavy one this season from the terrible disaster of April 10 in Boston Harbor, by which nine lives were lost. On Sunday, at 6:40 P. M., the boat crew of the Boston School Farm, on Thompson's Island, started in one of the boats for City Point, where they picked up A. F. Nordberg, an instructor of the school. On the return trip a squall struck the boat and she capsized, throwing the whole party, eleven in all into the ice-cold water. All retained their self-possession and gained the bottom of the capsized boat; but no help came, and one by one as they became chilled through, the wretched boys dropped off, only two being left when the boat finally drifted ashore some five hours later. The accident is one that might have been prevented by the use of a suitable vessel, such a non-capsizable craft as these waters called for.

THE racing outlook in England is not very promising thus far, save in the 40-rating and the classes under 10-rating. Iverna will fit out with a cruising rig, while Valkyrie, after several victories in the Mediterranean regattas, has been sold to Archduke Carl Stephan of Austria for $22,500, thus taking her out of the English fleet. Irex under a new owner, Mr. A. M. Muir, of Glasgow, and in the hands of a very clever skipper, Capt. Jas. MacNicol, will be changed back to the cutter rig with a complete new racing outfit. Meteor, late Thistle, now owned by the Emperor of Germany, will be sailed by Capt. Gomes, and may be started for the Queen's Cup and in other English races.

ALBORAK AND HARPOON.

DURING the past week there have been begun on Gen. Paine's 46-footer, Alborak, alterations which will make her an entirely different boat from the one originally modelled, or the one which, even with the improvements made last season, was far behind the others of the class in that most important feature of racing, windward work.

The alterations will, in fact, make the boat nearly as much of a fin keel as is possible with wood construction, and will give her an underwater profile not unlike that of the Herreshoffs' Wasp.

Whether they will give her the speed necessary to keep up with the others is of course an open question, but they are in the line of improvement, and if lower lead, lighter displacement, less wetted surface and a better balanced sail plan can do anything, the Alborak will be the gainer.

The most important alteration is in the recasting of the lead keel in such a shape as to bring it some 2ft. lower, and give the boat an additional 2ft. of draught, or about 12ft. in all.

Less lead will also be used, and the whole keel will be so balanced as to make the boat's load waterline some 4in. lower forward than the present one. The shape of the keel will also be changed, and its lower line, instead of curving upward, as at first designed, will run nearly parallel with the waterline to the forward end of the lead, and will then turn abruptly upward to the wooden stem and make a "jog" similar to that on the Bristol boat.

Then the forefoot will be fined away as much as possible, and to make up for the raising of the body of the boat out of the water the top sides will be cut away about 9in. forward, and thence gradually tapering aft to a very slight cut at the stern.

More deadwood may be added at the stern, but this is doubtful, since an addition was made there last season.

The effect of the changes will be to shorten the load waterline a little, decrease the boat's displacement and wetted surface, put her lead as low down as possible, and give her a better lateral plane with which to hold up to windward.

The reduction of the topsides will also lighten her somewhat and give her a little less sheer

Changes will also be made in the rig, and the mast will be stepped some 3ft. further aft than at present, and the bowsprit shortened a little. Fully as much, if not more, sail than before will be carried, for the increased power of the lower lead will warrant it.

All this cannot be done without an expenditure which would seem useless to most yachtsmen, and probably there are few but the owner of the Alborak who would so persistently try to improve an old boat.

Gen. Paine is one, however, who does not rest easy under a defeat, and expenditure would count little with him could he bring to the head of the class the boat which has been so widely condemned as an utter failure.

The changes are made at any rate with a full understanding of their value, and even if they do not produce the result desired, they show that spirit of restiveness under defeat and determination to have the best, which has brought Gen. Paine's other boats to the front and made his name synonymous with all that is most progressive in American yachting.

With the alterations once completed, it is not to be supposed for a moment that the Alborak will not be raced the present season; so more sport may be looked for in the 46ft. class than seemed probable or even possible earlier in the year.

With the Volunteer not in commission and John Paine busy with his 21ft. fin, the General will have plenty of time to give to the Alborak and bring her to the highest possible racing pitch.

And the great majority of yachtsmen will wish him "good luck."

But while Gen. Paine is improving the Alborak the Adams boys will not be idle on the Beatrix, though they will not make the radical change in her recommended by her original owner, Charles A. Prince.

Mr. Prince's suggestion to them when he sold her was that her present lead keel be taken off, the centerboard taken out and a fin-keel, with a little less lead than at present carried put on.

This, Mr. Prince calculated, would give her sufficient additional power to carry some 300 or 400sq.ft. more of sail, and thus produce the speed needed to make her ten minutes faster on a 24-mile course.

For many reasons, however, notably those of spoiling the cruising advantages of the boat and doubts as to whether the hull would stand the strain of the heavy fin keel, the present owners of the boat will not adopt Mr. Prince's suggestion, but will sail her as a centerboard, with only such changes as may be made without changing the type. Lower lead, a weighted centerboard and some changes in the sail plan have been suggested and are under consideration.

And as in the case of Gen. Paine and the Alborak, yachtsmen will wish the "Adams boys" and the Beatrix success, and will be glad that the only centerboard of the 46ft. racing fleet is not to be changed to a fin.—*Boston Globe.*

YACHTING AT BELLEVILLE.

YACHTING matters are looking up somewhat here, and the prospect is that the coming season will be an interesting one. Our trim little flyer, the Iolanthe, whose owners—Messrs. W. H. Biggan, M. P. P. and James Jenkins have determined, with commendable spirit, shall be given a chance to maintain her ancient fame and to win new laurels, are having her rebuilt by Mr. A. H. Cuthbert, of Trenton, son of the late Capt. "Alec" Cuthbert, Canada's most successful designer. The young man inherits much of his father's ability, he having designed and built some yachts which have proved fairly successful. The Iolanthe will be given a clipper bow and her overhang aft will be lengthened, but otherwise she will undergo little change in hull. She will, however, be given new mainsail, foresail and jib. With these improvements she will doubtless hold her own in her class.

The big sloop Atalanta, which is now owned in Chicago, will be rebuilt here by Mr. John Allan, our local ship builder, who superintended her construction. Before she leaves these waters she will be in all probability raced for the Fisher champion cup for sloops, which she won at Chicago in 1888 and afterwards forfeited to the Norah, which has since held it. These yachts have raced but once since the Norah got the cup, and then the Atalanta was badly beaten.

BELLEVILLE, Ont., April 7. PORT TACK.

POLAR PLANIMETER AND INTEGRATOR.

THE two instruments here illustrated have done much to lighten the labor of the designer and naval architect, all the calculations of a vessel being greatly shortened by them, while the liability to error is lessened as well. They were invented by Dr. J. Amsler-Laffon, a Swiss scientist. The planimeter has been in common use by designers and engineers for a number of years, the integrator being of more recent invention, having been used in England and on the Continent for about a dozen years, though as yet hardly known in this country. The theory upon which the two are based is intimately connected with the calculus, and consequently a knowledge of the higher mathematics is necessary to understand it perfectly; but the operation of each in practice is so simple that they are used by the younger apprentices in the large shipyards, several independent readings, of course, being made and checked off.

The planimeter, the simpler of the two, is shown in Fig. 9, and consists of a graduated roller and dial working freely in a frame composed of two jointed arms, one being of constant length, while the other may be lengthened or shortened to suit the scale of the drawing. At the outer extremity of the fixed arm is a needle-point or an anchor weight, about which the whole instrument revolves in use. At the outer extremity of the shifting arm is a tracing point which is passed over the entire outline of the figure it is desired to measure, the inclosed area being read off on the dial and rolling wheel. The shifting arm may be set to various scales, as shown by the graduations on its side, or in some cases the entire top of the sliding rod is graduated in milimeters, so that by calculation the arm may be set to any scale. In the common graduation the arm is marked for 0.10 decimeter, 0.10sq ft. and 10.00in., a subsequent calculation being necessary to translate the reading to any special scale of the drawing other than these. In use the arm is first adjusted to the most convenient scale, the instrument is then placed on the drawing in such a position that the tracing point will reach every part, the reading of the dial and wheel is noted, the point being placed on some certain spot, the point is then moved over the entire outline to the same spot from which it started, and a second reading taken, the result being the area of the figure.

The integrator (Fig. 10) is much more complicated, the two arms carrying three separate dials and rollers; while, in place of revolving about a fixed point, the entire apparatus traverses back and forth on a grooved straight-edge. The dial marked *A* gives the area of the figure, the dial *I* gives the moment of inertia, and the third dial, *M*, gives the statical moment. The instrument is shown as adjusted to the body plan of a vessel, as in calculations of the stability, for which purpose it is largely used. By means of the three sets of readings the displacement, the vertical and longitudinal positions of the center of buoyancy, and the other elements which enter in the calculation of the stability, are rapidly obtained. The instrument is quite expensive, the price in Switzerland ranging from $75 to $150, and being just about doubled in the United States through the duty.

One of the first imported into this country is owned by Mr. Robert Center, of New York; Mr. Burgess employed one in his office for several years, another is used in the Navy Department at Washington, one has lately been added to the equipment of the School of Naval Architecture and Marine Engineering at Cornell University, and one was lately on sale at an instrument maker's in New York. There are probably others in use, but these are the only ones we have been able to learn of.

The following graphical demonstration of the operation of the planimeter was written by Mr. Emil Thiers for the *American Machinist*, and is so much clearer than any other that we have yet read that we reproduce it, by the permission of that journal, for the benefit of those of our readers who are familiar with the use of the instrument without clearly comprehending its principle of operation.

Although the polar planimeter is an instrument in daily use, yet the theory of its action is probably fully understood by few of the many to whom it is indispensable. A clear and elementary exposition of its theory will therefore, it is supposed, be of interest.

It is presumed that the construction of the instrument is sufficiently well known to make a description unnecessary.

In order to arrive at the relation existing between the arc through which the measuring wheel of the instrument revolves and the part described upon the plane of the paper by the point of tangency, let it be assumed that a straight-edge *M N*, Fig. 1, is provided with any number of small wheels, all in one plane, and all touching the paper. For any movement of the straight-edge all wheels will revolve through the same arc. In proof of this, in Fig. 2, let *M N* be moved into the position *M' N'*. The movement may be considered as made up of a rotation of *M N* about *S*, the point of intersection of the directions *M N* and *M' N'*, and of a motion of translation along *M' N'*. The rotation of the straight-edge about any point in the plane of the wheels is not taken cognizance of by the latter, while the motion of translation in the plane of the straight-edge causes all wheels to revolve through the same arc. Any movement, however complicated, of the straight-edge upon the paper must be considered as made up of rotations and translations as described; therefore, the wheels being set to indicate similarity in the beginning, it is impossible to move them out of these position of coincident readings.

In Fig. 3 let *F* be the tracing point; *P* the fixed point or pole; *G* the joint; *M* the measuring wheel. *M N* is the trace of a plane coinciding with that of the wheel, and *P N* a perpendicular upon it from *P*. Now let *F* be moved to the right length, *P F* remaining constant. Every point of the system will then describe a circle about *P*, and all relative distances, *M N* among them, will remain constant. The measuring wheel *M* will therefore, as in the case of the wheels on the straight-edge, revolve similarly to an imaginary one at point *N*. As the latter remains tangential to its circular path, it follows that the arc *s*, measured by it, as also by the measuring wheel *M*, is equal to the circumference of a circle of radius $P N = p$; *i.e.*, $s = 2 \pi p$.

The measuring wheel will revolve right-handed, as seen from *F*; for the reverse direction of the motion of *F* the direction of rotation of the wheel will likewise be reversed.

The value of *p* is readily obtained from the right-angled triangles *F P Q* and *G P Q*. *F G* = *a*, *G M* = *c*, *G P* = *r*. *F P* = *R*.

$$P Q^2 = R^2 - (a + c - p)^2 = r^2 - (p - c)^2$$

$$R^2 - a^2 + 2 a (p - c) = r^2$$

$$p = \frac{a^2 + 2 a c + r^2}{2 a} - \frac{R^2}{2 a}$$

$$s = 2 \pi p = \frac{a^2 + 2 a c + r^2}{a} \pi - \frac{R^2 \pi}{a}$$

For another circle of radius *R'* described by the tracing point, the arc registered by the measuring wheel *s'* is similarly—

$$s' = \frac{a^2 + 2 a c + r^2}{a} \pi - \frac{R'^2 \pi}{a}$$

the lengths *a*, *c* and *r* remaining unchanged. If now, in Fig. 4, point *F* is moved over the outlines of the ring, 1 2 3 4 5 6, the movement of *F* will be right-handed over the outer circumference, and left-handed for the inner, while the crossing of the ring radially takes place twice, and in opposite directions, and is therefore without effect on the final reading of the wheel. The direction of rotation of the wheel being right-handed for *s* and left-handed for *s'*, the arc registered will be $b = s - s'$. Substituting the values of *s* and *s'* found above, we shall have—

$$b = \frac{R^2 \pi - R'^2 \pi}{a}; \text{ or } R^2 \pi - R'^2 \pi = a b.$$

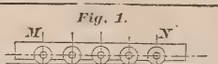
The left side of this equation is the area of the ring=*f*; hence we obtain the simple relation $f = ab$, *i.e.*, the area of any ring whose center is *P* is equal to the product of the length *a* of the movable arm by the arc registered by the measuring wheel.

It is manifestly immaterial at what point we cross the surface of the ring, the motion of the wheel being right-handed or left-handed, according as the tracing point is moved from the outer circumference inwardly, or from the inner one outwardly. If point *F* is therefore made to move over the outlines of the ring segment *F* 1 2 3 4, Fig. 5, the movements of the wheel due to the radial lengths 23 and 41 will be equal and opposite, and the arc registered will be one *n'th* of that registered before, supposing the subtended angle to bear this ratio to 360°. Both sides of the equation $f = ab$ have therefore been decreased in the same ratio, *a* remaining unchanged, the equation still holds, and the area of the ring segment likewise is equal to the product of the movable arm of the instrument by the length of the registered arc.

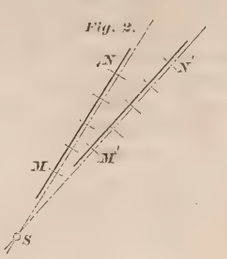
If now a figure, Fig. 6, composed of any number of annular segments whose common center is *P* is run over as indicated by the arrows, we shall obtain the area as for the single segment. The result will evidently remain unchanged if we omit all lengths which are traversed twice in opposite directions, leaving only the outlines of the figure. The number and size of the elementary segments is a matter of indifference, and as any figure may be considered as made up of segments infinitely small, it follows that in general the area may be found according to the formula $f = ab$, by moving the tracing point *F* over the outlines of the figure, the only condition being that the instrument must be brought back to the position from which it started.

As the length *P G* = *r* of the guide arm does not enter into the result, it may be made of variable length or even infinite, by guiding *G* in a straight slot. This form of the instrument is identical with what is known as Coffin's averaging instrument. To convert a figure of area *f* into a rectangle $l \times h$, *e.g.*, to find the mean pressure of an indicator diagram, it would be convenient to make the length of arm *a* equal to that of the diagram; then $l \times h = f = a \times b$; and as $l = a$, we have $h = b$.

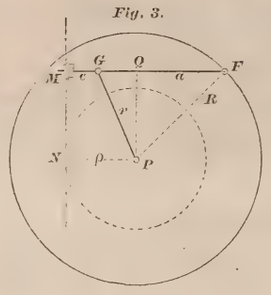
If the area to be measured is too large for the instrument, the pole being outside, we must either divide it up into sections, or else place the pole within the area to be measured. In this case it is necessary to omit that portion of the surface immediately surrounding the pole, and take account of it separately. The process is somewhat tedious, as the tracing point must be moved over the outlines of the figure, over those of the portion omitted, and twice over the radial length connecting the two (see Fig. 7). However, the process may be simplified by making the area omitted such that the wheel will not turn while tracing its outline. This is a case for a circle whose center is the pole and whose radius *R* is such that the *p* corresponding is zero, the plane of the measuring wheel passing through the pole (Fig. 8). For $p = o$, we have, as found above:



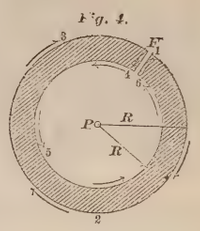
$$a^2 + 2 a c + r^2 - R^2 = o,$$



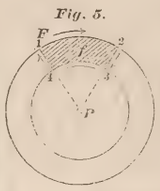
and the area of the omitted portion is



$$R^2 \pi = (a^2 + 2 a c + r^2) \pi$$



To find the area, therefore, the pole being inside, proceed as before and add the constant $(a^2 + 2 a c + r^2) \pi$.



It was stated above that for measurements with the pole outside the result was independent of the length *r*; it may be added that it is likewise independent of *c*. Any motion of the measuring wheel in the direction of its axis, due probably to readjustment of its bearings, will therefore have no influence on the readings. For measurements with the pole within the area, it is important, however, to check the accuracy of the constant. To this end place the points *P* and *F* of the instrument upon a slip of paper, Fig. 8, so that the pole *P* is as nearly as possible in the plane of the wheel. Now rotate the slip, keeping its tension constant about pole *P*, and notice if the wheel turns. According as it turns in one direction or the other *P F* is increased or diminished, until no motion is perceptible. The area of the circle of radius *P F* is the constant required.

IMPROVEMENTS IN THE FISHING FLEET.

THE importance of the recent improvements in the fishing vessels of New England, due to the precept and example of the U. S. Fish Commission, though generally acknowledged, never have been more strongly exemplified than in a recent occurrence, the particulars of which are thus stated in the *Gloucester Times* of April 4:

"Sch. Nannie C. Bohlin, from the Banks Sunday, reports a most thrilling experience. On the morning of March 12, at about daylight, while bowling along by the wind under full sail, with the usual watch on deck, a sudden squall arose. Capt. Bohlin was just coming on deck, and was standing in the companionway when a fierce gust from the northwest threw the vessel down. The captain managed to reach the deck. The man at the wheel, with great presence of mind, threw the wheel down, although both he and the wheel were submerged. He then rushed for the starboard side of the vessel and hung out over the stern, which was almost under water. One other of the crew also hung over the side and escaped being washed overboard.

"The crew in the forecastle were soon on deck (those in the cabin were unable to get out) and one of them rushed forward and let go the head sails. The vessel soon came up. It was a narrow escape, and had the Bohlin not been an extra good craft and the squall abated somewhat she might have filled and sunk. The vessel had lain flat in the water, her sails half under. One of her crew walked along her side from the wheel box to the fore rigging, so flat did she lie. The bait boards were torn off the house and two of the dories floated off by the water."

The Nannie C. Bohlin is one of the deep shooners and something like the Fredonia designed by the late Mr. Burgess, and has before this occasion demonstrated in the highest degree her special fitness for the business in which she engaged, so far as both seaworthiness and speed are concerned. It is evident to any one at all familiar with naval architecture, and the peculiar peril in which she was placed, that had she been as shallow as the vessels in common use in the New England fisheries a few years ago, none of her crew would ever have returned to tell of their experience.

YACHT NEWS NOTES.

The annual general meeting of the St. Lawrence Yacht Club for the election of officers and the reception of reports was held on Saturday evening in the club rooms, about fifty members being present. The secretary's statement shows the past season to have been a very successful one in every way. The membership has increased from 202 to 314. A comfortable club house at Dorval has been erected and furnished, a boat house and wharf built, and work commenced on the construction of a breakwater, the dredging of a basin, and the laying down of ways. The treasurer's statement shows a substantial surplus, and the club commences its season with more entausiasm and brighter prospects than ever before. The following officers were elected: Com., A. W. Morris, M.L.A.; Vice-com., Chas. H. Levin; Rear-com., Lionel J. Smith; Hon. Secy., A. F. Mitchell; Hon. Treas., W. A. C. Hamilton; Meas., Messrs. F. P. Shearwood and George Marler; Committee, Messrs. G. Herrick Duggan, David A. Starr, H. Markland Molson, David A. Poe, J. Dudgeon, E. Kirk Greene, J. Simmons and J. D. Miller.—*Montreal Witness, April 4.*

It is now reported that Vice-Com. Morgan will not race Gloriana this season, but will sail the new fin keel 35-footer. Capt. Harry Craven has sailed for England, which makes it probable that he will bring out an English steam yacht for Mr. Morgan. It is also reported that Mr. Ogden Goelet, owner of Norseman, schr., has purchased a steam yacht abroad.

A new yacht club to be named the Gravesend Yacht Racing Club, has been organized by the racing owners of small boats about Gravesend Bay, New York Harbor.

Two of the new 21 footers have recently been named, the Bigelow fin keel, building at Bristol being called Vanessa, while the Small boat will be the Exile.

Constellation, schr., is fitting out at Foster's wharf, Beverly, under the direction of Capt. Watson.

EASTERN Y. C. SPECIAL RACE.

THE Eastern Y. C. has issued the following programme for a special invitation race for yachts which do not exceed 21ft. waterline length, or do not exceed 25ft. racing measurement according to the rule stated below.

The special race of the Eastern Y. C. will be sailed from Marblehead Rock on Thursday, July 28, at 10:45 A. M., unless unfavorable weather necessitates postponement, and will be substantially according to the following scheme:

All matters connected therewith, unless otherwise specified in the programme will be governed by the racing rules of the E.Y.C. so far as they may apply.

Entries, which must inclose the certificate of measurement from the measurer of the club from which the yacht enters, must be delivered to the secretary, etc.

Each yacht must carry a number, etc.

The prizes will be: First prize $—, second $—, if five or more start; third $—, if seven or more start.

If any yacht of the "25ft. rating" class enters and completes the course, the first and second prizes above named will be doubled in amount.

Yachts shall be measured according to the rule of measurement for 1892 of the Corinthian Y. C. of Marblehead, not reckoning the spinaker boom. Yachts may carry at the mast a spinaker on a boom equal in length to the racing measurement so taken, and any excess of length shall be added to the base line and the racing measurement calculated anew.

According to the corrected measurements taken, as above, the yachts will be divided, for the purpose of starting, into groups, of which those yachts measuring 25ft. and less shall be the first group. Those over 25ft. and not over 26ft. shall be the second group. Those over 26ft. and not over 27ft. shall be the third group. Those over 27ft. shall be the fourth group.

COURSES.

Start and finish between a flag buoy moored a cable length southeasterly from Marblehead Rock and the pilot house of the committee steamer.

The E Y. C. turning buoy is placed 8 miles S.E. by S. from Marblehead Rock

The 2½-mile buoy will be a can buoy bearing a red flag, moored on the same range, distant 2½ miles from Marblehead Rock.

Course C.—From starting line to and around the 2½-mile buoy, leaving it on starboard; thence to and around the bell buoy off Great Pig Rocks, leaving it on starboard; thence to and around the flag buoy at Marblehead Rock, leaving it on starboard; thence again to the 2½-mile buoy, leaving in on starboard; thence again to the bell buoy, leaving it on starboard; thence across to the finish line. Distance about 15 miles.

D.—From starting line, the reverse of course C, leaving each mark on the opposite hand, to the finish line. Distance about 15 miles.

F.—From the starting line to and around the Graves Whistling Buoy, leaving it on starboard and return to the finish line. Distance about 16 miles.

E. Y. C.—From the starting line to and around the E. Y. C. turning buoy, leaving it on starboard and return to the finish line. Distance about 16 miles.

SIGNALS.

If the first signal is delayed the intervals will remain unchanged.

At 10:45 the course letters will be hoisted, and remain till all have started.

At 10:55 the warning signal, code flag P, will be hoisted.

At 11:00 start of first group of yachts, the smallest, by lowering flag P, hoisting flag S and blowing whistle.

At 11:01:30 start of second group of yachts by lowering flag S, hoisting flag T and blowing short whistle.

At 11:03 start of third group of yachts by lowering flag T, hoisting flag V, and blowing short whistle.

At 11:04:30 start of fourth group of yachts, the largest, by lowering flag V and blowing short whistle.

Each yacht will start within the limits for its group, and the starting time for all will be reckoned from 11:06, but if remeasurement changes the proper group of any yacht her elapsed time will be corrected accordingly. Subject to such remeasurement, the first yacht across the finish line will win.

The crew of each yacht will be limited to five men, no distinction as to amateurs.

One life preserver must be carried on deck.

No shifting ballast or outriggers will be allowed.

Copies of this scheme may be had on application to the secretary regatta committee E. Y. C., Room 76, 50 State street, Boston.

THE BOSTON MOSQUITO FLEET.

FAST DAY—APRIL 7.

THE usual Fast Day races of the South Boston mosquito craft took place on April 7, the Savin Hill Y. C. and the Chelsea Y. C. each holding a race in the morning, while that of the Mosquito Fleet Y. C. was sailed in the afternoon. In the Savin Hill race the wind was very light, but 5 finishing out of 13 starters. The course for the two classes was across line between club house landing and a stake boat, leaving flag boat—moored three-quarters of a mile southeast of club house—on starboard, Mushroom Island on starboard, and repeat, finishing across starting line between club landing and stakeboat. The start was made at 9:30 A. M. The times were:

FIFTH CLASS.

	Length.	Elapsed.	Corrected.
Laurel, J. K. Hutchins	14.00	1 39 56	1 15 09
Tantrum, F. D. Perkins	14.07	1 46 51	1 22 44

SIXTH CLASS.

Bessie, W. C. Cherrington	12.11	1 34 06	1 07 38
For Sale, C. H. Conant	11.03	1 46 26	1 18 13
Transit, S. N. Small	12.13	1 45 48	1 18 45

The race of the Chelsea Y. C. was started at 10:40 over a 3-mile course from Chelsea bridge dolphin, around the navy yard can buoy, back again, rounding the Chelsea ferry dolphin to point of starting. White Swallow won, time 1h.; Anna R., 1h. 45m.; Holy Smoke, 1h. 45m. 1s. The judges were Chas. P. Long, James Wolstenholm and Capt. Cannon of the yacht America.

The race of the Mosquito Fleet at 1 P. M. was sailed in a rising westerly breeze, the course being from between the South Boston Y. C. raft and flag to spar buoy 2, on starboard, to red buoy 4, on starboard, to and across starting point, leaving flag on starboard and home. The principal interest centered in the new fin-keel dory Polywog, owned by Mr. J. B. Paine and sailed by Mr. Waterhouse, but she made a poor showing. The times were:

	Start.	Finish.	Elapsed.	Cor'd.
Tantrum, F. D. Perkins	1 10 00	1 53 34	43 34	29 32
Bessie, W. C. Cherrington	1 10 00	1 58 39	48 39	33 02
Icurez, H. Jackson	1 10 00	2 00 38	50 38	36 23
Annie, E. H. Rich	1 10 00	2 01 14	51 14	36 43
Transit, S. N. Small	1 10 00	2 02 19	52 19	38 07
Fin dory, J. E. Waterhouse	1 10 00	2 06 20	56 20	42 08
Laurel, H. Hutching	1 10 00	Disabled.		

Judges, James Bertram, Howard L. Stickney, Hubert Pope.

SIZE VS. LENGTH AND SAIL AREA.

Editor Forest and Stream:

In response to your invitation allow me to say a few words concerning the weak points of the length and sail area rule. Unless my memory fails, the FOREST AND STREAM has for a number of years very truly maintained that "size gives speed," in boats, and so far the FOREST AND STREAM has been and is, perfectly scientific and sound; but we wanted a clear explanation of what size is.

The man with a deep, narrow, wedge-shaped boat carrying an unlimited amount of lead to make her do what would be impossible without it—namely, stand up and go—says that his boat is small because she is narrow and deep, and that his opponent's boat is large because she is wide and shallow, utterly ignoring the fact that his narrow craft is carrying a lever force in the form of dead weight hung low which would be sufficient to nearly sink the shoal boat that stands up and goes because of her shape, not because she is large.

The length and sail area rule is outrageously unfair. It is unfair because it is conceived in false pretense. It is unfair because it is bare-faced legislation in favor of a special type, and would, if it could, prevent all trials with other types.

Personally, however, and as a sailer of boats, I have not proposed, nor do I now propose, any other measurement rule for time allowance, but am hopefully willing to take it just as it stands and try to continue to prove that light displacement, even heavily handicapped, is superior in speed and weatherliness to large size, big weight and big humbug. So I say, by all means let us continue the experiment of taxing both length and sail area; but, in the name of common sense, let us not call 25 feet 30, nor arbitrarily force a boat to sail in a larger class than her own, simply because from the better shaping of her "size" she possesses power to carry sail without the "schoolboy's" crude contrivance of a heavy weight hung under her.

ROSLYN, L. I., April 9. THOMAS CLAPHAM.

[The general opinion, which we have shared with yachtsmen at large, after a careful observation of the workings of the length and sail area rules for some years, is, that this rule is not only the fairest yet devised for bringing different types together, but the only one yet tried which does not distinctly encourage one type to the exclusion of nearly all others. It would appear from Mr. Clapham's letter that he attributes to the length and sail area rule the production or encouragement of the extreme narrow cutter; but on the contrary, this type has passed out of sight with the adoption of the rule in question. Mr. Clapham states several general propositions, but offers no proofs; perhaps he will favor our readers with such specific dimensions of the "big humbugs," the 25ft. boats which are measured as 30ft., and of the boats of superior model which are excluded by the rule. Only with the actual figures of hulls and sail plans will it be possible to argue the question seriously.]

THE A. C. A. FLAG.

THE accompanying cut shows the correct proportions of the A. C. A. flag as adopted at the first meeting of the Association at Lake George in 1880 and since unchanged; the official dimensions for

canoes now being 12in. hoist and 18in. fly, the white stripe being one-fifth the hoist, or nearly 2½in. for this size. Of late this standard has been widely departed from, the white stripe being made of various widths, but the correct proportion is as stated, one-fifth.

BOW-FACING OARS.

Editor Forest and Stream:

The request of "Kelpie" in your issue of March 31 will doubtless interest many sportsmen. I was in the same quandary some years ago, and spent time and money to satisfactorily solve it. It is not every make of canvas boat that has sufficient gunwale to stand the action or strain of bow-facing oars, or that can be reinforced to make them so. I have seen and used almost every make of canvas boat, and no less than four styles of bow-facing oars, and my final conclusion for the best combination was a "Stranahan" three-section boat, 12ft. length, made expressly to order by Frank Holmes, Chagrin Falls, O., with a double strip gunwale rigged with two sets of sockets or rowlocks, if you so choose to call them, for F. A. Allen's, Monmouth, Ill., bow-facing oars. With two persons in the boat the oars were placed in the sockets near the stern, but when one only or three persons the sockets near the middle of the boat were used. For portaging I used a light bass wood yoke made by Mr. Grant, of Boonville, N. Y., tied with leather thongs to gunwales. Of course in making a portage the oars had to be taken off and tied securely to frame work in position to balance, unless there was a companion to carry them. It was always my custom to have with me a light Adirondack paddle to use in narrow waters or in running dangerous rapids. My paddle was of curly maple and envied by all who saw it, of elegant model and extremely light. Mr. C. M. Norton of this place took the model and has made some elegant counterparts. The Wanderer and its equipments have been in many waters and greatly admired.

GARRETTSVILLE, O. E. S. WHITAKER.

CANOE NEWS NOTES.

THE annual meeting of the Brockville Boating and Canoe Club was held on April 5, when officers were elected as follows: Com., Neil McLean; Vice-Com., Mayor Booth; Sec'y, W. S. Buell; Executive Committee—Robert Travers, W. M. Brown, James Moore and Charles Ball. Messrs. McLean and Travers were appointed delegates to the annual meeting of the St. Lawrence Skiff Sailing Association to be held in Brockville on May 5. This club will be the challenger for the New York C. C. cup on behalf of Mr. Ford Jones.

A. C. A. Membership.—Eastern Division: Nathaniel Silsbee, L. S. Drake, Boston, Mass. Northern Division: W. J. McNally, H. C. Fortier, Geo. W. Booth, Corinthian C. C., Toronto, Ont.; Harry Ford, Toronto C. C., Toronto, Ont.; G. E. Francklyn, Halifax, N. S. Central Division: L. T. Aldrich, Grand Rapids, Mich.

WANTED IMMEDIATELY, first-class canoe builders. None but first-class men need apply. Write, stating previous experience and wages required, to J. G. FRASER, Manager, St. Lawrence River Skiff, Canoe and Steam Launch Co., Clayton, Jefferson Co., N. Y.—*Adv.*

Rifle Range and Gallery.

Zettler Rifle Club.

NEW YORK, April 6.—At the regular weekly competition of the Zettler Rifle Club. Pres., B. Walther, for the gold medal, on Tuesday evening, April 5, at their headquarters, 219 Bowery, the following scores were made on the 25-ring target, possible 250 points: C. G. Zettler 247, Dr. J. A. Boyken 247, M. B. Engel 246, B. Walther 246, G. Nowak 244, H. Holges 244, L. Flach 243, B. Zettler 243, F. Ross 243, F. Schmidt 241, F. Hecking 237, M. Tropp 237, F. Lindkloster 234.

The result of the first day's shoot in their season 1892, open-air shoot, distance 200yds., off-hand, was shot at C. Wissel's Cypress Hills Park, Cypress Hills, L. I., on Sunday, April 3, showed the following scores, strings of 10 shots, 25-ring target, possible 250 points: Dr. J. A. Boyken 227, B. Walther 226, F. Ross 225, H. Holges 218, C. G. Zettler 216, B. Zettler 210, M. B. Engel 204, G. Krauss 207, Ph. Schmidt 198, G. Joiner 188, F. Farbarius 178, C. Dreste 161. GUS NOWAK, Sec'y.

"FOREST AND STREAM" TOURNAMENT

FOR NEW JERSEY RIFLE CLUBS.

LAST week we published the score of the Essex Amateur and Miller clubs, shot March 15, as sent us by the former, and we stated that the score was not of record because when received by us it did not have the signature of the captain of the Millers. Rule 7 reads: "The scorer of the home club shall send to the FOREST AND STREAM the result in full of each match within twenty-four hours after said match is shot. Said scores must be signed by the captain and scorer of each team, and be certified by the judge."

The Millers send us the following score, which they claim to be the correct one. It is signed by Capt. Richard W. Dewey, Judge E. Fischer and Scorer J. Caragher. It is not signed by the captain and scorer of the Essex Amateurs:

Essex Amateur Rifle Club vs. Miller Rifle Club, shot on Essex Amateur range, March 15:

ESSEX AMATEUR R. C.

J K Walsh	21	21	22	23	23	23	24	25	25	25	—232
F Dietz	24	23	24	24	24	23	24	21	24	25	—236
J Coppersmith	23	22	24	24	25	23	22	24	25	24	—234
A C Neumann	22	25	25	21	21	23	25	22	25	24	—233
G Snellen	25	25	25	24	23	23	23	25	23	25	—241—1176

MILLER R. C.

L Flach	23	24	25	25	24	25	25	23	25	23	—242
D Miller	23	25	24	23	21	25	24	25	25	25	—240
L Vogel	21	22	24	25	24	23	23	23	23	25	—233
G Schlicht	20	21	21	24	22	24	24	24	24	23	—227
C Judson	24	24	25	22	23	24	23	25	25	24	—239—1151

Captain, Richard W. Dewey. Scorer, J. Caragher. Judge, E. Fischer.

As no complete score of this match (that is, a score duly attested) has been received at this office, the match is not of record, and the score will count in the record of neither team.

Jefsen Rifle Club vs. Our Own Rifle Club, shot on Jefsen range April 5:

Captain, Frank Helms. Scorer, J. S. Wadams. Judge, Geo. W. Graf.

The Lady Miller Rifle Club.

THE Lady Miller Rifle Club was organized at the headquarters, 80 Hudson street, Hoboken, last Friday evening, the 8th inst. The members are composed of wives, daughters and friends of the Miller Club members. The charter members are Mrs. L. Miller, Mrs. J. Vogel, Miss M. Miller, Mrs. H. Stadler, Mrs. M. Barrett, Mrs. R. Katenkamp, Mrs. A. Cordts, Miss K. Born, Mrs. M. Meyns, Mrs. T. Meyer, Mrs. E. Petrie, Mrs. A. Petersen, Mrs. M. Franklin and Miss R. Stadler. In the election of officers that followed those selected were: Mrs. H. Stadler, President; Mrs. A. Cordts, Vice-President; Mrs. J. Vogel, Secretary; Mrs. B. Katenkamp, Treasurer; Mrs. L. Miller, Shooting Master. The initiation fee was fixed at $1, the dues to be 25 cents a month. It was also decided to hold their weekly shoot every Thursday evening at headquarters. The scores made last week are appended below. The conditions were 10 shots, rest, 25-ring target, possible 250:

Mrs H Stadler	25	25	25	25	24	24	23	23	23	22	—239
Mrs L Miller	25	25	25	24	24	23	23	23	22	20	—234
Miss M Miller	25	25	24	24	24	24	23	23	21	21	—234
Mrs Vogel	25	25	25	21	23	23	22	22	22	19	—230
Mrs Barrett	25	25	24	23	23	23	23	22	20	19	—227
Miss K Born	25	24	24	24	24	23	22	21	20	19	—226
Mrs Meyns	25	25	24	23	23	22	22	22	21	18	—225
Mrs Petersen	25	25	24	24	23	21	21	20	19	18	—220
Mrs Franklin	25	25	24	23	22	22	22	20	20	19	—220
Miss Stadler	25	24	24	23	23	21	21	20	20	19	—220
Mrs Meyer	25	25	24	24	23	22	20	19	19	19	—220
Mrs Petrie	25	25	24	24	23	22	21	20	17	14	—215
Mrs Cordts	25	24	23	21	20	20	20	20	20	16	—209
Mrs Katencamp	25	24	24	24	24	21	20	16	15	14	—207

Next month the club will be divided into classes and medals will be put up to be contested for in every class. A rifle has already been ordered, and altogether it can be seen that the ladies are "in it" to stay. The club promises to become an immense success, as the ladies interested are working hard to make it so. The next shoot will be held next Thursday evening, and as the ladies are becoming more used to rifle shooting, better scores will be made. Ladies' rifle clubs are meeting with much favor just now, as it is considered a good sport. Soon we will hear of a series of ten me—ladies' team match being arranged between rival clubs in the State.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, April 5, at George McCune's shooting gallery, 146 South Halsted street, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points. Scores as follows:

W J Gibbs	274	A McBean	267
H S Burley	268	C A Hankle	262
Geo McCune	268	Thos Ford	262
Roy Taylor			261
F Erickson			259

An interesting sweepstake was shot after the regular weekly shoot between the following: A. McBean, H. S. Burley, R. Taylor, W. J. Gibbs, Geo. McCune, M. Braun, C. A. Hankle and F. W. Eickhor; was won by A. McBean by 110 out of a possible 120.

Lischke Scores.

JERSEY CITY HEIGHTS, April 3.—The following scores were made by some of the members of the A. Lischke Rifle Club at their practice shoot at their range, 17 Milton avenue, Jersey City Heights, N. J., 110ft. distance, 25-ring target:

J Scharly	25	25	25	25	25	23	22	21	21	21	—233
A Lischke	25	24	24	24	23	23	22	22	21	21	—228
Beicharz	25	24	23	23	22	22	22	21	20	20	—222
Strater	24	24	24	21	21	20	19	19	18	17	—207
Shulte	25	22	22	21	21	20	19	18	16	16	—200

A. LANGENBERGER, Sec'y

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

AT THE last quarterly meeting of the Herman Rifle Club, Capt. Herman Neuman, held at their headquarters, 354 Palisade avenue, Jersey City Heights, the officers elected to serve for a year were: Captain, Herman Neuman; Secretary, Rudolph Auerbach; Treasurer, August Grosser; First Shooting Master, Robert Winkler; Second Shooting Master, Theodore Schmidt. The club's headquarters are to receive a general overhauling. The weekly shooting night was changed from Friday to Saturday evening. After the close of the meeting the members were treated to a fine collation by the genial brother of Captain Herman Neuman, "Gus" Neuman. To say that the quasi banquet was enjoyed would be putting it mild. The club also decided to have an excursion down to the Fishing Banks on Sunday, May 29, and all the members of neighboring rifle clubs are cordially invited to participated in a day of possible seasickness and pleasure, according to whether a man possesses sea legs or no.

The annual prize shoot and bowling for prizes of the Hudson City Schuetzen Company, Captain Bleumel, takes place at Pohlmann's, Jersey City Heights, next Monday (Easter Monday), the 18th inst. Five gold medals and twenty-five dollars will be presented to the more expert in both the bowling and shooting line. The committee in charge of the affair are: First Lieut. Tuelcc, Second Lieut. Fisher, Recording Secretary Tucker, Financial Secretary F. Mahleiser, Treasurer Wm. Reinhardt and Capt. Peter Bleumel. A ball and entertainmut will follow in the evening.

Palisade Rifle Club, Captain John Reinhardt, Jersey City Heights, Thursday, April 7.—The scores made to-night are appended below. The conditions were: Ten shots off-hand, 25-ring target, possible 250:

First Class.

F Liell	25 25 25 25 24 24 24 24 23 20—239

Geo L Graf	25 24 22 22 21 21 20 19 17 17—210
G A Finger	25 23 22 21 21 20 19 19 19 18—207

The regular quarterly meeting followed. The resignations of secretary and treasurer were announced, on account of Secretary Gus Finger leaving for Chicago, where he will remain until the close of the World's Fair, and the resignation of Treasurer James Johnson. Herman Rosenthal was elected to serve as secretary, and Charles Burk as treasurer. A motion was made, seconded and passed that the club have a shoot among the members to last two months, and each winner among the first and second class men be presented with a handsome gold medal. The acceptance by the Puritans to a 10-men team match was received, and the first match will take place at the Palisade's headquarters on Thursday evening, the 14th inst. (to-night), and not on April 19, as previously mentioned. The Palisades are confident of winning at least one of the matches, thereby evening up.

The votes cast for the handsome gold medal, to be presented by the Hoboken Schuetzen Club, Capt. Henry Wirth, to the most popular captain, at its annual ball, at Russell & Roedels' Schuetzen Hall, 223 First street, Hoboken, on April 24, continue to pour in rapidly. Captaid Joseph Schauer, of Freischutz Company No. 53, Germania Schuetzen Bund, leads with an even hundred to his credit; Captain John Reinhardt, of the Palisade Rifle Club, of Jersey City Heights, follows with a total of seventy-five votes to his credit. Other candidates for the honor are Captains Freitag, Moehneking, Koellisch and Forkel. The race will probably be between Captains Schauer and Reinhardt, but many dark horses are looming up, and it would be a most difficult task to name the winner. The committee in charge of the arrangements for the affair are: Messrs. John Stein, J. H. Kruse, Paul Schunke, Frederick Kroeger and Captain Henry Wirth.

A three 3-men-team match took place last Saturday evening between members of the Hoboken Schuetzen Club. Team No. 1 won by a small margin. The scores made were:

Team No. 1.		Team No. 3.		Team No. 2.	
J H Kruse	233	Capt Wirth	232	J Stein	232
G M Roedel	230	F W Kroeger	230	S Russell	220
J Stein	232	Schunke	228	F Betts	220
	695		690		672

A ten-men team match has been arranged between the Palisade Rifle Club, Capt. John C. Reinhardt, of Jersey City Heights, and the Puritan Rifle Club, of Newark, for $10 a side and a good time. The first match will take place on the Palisade's range, 354 Palisade avenue, next Tuesday evening, the 19th inst. The Palisade's team will be composed of George W. Graf, Charles E. Bird, J. H. Kruse, Adolph Malz, Capt. John C. Reinhardt, Henry Boddey, Charles Buck, Frederick Brandt, Jacob Kehrwald and John Carragher. A return match will take place later. The Palisade's motto in this race is, "If we can't play we pay."

The most successful rifle shooting tournament in New Jersey's history, thanks to the indefatigable management of FOREST AND STREAM, is rapidly drawing to a close. The Miller Rifle Club, Hoboken, continues in the lead with all victories and no defeat to its credit. They will probably win the handsome trophy, emblematic of the State championship, unless something unforeseen occurs. The Millers will shoot the following matches between now and the close of the tournament: April 19, Jefsen; May 3, Our Own; May 13, Greenville; May 31, Essex Amateurs. They ought to at least win three out of the four remaining matches.

Gus Finger, secretary of the Palisade Rifle Club, has compiled the following averages of all the club's members who participated in the FOREST AND STREAM thournament matches. J. H. Kruse leads with a average of 229^{1}_{10}, George Graf being second with an average of 224^{8}_{11}, and Capt. John Reinhardt just fills third place with an average of 220^{5}_{10}. The scores with number of matches shot are appended below, also the averages of each man:

	1	2	3	4	5	6	7	8	9	10	11	Matches.	Av.
J H Kruse	228	232	222	235	231	234	226	223	233	227	—2291	10	229^{1}_{10}
G W Graf	237	225	220	226	234	222	220	212	220	223	—2249	11	224^{8}_{11}
J Reinhardt	219	216	228	224	222	233	223	221	211	208	—2205	10	220^{5}_{10}
F Pfleger					212				228		—440	2	220
Rosenthal			230		220	196	216			206	—1068	5	217^{9}_{5}
G A Finger	218	215	215	209	220	225		196	200	208	—1906	9	211^{7}_{9}
J Johnson							210	207			— 417	2	208^{9}_{2}

Herrschaft	190										— 190	1	190

Team scores 1072 1081 1125 1093 1131 1107 1112 1062 1082 1078 450*

* Only two of the team appeared to shoot on this occasion.

Excelsior Rifle Club, Jersey City, Tuesday, April 5.—The scores made to-night in the regular weekly medal competitions are below. The conditions were: 10 shots off-hand, 25 ring target, possible 250, distance 75ft.:

L P Hansen	25 25 25 25 24 24 24 24 23—243
W J Hennessy	25 25 25 25 24 24 24 23 23 21—238
C Boag	25 25 25 24 24 24 24 23 22 21—237
C L Pinney	25 24 24 24 24 23 23 22 22 21—232
Jas Hughes	25 25 24 24 24 24 23 22 21 21—233
C Batchler	25 25 25 23 23 23 23 23 22 21—233
G C Varick	25 25 24 24 24 23 23 22 22 20—232
W J Channing	25 25 24 24 23 23 23 23 21 21—232
Thos Hughes	25 25 24 24 24 24 23 22 20 18—229
W H Robidoux	25 25 24 24 23 23 22 22 20 20—228

Although the indoor season of this club is rapidly closing, the interest centered in the annual medal competitions is increasing. It has resulted in pretty races in all three classes, and it is as yet impossible to guess the winners, as three more weeks are left ere the competitions close, which is plenty of time to bring forth a dark horse. Meantime the rifles for the long-range shooting are more in demand, and the members are settling down with the expectation of putting up big scores this summer.

Miller Rifle Club, Hoboken.—Captain Richard W. Dewey. The scores made to-night in the regular weekly competitions for the second class medals are appended below. The conditions were ten shots off-hand, 25-ring target, possible 250. Distance 85ft.

First Class.

A Meyns	25 25 25 25 25 24 24 23 23 21—240
D Miller	25 25 25 24 24 24 24 23 22 22—237
F Brandt	25 25 25 24 24 24 23 23 22 22—235
L Vogel	25 25 25 25 24 24 23 23 22 22—235
E Fischer	25 25 25 24 24 24 23 23 22 22—234
F Liell	25 25 25 24 24 24 23 23 22 20—230
H D Heneken	25 25 24 24 24 23 23 22 21 20—227
L Sohl	25 25 25 24 23 23 22 22 21 19—225
Capt Dewey	25 24 24 23 20 20 20 18 18 18—210

Second Class

D Peters	25 25 25 24 24 24 23 23 23 21—237
C Prien	25 25 24 24 24 23 23 22 22 19—231
H J Carragher	25 25 25 24 24 23 23 22 19 18—228
J H Kruse	25 25 24 24 24 22 22 20 20 20—225
F Kloepping	25 25 25 24 24 23 21 20 20 18—325

Third Class.

A Stadler	25 25 24 24 23 22 22 20 20 20—225
J J Devitt	25 25 24 24 24 23 22 19 18 18—222
H Seltenreich	25 25 25 23 23 21 21 21 21 18—222
H Gwinn	25 25 24 23 23 23 21 20 19 18—221
H Vanderheyden	25 24 23 22 20 20 20 19 18 15—206
F Kammel	25 25 23 20 20 20 19 18 18 16—204
F Dunsteadt	25 23 22 21 20 20 19 18 18 18—204

Match shooting followed, the scores made being:

D. Miller's Team.		F. Brandt's Team.	
D Miller	119	F Brandt	115
A Stadler	115	R W Dewey	103
J H Kruse	111	L Schl	113
F Liell	121	H Gwinn	100
F Kloepping	119	J Carragher	107
D Peters	119—704	J J Devitt	112—656

Another match followed with these scores:

F. Brandt's Team.		D. Miller's Team.	
F Brandt	114	D Miller	114
D Peters	118	A Meyns	122
J H Kruse	115	F Kloepping	116
A Stadler	115—462	R W Dewey	110—462

The tie was shot off by each man firing one shot:

Miller's team.....23 21 25 25—94 Brandt's team.....24 22 23 24—93

The regular monthly meeting followed. The candidates for membership elected were F. Drews, of this (New York) city, Charles Prien and Herman Grimm. The committee of arrangements for the big Decoration Day festival reported that all arrangements had been completed. The music will be furnished by Prof. Boenich. The members were told to have everything in readiness and to look to their coats and helmets.

The younger members of the Miller Rifle Club are envious of dashing Alson Stadler, who is to be the floor manager at the festival. Alson has a courtly way about him that the ladies can't resist, and on the day of the affair Alson, with his breast covered with the large floor manager's badge, will be looking more handsome than ever.

Alson is just now very proud of a present given him a few days ago by Mr. Stadler. It is a handsome 26in. Ballard rifle. It cost the donor $28, as the rifle has a very neat stock and heel plate.

The medal competitions of the club were closed last Wednesday evening, the 6th inst. "Dave" Miller received the medal in the first class, with R. Judson, A. Meyns and F. Liell giving him a tight race. The second class medal was secured by J. H. Kruse, of FOREST AND STREAM, who secured the prize sixteen times out of the twenty-six weeks that the medal was up for competition. He was promoted to the first class. Henry Seltenreich secured the medal in the third class, having won it fourteen times, R. Stadler giving him a close call, he having won it ten times with H. F. Meyer twice. Seltenreich was placed in the second class. The medal competitions will not be resumed until next September, team shooting taking its place. It was proposed by some to close the headquarters up during the summer, and do no indoor shooting until next winter, but if that idea is brought up before the club it will be met by a perfect storm of opposition, as most of the members have made it their rule for the past five years to regard Wednesday evening as a shooting night.

The shoot for the Colonel Stevens trophy in the Second Reciment, N. G. S. N. J., will be governed by the following rules: The shoot to take place on April 26 and 27, teams to consist of 10 enlisted men only of each company, no member will be allowed to shoot who was not enlisted before Jan. 1, 5 shots per man, no extra shots unless bullet does not leave rifle, distance to be 100ft., only one team to be on the floor at any time, ammunition to be furnished by the inspector of rifle practice, scorers are to be furnished by the same officer, trigger shall have a 6lb. pull, no substitution of rifle allowed during a string shoot except in case of accident and with the consent of the inspector of rifle practice.

The Greenville Rifle Club, Captain William H. Robidoux, has received and accepted a challenge of the Warren Rifle Club, of Newark, to a 10-men a side team match, to take place at the headquarters of the former club, "Joe" Kaiser's Metropolitan Hall Ranges, Greenville, on Wednesday evening, the 27th inst. Captain Robidoux is confident of his team scoring a victory, although he knows they will have to shoot to win, as the Warren club possesses quite a lot of good material. At all events the match will be a close one, and to pick the winner would be an impossibility.

The Greenville Rifle Club are, by other participating clubs, justly acknowledged to be the most hospitable of any club in the FOREST AND STREAM tournament for New Jersey rifle clubs. Although the club has met with indifferent success in the tournament, they are making a good showing for such a young club.

Empire Rifle Club's Banquet.

NEW YORK, April 7.—The Empire Rifle Club held its yearly banquet at its headquarters, 12 St. Marks place, Tuesday evening, the 5th inst., and was attended by delegates of the leading rifle clubs of New York and its vicinity until the early hours of the morning.

The following scores were made at the prize shoot:

C Zettler, Jr	73	W Fetzer	69 G Hillmeyer 64
B Zahn	70	A Rosenstraus	68 J Diehl 61
W Rosenbaum	69	J Grimm	68 H Fetzer 60
H Zettler	69	W Meisenholder	66

After the prize shoot the club adjourned to the bowling alley.

B. ZAHN, Sec'y.

Cincinnati Rifle Shots.

THE regular shoot of the Cincinnati Rifle Association; very irregular winds, conditions were 200yds., off-hand, at the Standard target:

Gindele	86	84	85	Payne	85	78	75
Best	81	81	76	Simon	70	64	66
Louis	71	69	68	Stegner	72	67	63
Weinheimer	70	68	73	Speth	80	68	68
Wellinger	85	77	78	Drube	84	77	79
Houck	73	68	63				

New York Revolver and Pistol Club.

NEW YORK, April 11.—The following scores were made by the members at their last regular weekly practice shoot, on the 9th. First five strings of six shots each, on Standard American target; distance 20yds., S. & W. revolvers:

G E Jantzer	50 48 50 54 52—254
H Oehl	54 47 54 52 48—255
W Koch	39 39 32 25 46—181
G L Hoffman	48 50 53 55 43—249

Heidenreich Rifle Club.

NEW YORK, April 11.—The following scores were made at our weekly shoot at our range, 425 West Fifty-third street, open air, distance 100ft.:

Val Horn	241	J Aigeldinger	234 Jos Hippold 234
W A Hicks	232	Wm Steckel	230 Louis Enders 228
John Kaufmann	222	A Busch	220 C Waldman 217
Wm Muller	215	Frank Goodman	224 W M May 213

Medals for Canadians.

Editor Forest and Stream:

To encourage trap shooting, the Hamilton Powder Company offers for competition a series of gold and silver medals. A silver medal will be given any amateur gun club in Canada, having fifteen members or over, and possessing club property to the value of $300, on the secretary making application. These medals are to be shot for at inanimate targets, in regular club matches, held not less frequently than once a month, at which at least seven members participate. The competitions to open May 1, 1892, and close at midnight May 1, 1893. The company will, in the early part of 1893, give at least three heavy gold medals, fac-similes of the above. These are to be put up for competition, one in British Columbia, one in Ontario and one in Nova Scotia, and will be open to the winners of the silver medals in Northwest, Central and Eastern Canada respectively. They are to be shot for once, as an extra prize in some convenient tournament, and will belong to the person winning them under the rules of that tournament in a single barrel match. The medals will thus, in a measure, represent the championship of the three great natural divisions of Canada. For any information, write W. Emond, agent Hamilton Powder Company, Toronto, Ont. B.

MONTREAL, March 28.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

April 14.—Unknown Gun Club, monthly shoot at Dexter Park, Long Island, for two trophies and three prizes in money. Henry Knebel, President.

April 14.—Newark Gun Club, monthly prize and open shoot, at live birds, John Erb's, Bloomfield avenue, Newark, N. J.

April 15.—Fourth shoot of Connecticut Shooting Association, at Colt Hammerless Gun Club Grounds, Hartford, Conn.

April 15.—Jeanette Gun Club monthly shoot, at Dexter Park.

April 15.—New Jersey Trap-Shooter's League, third team contest, on grounds of Brunswick Gun Club, at New Brunswick, N. J.

April 16 —Parkway Gun Club, monthly shoot at Dexter Park, Long Island.

April 16.—New Utrecht vs. Amersfort Gun Clubs, team match, at Woodlawn Park.

April 16.—Atlantic Rod and Gun Club, semi-monthly shoot at West End, Coney Island.

April 16.—South Side Gun Club, weekly shoot at artificials, Newark, N. J.

April 16.—Sewaren Land and Water Club, team and individual contests at artificials, at Sewaren, N. J.

April 16.—John Erb's Old Stone House grounds, live bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J.

April 16 —Sweepstake shooting at Watson's Park, Burnside, Ill.

April 16.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.

April 16.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.

April 18.—Paterson Rod and Gun Club, regular shoot, at Paterson, N. J.

April 19.—Albany Gun Club, bluerock tournament, under management of Paul North, at Albany, N. Y.

April 19-20.—Eagle Grove Gun Club tournament, at Eagle Grove, Ia.

April 19-21.—Elk Park Shooting Tournament, two days at artificials, third day at live birds, Royersford, Pa. Address H. E. Buckwalter, Royersford, Pa., or Harry Thurman, Germantown, Pa.

April 19-21.—Detroit tournament, Detroit, Mich. Address John Parker, Manager.

April 20-21.—Onondaga Rifle and Gun Club, bluerock tournament, under management of Paul North.

April 21.—Essex Gun Club, monthly prize shoot, Jersey City Heights Gun Club grounds, Marion, N. J.

April 21.—Falcon Gun Club monthly shoot, at Dexter Park.

April 21.—C. Detlefsen vs. C. E Morris, at Woodlawn Park, Long Island; 100 birds for $150 a side.

April 21-22 —Sardinia, N.Y., tournament. E. Andrews, Manager.

April 22 —Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.

April 27.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.

April 27.—John Erb's grounds, Newark, N. J., open to the world sweepstake, at 50 live birds per man, $50 entry; beginning at 10 A. M.

April 27.—Grand sweepstake, open to the world, 50 live birds, $50 entry, birds included, twelve entries, four moneys; sixteen entries, five moneys; twenty or more entries, six moneys. John Erb's, Bloomfield avenue, Newark, N. J.

July 5-7.—Atlantic City Gun Club's tournament, at Atlantic City, N. J.

July 6-8.—Lafayette Gun Club tournament, at Lafayette, Ind.

July —.—Interstate Manufacturers' and Dealers' Association tournament, at Watertown, N. Y.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. 10-12.—Missouri State Amateur Association tournament, at Lexington, Mo. Added purses. Address G. A. Sturges, Sec'y.

Aug. 23-26.—International tournament, Des-chre-shos-ka Island, Detroit, Mich. Live birds and targets.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

Aug. —.—Interstate Manufacturers' and Dealers' Association tournament, at Auburn, N. Y.

Royersford, Pa., will be the center of attraction next week, and the chances are that an immense number of entries will be seen at the Elk Park shooting tournament. The shoot will take place on Tuesday, Wednesday and Thursday, the first two days being devoted to smashing bluerocks, while on Thursday live birds will be used. The order of the bluerock events (the same each day) will be as follows: Ten targets, $1 entry; 15, $1.50; 10, $1; 20, $2.50; 10, $1; 20, $2; 15, $1.50; 15, $1 50; 10, $1; 15, $1 50. The first, third, fifth, seventh and ninth events each day will be for amateurs, in which experts will have to shoot at unknown angles from unknown traps. The other events will be open to all. Thursday's live bird events will be at 5 birds, $4 entry; 7 birds, $6; 4 birds, $3; 10 birds, $8; and 5 birds, $4. American Association rules will govern all shooting. Extra events will be arranged to suit the contestants. "Old Father Time," alias "Rainbow," alias "Ikem Harry," alias Harry Thurman, will vie with H. E. Buckwalter in entertaining visitors. Shooting will begin at 9:30 A. M. each day.

South Side Gun Club.

SOUTH NORWALK, Conn., April 9.—Will you kindly note that we hold forth at the old stand each and every Saturday, and all shooters are welcome to join us at any time. Upon Fast Day and Good Friday our members participate in a live-bird shoot at White Plains, N. Y., in deference to the old blue laws of the "Nutmeg State," we are compelled in our occasional live-bird shoots to take a journey into New York State, where we can shoot without fear of molestation from the "minions of the law." A rumor is abroad that the New Haven Gun Club contemplate introducing a bill to repeal the existing law prohibiting live-bird shooting. If our New Haven brethren will take the initiatory steps, they may rest assured of our hearty support, and we will start a petition in our city to our political representative in this section of the State, petitioning that this obnoxious measure be repealed. In our shoot last Saturday Officer Ireland, of the city police, appeared with a new 6¾lb. 12-gauge Parker, which demolished the "crockery" in great shape. Mr. Remington, a new aspirant for honors "a la Fulford," quite eclipsed himself, and the rest of us as well, in the last sweep at 5 pairs, breaking 8 clean—he is now ready to shoot any man in town, at doubles, for glory or money.

Scores of April 8, sweeps, 25 cents entrance, 3 moneys, 10 birds (Keystones) each event, excepting in twelfth event at 5 pairs and the last event, which was a walking match at 5 birds, use of one barrel only. A brisk N.W. wind blew across the traps, which rendered full scores very difficult and few and far between.

No. 1: E. H. Fox 7, Northrup 7, Remington 6*, Coleman 7, Drake 6, Ferris 5. Three moneys in this and all other sweeps.

No. 2: Fox 9, Northrup 8*, Remington 8*, Coleman 8*, Drake 9, Ireland 7.

No. 3: Fox 9, Northrup 4*, Kelly 4*, Coleman 4, Drake 8, Ireland 7.

No. 4: Fox 9, Northrup 7*, Kelly 4*, Coleman 4, Drake 9, Ireland 8.

No. 5: Fox 6, Northrup 8*, Remington 6*, Coleman 8, Drake 9, Ireland 7, Ferris 8.

No. 6: Fox 6, Northrup 7*, Coleman 10, Drake 9, Ireland 6, Ferris 6. Ties on 6 shot off miss and out, won by Ferris.

No. 7: Fox 7, Northrup 4*, Kelly 4*, Coleman 8, Drake 6, Ireland 8, Hoyt 4*.

No. 8: Fox 10, Northrup 7*, Remington 7*, Coleman 7, Drake 9, Ferris 7.

Frank Post Wins the Excelsior Badge.

THE monthly badge contest of the Excelsior Gun Club took place at Pearl River, N. Y., on April 4, each man shooting at 25 artificial targets. Frank Post, the Park Ridge, N. J., expert captured the badge as shown by the following figures:

VanRiper	0110111001111111111110111—20
Post	1111111111101111111011130—22
Demarest	0101111011110111011111—20
McMillan	1100000001100000011100011— 8
J H Blauvelt	1111111111110110110101111—21
Freideman	0001110011111101111100110—16
Williams	1111001111110110101111100—18
Jersey	0100100111111111101111011—18
Peterson	1101111011110011101000011—16
J J Blauvelt	1111110111011101011111—21

The following score was made in a ten target sweep, $1 entry, which followed:

Post	1111111111—10	J H Blauvelt, Jr.	1111101111— 9
Freideman	1101111011— 8	McMillen	0111100111— 7
Demarest	1111111111—10	Williams	1111111111—10
Jersey	0101010101— 5	J J Blauvelt, Sr.	1111101001— 7

Saturday at John Erb's.

THE attendance at John Erb's on Saturday was light, an even quartette of shooters being on hand, these comprising John Erb, Samuel Castle, Neaf Apgar and E. D. Fulford. There was a strong wind blowing across the line of traps from the left, this making some of the birds fly very fast. Four Jersey sweeps were shot, the entrance in each being $3 and there being two moneys. Fulford shot at 45 birds and killed them all. Castle lost 2 out of 45, Erb lost 2 out of 2? and Apgar lost 4 out of 26. In the first sweep Fulford shot Castle out of first money on the seventeenth round, Erb going out on the fourth round. Fulford also shot Castle out on the fourteenth round in a miss and out for first money from events No. 2, 3 and 4. Below are the details:

	No. 1.	Ties.	No. 2.	No.3.	No.4.	Ties.
Fulford	1111	21211111212211111	1112	1121	2222	11112212111211
Castle	1111	11111112111212110	1111	1121	1111	11111212221120
Erb	1121	1110	1111	1111	1112	20
Apgar	1121		1110	1110	1210	

Haggerty—Mussey.

CHICAGO, April 11.—Jimmy Haggerty, or Mr. J. E. Haggerty, or, as I presume we should now call him, Col. James Haggerty, of St. Louis, has added another cause for the deep and undying hatred which Chicago has for the "town by the bridge."

First there was Col. J. Winslow, of St. Louis, who wilfully, feloniously and with malice aforethought did come up here last year, and then and there did scoop, beat, defeat and otherwise get away with two Chicago men, to wit George Kleinman and George Hofman, against the peace and dignity of Chicago; never said he was sorry, either. And now comes Col. J. Haggerty, also of St. Louis, and likewise feloniously on purpose breaks into Billy Mussey's safe, the same of reputation in the land, and then and there abstracts therefrom a sum of money, to wit, A hundred.

Can these things be? Yea, they can, easy. They now are was.

Col. Haggerty is a St. Louis alderman, but he would rather shoot than alder. In his shooting capacity he is known well in the Mississippi valley country and wider. He has contested with Mr. Elliot in his day, though not successfully, and has beaten many a man who classed in the upper three-fourths. I have already mentioned how he came up here last week and trod on people's coats publicly. To-day he came up from St. Louis quite alone. A stranger on a strange ground, he shot his race with Mr. Mussey, a shooter not in the sneezeable class certainly, and he won in a quiet, gentlemanly, but interesting and spirited race. He did it fairly. Chicago has not a word to say. There may be a slight tightening of the trigger on the old safe, but no lockjaw will set in, and the latchstring will still hang out. It's no disgrace to be beaten by an alderman anyhow.

At 2 o'clock this afternoon Mr. Haggerty stepped to the score. He was clad in a striped bathing suit, with a diamond as large as a baseball stuck through his jersey. All aldermen wear diamonds. The air was cold and clear. The wind, what little there was of it, blew from left to right across the score. It was not a day whose conditions would make the shooting hard. The birds were expected to be an exceptionally hard lot. Some of them were so, very much so, but some were easy. There were a few which did not start until a moment after the trap was sprung. Two had to be flushed, one for each shooter. There were some incomers, and also a few soft high birds. Against these there were some screamers, as hard as one would ever see. Mr. Mussey shot 10 practice birds, and of these 6 were as hard as any birds we get here. With a good stiff wind the birds to-day would have had some fun with the shooters, no doubt. As it was, neither shooter got 90, and both apparently wanted 90 or more. One feature of the shooting was the great number of low birds. Only about 20 birds towered or went off high.

Mr. Mussey also stepped to the score. Both shooters usually do step to the score in a match, but I want to mention this to establish the fact beyond cavil. It is about the only thing which is beyond cavil in a pigeon match. Mr. Mussey wore a shocking bad hat, a pair of side-bar glasses and a pleasant expression. He was not in jewels, but he was in hopes. He had a license to be had he shot his usual gait, but he fell a couple of birds or so below it.

Mr. John Watson was chosen referee, Mr. C. E. Willard official scorer, Prof. Turtle did the accumulating of dead birds for Mr. Mussey. The boy trapper, Billy, performed a like service for Mr., or, I should say, Col., Haggerty.

Col. Haggerty shot an L. C. Smith 12gs., his load being 3¼drs. of E. C. powder, 1¼oz. No. 8 chilled in both barrels. At the score his position was crouching, leaning and constrained.

Mr. Mussey shot a Greener 12ga., with 42grs. Schultze, 1¼oz. chilled 7s in both barrels. His position was erect with the left arm stiff and straight.

During the race Col. Haggerty twice discharged both barrels at once and was asked to shoot another bird. This was agreed upon before the race. American rules governed, barring this and the 1¼oz. clause.

Col. Haggerty shot in a very close, careful, deliberate way. He shoots more like Geo. Kleinman than any man I know. He does not shoot the bang—bang style, but is deliberate. His weapon is a fine performer, So also is the one used by Mr. Mussey, indeed better than that gentleman needs, for he shoots first and second so quick that a gun of much wider pattern would do him as well or better.

In the early part of the match the exhibition of skill was fine on both sides, and it was a pretty race. At 20 the men were tied. At 40 St. Louis led by one bird, and held ahead to the close. At about his middle 20, Mr. Mussey was doing some pretty patchy work. In his last 20 Col. Haggerty showed signs of demoralization, and came back several birds, Mr. Mussey finishing strong as usual.

The following is a new sort of score. Look at it. You can tell how the birds flew. You can tell it at a glance. You can't find this in any other paper on earth. Everybody reads FOREST AND STREAM anyhow, but now everybody's friends will read it. The paper with ideas and enterprise is the one the American sporting public is going to buy and read and swear by. You can get all the trap news in FOREST AND STREAM, get it quick, get it easy, get it fresh, get it in good shape, in new shape, in exclusive shape. No pitchfork. The pitchfork as an editorial tool is not in use on FOREST AND STREAM. Score:

o dead out of bounds. E. HOUGH.

"Forest and Stream" Trap Score Type.

WE hinted last week at a surprise in store for FOREST AND STREAM'S Trap Department readers. It is presented to-day in the score of the Haggerty-Mussey match.

The FOREST AND STREAM has devised a font of graphic trap score type, by means of which to show at a glance the direction of the bird's flight from the trap. It is to take the place of the old device of indicating the flights by initials, as R Q D for a right-quartering driver. The new type does away with all that and tells the story of each bird's flight admirably, adequately and effectively, and in a manner quite impracticable with words. The succession of flights and the character of the shooting as determined by the directions may be followed from the first to the last with a facility now for the first time made possible by the enterprise and resources of this journal.

The characters and their significations are as follows:

Regular Flights.

↑ straight away.
↓ incomer.
← left driver.
→ right driver.
↖ left-quartering driver.
↗ right-quartering driver.
↙ left-quartering incomer.
↘ right-quartering incomer.

And Irregular Flights.

↟ straight away (twister).
↡ incomer (twister).
↞ left driver (twister).
↠ right driver (twister).
↖ left-quartering driver (twister).
↗ right-quartering driver (twister).
↙ left-quartering incomer (twister).
↘ right-quartering incomer (twister).

The characters were devised by the FOREST AND STREAM, and have been copyrighted by the Forest and Stream Publishing Co. They will be employed from time to time in reports of important matches.

We have set out to lead the world in trap reporting. We are leading.

DRIVERS AND TWISTERS.

THE Paul North system of handicapping, which was fully explained in the account of the Auburn shoot published in last week's FOREST AND STREAM will be used at the bluerock tournament of the Albany Gun Club next Tuesday and the writer feels justified in saying that it will be a "go." The Albany people know a good thing when they see it and are not slow in "catching on."

* * *

Anent the above system it will also be introduced at the bluerock tournament of the Onondaga Gun Club, to be held at Maple Bay, Syracuse, N. Y., next Wednesday and Thursday. The Onondagas have one of the most picturesque locations of any gun club in America and expect a big influx of shooting men.

* * *

Al Heritage has enlisted the aid of the genial Fred Quimby in managing his tournament to be held at Marion, N. J., on April 28, 29 and 30 and this of itself should make the affair a grand success. The first two days' shooting will be at bluerock targets and the third day at live birds. The live bird events are expected to attract an immense crowd of competitors.

* * *

There will be a grand two days' shooting tournament at Sardinia, N. Y., on April 21 and 22, at live birds and targets, American Shooting Association rules to govern, 1¼oz. shot allowed, 12-gauge gun. No shooters barred or handicapped. Sardinia is thirty miles south of Buffalo on W. N. Y. & P. R. R. All purses divided 40, 30, 20 and 10; $5 in gold will be given to the shooter making best average in all programme events, $2.50 to second. E. Andrews is the manager.

* * *

E. D. Fulford will shoot against J. A. R. Elliott, at Kansas City, Mo., on April 30, for possession of the American Field cup. Each man will shoot at 50 live pigeons, under London Gun Club rules. A great deal of money will change hands on the result, big odds being offered in favor of Elliott, who has never been beaten on his own grounds. Fulford is not in his old form, although he is confident of giving the Kansas City man a hot chase. Until he shoots better than he has for a month past he will not be "in it" with Elliott.

* * *

The three days' tournament to be held at Marion, N. J., on April 28, 29 and 30, under the management of Al. Heritage and W. Fred Quimby, is exciting considerable attention. Bluerocks will be used on the first two days and live pigeons on the third day. On the first day the events in order will be as follows: Ten bluerocks, $1 entry; 15, $1.50; 10, $1; 20, $2; 15, $1.50; 10, $1; 15, $1.50; 10, $1; 15, $1.50; 10, $1.50. Second day: Ten, $1; 15, $1.50; 20, $2; 25, $2.50; 10, $1; 15, $1.50; 10, $1; two-men teams, 15 targets per man, $4 entry per team; 10, $1; 10, $1. On the first day two prizes of $5 each will be presented to the heaviest and lightest man shooting in all programme events. On the second day $4 will be given for the best individual score in the team shoot and $3 for the second best score. A prize of $3 will be given for the best score in the 25 target event on the same day. One year's subscription to FOREST AND STREAM will be presented to the shooter who, taking part in all events during the two days, breaks an aggregate nearest to the figures contained in a sealed envelope held by Mr. Quimby. Saturday, the third day, will attract live-bird experts from all over the country. The events in order will be 4 birds, $4 entry; 8 birds, $6; 10 birds, $10; 7 birds, $5, and 8 birds, $6. A special prize of $5 will be given for the best position at the score in any of these events.

* * *

The return match at 100 live birds each for $150 a side between C. E. Morris and C. Detlefsen, to take place at West End, Coney Island, on April 21, is likely to draw a big crowd, owing to the close finish in the first match, when the score was 85 to 84 in favor of Morris. The battle was nip-and-tuck to the last round, when Detlefsen missed his bird.

* * *

Jersey crockery breakers will flock to New Brunswick tomorrow to take part in the third team contest of the New Jersey Trap-shooters' League. The Independent Gun Club, of Plainfield, won the two previous events, but whether it will repeat its victory to-morrow is an open question, as some of its strongest men will be at the Interstate Shoot, at Staunton, Va., until Thursday night, and may possibly be unable to reach New Brunrwick in time to shoot on the club team. However, there will be members enough on hand to pull out a strong aggregate. The entry list will probably show the names of ten or more teams, each comprised of five men. In addition to the team contest a choice programme of sweepstake events will be arranged by the Brunswick Gun Club. The team contest will begin promptly at 12 o'clock, noon, this to be preceded and followed by the sweepstakes. The traps will be in order for business at 9 o'clock A. M.

* * *

The Missouri State Fish and Game Protective Association has published an elaborate programme for its fifteenth annual convention and tournament, to be held at Kansas City, Mo., on May 2 to 7, inclusive. The convention will be held at the Midland Hotel, corner Seventh and Walnut streets, on Monday, May 2, and delegates are requested to assemble promptly at 8 P. M., in parlor S. Each club in the State is entitled to five delegates. All recognized clubs are invited to send delegates to this meeting and also to enter teams for the State shoot. The roll now shows the names of thirty-four clubs.

The programme of live bird events is one of the most attractive ever published, there being eleven regular events, numbers 1, 2, 4, 7, 9 and 10, each at ten live birds are open to the world. No. 8 at five pairs, 26yds. rise, ground traps is also open. In No. 10 the entrance is $10, and the association offers a guaranteed purse of $500 to be divided 50, 25, 20, 15 and 10 per cent. Event No. 3 is open to two-man teams from any association club, ten live birds per man, 28yds. rise, $15 entry per team. No. 5 is the State Association medal shoot, open only to one team of four men from each club. The previous year's medal winners will get $100 out of the pot. Each man shoots at fifteen live birds, the entry fee being $20 per team, birds extra. No. 6 is the St. Louis Gun Club medal shoot, for State Association members, ten birds per man, $10 entry; the first prize is a grand gold medal, the entry fees, less cost of birds to go to last previous winner. No. 11 is a special event, open to State Association members only, ten birds each, $5 entry; first prize being a Lefever hammerless gun, valued at $175, donated by the E. E. Menges Sporting Goods Company; second prize is a Parker hammerless gun, $80 grade, donated by J. F. Schmelzer & Sons; th rd prize, $50 cash, donated by Kinnan & Bennett; fourth prize, 50 per cent of entrance money; fifth prize, 50 per cent of entrance money. Inanimate targets will also be shot from two sets of five traps each.

* * *

An even half dozen shooters visited Weidenmayer's Park, Newark, N. J., on April 6 and had a pleasant afternoon's sport in shooting at bluerock targets and live pigeons. The premier event was at 10 bluerocks each, in which Hedden took first money along with Young, while second went to Kramer. In the second event Hedden and Young took first, and second was captured by Smith and Kramer. Then came a match at 10 live birds each between Schrafft and Smith in which each killed straight. They started to settle the tie with a miss and go home, which latter they were obliged to do when each had killed six birds, it being too dark to see. Previous to this Hedden and Smith had shot three miss and out events, the former winning on 5, 4 and 7 kills respectively.

* * *

To-morrow will be a big day on the grounds of the Colt Hammerless Gun Club (below Colt's Armory), Hartford, when the Connecticut Shooting Association will hold its fourth team contest for the Penrose trophy, donated by H. A. Penrose of the Standard Keystone Company. Clubs from every part of the State will send teams and great sport is anticipated. The teams will comprise three men each and each man will shoot at 30 keystone targets, under the rapid firing system.

* * *

The Independent Gun Club, of Plainfield, N. J., will hold a one day shoot on their grounds April 20, at 300 live birds and bluerocks (5 traps), commencing at 10 o'clock sharp; Charles Smith, Manager.

* * *

The Williamsport Rifle and Gun Club, not wishing to be placed on record as doing anything to detract attention from the Inter-State tournament at Pittsburgh the first week in May, have decided to hold their tournament on May 9, 10 and 11, the week following the Pittsburg tournament. This will catch all the shooters as they return from Pittsburg.

* * *

Mr. C. H. Mowry writes us that the Onondaga County Sportsmen's Club will hold a two day's tournament on their grounds, at Syracuse, N. Y., on April 20 and 21. Bluerock targets, with Paul North's expert traps and electric pull, will be used.

* * *

A shooting match at 100 clay birds took place at Red Bank, N. J., April 8, on the grounds of the Riverside Gun Club between John Cooper and James Cooper, Jr. John won, the score being 79 to 71.

C. H. TOWNSEND.

Club Elections.

Onondaga County Sportsmen's Club.—At the regular meeting of the Onondaga County Sportsmen's Club, Syracuse, N. Y., April 5, the following officers were elected: Pres., Charles H. Mowry; Vice-Pres., D. M. Lefever; Sec'y, John Steadman; Treas., Harry Ayling. Executive Committee, Wm. Prettie, Nicholas Ayers and A. C. Ginty.

Garfield Gun Club.—At the annual meeting of the Garfield Gun Club, held at the Grand Pacific Hotel, Chicago, Ill., the following officers were elected for the ensuing year: Pres., M. R. Bortree; Vice-Pres., F. S. Baird; Sec'y, Geo. H. Brown; Treas., Thos. P. Hicks. Board of Directors, M. R. Bortree, F. S. Baird, C. P. Richards, S. M. Meek, J. W. Meek, Thos. P. Hicks and Geo. H. Brown.—GEO. H. BROWN.

Old Reliable Rod and Gun Club.—The regular annual meeting of the Old Reliable Rod and Gun Club was held at the office of the secretary, 22 Monroe avenue, Detroit, April 1. The following officers were elected for the ensuing year: Pres., W. H. Smith; Vice-Pres., W. P. Hutchings; Sec'y-Treas., W. G. Woodworth. Directors, F. H. Beard, T. E. Reeder and R. C. M. Judge. Capt., F. C. Percival; Lieut., Harry Burt. The club holds weekly shoots at its grounds, adjoining the Exposition grounds, every Saturday afternoon.—F. H. BEARD.

Red Hook Gun Club.—Red Hook, N. Y., April 7.—At the annual meeting of the Red Hook Gun Club, held April 6, the following officers were elected for the ensuing year: Pres., Geo. H. Cramer; Sec., Robt. J. Carroll; Treas., John W. Bain.—ROBT. J. CARROLL, Sec'y.

Johnstown Gun Club.—Johnstown, N. Y.—At the annual meeting of the Johnstown Gun Club, April 4, the following officers were elected for 1892: Pres., Geo. Yost; 1st Vice-Pres., L. F. Northrup; 2d Vice-Pres., Wm. F. Chapman; 3d Vice-Pres., J. A. Bants; Sec., F. W. Partiss; Treas., Alvin Walrath; Executive Committee—L. F. Northrup; Lucian Hillabrandt, Jos. W. Fulton; Field Captain, Jas. Pierson; Lieutenant, John Timmons; Official Scorer, Wallace Yost.

Herron Hill Gun Club.—Pittsburgh, Pa., April 11.—At the annual meeting of the Herron Hill Gun Club the officers elected were: Pres., J. B. Jones; First Vice-Pres., Geo. Lowen; Second Vice-Pres., Chas. Richardson; Sec'y-Treas., Fred Pestre; Field Captain, A. H. King.—FRED PASTRE, Sec'y.

The four full-page pictures, Young Mountain Sheep, American Elk, Group of Elk, and FOREST AND STREAM'S Grizzly, form the "*Forest and Stream Animal Series*," handsomely printed on heavy paper suitable for framing. The set of four (in tube) will be sent for ten cents (stamps will do).

Work at the Long Island Traps.

DEXTER PARK, April 4.—The following scores were made at the monthly shoot of the Waverly Gun Club, each man shooting at 10 bluerocks for the club medal:

G Helmstead	1001101101— 6	D Hillmer	1001011100— 5
H Von Staden	0101101030— 4	M Schultz	1111010011— 7
W Schumacher	0110000000— 2	L Grane	1101010000— 4

Sweepstake, 3 live birds, then miss and out, $1 entrance, two moneys:

G Ellerhorst	111—3	H Von Staden	111—3
W Schumacher	111—3	L Grane	011—2
G Helmstead	111—3	M Schultz	111—3

Sweepstakes, 50 cents entrance, 6 bluerocks each, two moneys:

	1st.	2d.	3d.	4th.	5th.
H Von Staden	001011—3	110011—4	000010—1	100001—2	100100—2
O Hillmer	101110—4	000011—2			
F Helmstead	010111—4	011111—5	101010—3	111100—2	011001—3
L Grane	110100—6	000001—1	000111—3	001010—2	010100—2
W Schumacher	010111—4	010001—2	111000—3	000010—1	000010—1
M Schultz	111111—6	010101—3	111111—6	011000—2	010111—4
G Ellerhorst		000000—0			
E Wingert		100111—4	100001—2		

Dexter Park, April 5.—Acme Gun Club, monthly shoot for annual prizes, 20 bluerocks, averages to count:

C Dethloff	10010010100001000110 — 8
M Euler	01011000000011111100—10
Schottler	10010111000100000100 — 8
J Link	00010101100101111101—11
J Stuetzle	11011111001101011110—14
H Menckel	11000000111001011100— 9

Sweepstake, 5 live birds, $2 entrance, 25yds., one prize:

C Dethloff	22023—4
M Euler	20210—3
A Blinn	00121—3

Match at 10 live birds, 25yds., Long Island rule, second barrel on ground, $15 and the birds:

M Euler	0210120222—6
A Blinn	0111210122—8

Sweepstake, 10 bluerocks, $1 entry:

M Schottler	1100100111— 6
J Stuelzle	1101110011— 7
J Link	1100000100—3
M Euler	1100100100—5
S Short, Jr	0001000090—1

Woodlawn Park, April 6.—Fountain Gun Club's regular monthly shoot at 10 live birds, club handicap, Hurlingham rules, best averages to count for the six annual prizes. Fine weather and a good lot of birds. The strong south wind carried a good many birds out. C. E. Morris kept up his average with 10 straight, R. Phister, Jr., and Capt. Crammer the same. Score club shoot:

A Crook	1210011002— 6	Capt Crammer	1112121112—10

Referee, G. W. Greenville.

Dexter Park, April 8.—The monthly shoot of the Crescent Gun Club took place here today, each man shooting at 7 live birds in the prize contest. The birds were a poor lot. The weather was good. There were seven ties for second money, and by mutual consent these were shot off in a third bird sweep which followed, when C. Hubbel won the pot:

C Hubbel	1111012—6	W Gilman	1111121—7
C W Simmons	0211111—6	L Hopkins	2010222—5
J Picket	1121012—6	M Schultz	1112210—6

Chicago and Western Traps.

CHICAGO, April 9.—It should be a grand tournament at Grand Island, out in Nebraska, May 10-13 next. The "Grand Island Gun Club Journal" assures that fact, indeed. This is the most widely planned tournament programme ever issued in the West, and is thoroughly Western in plan and execution. Nowhere but west of the Missouri River is the growth of town pride so strong, and nowhere else is the art of town advertising so thoroughly understood. Grand Island deserves a boom in business as well as shooting matters, for her citizens and her shooters both are unmistakably of the right sort.

At the Grand Island tournament there will be $1,000 added to purses. Bluerocks and the speedy and effective Paul North electric pull will be used. Frank Parmalee will be there, and that is a guarantee of itself. Bryan Haywood, of Denver, champion of the Rocky Mountain Sportsmen's Association, will also be there, and I hope he may meet many citizens from the town of his nativity, for be it known, Mr. Haywood was born in Chicago.

Grand Island tournament will nicely follow Missouri State shoot, which takes place at Kansas City, May 2-7, under the management of the Kansas City and Independence Gun Clubs. This is the Missouri fifteenth annual. There are 34 clubs belonging to this old and strong sportsmen's association, which ranks among the most prominent in the West.

The Grinnell Gun Club, of Grinnell, Ia., holds a tournament April 26-28 Among other events is a 100 birds target race between C. W. Budd and Tom Marshall, the latter of Keithsburgh, Ill. Charlie Grim, of Clear Lake, Ia., will also shoot another race at 100 live birds.

Messrs. Rolla Heikes and Ed Bingham, of this city, and Mr. Geo. Rexroat, of Virginia, Ill., have departed for Dayton, O., and at this moment are probably smashing crockery records. Mr. Tom Marshall started for Dayton last Wednesday, intending to take in a day's shooting at Springfield first. As to the result of the Illinois—Ohio team race, all is conjecture, for it should be close. Mr. Heikes's team is one man short, Mr. A. J. Atwater, a very strong factor in any team, being unable to go to Dayton. For days before leaving, Mr. Heikes went through regular practice in preparation for this time race at targets, putting up the gun 125, 250 and 500 times in succession, gradually increasing the number daily. Any one who will try putting up a gun to the shoulder thus rapidly for even 100 times, will find it more of a task than he had anticipated, if he be new at it.

Mr. J. L. Wilcox, of this city, absent in the Northwest on business, shot a couple of matches to pass away time, which will be reported elsewhere, he winning one and tying one, the latter protested.

At St. Louis, last Monday, I met at Rawlings Bros.' wigwam in the corner a number of the shooters of that city, including our friend Col. Jack Winston. The latter informed me that while he was not shooting at all just now, he would some day, perhaps, come up and take another Chicago scalp or two.

Mr. J. G. Schaaf, another well known shooter of St. Louis, told me that himself and Mr. J. E. Haggerty would start the following evening for Chicago, and would shoot some individual and team races. Mr. Haggerty and Mr. Mussey, of this city, had previously had talk looking to a 100 bird race. Mr. Haggerty arrived at Chicago later in the week, but I was sorry not to see Mr. Schaaf's pleasant face also.

Mr. Haggerty wished to shoot under Hurlingham or Gun Club rules. These are not much used here. It was finally agreed to let Association rules govern, and a match was arranged between Mr. Haggerty and Mr. Mussey, to be shot Monday, April 11. In his practice here Mr. Haggerty ran 24 out of 27, I am told, and again in the wind of yesterday only got 12 out of 20. It is the match figures which count, however.

Pigeon shooting here is now nearly over for the season, so far as important matches are concerned. We hope for a good race Monday.

April 9, 7 P. M.—A telegram just received from Mr. Heikes, at Dayton, O., reads: "Broke 500 targets in 40 minutes and 40 seconds. Did not shoot team race. Illinois being short a man they refused to shoot my four men under any conditions."

Mr. Heikes's record at targets has been approached only once, and that by himself last spring. His time then on the 500 was 52 minutes and 58 seconds. The present incomparable performance will probably stand as the record for a long time. It was for money, a $250 wager being up. Mr. Heikes may now with all honor and justice be called the king of target breakers. The targets were bluerocks, and he used three Smith ejector guns.

I offer as news matter of especial importance the fact that Col. Jim Riley, of Kansas City, has raised a goatee, also that Mr. R. B. Wadsworth, of Chicago, was not elected alderman in the Thirty-second Ward at the late election. E. HOUGH.

Herron Hill Gun Club.

PITTSBURGH, Pa., April 11.—The shooting season was opened here by the old reliable Herron Hill Gun Club at their grounds on Bounot's Island with an old time handicap merchandise prize shoot with five prizes. Field Captain A. H. King was going to introduce the Inter-State Manufacturers' and Dealers' Association revised rules to break the boys in for their May 3, 4 and 5 shoot, but the great rain put a stop to it and the afternoon programme. The few shooters that came shot a few sweepstakes, 50 cents entry, and two moneys. The following scores will show where some of the boys got the stuff. The U. S. targets were used in all the sweeps and gave general satisfaction to the shooters. The club will give three practice and one prize and sweepstake shoots monthly during the shooting season.

At 15 bluerock targets: Williams 5, Runstein 4, Wolf 13, Turner 3, G. Watson 7, Walpole 11, J. P. Watson 11. RAVELRIGG.

Lakeside Gun Club.

GENEVA, N. Y., April 11.—I send herewith the scores made at the annual shoot of the Lakeside Gun Club, April 7. Our president, Mr. M. S. Markham, went to the front in great style. In the first contest Markham won first, Stacey, Jr. second, Scott and Banks third, Sheridan shot out Rogers for fourth. In the second contest Banks won first, Markham shot out Sheridan in a hot race for second, Scott and Musselman third, Dey fourth.

First contest, 9 singles and 3 pairs, donated prize, 50 cents entrance:

Rogers	111011111	10 11 10—12	
Sheridan	111101111	01 11 01—12	
Rolinson	100111101	11 11 01—11	
Stacey, Jr.	110111111	11 11 11—14	
Scott	101111111	11 01 11—13	
Reed	001101111	11 11 10—11	
Markham	111111111	11 11 11—15

Scott	0100010111— 5		

I. G. S.

Morris and Detlefsen's Close Match.

SOME good shooting at a good class of pigeons was seen at Woodlawn Park, Long Island, on April 7, in the match between C. B. Morris and C. Detlefsen. The conditions were 100 live birds each for a stake of $150 a side, modified Hurlingham rules to govern, Morris standing at 30 and Detlefsen at 28yds. The weather was favorable during the early part of the match but toward the finish a strong southeast wind made the birds fly viciously. The birds were a fairly good lot throughout, Morris having a majority of the hardest ones. He lost his fourteenth bird on account of his safety slipping. His eighteenth, a fast incomer, was hard hit with both barrels but it managed to cross the boundary before it gave up the ghost. After losing his twenty-fourth bird he made a straight run of twenty-four which left Detlefsen only one bird ahead. On the fifty-second round the match was a tie. Detlefsen then crept up, and on the seventy-fifth round led by two birds. Another tie was made on the seventy-eighth round. On the last round Detlefsen had to kill to tie but he missed a right-quarterer, thus giving Morris a hard fought race by one lonesome bird. Detlefsen made runs of 21, 15, 12, 11 and 10; Morris's best runs were 24, 11, 11 and 8. Jacob Pentz was referee; C. A. Dellar scorer. Morris had considerable trouble with his ammunition. He hit every bird he shot at and should have had more credits. He shot a C. C. Higham 10-bore gun weighing 9lbs. Detlefsen shot an L. C. Smith 12-bore gun weighing 7¾lbs. Detlefsen used his second barrel to kill forty-four times as against Morris' twenty-two times. Morris used Climax and Detlefsen used Kynoch shells. D. Monsees handled Morris and C. Plate looked after Detlefsen. Morris's judge was George Kleist, and Ben West did the judging for Detlefsen. John C. De Fraine was trap-puller. The time consumed in shooting the match was 1h. 50m. Below is the detailed score:

C E Morris	2212001110111011101001111—19
	1121012111121112122211—24
	2211011010021112122120—16
	1112121111c0111112112112—23—85
C Detlefsen	0022112122212212111210—22
	2222111110021222212112021—22
	2012121102212211222002—20
	1001212112122212201220—20—84

The return match under same conditions as above will be shot at West End, Coney Island on April 27, and Detlefsen will put forth a strong effort to turn the tables.

Mitchell vs. Brewer.

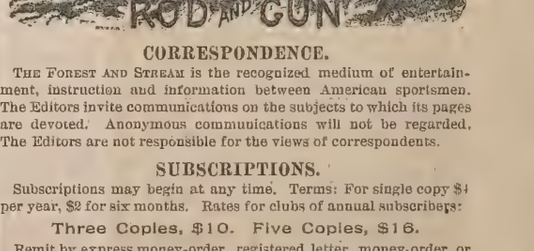
RICHMOND, Va., April 6.—About 200 sportsmen attended the shooting match at Island Park this afternoon between Captain John L. Brewer and Mr. W. T. Mitchell. Brewer was a strong favorite in the betting before the shooting commenced. He killed twenty-nine straight, missed his thirtieth, thirty-first, forty-fourth and forty-fifth birds. Mitchell missed his eleventh, twenty-first and twenty-second, killing twenty-eight straight. The match was at fifty birds each, five ground traps, 30yds. rise, modified Hurlingham rules.

Captain Brewer shot a 12-gauge hammerless ejector, weighing 7lbs. 10oz. His shells were loaded with 3½drs. of American wood powder and 1¼oz. of Tatams No. 7 chilled shot. Mitchell shot a Greener hammerless 12-gauge gun, weight 7lbs. 7oz. His shells were loaded with 3¼drs. of Schultze powder and 1¼oz. Le Roy's No. 7 chilled shot. The birds, taken as a lot, were good flyers, and and the scores in keeping with the reputations of the shooters.

Mr. Mitchell lived in this city for years, and is now located at Lynchs, Va. His reputation as a field shot is most enviable, and as a trap shot he ranks high.

Brewer used his second barrel thirty-four times, while Mitchell's second barrel was used only fifteen times. Brewer and Mitchell each lost one bird dead out of bounds. Brewer had 19 right-quarterers, 8 left-quarterers, 13 drivers, 7 incomers and 4 towerers. Mitchell had 14 right-quarterers, 6 left-quarterers, 13 drivers, 14 incomers and 3 towerers. Mitchell killed 47, missed 3. Brewer killed 46, missed 4.

Some Ohio Shooters.



CLEVELAND, O., April 4.—The attendance was not particularly large at the shoot for the Sipe & Sigler cup this afternoon, but the scores made were fairly good. Flick won the cup and carried it away in triumph. The following are the scores of the different contestants:

Tamblyn	0111111010011101110110111011011—21
White	1100110001111000011111010010010—16
Packard	0111110110011001111101111111111—23
Maygo	0111111001111111010111010100011—21
Allen	1011110110011111011011111111011—23
Watts	1111101011101101010100110011001—19
Hinde	0001101010101011111111111010—20
Flick	1111110010111111111111011111101—25
Alexander	0110111111110111001101011111—22

At the close of the shoot two team shoots were held with the following results:

Alex	12	11	Maygo	10	10
Flick	8	11	Tamblyn	12	12
Allen	7	8	Packard	9	7
Feller	8	12	Hinde	9	11
Watts	6—41	9—51	White	6—46	6—46

April 7.—Some of the best shooting seen in Cleveland for months was that this afternoon at the grounds of the East End Gun Club. It was an admirable day for work with the shot-gun, and those present "smashed" the Keystone targets in excellent manner. "J. I. C." won the first badge and North the second. The following scores were made at 30 birds: North 27, Sweetman 19, Brockway 18, Joe 22, Juna 23, Davis 17, Calhoun 24, Bloom 17, J. I. C. 28, Conger 16. Beard 14, Dubroy 16, Maygo 25, Jenks 22. Visitors: Bluerock 30, Gaylord 17, Elworthy 23, Redwing 24, Saffold 16, Tamblyn 26, Judge 13.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

Putney Rod and Gun Club.

THE members of the Putney Rod and Gun Club shot the following sweepstake matches on their grounds to-day. The weather was fine, although sufficient wind prevailed to vary the targets enough to make clean scores impossible. The first event was at 10 singles, 18yds. rise, thrown from three set traps:

Crosby	1001010101—5	W S Ayer	0110101100—5
Ayer	1101000011—5	Willard	0101100110—5
Stowell	0101001110—5	Marcy	0010111010—5
Warner	0101011010—5	Robertson	1000010011—4
Pember	0010011101—5		

Pember first, Marcy second.

Second event, 15 singles:

W E Ayer	110011011001101—9	Perry	110011101110100—9
Crosby	110110001101011—9	Willard	001101110101001—8
Underwood	001010111111001—9	Marcy	001100011001001—6

Ayer and Crosby first, Willard second, Marcy third.

Third event, 9 singles and 3 pairs doubles:

Perry	011101110 11 10 11—11	Underw'd	1100011101 10 01 10—8
Crosby	111101110 00 10 11—10	Ayer	011011001 00 11 10—8
Willard	010111011 10 11 00—9		

Fourth event, 10 singles, straightaways:

Ayer	1011111110—8	Underwood	0100001111—5
Willard	1110010011—7	Perry	0110001100—4
Marcy	0111110010—6	Everleth	0001100011—4

Fifth event, 20 singles, 3 angles:

Crosby	01010011111101101101—13	Willard	01001101110001111011—10
Underw'd	01101111010101010120—12	Warner	01110010011101100010—10
Ayer	10110100101101100101—11		

Keystone Targets at Springfield.

THE monthly prize shoot of the Union Gun Club, which took place at Springfield, N. J., on April 6, attracted a baker's dozen of members and some good shooting was done. The club shoot was at 25 Keystone targets, unknown angles; E. D. Miller, J. W. Smith and E. Collins shooting in Class A, all the others being in Class B. The scores were as below:

Class A.

Miller	1011111111111011011110100—19
Collins	1011000010111010000010101—12
J W Smith	1001101011111101011111011—18

Class B.

W N Drake	0011111111111111110110111—21
L T Terry	1011001000101100010010011—14
J Briant	0111111110111100101111110—19
D Terry	0001101010111011011011110—15
Brantingham	1101111111101011111111110—21
Manning	1101001010111010101110111—16
A Pudney	1111111010101010110110110—18
C Smith	1111101111001111011011111—20
A Sickly	0111101110111111101111111—21
W Sopher	1100111110001110011001101—16

The appended scores were made in a series of ten-target sweeps which followed, the entry being $1 in each:

No. 7 was at 5 pairs, and on the shoot-off for first money Van Dyke won from Hedden.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

F. W. F., White Creek, N. Y.—Will you please send me some good guide's name in North Carolina for hunting bear, deer, etc. If you know of any good locality for hunting bear please inform me and oblige a lover of your worthy FOREST AND STREAM. Ans. Bill Basnight, of Dare Island, Dare county, is reported to be a successful bear hunter. Or write to Chas. Hallock, New Berne, N. C., for the information desired.

THE SPRING SHOOT.

When you get a bird or beast from Florida or Hudson's Bay, the Chesapeake or Puget Sound, and want it mounted true to life, send it either skinned or in the flesh well salted, to

Ward's Natural Science Establishm't
ROCHESTER, N. Y.

Also all kinds of fish handsomely and correctly mounted. Write for booklet "Heads and Horns."

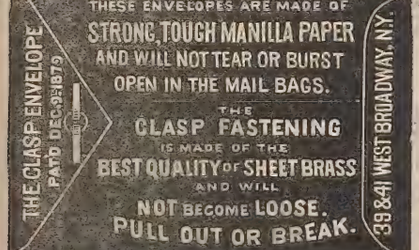
THE SALMON FISHER.

BY
CHARLES HALLOCK.

CONTENTS: Distribution of the Salmon. Life History of the Salmon. Technology of Salmon Fishing. Salmon Fishing in the Abstract. Luxury of Salmon Waters. Itinerary of the Salmon Rivers.

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 126 pages. Price $1.00
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.



ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

Athletes, Cyclists, Baseball and Football Players, Horse-back riders, Boxers and Oarsmen; when you want to ride, run, walk, row, skate or swim a long distance,
ANTI-STIFF

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting, and stimulating effect on all weak or stiff muscles and sinews. Quick in its action, cleanly and pleasant in use.
Rub it into the muscles every night for a fortnight, and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.
Price 20c. and 35c. per box.

For Sale.

ARABS FOR SALE.
Polo Ponies.

THE PEARL, entire, 7 years old, silver gray, under 14.1. This horse is of the highest caste, Aneeza Khailan. Very quiet both to ride and drive. **Price $500.**

THE GAZELLE, entire, 8 years old, gray, under 14.1. This horse is a well known polo pony, and played in the cavalry tournament at Hurlingham in 1890. He is also quiet in harness and a very fast trotter with fine action; good match to the above. **Price $500.** Both these ponies have been ridden and driven by ladies. Photographs and veterinary surgeon's certificate of soundness can be sent.

EXMOOR, entire, of the pure breed, 12 hands, brown with mealy muzzle, 6 yrs. old. A beautiful pony with long mane and tail. Bred by Sir Thomas Acland, who alone has the poor breed and on this account extremely valuable to pony breeders. **Price $250.**

The prices include delivery in Liverpool and clothing. Address
A. G. BURCHARDT ASHTON,
Blackerton, Dulverton, England.

BROOK TROUT.

QUINCY, Ill., Jan. 19, 1892.

Hon. John S. Cochennour, Olney, Ill.:
DEAR SIR—After two years' use of your "Little Daisy Minnow Trap" I find that it does its work well and satisfactorily. It is a source of great gratification to me to have fresh, lively minnows when I want them, and these your trap furnishes me. I can cheerfully recommend it to anglers as a valuable addition to their outfit.
Yours respectfully,
S. P. BARTLETT,
Sec'y Ill. State Fish Com.

Chas. Daly Hammerless Guns

We are constantly receiving unsolicited testimonials from gentlemen throughout the United States expressing pleasure in having a gun of this make. We mention a few here:

PORTLAND, Ore., April 6, 1892.

Messrs. Schoverling, Daly & Gales:

GENTLEMEN—The Diamond Daly I have been using about a year is in my opinion the finest gun made. I have shot over 30,000 rounds of shells loaded with nitro powders, and there is not the least wear. As to hard and close shooting it will hold its place with any make. I have tested it with Holland & Holland, Purdy and Greener's best guns, and have never had occasion to take a back seat from any of them. Cannot say too much in praise of the gun. I wish to get a very light gun, 12 bore, exactly same finish as mine. Can you make it and how long will it take? Very truly,

H. J. BURRELL.

NEW YORK, April 2, 1892.

Messrs. Schoverling, Daly & Gales:

The new gun is a daisy; shot my first match to-day, my score 18 out of 20, and the two fell dead out of bounds. I cannot say too much in favor of the gun, and everybody admires it very much. Very truly,

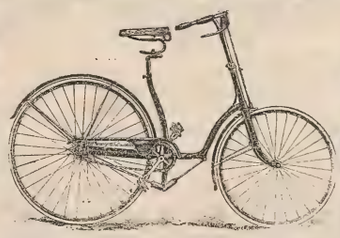
JOHN MEHL, JR.

RANGE VALLEY RANCH, Utah, Feb. 11, 1892.

Chas. Daly, Esq., New York:

DEAR SIR—I bought one of your three-barrel guns of Dr. Dart, of Salt Lake City. He was down here and had that gun. I wanted it so bad that he finally let me have it. I can assure you it does most excellent work, and is the best bear gun I have any knowledge of. Killed fourteen bear last fall with it. Very respectfully,

C. A. WING.



The above and many other testimonials are received almost daily by us from gentlemen who buy the

Charles Daly Hammerless or 3-Barrel Guns.

ROD AND GUN AND CAMERA.

THE Sportsman Tourist of to-day is an amateur photographer. The camera has a recognized place in the sportsman's outfit. The results of successful snapshots often constitute the most cherished mementoes of an outing.

From time to time we have been favored with highly interesting evidences of the skill and success of those who are no less adept with the camera than with rod and gun; and some of the views sent us have been reproduced by the marvelously faithful photo-engraving half-tone process for the benefit of our readers. Notable among these were the group of mule deer, in our "Boyhood Number," and on April 7 the happily successful picturing of the mountain goat. There must be a rich store of such photographs in the possession of those to whose notice this shall come. If they could be brought together for comparison the collection would supply abundant interest and study.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20. Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to the make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee, shortly to be announced. In making these awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Competition prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp Fire Flickering Vote." Such popular vote, however, will be quite distinct from the award by the committee.

APRIL ON THE MARSHES.

DOWN in the open marshes the lodges of the muskrats have gone adrift in the floods; but the unhoused inmates count this a light misfortune, since they may voyage again with heads above water, and go mate-seeking and food-gathering in sunshine and starlight, undimmed by roof of ice. As you see them cutting the smooth surface with long, swift arrowy wakes, coasting the low shore in quest of brown sweethearts and wives, whimpering their plaintive call, you can hardly imagine the clumsy body between that grim head and rudder-like tail capable of such graceful motion.

The painted wood drake swims above the submerged tree roots; a pair of dusky ducks splash to flight, with a raucous clamor, out of a sedgy cove at your approach; the thronging blackbirds shower liquid melody and hail of discord from the purple-budded maples above you. All around you, from the drift of floating and stranded water weeds, arises the dry, crackling croak of frogs, and from sunny pools the vibrant trill of toads.

From afar come the watery boom of a bittern, the song of a trapper and the hollow clang of his setting pole dropping athwart the gunwales of his craft, the distant boom of a gun and the echoes rebounding from shore to shore.

The grateful odor of the warming earth comes to your nostrils; to your ears, from every side, the sounds of spring; and yet you listen for fuller confirmation of its presence in the long-drawn wail of the plover and the rollicking melody of the bobolink.

YOU ARE INTERESTED.

LEGISLATION with regard to the National Park appears to be in a deplorable condition. Messrs. Carey and Warren, Senators from Wyoming, within whose boundaries the reservation lies, care little for the Park, but a great deal for making themselves popular with their constituents. The former has introduced a bill for its protection, a half-way measure which can do little good. Mr. Warren proposes to throw open a good part of the recently established forest preserve to the railways, the tie cutters and the prospectors. Neither of the gentlemen seems as yet to realize that Wyoming has become a State. They still pursue the petty methods of a Territory and of a newly settled country. Senator Vest, who in the past has done such yeoman service for the Park, appears to have withdrawn from the struggle, and his bill is buried—no one knows where.

In the House things are, if possible, in a worse condition than in the Senate. The Dixon bill, which is the same as Senator Vest's, has made no progress whatever. The Committee on Public Lands has favorably reported the iniquitous measure giving the right of way to the Montana Mineral Railway to pass through the Park. No one appears to take the slightest interest in the subject, and it is quite likely that by means of selfish bargains and deals some of the bad bills affecting the Park may be passed.

It is often said that no measure can pass Congress unless it is backed by money or politics, and the course of the House in regard to the Yellowstone Park bills seems to justify this statement. Behind the Montana Mineral Railway there are a lobby and money. Behind the Park there is neither a lobby nor money—only the people.

Every citizen of this country is a part owner of the National Park, and these bills which threaten its integrity, threaten the rights of all of us. It is the duty of every citizen to protest against these proposed outrages and to let his representative in Congress know that his course with regard to the Park will be watched.

THE ILLINOIS LEAGUE.

IN behalf of the angling fraternity of America, we warmly and heartily congratulate the citizens of Illinois upon the formation of the Illinois State Fish League, the official report of which is contained in our present issue. In plan, purpose, scope and organization the League is admirable. It has before it a work of importance and value beyond estimate. The men who have united for accomplishing this work are men of brains, enthusiasm and ability. They have gone about this enterprise in a way which is full of good portent. The League gives every promise of proving an active, intelligent and constant factor in securing to the people of Illinois those benefits which the fish laws should insure, and will insure if enforced.

The League should have the earnest and active support of the entire community; and in particular of each one of the many hundreds of individuals to whom the officers send this number of the FOREST AND STREAM as their authorized announcement and report.

SNAP SHOTS.

ON April 13 the U. S. Fish Commission sent from its Washington headquarters 14,000 fry of the Von Behr or brown trout to small tributaries of Rock Creek, District of Columbia, within the boundaries of the proposed National Park. Several thousand of the trout were hatched in Washington from imported German eggs, and the rest were from eggs collected at Northville, Mich. Mr. Donnelly, who superintended the planting, says the first lot were placed about one mile west of Brightwood, and from thence two miles along the course of the stream in little tributaries, free from other fish. He found plenty of holes, about two feet deep, in which the fry settled very comfortably. The trout did not "bank" (or huddle together) much, and soon began to move up stream. As the waters are strictly protected and few fish are found native in the localities stocked, it is thought that good results may follow this experimental planting.

When the Illinois State Sportsmen's Association adopted a new set of trap shooting rules, the full text was wired to FOREST AND STREAM, and published in this journal in advance of all others. To-day we give the official report of the new Illinois Fish League, and this is sent by the League to many hundreds of people in that State. Thus again it is demonstrated that the FOREST AND STREAM is for the West, as well as for the East, the newspaper that gives the news. For that matter, the same thing is demonstrated every week in the year, and so far as the West is concerned, has been the rule ever since the acquisition of our bright Chicago staff correspondent. Whether an event takes place in Massachusetts or Illinois or Louisiana, *Always look for* FOREST AND STREAM'S *report.*

At this writing (Wednesday noon) the New York game bill has just been passed. Orange and Sullivan counties have been added to the list of those in which woodcock shooting will open Aug. 1. Erie, Chautauqua, Cattaraugus and Orleans counties have been exempted from the snipe law. Protection has been removed from hawks. Taking it all in all, the measure is a disgraceful mess, in some sections unintelligible, and as Mr. Gavitt says in another column, it cannot longer be considered the Codification Commission's bill nor the bill indorsed by the sportsmen of the State at Syracuse.

Whatever may be the effect of the sale of black bass in close time in Massachusetts, it is certain that the proposed license to sell cultivated brook trout all the year around will work disastrously to the supply of wild fish. No one is better qualified to judge of this than Mr. Eugene G. Blackford, of Fulton Market, in this city, and Mr. Blackford expresses the opinion that the practical working of the law would be to encourage the sale of wild trout in close season. It would in effect, says Mr. Blackford, take away protection from the wild fish.

The practical working of a law which permits rabbit shooting in the close season for game birds is stated by a Missouri correspondent in our game columns. In that State, under cover of a pretense of rabbit hunting, pot-hunters destroy vast numbers of quail. This is just what may be expected under the proposed New York law.

The Sportsman Tourist.

AN EXPERIENCE AT VERMILLION.—II.

MEMORANDA OF THE EXPEDITION OF H. W. AND T. TO VERMILLION LAKE, MINNESOTA.

(*Concluded from Page 346.*)

SEPTEMBER 8, Wednesday.—The question of moving from our present camp and pitching our tents at the further end of the lake, has been more or less actively discussed for the last three days. We are all agreed that we want to emigrate from the Three Pines, but as our two boats will not carry all our "chuck" it is apparent that a third canoe and man must be hired. Jessmore affirms that by going to Sucker Point, where the Indian village is situated, we can certainly hire a canoe and an Indian. Evidently that is the best thing, but no one of us is inclined to make the effort.

After breakfast we made a fire at some distance in the forest, so as to be sheltered from the wind which was sweeping through the camp, and seated about the logs we discussed the situation. Sam, who is always the emergency man of the party, finally put Harvey and me to shame by volunteering to row Jessmore to Sucker Point, and to come back with the necessary help. Accordingly he started off in the cedar, with Jessmore, and Harvey and I watched them till they turned in the Narrows. It was about ten o'clock when Sam pushed off, and he undertook to be back by one o'clock. I took my little rifle and set off to explore the bay lying between us and the Trout Lake portage. I succeeded in half circling the bend, but with great tribulation and labor, the forest being altogether too dense to permit a free step forward. Every foot of the path had to be hewed out with the hunting knife. Soon returning to camp, I lay in the tent smoking, and casting an occasional eye over the lake to see if peradventure Sam's returning canoe had passed the Narrows. One o'clock came and passed into the gulf of time, and no Sam. Harvey and I got up a small dinner and took a smoke. The wind still blew fiercely from the west, confining us to the land, and so cutting off our fishing. I again took my rifle and wandered out into the woods, plying hatchet and knife until wearied. A small log hut stands on the shore about a hundred yards from our camp, and back of it a bold ledge of rocks makes a partial clearing in the forest. I mounted the rock. I sat there for an hour, wishing for a partridge, or bear, or anything, and occasionally invoking the Lord to have an eye to the safety of my canoe, and so far as might consist with that object, to the safety of its crew also.

About 5 o'clock a couple of Indians landed at our camp, and looked at us in mute interrogation for fifteen minutes. They could not talk English and my store of Chippewa was very limited. I gave one of them a bad half dollar and they went away in high delight. No Sam. "No sign from day to day." The wind went down and the waves sunk into noiseless ripples. Six o'clock came, and then Harvey and I concluded that Sam had gone to Tower and would probably stay there over night. Under that impression we got supper, such as it was, lit the camp-fire before the tents, and sat down to wear out the evening. It was a perfectly still night, but the woods were vocal with the crying of the owls and the smooth water plashed with the constant leaping of the fish, who had probably heard of our proposed departure and took that mode of manifesting the joyful emotions which the thought of it excited within them. No Sam. It was dark now. We could dimly trace the adjacent shore line, but no more. Harvey thought he heard a lynx crying in the wood (I don't believe he knew a lynx from a tree toad), and the thought reminded him to discourse on wildcats and things of that ilk. I am not naturally a very nervous man, but I unlaced, unstrapped, untied, unwrapped and finally exhumed my big Marlin rifle from its case, and slipping four express cartridges into the magazine laid it alongside of my blanket. Nine o'clock. I took a final squint down the lake, listened for the rattle of oarlocks, saw nothing, heard nothing, and turned in. I was sleeping the sleep such as only just men know, when I was awakened therefrom by a grinding and scraping at the landing place, and then Harvey began to talk to somebody and Sam answered, "We've got 'em," and then Sam, Jessmore and two Indians filed past the open tent. I sunk back on my browse pillow and went to sleep.

SAM'S ACCOUNT OF HIS EXPEDITION TO SUCKER POINT.

It had been our purpose to spend not more than a week in camp at the east end of the lake, and at the expiration of that time to embark for the mouth of the Vermillion, or the extreme west end of the lake. But before this change of base could be effected it was necessary to secure the assistance of some *voyageur*. We had fondly hoped to hail some passing Indian, but the heart becoming sick with this vain hope, it came about that the guide and the Unshaven undertook the expedition hereinafter related. We started from our little point at about 9:30 o'clock, Wednesday the 7th, the Unshaven at the oars and the guide in the stern where his strength and skill would be most effective in keeping our little craft head on to the seas which were rolling with some force even in our little bay, a disposition the wisdom of which was proven by our after experience. We first felt the force of the gale rounding Pine Island to the south. Here our boat danced like a cockle, and buffeted and tossed threaded its way among the many islands in this portion of the lake, propelled by the laboring oars of the Unshaven and kept from the rocks and surf by the matchless steering of the guide. To the inexperience of the Unshaven every wave seemed an impending fate and the countenance of the guide, anxious and serious, and his energetic commands to him who sat at the oars did not serve to brighten the situation. The writer is thus minute as to the perils of the journey, not from any desire to figure as a hero, for as a truth he looked and felt anything but that, but with the wish to emphasize a piece of advice to those who may voyage upon this lake with a high wind. The advice is this: Place the man of nerve, strength and experience at the tiller, and he will fetch you through; otherwise, to say the least, you will get a very uncomfortable wetting.

We made our first point, Birch Point, without mishap, and stepped upon the shore with a feeling of devout thankfulness, on the part of the Unshaven at any rate, and even the guide allowed some expressions of satisfaction to escape him, and indulged in some strong expressions of admiration for "the cedar," culminating in the solemn assertion that she was "a dandy." Birch Point, the whilom abode of some pioneer, whose shadowy existence had been confindently asserted by the guide, was utterly deserted, a little hut, a stable of hewn logs, and a forlorn clearing covered with turnips, afforded us little consolation. It being near noon we two made a sumptuous meal upon a large and juicy turnip, and smoked a meditating pipe as we looked out over the tossing lake, at the sun-kissed roofs and wigwams upon Sucker Point, two and half miles distant. It was with rather a forlorn smile that the Unshaven mentally perpetrated the obvious pun upon Sucker Point. However, there was no succor to be had where we were, so at 12:30 we pushed off and were soon struggling with the waves, that ran higher here than at any time in the entire trip. We reached Sucker Point at 1:30, having shipped no water to speak of, and with some feeling of exhilaration, now that the dandy qualities of the boat were approved, and the capabilities of her crew to man her were beyond a doubt. It should have been stated that we expected what assistance we needed at Birch Point, and failing that, to push on to Sucker Point to the reservation and hire a couple of Indians. But having reached Sucker Point, our first and only thought was dinner, the sustaining powers of turnip having been exhausted by the last stretch. So dinner we had, and herein saw the mark, a "boiled dinner," of which the Unshaven partook with a gusto such as never seasons a dinner at the club. And the surroundings—well, they were in their way unusual. A fairly clean log farmhouse of one room set in a small clearing in the edge of the forest. For table companions, a squaw, three half-breed boys, a comely half-breed girl, herself a mother with babe in her arms. So we sat and ate and exchanged the compliments of the season and the frontier, and coin of the realm for the best this queer hostess could provide. After dinner we undertook the business in hand by going over to the Reservation. After an inspection of the same, its huts, its wigwams, its dogs, its inhabitants, its and their dirt and vermin, we engaged the services of two likely bucks, stipulating that they should run back with us in the evening if the wind went down, and so be ready for an early start next morning.

We then made another circuit of the points of interest on the Reservation. These children of the forest can have civilization it they will but reach out and take it, for the Government provides it at the rate of $1,800 per annum; a blacksmith with a salary of $600, and whose forge never smokes, is theoretically always at hand to teach them the anvil chorus it is presumed, for in what other capacity he could employ his art for the edification of these savages the Unshaven could not see. It seems to strike the said blacksmith in the same light, for he spends his time cruising about the woods and engaging in other unprofessional ways the abundant leisure he commands. The farmer who is detailed to teach agriculture may employ his time, and even his $600 a year in writing bucolics, for the red man does not take more kindly to farming than to blacksmithing. The school teacher to our mind is the only one who earns the salary paid by the Government, for he must daily confront his little row of benches, whether they be full or empty, whether there be many or few to catch words of wisdom that are ever ready to drop from his lips. When we visited him it was half after 2 o'clock. Two stoical urchins with shock hair, beady eyes, and the brows of murderers sat upon the hard forms, ready to spell scalp, tomahawk, assassination and words of that ilk. The school teacher said he had rung the bell at 1 o'clock, and at 2:30 these two were all that had answered his summons, doubtless twenty or thirty had received a material propulsion in the direction of the school house, but Dame Nature had been too strong and they had wandered off into the woods there to learn the secrets she alone could teach them.

The rest of the day's expedition is quickly told. The wind held on until after 6 o'clock, compelling us to again avail ourselves of Mrs. Donaldson's hospitality for our supper, Mrs. Donaldson being our squaw hostess of that day noon.

At 8, the wind having spent its force, and the lake stilled as if by magic, we and our two Indians accompanying us in three birchs held our course under the stars on our return trip, reaching camp at 10:30 P. M.

NARRATIVE RESUMED BY H. C. T.

Thursday, Sept. 8.—All hands fell to before breakfast to pack up preparatory to striking camp. All our truck to the last piece of string was loaded in the boats, and by 8 o'clock we were under way. The two Indians (Louis Roy and a common "Nitche") carried in their canoe the provision boxes, camp kettles and tents. Jessmore in his canoe carried my camp chest, our individual packs and the tent poles. Sam, Harvey and myself occupied my cedar canoe, and carried the guns. As the boats pushed off, Harvey took a hasty shot at them through the camera. The wind was adverse, very strongly adverse, but by shooting from island to island and keeping close under their lee we made good progress. At the broad traverse of Frazer's Bay we did strike some extremely high seas, but managed to weather them, and after a strong and laborious pull, ran under the lee of an island where I yielded the oars to Harvey, taking my seat amidship. We now entered Muskrat Channel, a narrow arm of the lake, and henceforward had a smooth sea and no wind. We passed the outlet of the Vermillion River, and shortly after encountered a fleet of fourteen birch canoes full of Indians, squaws and pappooses on their way to Tower. I hastily got on shore, set up the camera and arranged to shoot them as they passed by, but Jessmore recognized the chief, "Ouagumaup" or "Wakemup," and prevailed on him to stop the fleet for an instant. I took the shot, but have my doubts as to the success of the plate. Leaving the Indians, we ran across the bay and, landing on the opposite point, got up a hasty dinner and took a smoke. At 1:30 we were afloat once more, and paddled without incident until about 5 o'clock, when we sighted the huts of Ouagumaup, the invincible Sagamore whom we had met on our way. A storm was rolling up from the west and we ran the boats ashore, unloaded and piled the baggage on the beach, covered it with a tent fly, and got into the lodge of Ouagumaup just as the rain fell. There were three or four wigwams round about and various outbuildings of an unknown order of architecture, each of which contained a full complement of squaws, pappooses and dogs. The bucks were invisible; probably the fleet we had passed contained the warriors of the village. Ouagumaup's lodge was a pretentious log hut of one story, containing two bunks, a rusty stove, several squaws, two pappooses, two dogs, and a most vile smell, both "ancient and fish-like." We marched in and took possession without ceremony. One of our Indians, Louis Roy, did the honors of the lodge, by inverting a pail and handing it to me for a seat. I took it and immediately lit my pipe to counteract the evil spirits of the air. The father of the chief Ouagumaup was in the lodge with us, holding conversation with Jessmore on the subject of tobacco and how much it took to make a pipeful. He was a strongly-marked old villain, about 100 years old, so Jessmore said. His hair, slightly tinged with gray, was parted in the middle and fell on his shoulders. The rain delayed us about half an hour, when we again plied the oar and paddle. Our contemplated camping ground was only a mile distant, and by 6 o'clock we had landed and were busy with the tents. It did not take long to get our quarters arranged for the night, and about 8:30 I turned in and slept.

Friday, Sept. 9.—We have christened this camp "Camp Ouagumaup" in deference to the old chief on the opposite point. It is situated at the extreme western end of the lake on a point running out from the main shore in a southeasterly direction, making two bays, the smaller or southern of which our tents overlook. The land is high, dry and with little underbush. Evidently it has been a favorite camping ground of the Indians, for we have already found innumerable rags and tatters, skin frames and the like debris. Three lodge frames are standing within a stone's throw of our tents, and there is a heap of old snowshoes and toboggans in the same radius.

It did not take long to put our camp in complete order and dismiss our Indians. Jessmore and Sam took a turn through the woods, and returning about noon brought one small partridge. They report that at the foot of the bay on the other side of the point is a log house full of lumbering supplies, and suggested that an expedition be made there for hay and lumber. In the afternoon Sam and I rowed around there and made entrance into the house. We found a lot of tin-ware, knives and forks, some boards, a bench and an axe, all which we loaded into the boat together with two or three armsful of hay for our beds, and carried them back to camp. On our way back we threw out a trolling line and took a couple of turns about the bay and succeeded in hooking two pickerel and one wall-eyed pike. The latter was a magnificent fish and turned the scale at 3½lbs. We had him and the partridge for supper. The pull at the oars yesterday seems to have strained my wrist, for the muscles and tendons even to the finger points are stiff and sore. The other boys appear none the worse for the twenty-five mile voyage. The weather is growing colder, and our campfire grows larger every night.

Saturday, Sept. 10.—The wind follows us wherever we camp. At the camp of the Three Pines it swept across our point with such a keen fang that we had to take refuge in the depth of the forest to get peace and quietness. Here it still sweeps us, and takes away half the pleasure of our camp-fire. Harvey and I pulled around the point to the storehouse, which we visited yesterday, and Sam walked across to meet us there. Harvey took his gun and went up the creek, Sam esconced himself on a convenient rock and made a sketch of the storehouse, and after loading up the boat with hay and a table from the storehouse, I went hunting for autumn leaves which are fast becoming brilliant and giving color to the woods. Sam succeeded in bagging a plump partridge on the way over, and that was the extent of our game. Our trolling line yielded nothing. The wind still confines us to the point. We have been waiting for a chance to get over to the Indian village, but the pull is too hard; so we loaf about the tents and amuse ourselves as best we may. Harvey again tried the woods, but with no success. Jessmore borrowed my little rifle and took a tramp off somewhere, but returned empty-handed. Sam paddled across the bay and took a sketch of the camp. I did nothing until evening came, when I refilled the plate-holders and packed away the exposed plates.

Sunday, Sept. 11.—More wind. From our point, looking out on the lake, we could see the whitecaps tossing, and though the sky was clear the wind howled a vigorous and prolonged howl that meant no expedition to Ouagumaup to-day. I took my little rifle and wandered off into the woods, roused a duck in a sheltered cove, sent a shot after it, found a warm rock, sat down and smoked until noon. I suppose I am no better than a camp loafer, for a little operation like that suits me far better than tramping through brush after partridges, although in theory the latter is much pleasanter. I have come out here equipped with all the costly paraphernalia of a sportsman, ready for any kind of hunting or fishing, but little good does my outfit do me; and in fact I had a sneaking suspicion before I started that it was "great cry and little wool," as the farmer said to the billy goat who objected to being sheared. Toward noon, as the sun got around so as to light up our camp ground, I took a photograph of the lodge frames of the old wigwams, and later in the afternoon Harvey and I took two views of the camp. I put in most of the afternoon on reading a novel which I borrowed from Sam—"Mr. Barnes of New York." Sam and Harvey rowed the cedar around the point and into the other bay, where they caught two pickerel. Harvey also shot an owl in the meadow near the creek and brought it into camp.

Monday, Sept. 12.—Another day of wind, this time accompanied by a cold rain. There was but little to do but to lie around the camp. Harvey and Sam took a range into the woods with no results, and later in the morning I did the same with equal success. In the afternoon, in spite of the tempest, Harvey and I pulled the cedar around the bay, industriously dragging a trolling line, but caught nothing but a few lilypads. The rain fell on us about 5 o'clock. Jessmore cooked a hasty supper and hurried it into his tent, where he ate it with such appetite as our increasing discomfort would allow. As it was impossible to sit about the camp-fire, we soon sought our blankets. I availed myself of the close company which the unpleasantness of the day compelled to extract from Jessmore some description of the life led by the "cruisers," to which class he belonged. I knew in general what a cruiser was and what he did, but I never before had it set out in detail by one of them.

A cruiser is the modern representative of the *coureur du bois*, or rangers of the wood, who roamed these

wilds during the days Duluth and LaVerendrye were lords of the forest and the Fleur-de lys and the French fur traders were dominant in the New World; but with this difference, the *coureurs du bois* were outlaws. The cruiser is a reputable citizen. The business of the cruiser is to look up land either for timber or mineral. They call no man master, but hire themselves for a time to any one who stands in need of their service. A man has bought, or contemplates buying, a certain section of land in a certain town and range, and he wants to know what there is on it, how much timber, etc. It is an easy thing for the owner to mark the spot on the map, but he would fail utterly were he to attempt to identify it in the heart of the forest and find the four stakes planted, perhaps, long ago by the Government surveyors to identify its corners. If the owner be a wise man he does not undertake the journey, but retains a cruiser to do it for him. The cruiser is a man (generally of American or English descent) educated, but hardened to wonderful endurance by a life of constant tramping in the forests. He receives his instructions and starts out. Summer or winter, it makes no difference to him. Sometimes he travels alone, but more generally has a partner. If the expedition be in summer they provide themselves with a light and well pitched birch canoe, laden with their "chuck," or provisions, generally flour, bacon and canned goods, coffee, tea, etc., their blankets, kettles and frying-pans, their axes and a small A-tent, and push off. Their course leads them through lakes and over streams, with frequent portages, until they reach the vicinity of the *locus in quo*. When they have paddled as near as water communication permits they land, cache their canoe and such provisions as they cannot carry, stow the remainder in their pack-bags, carried on their backs by a broad strap passing around the foreheads, and axe in hand set out through the wood, steering by compass to the desired spot, which they identify by finding (often after most laborious search) the corner stakes placed by the surveyors and on which are marked the town, range and section.

Now the real business of the journey commences. Every foot of the land is paced over, every stick of timber carefully noted, and an accurate estimate made of the amount of lumber in feet, contained on the tract. This done, their work is accomplished and they return. The winter journey is more arduous. The lakes and rivers are now ice-bound, and the birch canoe is exchanged for the toboggan and snowshoe. Over the frozen lakes they drag their toboggan loaded with their supplies, until the forest is again reached. The cruiser now makes up a pack, weighing from sixty to eighty pounds, containing the small tent, one kettle, one frying-pan, his blankets and provisions. His companion, if he has one, is similarly weighted, and together they pass into the woods. Journeying through the tangled forests is terribly exhausting work, and especially when one is weighted with sixty pounds of baggage, and is on snowshoes. The underbrush is almost impenetrable; the windfalls and accumulations of fallen trees are encountered at nearly every step. A fall is a matter of more consequence than a stumble in summer time, for the unhappy cruiser before he can recover himself, must slip his pack, and perhaps his snowshoes, before he can struggle to his feet. In this way the march is made until about 4 o'clock in the afternoon, at which time the forest is already gloomy in the shadow of approaching night. The cruiser now selects a suitable spot for a camp, throws down his pack and having cleared away the snow builds a large and generous fire. He cooks his meal, smokes his pipe, and then removes the fire to another place, pitches his tent over its former bed, and rolled in his blankets goes to sleep on the warm ashes. Ordinarily a cruiser will travel from twelve to sixteen miles a day, either in summer or winter, and as that distance is small even to the ordinarily vigorous product of city life, one will begin to appreciate the difficulties which reduce the travel of these men of iron endurance to so small a space. The pay of a cruiser varies from a bare living to about $3,000 a year, depending, as in other walks of life, on each man's skill, intelligence and industry. From $3 to $5 a day is the usual range of wages.

Tuesday, Sept. 13.—We are still bothered with this wretched wind. It is blowing from the west to-day, and our bay is comparatively calm. We trolled it but with no avail. All of us took our usual tramps about the woods and met with the usual success. I am getting disgusted, that is to say, weary with hope deferred. I have been waiting three days for a chance to go over to Ouagumaup and photograph the squaws, and dicker for moccasins, and here I am yet. I devote my time to sitting about the fire, or gathering autumn leaves. Harvey and Jessmore took a cruise in a new direction in the afternoon but returned about 3 o'clock, gameless. Then Sam and I took a walk across the point, and over to a little lake which lies about a mile up the stream entering the bay on the northern side of our point. We saw nothing in the whole distance. The wind still howls with no prospect of abatement.

Wednesday, Sept. 14.—A cold night and raw morning. We did nothing but hug the fire, and make an occasional tramp into the woods for partridges and got none. At dinner time we were visited by two Indians who hung around after the manner of their race, in silent expectation of good to come. We bought a whitefish from them and gave them a little tobacco and something to eat, wherewith they appeared satisfied and soon departed. Jessmore took a turn in the woods and brought in two partridges. In the evening, while we were sitting about the first pipe after supper, we received a call from Ouagumaup who with one of his retainers had paddled across from his village. I gave the chief a cigar, and Jessmore on demand furnished some supper to his man. We gathered about the fire and discoursed with the sachem on divers subjects, principally game. We dickered with him for five pairs of beaded moccasins and one pair of heavy moccasins, giving him the measure of the same. He seemed to grasp the idea and promised to set his squaws to work as soon as he returned. Sam also suggested that he send us a whitefish for breakfast, and this the chief, liar that he is, agreed to do. As he was about to leave he turned to Jessmore and demanded to know who was the boss, "Oh, they are all bosses," says Jessmore.

Thursday, Sept. 15.—This was the first really good day we have had at this camp. No wind, bright sun, and a warm balmy air. It gave us an opportunity to go fishing, and Sam and I pulled around to the storehouse bay and along the shore into another bay, but caught nothing in the whole distance, whereat, disgusted, we returned to camp.

Harvey and Jessmore had taken the birch and paddled along the shore in the opposite direction, landed and followed a trail for partridges. They returned soon after us, empty handed as ourselves. Ouagumaup called on us again, bringing two good-sized fish, a pike and a whitefish, and one of his crew brought some cranberries which we bought of him.

In the afternoon Sam and Harvey paddled over to the bay next south of us, and took to the woods, as usual, after partridges. I loitered about the camp. I happened to stroll along the shore a little distance from our tents and was searching the opposite shores with a spy glass when I saw a bear come out of the woods on our point, and lazily shamble along the shore. He was rather more than half a mile off. I came back to the tent, hastily got my Marlin, and started down the point. But I was too unskillful a hunter to come up with bruin or get sight of him again; he had vanished in the woods. I hunted through the woods for the rest of the afternoon, but never even found a track. Toward suppertime Sam and Harvey returned with one partridge.

Friday, Sept. 16.—Another day of cold wind. We passed the morning about the camp-fire, cowering under a wind brake of cedar boughs. The Indians at Ouagumaup's village hold a squaw dance to-day, this being one of their days of worship. We heard their tom-tom beating, and after dinner all four of us manned our canoes and went over there. I was at the oars in my cedar canoe, and had a pretty hard pull to get across the bay. As we approached the lodges we saw the Indians gathered together in a rather spacious construction of cedar poles, looking like a huge barrel cut in two lengthwise. As we gained the door the dancing ceased, and the performers huddled along the sides of a lodge, where they received some sort of refreshment from the hands of the master of ceremonies. While this was going on I began to set up my camera, and this proceeding appeared to affect their appetite, for immediately the medicine man came out, and with a stately wave of his hand remarked "Kawain" and some other Chippewa which I could not understand, but the purport of which was manifestly to clear out. Ouagumaup also came out, and saying that he was not the boss of this occasion, confirmed the command of the high priest. Accordingly, Harvey and I went down among the houses and photographed one of the wigwams to the great terror of the aquaws who had taken refuge therein. Returning to the dance house, Harvey with the camera dismounted and under his arm, cocked and primed, stood in the doorway and dropped the shutter on the worshippers before they were aware of what was up. We stayed there and watched the dance some time, although it was not especially interesting, and five minutes were enough to see it in all its phases. There were some twenty or thirty dancers, bucks, squaws and young boys and girls of all ages, most of them painted with red and blue paint, mere daubs, no design being apparent. They danced, or rather hopped, slowly around the lodge, keeping time to the beating of the drum and the low monotonous howling of the medicine man at the other end. Ouagumaup did not participate, but his father did. After the dance was concluded we got Ouagumaup, his father, mother, son and grandson in a group near the door of the lodge and I exposed a plate on them to the admiration and delight of all present. Then we returned.

Saturday, Sept. 17.—This is the last day of our stay. The wind had partially gone down and we were not obliged to come under the wind break. After an extraordinarily good breakfast, Sam, Harvey and myself paddled across the bay and along the southern shore until we reached a trail said to extend to the Little Fork River. We landed and followed the trail, Sam and Harvey ahead, keeping an eye out for partridges, or anything else that might pass for game, and I brought up the rear with the camera. Never have I seen such beautiful woods as we passed through that morning; such vivid tints of color, the sumac with its gory trophies, the birch yellow as autumnal sun-light, and the maples that literally "blush like a banner bathed in slaughter." The trail led over a hill and down into a valley, where it ended in a marsh. I set up the camera on the hill and exposed several plates at a claim shanty, while the others ranged the woods. An hour or more passed and they returned as usual gameless, and we returned to our boat and pulled back to camp. I put in the afternoon in gathering together my various traps and packing the same so far as might be in preparation for our departure. Of tobacco, there are only three small pieces of plug in camp, and though Sam and I are well supplied with cigars they do not, for me, supply the place of a pipe. As a consequence I am measuring my smokes with the utmost care, and cutting the precious plug with harassing economy. This being on short commons in tobacco, is a new and most mortifying experience for me.

The whole camp was overcome with indolence this afternoon. Jessmore sat on the log seat before the fire-place and gazed steadfastly into eternity; Harvey backed up against a tree and read "A Wonderful Woman;" Sam retired to a far corner of the tent where he read something part of the time and reviled me and my packing at odd intervals, as new gibes occurred to him. Evening came and stirred Jessmore into activity sufficient to produce a very fair supper. We closed about the fire and smoked. The wind was gone, the stars came out, and we enjoyed another perfect night. Harvey mustered up sufficient energy to fill the plate holders and stow away the exposed plates, after which we turned in.

Sunday, Sept. 18.—I saw the sun rise this morning, and therein I got ahead of all the rest of the camp. No one has had a similar experience on this trip, and I feel proud and haughty in consequence. We had intended to get under way by six o'clock but did not. It was eight by the chime when our canoe put off. All our baggage was packed up in final wrappings, a small supply of provisions left out to sustain us on the voyage, pipes were lit all around and we put off. It was a perfect day. No wind, the lake like a mirror, the sun bright, the air warm and balmy, and ourselves in excellent trim and good digestion. We ran over to Ouagumaup's village, and there took on a pair of moccasins and engaged another canoe to take part of our baggage to Tower. Jessmore conducted the negotiation, and by the persuasive powers of two or three slabs of bacon, and a pair of overalls, which I had abandoned, he succeeded in inducing an Indian with his squaw, pappoose and canoe to enter our service. We relieved our canoe and Jessmore's of all the baggage which could be crowded into the Indian's canoe, and again set out. Harvey was at the oars, Sam sat amidships and held his trolling line and gun, and I at the stern wielded the steering paddle. As we passed down the lake, threading the numberless islands, crossing the traverses and wide reaches of water, rounding promontories and skirting the shores, we began to understand of how much pleasure and enjoyment we had been deprived by the baleful wind which had held us prisoners at our camp during nearly the whole stay. If we could have got out and made from time to time little expeditions over the lake, we could have increased our pleasure ten fold. Harvey toiled manfully at the oars until we had left our camp ten miles behind us.

Sam now took his place and on we went until we reached Oak Island, where we ran ashore and got up a hasty dinner. Our Indian retainer had been placed in Jessmore's canoe to assist him, while the squaw and pappoose followed in their own canoe. We had distanced the squaw by a mile or more, but she soon hove in sight and joined her lord, who was gorging himself with the last of our bologna sausage. At 1 o'clock we were again under way. I relieved Sam at the oars as we neared the Birch Point, and we entered on the last stretch of the voyage. At Jessmore's suggestion, strongly advocated by Harvey with the steering paddle and a strong pair of lungs, we left the canoes to proceed by the usual route and rowed down to Sucker Point, where the Indian reserve is located. There Harvey got out the camera and took several photographs of the squaws, who were fluttering about the village engaged in some game, while Sam made a dicker with a couple of young braves to portage our canoe across the point. He succeeded in the dicker, and the two braves picked up the canoe and we picked up the baggage and crossed the point. The portage trail was well worn and easy going, and we reached the other shore without loss of wind. The buildings of the Tower wharf could be seen as we pushed off from the shore, not more than a mile distant. Harvey pulled the final stretch, and at 4:15 o'clock we landed at Tower, just ahead of the squaw and just half an hour behind Jessmore, who was waiting for us. After some delay we got a team to carry our baggage up to the hotel for us, which we found full of cruisers and explorers. The landlord told us that Mr. Kimball, who had intended to start with us, had come up there a few days after we had started out, and that after a search of two or three days for our camp, had given up the chase and returned home.

We left Tower the next morning at 5:30 and reached Duluth in time to catch the 3 o'clock train for Chicago, meeting no adventures or mishaps worthy of note.

"And this is the end of one, two, three,
The rat, the mouse and the little froggie."

H. C. T.

SYNDICATING THE ADIRONDACKS.

Editor Forest and Stream:

A friend has furnished me with some data relating to Dr. Webb's purchase and his railroad in the Adirondacks. It is not complete, but conveys much information to those sportsmen who are acquainted with the region to which it refers. It becomes more intelligible when reference is made to Stoddard's map of the Adirondacks. He writes: "Dr. Webb owns about two-thirds of Township 38, in Hamilton county, which includes both Smith's and Albany lakes. He also owns all of the triangle—about 600 acres—north of the Township 38, also all of the Township of the same number situated in Herkimer county—about 4,500 acres—also all of Township 43—containing 25,288 acres—also all of Township 8, except 250 acres on the north shore of the Third Lake (Fulton Chain) and 150 acres between First and Second lakes, making his entire purchase in Township 8, 32,650 acres. Also that part of Township 42 lying on both sides of Beaver River for about three-quarters of a mile from the river on either side. It is embraced in subdivision lots Nos. 21 to 63 inclusive, and lots 126 and 127, making about 9,000 acres. This makes in all about 100,000 acres, but it is not in one solid body. There are numerous small pieces scattered through Township 38, and more than one-half of 42 which he does not own. I think Wood's Lake is in Township 5, next west of Township 42; and the line between these townships runs a little east of Loon Lake. Twitchell Lake seems to be in Township 8, which Dr. Webb owns almost wholly; but Twitchell Creek, mostly in Townships 5 and 6, he does not seem to own. By reference to the map you will see that Township 42 includes Little Rapids, on Beaver River, the South Branch, etc., and I am informed that it is Dr. Webb's intention to prevent trespassing upon this portion of his purchase.

I have not examined the entire record of all conveyances to the St. Lawrence & Adirondack Railroad Company for railroad purposes. A part of the road is located as follows: The road enters Herkimer county near where the county line crosses the Moose River, about a mile west of the junction of the north and south branches of the Moose. There is to be a station near this bridge. The line is then along the south branch to near the west line of Township 7, where it turns to the left and crosses Little Safford Creek, about 800ft. from the lake of the same name, thence close to Clear Pond, thence into Township 8, near Thirsty Creek, and turns to the left at a right angle up the creek, passing close to the west side of Buck Pond, in Township 6; thence it bears northwest slightly and turns at a right angle to the right, crossing Twitchell Creek, thence in a nearly northeast line to Harris's Camp on the south branch of the Beaver. Thence it passes Munsy's to the upper end of the carry, when it crosses Beaver for Smith's Lake. On the map filed, Township 42 is marked "Ne-ha-sa-ne Park;" Township 5 is not so marked.

It is hoped that there will very soon be another edition of Stoddard's map which will show both the "Webb purchase" and the lines of his and other railroads. There has come to be so much confusion of ownership and boundary lines of private property, that but comparatively few sportsmen know when they are upon safe footing. Indeed, lines in that region are obscure at best, as a general thing, and the owners of tracts often lay claim to much which they do not possess. Syndicates are working together, as the Forest Commissioners must know, with the ultimate purpose of bringing the entire region under private ownership by men of great wealth. The Indians were driven out long ago, and now the humble sportsman must soon go. D. H. B.

SYRACUSE, April 12.

Natural History.

SOME SOUTHERN FIELD NOTES.

THE following interesting notes are extracted from letters to Mr. Robert Ridgway, of the U. S. National Museum, written by Mr. Chas. A. Strawn, of Cerro Gordo, Ark., under dates of Jan. 28 and March 22, 1890:

Before the late war my father owned a farm about fifteen miles from Natchitoches, in Louisiana. This was at that time a great region for the ornithologist. I have spent many a day in the Red River bottom hunting and fishing, and often camped on the site of old Natchitoches. This was thirty years ago, when the region contained a few panthers and abounded with bears, wildcats and catamounts. Geese, swans and more kinds of ducks than I have ever found in any other country were also plentisul. I used to ride fifteen miles from home to Red River bottom, hunt the remainder of the night, hunt and fish all of the next day, and be back home Monday morning ready for business. I would spend weeks camping with the raftmen, and thus passed many pleasant days shooting alligators and fishing for alligator gars. I made a wire contrivance, a kind of hoop fastened to a small rope, and fixed the bait within it so that the gar in getting to the bait most commonly poked one jaw inside the hoop, when it would close or draw up, and then I had only to pull the fish to the shore.

I once resided in Campbell county, Ga., now Douglas county, and while there I spent more time on the Chattahoochee and Dog rivers than with my relations. Dog River is a tributary of the Chattahoochee, and partakes of the nature of a mountain stream, and when I was there the people had fish traps along the river at the shoals and falls. Whenever the river was a little flush the people attended the traps day and night, and it was on moon light nights I noticed at the shoals, where the long rocks divided the waters into narrow channels, that the owls resorted to such places. Being curious to know what they were after, I watched them many nights. The owls would alight on the rocks, fly from one rock to another, scuddle along on the rocks, stand still, hold up one foot every now and then, grab out a fish and fly off. Many fish were thus caught by the owls, which were of a large size, I do not know their technical name.

On this same river (Dog) I found a kingfisher's nest built in the bank at an old ford. The hole went directly in the bank about a foot, then turned to the left. I pulled eleven young kingfishers from the nest.

Does the snake slip out of its old skin or does it turn the old skin wrong side out? I am of the opinion that it is the latter. I have in my possession a tolerably good specimen, and the lips of the skin, as well as the tip end of the tail, show that it was turned wrong side out and not slipped off.

Does the rattlesnake bring forth its young alive? I have seen young snakes run in the old snake's mouth, making a singing-like noise, and upon killing the old snake and cutting it open have found the young packed away side by side, not in the stomach proper, but in what seemed a place for them.

When a boy I once plowed up a snake about two feet long. It looked a good deal like what country people call striped lizards. It had two short stubbed legs four or five inches from its head, and a few inches back of them on the body there appeared to have been two more. These were not present and I thought must have dropped off. I had never seen such a reptile before, nor could I find any one who had.

In my rambles I have come in contact a few times with the blacksnake, especially in the spring of the year, when they would run at me, come very near and slash around at me with their tails. This is when they have mated, and are found in pairs only.

During one of my hunting and fishing excursions in Louisiana I was fishing on a lake two or three miles long and from one-quarter to one-half mile wide. On one side the hill land came down near the lake, leaving about one-quarter mile of sand beach, and while there I saw a deer running at the top of its speed toward the lake, and a moment later a wolf appeared in hot purpuit. Expecting them to plunge into the lake, when I could overtake and kill them both in the water, I kept my place. Just before the deer reached the water it was caught by the wolf, which pulled it down and killed it. Then the wolf stalked around, looked about, trotted off some distance and set up a howl, went further and again howled, and then into the woods when I heard more howling. The wolf being out of sight, I rowed my boat to the place and got the deer and then went back to my fish hooks. Shortly there appeared on the scene a pack of ten or twelve wolves. They sniffed and moved all around where the deer had been killed. These movements occupied considerable time. They would huddle together, change about, and mixing up trot around in all directions, keeping close together. Finally they got into a fight, the whole pack attacked one wolf and killed it. It was literally bit and chewed to pieces. Now what was the wolf killed for? The probability is, and I am almost positive, that the dead wolf was the one that killed the deer. I have talked to many hunters upon this subject, and have come across but two who had seen anything similar, and they thought the wolf had been killed for lying. If it was done in the case I saw for lying, it was the only time I ever knew a wolf to be killed wrongfully.

[The "snake" with the imperfect feet may very likely have been the so-called two-footed Congo snake (*Amphiuma means*), a tailed batrachian of the family *Proteidæ*. It is not uncommon in the South as far north as North Carolina.]

MICHIGAN SPRING.—Central Lake, Mich., April 9.—The ice in the Intermediate Lakes broke up April 5. Four robins seen March 29, after which they soon became common. Four crow blackbirds seen April 3, and several finches or similar birds since, not identified. Have heard of no ducks lately. We have had delightful weather of late, but last night came a frost. Thermometer at 23° this morning and the robins look all humped up. They come and eat the bittersweet berries from our vines, and we try to feed them.—KELPIE.

NEWBERN, April 9.—It is interesting to note the movements of fish of all sorts, especially of bluefish, whose habits are not known as fully as those of some other kinds of fishes. They are all catching fine sea bluefish at Roanoke Island. The steamer Newberne, of the O. D. line, brought in a few hundred of them to this city yesterday. They retailed here at 35 cents each. There were about 2,000 of them on the island when the steamer left. They were nearly uniform in size, weighing full 7lbs. each. The mid-winter weight was heavier. There were 2,000 barrel boxes of shad shipped from the island last week. As far as my observation goes, a run of big bluefish, weighing from 7 to 12lbs., commences in February in North Carolina waters and continues until some time in April. Quite likely this run makes it way northward as the weather grows warmer, usually appearing off the New Jersey coast in May or early in June.—CHARLES HALLOCK.

AN ALBINO BUCK.

FROM a photograph by Mr. B. W. Kilburn, Littleton, N. H., who writes: "The buck was killed, in the Crawford Notch, by my friends, Messrs. Cheney and Whitaker. It is the first albino deer seen here within the memory of the oldest inhabitant. The buck was very fat, and the taxidermist has been successful in setting up the specimen in the attitude of nature."

Game Bag and Gun.

PROTECTION IN NEW YORK STATE.

Editor Forest and Stream:

The present outlook toward better protection of the fish and game interests in this State is indeed far from flattering and the efforts of those true and loyal sportsmen who have, for the past two or three years spent considerable time and worked faithfully to bring about a revision of our present imperfect laws, appear to have been in vain; and there is at present an indication of bad matters being made worse by the passage of a bill which will be infinitely inferior to the existing law; a bill which will take away about every protection which we now have and which will give the pot-hunter and game-hog unlimited sway, even to the killing of song birds, the depopulating of nearly every stream in the State and the complete extermination of the present limited supply, both of fish and game. Yet this is the bill which originally was intended as a bill expressing, as near as may be, the general needs and desires of the better class of sportsmen throughout the State; a bill carefully framed by the Codification Committee appointed for that purpose some two years ago, which committee acted under the advice of those interested in all parts of the State; a bill which was afterward submitted to the New York State Association in convention with other associations at Syracuse, where sportsmen from every section in the State were present and almost to a man expressed but one view in relation to the bill. In Assembly committee the bill received a few amendments but still remained the good bill which it was desired to have become a law. Upon reaching the Assembly, the war began and at the present time the bill would hardly be recognized by its promoters as it bears such a complete disguise. Amendments were offered by members whom it is safe to say could not distinguish between a mallard duck and a jack-snipe, and who would probably regard bullheads and brook trout of the same family of fish, yet these amendments, offered by these narrow minded members acting under the advice of those not in favor of protection, were allowed to prevail.

There are two prime reasons for this state of affairs, the one is the want of public sentiment favoring and recognizing the necessity of better protection and the other is the failure, on the part of the sportsmen throughout the State, to recognize exactly one course and to follow it with united effort to the end that every member in both houses of the Legislature will be taught to vote for a bill which has received the indorsement of those interested, without tacking on a lot of amendments to suit any individual or set of men. Sportsmen must be united and together in their efforts and willing to work in harmony, abolishing the idea that they can longer deal liberally with this matter.

We need better laws for the fish and game of this State and that speedily.

Local protective associations, energetic and faithful in their work, will do much to awaken public sentiment in this direction, and success depends largely upon this. Immediate action should be taken to stop the passage of any bill which will give any greater latitude than the present law and which will take away any of the present, though inefficient, means of bringing law breakers to justice.

Better take a step in the right direction or call halt at once.

Unless this bill can become a law as indorsed by the sportsmen of this State, it is better that the present law exist until proper action can be taken.

I have confidence that a better state of affairs can be brought about, but it will only be by systematic, unflinching, hard work. Who among the many true sportsmen of this State are willing to join the forces and labor to this end? W. S. GAVITT,

Pres. Central N. Y. Fish and Game P. A.

SPRING SHOOTING.

Editor Forest and Stream:

A few days ago President Harrison was duck shooting. A few weeks ago ex-President Cleveland was doing the same thing. These be bad examples. There should be no spring fowl shooting nor spring fishing. If there could be a national statute prohibiting these wastes of birds and fishes, their old time plentifulness would, in a measure, be restored. Of course the increase in population; the facilities for reaching all places where fish or fowl are to be found; the muzzleloading gun, and the artificial fly; the drying up of streams; the refuse of factories and mills; the drainage of lakes, ponds and swamps all tend to deplete the waters of all animal life, but no one or two or more of these unavoidable causes are so destructive of fish and game as the avoidable one of fishing and shooting in the spring of the year.

It does seem that there ought to be enough genuine sportsmen, backed by the large number of humanitarians, who would join in the agitation to create a well formed sentiment against these twin iniquities. Public opinion is all powerful when once aroused and directed.

What say you, brothers of the rod and gun, let us agitate: if not for our own interest, for the good of the cause and the coming generations. JAP.

NEW ALBANY, Ind., April 12.

THE WHITE SWAN.

HARRISBURG, Pa., April 13.—I notice in your late issues that the white swan is always spoken of as a rare bird. Every spring and fall during the annual migration of the waterfowl there are a few killed in this locality. On Sunday the 10th our river was full of ducks with a liberal sprinkling of geese among them, and one flock of sixteen beautiful swans. Monday morning the shooters were out in full force, and while most of the ducks had left several hundred were killed. Eleven miles above us, on an island, Mr. Brelsford has a fishing and shooting box which is in charge of Charlie Lukens, who, although partially crippled in the late war, is possibly the most expert duck shot and paddler in this section. The flock of swan before mentioned alighted near this island and Lukens succeeded in getting near enough to kill two of them outright and so badly crippling a third that it was finally captured after a hard chase. The three immense birds weighed 38lbs. together, but looked as if they weighed a ton. The largest is being mounted for Mr. B. Are these swan what are called trumpeter swan? They are pure white with black legs, feet and bills, with a small yellow mark on the bill close to the head. They were killed with No. 6 shot and scarcely a feather injured. Quite a feature of this flight of wildfowl was the great number of woodduck, more than old gunners have noticed for years. These beautiful birds, while quite common with us, have never been killed in such numbers before. Some of the drakes were in exceptionally fine plumage, and our local taxidermist has had his hands full mounting them. One specimen secured by Mr. Harry Bach was the finest the writer has ever seen, being exceptionally brilliant in plumage even for one of its species. Snipe are here in small numbers.

PIGARTH.

[Swans are rare in most parts of the Eastern and Middle States, but winter in numbers in the Chesapeake Bay and on Currituck Sound. Of course to reach these grounds they must pass over or by the more northern States, but they are rarely seen in New England. The swans killed as above stated were not trumpeters but whistling swans (*Olor columbianus*)]

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., April 16.—Mr. Theodore Roosevelt, president of the Boone and Crockett Club, of New York, went out to the World's Fair grounds, this city, to select a site for the typical hunter's camp, which will form so interesting a portion of the exhibit. Mr. Roosevelt and Mr. Codman, of the landscape department, agreed upon a small desert island at the southern end of the lagoon. Here a cabin and camp will be established.

Joshua Roberts, a trapper of Port Arthur, Ont, has sent to the Department of Ethnology of the World's Fair, a collection of Indian curios, comprising bows and arrows, arrowheads, beads, moccasins, etc.

Two accidents with firearms, one fatal, occurred at Iowa City April 10. Harry C. Kelley shot himself in the face with a revolver while taking it from a drawer. Herman Nass, 17 years old, blew off his with a shotgun and died soon after.

Iowa has raised the wolf bounty to $5 a scalp, and many wolves have been killed lately in the northwestern part of the State.

Mr. R. B. Organ is lately back from a little shooting trip on the Kankakee, on which he bagged a fine brace of genuine Canada geese, one weighing 9¾lbs. and one 11½lbs. He knocked down four, and his pusher jumped one of the strays an hour after it was shot, but it rose slowly and got off. A real Canada is a tough bird. Mr. Organ tells me a friend on the same trip bagged twenty snipe on a little piece of buckwheat. The marshes are too marshy now for the snipe.

Our duck season is now over.

Mr. Chas. Comly, of the Chicago Rifle Range, returned from Fox Lake at the close of the season. He was there two weeks, his top bag being thirty-two and his daily average fifteen. The ducks are now more abundant than ever at Fox Lake. The snipe are not yet up fully. Lower down in the State by 150 miles everything is looking green and well advanced, but up here it is cold and bleak and the grass is gray.

Mr. M. L. Kelly, of "Kelly's" near Lorenzo, writes me to-day that the Kankakee is still high and quite muddy.

This river averages very clear even in times of high waters, so some idea of the floods may be had.

Horicon Marsh, Wis., is full of ducks. No shooting allowed there.

A writer in the Sheboygan county *News*, April 6, has following interesting remarks to make about quail in the early days of this region:

"The recent announcement that the Sheboygan Gun and Rod Club had received seven dozen pairs of quail from Wichita, Kan., to stock their grounds with south of the city, sets your correspondent thinking:

"Mr. and Mrs. Bob White, seven dozen of them and from away out West. Something strange about that bird. An Indian never saw one until the whites came, and they called them the white man's bird. And they never saw a white clover flower (this they named a white man's foot in blossom), or a honey bee either, before the pale faces came.

"'Swarms the stinging fly, The Ahmo,
Swarms the bee, the honey-maker.'"

"So according to Hiawatha, sang the redman. Even prairie chickens never go many leagues ahead of cultivated land and grain fields. The good book tells of the flock of quail sent to feed the Israelites in the desert. In the fall of '50 something like that happened in this then small burg. Not that we were particularly hungry for quail on toast, like these old-time fellows, or were suffering for food, or grumbling, but the birds came all the same. A sleet storm came and in it were hundreds of quail. They seemed chilled and stupid, and many of them were caught by being driven into corners. In one case a dozen or two were driven under a barn and caught. As the storm cleared off they got lively, and for months were often seen and heard about the town. The writer got some boys (one of whom was "Dock" Pape, now Mr. C. H. Pape, of the dairy farm) to catch a few, which were kept for a time in the store that stood on the ground now known as No. 422 Eighth street. They did not do well in confinement and so were turned loose. Where did they all come from? It was then and is still a mystery. Some claimed from across the lake. But that could never be, for they are not of long flight like wild pigeons. That pigeons came across was well known, and that they arrived very tired as well was also known to every boy who owned or could borrow a shotgun. Some six or seven years after the quail episode we moved to Illinois. There birds were plenty and each year became more so, until *more wet—more wet* or, if you please, *buckwheat—buckwheat* intermixed with a soft far-reaching whistle was heard from morning to night, though more in the morning. About the farm one was always coming across their nests, or a mother bird very lame with a dozen or so little brown babies as large as your thumb. She was very lame, so lame you could almost catch her until every baby was hidden under a leaf, then she recovered. In time it beat all cures ever heard of, except perhaps miracles. She fooled you she thought and saved her children, but you were on to her little game and stepped away very carefully not to crush a little one under a leaf. As the weeks went on the children grew bigger, but the family kept together, sleeping at night in a bunch as close as they could pack in the grass. The next spring they broke up and each went for himself; and the hunter and his dog for all. In spite of this they increased in the land until the terrible New Year Day of the second year of the war, when a hundred miles south of Chicago the thermometer marked 40° below zero and cattle froze to death on the prairie. It seemed queer that it was much less cold a hundred miles north of Chicago, although very cold. Bob White was frozen to death almost to a bird, and they have not been as plenty since. The prairie chickens thinned out, but lived through the cold."

E. HOUGH.

STORIES OF THE OZARKS.—IV.

[*Continued from Page 346.*]

"I EXPECT there's a story with that scar over your eye if we could get at it."

"You're right, gents, and I'll tell you how I got it if you aint tired o' listenin'.

"Ten or twelve years ago I lived in one of the southern counties of the State borderin' on the Arkansas line, where the spurs of the Ozarks run off into the swamps and river bottoms. There was lots o' game in that section then besides a heap o' fur, and as I made my livin' by huntin' and trappin', I reckon I got my share of it. I built a new cabin, and me and the old woman had no neighbors for miles; but we didn't feel a bit lonesome, for we'd got used to that kind of a life. I put in the summer purty easy, killing a few turkeys or a deer now and then for the table; for in them days there was no game law in that part of Missouri that any one knowed of, and when a man is hungry he is apt to be a law unto hisself.

"A few hard frosts had set the leaves to fallin', and I knowed it was time to be lookin' out for my winter's meat. One mornin' at sunrise found me five or six miles from the cabin. I never lived in anything but a cabin; was born in a cabin, in fact.

I was on a long ridge that led down toward the White River bottoms. The ridge was purty well covered with brush, with a few pines stattered here and there and spotted in places with bald patches o' gravel. A light rain the night afore had softened the ground 'long the ravines, and there was enough deer sign in sight to make a hunter's heart glad.

In follerin' one of the plainest trails I ran across a bear track in the mud that I was mighty certain was made the night afore. I quit the deer trail at once and kept on the trail o' the bear as well as I could, and found where it had been feedin' on mast under a little patch o' white oaks. I knowed in reason it was headin' for the bottoms a mile or two further on, for I knowed the country like a book, and I kept on the trail till it turned into a pocket or neck of swampy land that ran up between two long ridges or spurs that made out from the mountains. It had a few big sycamores, elms and water oaks scattered over it, and was covered with a net-work of vines, briers and undergrowth so thick a rabbit could scarcely get through it, but it was just the spot where a bear would be apt to stake out his claim.

Here I found a well-beaten path with plenty of tracks goin' in and out, and I knowed if there was anythin' in sign there was at least one bear in there, dead sure. Puttin' a fresh cap on my gun, I went cautiously 'long the trail with my rifle pinted ahead o' me ready to let her go at the first thing that showed up. I had to crawl part o' the way on account o' the vines overhead, and besides I didn't want to make no noise, for I was as certain a bear was in that thicket as if I had seed him with my own eyes. I poked along slowly for a couple a hundred yards, I reckon, with a slight wind in my favor, when I smelt him."

"Smelt him?"

"Yes, smelt him. A hunter that can't smell a bear thirty yards, 'specially if it has been in its bed a few days, had better quit huntin' bear. As I was sayin', I smelt him and I knowed he was mighty close at hand. There was a big fallen tree a few yards ahead o' me covered with briers and moss, toward which the trail led, and I knowed in reason the bear was about or behind that tree, if he was at home, for there was tracks goin' in, and sure as shootin' when I got within twenty feet of it, the bear raised on his hind feet and faced me with a growl.

"I didn't stop to say 'Good mornin', Mr. Bear, how's your family?' nor nothin' o' the kind, but blazed away 'thout takin' aim, and ran and crawled back on the trail as fast as hands and legs would carry me. I got out o' that a heap faster than I went in.

"I heard a terrible racket in the brush behind me, and I thought sure the bear was at my heels, for I wasn't at all certain of my shot. When I got out into the open I turned round to face the bear: but there was no bear in sight. If I'd had one o' them repeatin' guns such as you've got here, instead o' runnin' back on the trail like a scart deer I'd have given him some more lead and settled the business at once.

"Well, I rammed down another ball and crept back on the trail, just as I did afore, ready to shoot at a second's notice: but I didn't see anything until I got to the log, and lookin' cautiously over it there lay the bear in its bed as dead as a nail in Noah's ark.

"Well, the first thing I did was to turn it over to cut its throat and bleed it, when I found it was a she bear and sucklin' cubs, two of 'em. 'Now,' says I to myself, 'here's more game for you; here's a whole family o' bears waitin' to be killed.' I knowed them cubs wasn't far off, and I looked round among the vines a while, and not seein' 'em concluded they had treed; and sure enough, there they were for certain up a scrubby oak about fifteen feet from the ground, and not more than a hundred yards from where I had shot the dam.

"I drew a bead on one of 'em, when I thought, 'Sho! no use to shoot 'em; no use to waste powder and lead. I'll catch 'em alive. I've allus wanted a pet bear, and now I'll have two of 'em. I'm in luck this mornin' for a fact.'

"I leaned my rifle agin a tree and hung my huntin' knife and powder horn on a limb. The cubs looked as innocent as two kittens, and I kind o' pitied 'em because they'd lost their ma.

"As I had no cords at hand I took off my galluses, a pair the old woman knit me, and laid 'em down at the root o' the tree to tie 'em with. Then I tightened up my belt and shinned up the tree to the lowest one, and took it by the back o' the neck and asked it to come down with me and see the folks. He squabbled and objected mightily, and hung on with a grip like death, but after a lively tussle I got him down on the ground and throwed him on his back and put my knee on him and tried to tie him with one o' the galluses: but he squirmed like an eel and squealed like a shote at hog-killing time, and I was mighty 'fraid the head o' the family was loafin' 'round in the neighborhood, and hearin' the racket, might come round to see what was goin' on, and make it mighty interestin' to a feller; and to stop his noise I pulled off my old wolf-skin cap and crammed it in his mouth.

"Gents, I didn't have to climb the tree for the other cub, for it dropped on my back all spread out like a flyin' squirrel, and lit a bitin' and a clawin' with a vengeance. It knocked the wind out o' me for a minute or two and I had to let the other one loose and fight the last one, and after kicking it in the ribs several times and hittin' it with my fists, I got it by the throat and was chokin' it. I'd got its wind pretty well shut off, when the other one jumped on me from behind.

"Well, I fought 'em and kicked 'em the best I knew, but I had nothin' on my feet but a pair of home-made moccasins, and I reckon I didn't hurt 'em much, for they'd come back at me madder than ever, with their hair all bristled up like an old sow fightin' for her pigs.

"When I'd turn to fight one of 'em, the other would tackle me on the other side. This was more of a bear fight than I'd bargained for, and I was gittin' the worst of it. They was a heap bigger than they looked up the tree. It was gettin' lively. I had no time to take a chaw of tobbakker or spit on my hands. They had a heap more fight in 'em than I reckoned on, and they were the wickedest little cusses I ever seed.

"Just in the worst of the scrimmage my huntin' belt, which was nothin' but an old leather strap with a buckle on it, broke in two; and my breeches, what was left of 'em that the cubs hadn't tore off of me, began to slip down toward my knees. You may laugh, gentlemen, but it's the born truth, 'tis for a fact. I sometimes laugh myself when I think of it, but just at that time I didn't see anything funny about it. I was too busy to even raise a snicker."

"That was an embarrassing situation."

"You're right, young man, I never was so much embarrassed in all my life, except the time I had the fight with the buck that I just told you about. Well, as I was sayin', I catched my breeches by the waistbands and made a dash for my huntin' knife; and as I did so my foot catched in some creepers and I fell full length among the vines, and both of them cubs was on top o' me quicker'n you could snap a flintlock, and before I got untangled from the vines and beat 'em off, they'd chawed me up purty bad. I reckon they'd just found out about their ma and was takin' revenge out o' me.

"After a while I got loose from 'em and made another break for the knife, with the cubs a chawin' at my heels, and I got it that time, and that bear fight came to a mighty sudden end.

"There's nothing like a knife in a scrimmage. I've found that out a heap o' times, but a feller often forgets what he knows.

"Well, I had three bears on my hands."

"It was a poor day for bears too."

"No, it was a purty good day for bears. Four bears, in fact, for I was purty bare myself, for them pesky cubs had torn the clothes nearly all off of me and I was bleeding in more than twenty places. May be you don't believe me. Just look at the scar on the calf of that leg, they tore it half off, and the other is mighty nigh as bad. Look at this arm, see the marks of the teeth there, and there; see that scar on my neck, well that's one place they bit me when they had me down in the vines and that ain't half of 'em. Yes, I'm a battle-scarred veteran, sure enough, and the State of Missouri ought to give me a pension for killin' so many varmints.

"Oh, no, I didn't get all my scars in that fight. I've had a heap more fights than one. I've learnt a heap o' huntin' tricks in my time and I've made some purty bad blunders, too. There's a heap in luck, but there's a heap more in skill and cunnin', I've found that out too, but if a hunter has both luck and skill he can do purty good work. In them days I wasn't afraid of any varmints in the Ozarks, and I ain't yet for that matter; but it's better to have a cool head than a light pair o' heels, but both are mighty good things to have 'round when you're alone in the mountains. You see how I missed it in this case. If I'd put my huntin' knife at the root o' that tree with my galluses and been on the safe side them cubs wouldn't have chawed me up the way they did."

"Yes, but we'd have lost the most interesting part of that bear story. What's an old pair of breeches to a good bear story anyway?"

"The old breeches warn't worth much, for a fact, but them cubs took right smart o' my hide along with 'em, if you'll believe me. Well, to finish my story. When I skinned that bear I found the bullet had gone plumb through her heart and I couldn't have made a better shot if I'd aimed at her a week. The old woman and me had plenty o' bear meat that winter. Bear meat dried and smoked is purty good eatin', 'specially them cubs that come so nigh gettin' away with me."

"Boys, that's a good one."

"I could tell you huntin' stories the balance o' the night and all day ter-morrer, and then not get through, but it's gettin' purty late and I reckon I'll have to go."

"Well, here's to the health of our guest."

"Same to you, gentlemen, and a successful trip."

We broke camp early the next morning and headed the teams toward the Arkansas line. As the day advanced mast and deer sign were more abundant and we felt certain we were on the route to the promised land. In the afternoon we ran on a flock of wild turkeys and bagged two of them.

The cook was glad to see meat coming into camp, for the commissary was getting low, and he'd made up his mind to send one of the teams back to St. Louis for supplies. He said he'd cooked on the Mississippi steamboats and in the lumber camps of the Northern pineries, and for "right down gobble everything in sight and lick the skillet," our appetites "took the bakery."

In the afternoon of the seventh day out we rounded up in a little valley, and pitched the tents on the bank of a beautiful spring that boiled and bubbled like a huge cauldron. It was at least fifty feet in diameter, and the water was almost as transparent as the air itself. One of our party, who was an expert in such matters, said there was at least fifty horse-power going to waste. It was hastening on with its rush and roar as if impatient to mingle its stainless waters with the turbid Mississippi.

We were now in the heart of the wilderness. Here was nature undefiled. This was the place we long had sought, and permanent camp was agreed on. Three of the boys shouldered their guns and struck out in different directions to prospect and pick up some game; the others stayed in camp to stretch the tents and make everything snug for the night; to build a camp-fire and get supper. About sundown the hunters came back with a couple of turkeys, and reported plenty of deer sign, and all were much elated over the prospects.

We turned in early, with visions of game galore flitting through our heads. About midnight there was a stamping and snorting among the horses; and the dogs, that were secured in a tent by themselves, set up a howling that helped to keep up the racket, and fearing a stampede, quicker than I can tell it that tent was empty and six half-clad figures were shivering in the chilly night air. After quieting the horses and looking to their fastenings we crawled back to bed again. One of the old hunters said the horses were frightened at a deer that was attracted by the camp-fire; and he was right, for in the morning there were fresh tracks of two deer that had passed on the run within 50ft. of the tents. This was encouraging.

The next day two bucks and a doe were hung in the trees about the camp. We stayed here two weeks, and every day brought something to the larder or increased the stock of venison, with which we were to surprise our friends at home. Turkeys were fat and plentiful, and many a fine fellow went to "keep the pot boiling."

One of the boys shot at a bear as it was running through the brush, but did not stop it. The hounds were called in and put on its trail. They brought it to bay twice, but did not hold it long enough for us to get a second shot. Deerhounds are not bear dogs by a large majority. We saw no panthers, but had the satisfaction of hearing them scream at night, and had no chance to test our nerves or skill on them in an open fight.

The streams in that region are mostly fed from springs, many of them remarkable for size and volume; and are marvels of beauty and purity. On the Black and White rivers and their tributaries are many ideal fishing grounds—a paradise for the lovers of the rod and reel. Nothing is more deceptive than their apparent depth. A stream which a novice might think to be two or three feet deep would actually be twice that depth, as one member of our party learned by experience. To save a detour he attempted to cross what seemed a shallow branch on a fallen tree, but having on his shoulder a deer which he had killed an hour before, and being further incumbered with his gun, he missed his footing and fell into the water up to his neck. He waded out and hurried to camp.

Our return trip was made without special incident, and at the end of the fourth week we reached home with eleven venison saddles and four antlered beauties, making fifteen head in all. The ribs and shoulders belonging to these saddles went to make venison stews to fill that insatiate void so much complained of by the cook. We were bronzed by sun and wind and had taken a new lease of life with increased avoirdupois, and had a fund of anecdote withal to be kept green by repetition till the mellow days of October called the clan together again.

ST. CHARLES, Mo. CAMERON.

CATCHING A PRAIRIE WOLF.

ONE cold windy day a party of lively young fellows driving across the prairie, saw a prairie wolf making a meal from a dead horse. Bill Burns offered to bet ten to five he could catch the wolf, and the bet was taken. Bill directed the driver to get as close as possible under cover of a low ridge some three hundred yards from the wolf. With the wagon concealed by the ridge and the wind in his favor, Burns began to crawl through the knee-high dead grass, which was nearly the color of his canvas coat and old felt hat. The horse lay with its back towards Burns, and as it was frozen the wolf was eating from the inside of the carcass, going almost his whole length into a hole eaten in the horse's abdomen. He would go in and snatch a mouthful or two, then quickly back out and look around. It was evident that he considered "eternal vigilance the price of liberty."

Each time the wolf went in, Burns crawled rapidly toward it, lying flat in the grass whenever the wolf came out. In half an hour he had got within a few feet of the wolf, and watching for a favorable moment, rose to his feet, jumped over the horse and caught the wolf by the hind legs. To the spectators it did not look as though Burns had more than touched the wolf, when it was rods away, and went off with such a grand burst of speed, that one of the boys declared he could hear it whizz long after it was out of sight. Although Burns held the wolf but an instant he was severely bitten on both arms and on one leg. His opponent claimed the stakes because Burns did not hold the wolf, but Burns said he did not agree to hold it, but to catch it; that he did not intend to hold it long enough for it to bite him, but found he could not let go quick enough. The bet was decided in Burns's favor. O. H. HAMPTON.

Camp-Fire Flickerings.

"That reminds me."

A GENUINE Erie character was gunsmith Weeks, recently deceased. Everybody respected the honest old man. His record for turkey shooting with the rifle was so great hereabouts that the boys barred him out from our holiday turkey contests. Having occasion to call at his shop, shortly before his death, I found him talking with a customer, whom he evidently mistook for a clergyman. Straightening himself up to his full height and peering over his spectacles at his listener, he delivered himself thusly:

"I tell you, sir, that if you want to bring up a boy so he shall be moral, refined, an ornament to his parents an' a useful man in society—buy him a gun." MALLARD.

I didn't shoot a duck last fall. Perhaps you may think that this was because I missed one. Sir, you are wrong. Then, says the other fellow: Perhaps you didn't go duck shooting. Well, I don't know. I did, or I didn't. Is the phrase "duck shooting" to be employed in the characterization of the course pursued, and the action taken by a man who didn't fire his gun at all? I pause for a reply. One morning last November a light snow lay on the ground and things looked shivery. I was engaged in coaxing the fire, when Jack came in and said that there were 25 or 30 ducks in the little lake just back of my grove. I went down to the house, put on my fighting coat and shouldered "Aunt Hannah."

"Where are you going?" asked the Commandante.

"Ducks, back of the grove."

"Hope you'll get some."

In about half an hour I returned.

"Did you get any ducks?" inquired the Commandante.

"No."

"Did you see any?" asked the Ochitelka.

"No."

"Maybe none had been there."

"But there had."

"Then why didn't you get some?"

"Why, half an hour before I reached the lake, a boy went there with a rifle, fired a long shot at them, didn't get any, scared the flock and spoiled my sport."

"Did you see him?"

"No; didn't see or hear anybody."

"Then how did you know it was a boy?"

"Saw his tracks."

"How did you know he had a rifle?"

"By the mark of the heel-plate in the snow."

"How did you know he fired?"

"By the patch of his bullet."

"How did you know that he fired at long range?"

"Because there was no place within short range of his stand where the ducks would have been lying."

"How did you know he missed?"

"Because he made straight tracks for the village. Had he hit a duck, he would, being a boy, have spent the whole day if necessary in trying to secure the bird."

"You seem to know as much about it as if you'd been there yourself."

"Very nearly." KELPIE.

By your recent issue I see that every fisherman is provided with a "multiplying reel." I am no fisherman and may be in error, but I suppose this is a misprint for "multiplying real," and in this light it helps to explain much that one finds difficult of acceptance among the narratives of Jonah's disciples. E. E. T.

Map of the United States.

A large, handsome map of the United States, mounted and suitable for office or home use, is issued by the Burlington Route. Copies will be mailed to any address on receipt of twelve cents in postage by P. S. EUSTIS, General Pass. Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

THE TENT YOU WANT.—If you need a new tent for your camping trip this summer, it will pay you to investigate the "Protean Tent," elsewhere advertised in these columns. It is far better for the purpose than any other tent, and will add much to the pleasure and comfort of your outing.—*Adv.*

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—*Adv.*

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

THE ANGLER'S DREAM.

THE day was ideal, not a cloud in the sky;
He caught his train without worry or haste;
Not a thing was forgotten—not even a fly;
And the lunch gotten up to an epicure's taste.

And then for a wonder the fish were all biting,
And the little ones seemed to be off for a day;
And when the fly struck the big ones were fighting,
Each doing his best to be hooked right away.

He caught enough fish so he had not to buy,
And for once in his life he had not to scheme,
And to the wife of his bosom and friends have to lie;
But for all that he cussed to find it a dream.

THE WASTE BASKET POET.

CHICAGO, Ill.

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., April 14.—Recent floods have turned our streams into boiling and discolored torrents. If the fish do not choke to death, there should be a great run and fine fishing in season. Many of the dams are under water at this writing. Yesterday the Des Plaines and the Kankakee Rivers when crossed appeared rather as lakes than as rivers. The Fox has overflowed its whole lake system.

From Lorenzo, or the A. T & S. F. Ry., State Warden M. L. Kelly writes me that the run is up, and that a fall in the water will mean good fishing. From Momence, higher up on the Kankakee, Mr. W. M. Durham writes, under date of the 10th:

"You can get some good fishing this week, I think. The water has been very muddy but is O.K. now. I caught four big-mouths or Oswegoes, Friday P. M , but it was so cold I froze out in a short time, though I had an overcoat, mittens and a regular winter suit." This letter was written before the hard rain of last night, which has set the mud going again.

The whole dam at Momence is out, undergoing repairs, so the run at that point will not be obstructed in the least. During the week the full run of small-mouth bass should be up as high as Momence. The pickerel and wall-eyes are past there 150 miles.

The Illinois River is extraordinarily high. The timberlands are overflowed, and the fish are working all over the flats. At a stream running into Spring Lake, below Pekin, some magnificent strings of bass have been taken.

Warden Buck has finished his second trip to the English Lake country. From the B. &. O. bridge above Davis to Momence, over 150 miles, the Kankakee River is now free of nets, although at Koutts and at Water Valley there are nets owned which may be used later. This situation is covered by the following letter from Mr. Borders, the Indiana attorney who watched the cases:

"WINAMAC, Ind., April 11.—I saw Buck again last week, and it seems we have made a pretty effectual disposition of the nets on the La Porte county side of the river. We have several indictments in the Circuit Court against the man Auge on the Starke county side. He is showing fight, which makes his defeat a little slower, but in my opinion none the less sure. His trial will come in June, and until then his nets are in the custody of the sheriff of Starke county.

"Mr. Spalding, of Chicago, sent word indirectly to me, it came through Judge Burson, that if more money was needed to continue these prosecutions we might call on him. I feel warranted in saying that some cash would be very acceptable at this end of the line, as you know our fish commissioner is limited as to means and has expended the whole year's appropriation. Call on Mr. Spalding and, if my information is correct, he will be glad to contribute, and he can also probably put you on to others who will be glad to assist. B. BORDERS."

The firm of A. G. Spalding & Bros. has always been very liberal in such matters as the above. I do not doubt that this and other large concerns here will help the Kankakee Association in its funds, which now begin to grow scanty. Every dollar this Association has spent or will spend means results, direct and prompt.

Mr. J. L. Wilcox is back from a successful duck trip in the Northwest. On his farm near River Falls, Wis., he found the trout abundant in a small stream, and in the Kinnikinnick, a stocked stream, he saw 50 trout in one pool, many 2lbs. in weight, he thought. There are 4lbs. rainbow trout in this stream. A few days after the season opens Mr. Wilcox will return to this stream with a party of friends.

To-morrow is opening day on trout in Wisconsin, where most of our anglers do their early trout fishing.

Mr. John R. Stockton informs me of the organization of the Anna River Fishing Club of Marquette, with fifteen members in Chicago. The grounds of this club are on the shore of Lake Superior, 24 miles east of Marquette, in easy reach of both stream fishing and the magnificent shore fishing for the brook trout of the lake, which is still good in that region under proper conditions. This location is just west of the Pictured Rocks, and is one of singular interest for many reasons. I hope to see it later.

The Chicago Fly-Casting Club.

The only fly-fishing organization now known in this city—the Chicago Fly-Casting Club—held its first annual meeting Monday, April 11, 8 P. M., at the Grand Pacific. The secretary read the minutes and financial report. Messrs. R. C. Moore, E. F. Daniels, C. Loughridge, Geo. B Townsend, H. L. Stanton, F. S. Smith, Austin P. White, Alfred Marshall and Dr. A. W. Hoyt were admitted as new members. Election of officers followed. Mr. W. H. Babcock was chosen president for the ensuing year, Mr. Chas. Loughridge vice-president and Mr. F. Davidson secretary-treasurer, the executive committee being Messrs. J. S. Rossiter, Geo. Morell and Geo. W. Strell. The treasury showed $80 on hand.

The committee reported that the park boards of the Washington Park gave consent for unobstructed practice at fly-casting on the park lakes. The West Park Board have not yet been heard from. Permission had not yet been obtained from the North Park Board, but it probably would be later. A design for a membership card was submitted and adopted, with instruction to have the reel on the rod shown in the draft placed below the hand-grasps, and not above, as shown.

Much discussion arose on the report of the committee on competition rules. The report submitted was as follows:

RULES GOVERNING COMPETITIONS.

Club tournaments and individual competitions by members of the Chicago Fly-Casting Club shall be governed by the following rules, subject to amendment at any regular meeting, by a majority vote:

SINGLE-HANDED CASTING.

Rule 1.—The unit of measurement for rods in the Chicago Fly-Casting Club shall be not less than 9ft. nor more than 10½ft. in length.

Rule 2.—The unit of weight for rods in the Chicago Fly-Casting Club shall be not less than 6½ nor more than 8½oz.

Rule 3.—All rods measuring more than 10½ft. in length shall be handicapped 3ft. for every 3in. they measure over 10½ft.

Rule 4.—All rods weighing over 8½oz. shall be handicapped 5ft. for every ½oz. they weigh over 8½oz.

Rule 5.—All rods measuring less than 9ft. shall be credited 3ft. for every 3in. they measure less than 9ft.

Rule 6.—All rods weighing less than 6½oz. shall be credited 3ft. for every ½oz. they weigh less than 6½oz.

Rule 7.—A 6ft. single gut leader, with one fly tied to a No. 3 barbless sproat hook, shall be the standard cast in all club competitions.

Rule 8.—The style of reel and kind of line shall not be considered by this club.

Rule 9.—Each competitor, when casting, shall stand within a boundary line marked with a chalk line, fastened to stakes, along the shore line; and any competitor overstepping this boundary line, when making his cast, shall be disqualified.

Rule 10.—Each competitor shall be allowed five minutes in which to make his casts, and he shall be entitled to score any one of the casts made within this time limit.

Rule 11.—A fly must alight 25ft. from the staked line to constitute a cast, at which distance buoys shall be anchored.

Rule 12.—Files of alternately painted buoys shall be anchored every 5ft. 25ft. from the staked line; the judges shall so station themselves that every cast can be seen; and their decision shall be final.

CLASSIFICATION.

Event No. 1.—Long Distance Casting: The competitor making the longest cast to be declared the winner. The length of cast shall be measured from the staked line to the cast fly. All ties shall be cast off in the water. Where the judges are unable to decide, the ties shall be cast off on a lawn and over a water thoroughfare on to a lawn beyond, when possible to do so.

Event No. 2.—Casting for Accuracy and Distance: Casting shall commence at the 25ft. buoy, and those who tie shall be ordered to cast at the 30ft. buoy, and so on until all the ties are cast off. The competitor who succeeds in casting the longest line and placing his fly nearest the mark shall be adjudged the winner. Where the judges cannot decide the same method shall be pursued as in Event No. 1, by casting off on a lawn.

Event No. 3.—Dry Fly Casting, for accuracy and delicacy. Each competitor is entitled to five casts only. Each competitor shall cast at a painted buoy, which shall be anchored 25ft. from the staked line. All ties shall be cast off at the same buoy, which shall be removed 5ft. at a time, until there are no ties. The competitor who succeeds in placing his fly nearest the buoy with the greatest delicacy of delivery shall be adjudged the winner. In this event delicacy of delivery shall count before accuracy. The decision of the judge shall be final.

Event No. 4.—Double-Handed Casting. In this event the unit rod shall not exceed 16ft. in length or weigh more than 26oz. Distance of cast only shall count, the competitor making the longest cast to be adjudged the winner. A 27oz. rod shall be handicapped 5ft., a 28oz. rod 10ft. For every ounce less than 26oz. down to 23oz. the competitor shall be credited 2ft. Length of leader, size of line, kind of reel or fly shall not be considered in this event. The judge's decision shall be final.

Rules on single-hand handicap were published in FOREST AND STREAM last week. The rules from No. 6 down were devised by Mr. Strell, of the committee, and by the way, also of the staff of the esteemed contemporary which published the remarkable article on the "Objects of Fly-Casting," and "How to Cast a Fly," last week. Mr. Strell modestly allowed he would like to see this article embodied in the report as part of the rules. Mr. Clark, of the committee, gave a horrified glance at the article in question and begged to strike that out. I quote from this, continuing the reference made later to the unique statements made therein:

"Perfected or scientific fly-casting is attained by the happy combination of the four following accomplishments, viz.: Delicacy in delivery, accuracy in casting, insulation of the angler and fly when on the water, and distance in casting. * * * The kind of reel to use is immaterial so long as it possessess a click or light drag. The position of the reel, *i. e.*, above or below the hand grasp, is also immaterial, so long as the rod balances properly. * * * Nine feet of fine natural gut leader, with three flies attached, is proper for trout fishing; the middle stretcher 30in. from the dropper, and the hand stretcher 24in. above." In view of the above, Mr. Clark thought it was not best to embody the article in a set of rules.

The third member of the committee offered a minority report on rules. He thought the time for perfecting a cast in competition should be ten minutes, instead of five. He also thought the matter should be handed back to the same committee, or another committee, with the instruction to test the handicaps and credits more thoroughly. As it was, the committee had, outside of some imperfect experiments of his own, done nothing but accept hearsay evidence on handicaps. On his protest the handicap on heavy rods had been cut down nearly one-half, but it might still be excessive or not enough. The club should not make the error of favoring one build or one class of rods. It should not adopt a unit, and then make rules practically barring out rods of other weight or other class. Solid rods should be let in on as fair a basis as split. The proposed basis might or might not be fair, but that could not be known until they were tried, and they certainly had not been tried. The club might unwittingly be doing injustice by adopting untried rules, and so might lay itself open to the gravest charges.

Mr. Strell thought the rules could be tried at the next tournament, and if then found unjust, they could be changed. It was pointed out to him that a tournament was no test of a handicap, as different men might have different skill with the same rod. The handicap should be one of tools, and not of the men using them. The only fair way to get at it was to have the same man, under the same conditions, to take several rods of the same class, but of different weights and lengths, and to compare their performances. This should be done with both the split and solid rods. Both should have a chance.

Mr. Clark and many others spoke on the intricate question involved. Finally Mr. Davidson moved to amend to the effect that the president at the next tournament of the club should appoint a committee of five, who should take the weights and lengths of the rods offered in competition, and should to the best of their ability determine what the rods would relatively do. This was carried. It is practically the recommendation of the minority report.

The final engrossing of the rules and constitution was

deferred. A committee on entertainment, consisting of Messrs. C. P. Stivers, R. Opdyke and O. Ware, was appointed. Votes of thanks to the officers and to the Grand Pacific were passed.

The Illinois State Fish League.

The State League is no longer a wish nor a proposition, but a fact. It apparently rests upon a good foundation.

Pursuant to the call earlier published in these columns and further diligently circulated, the meeting of permanent organization was held yesterday, April 13, at Springfield, the capital of the State. The call to order was at 2 P. M., in the parlors of the Leland Hotel.

The attendance was not large, but it was largely representative. Many clubs sent on a single member to look into the matter and report back, thus saving the expense of so long a trip for many. Thus Mr. B. D. Prettyman of Pekin, one of the wealthiest and best known attorneys in that portion of the State, represented a club of over 200 members. Dr. D. H. Shields of Hannibal, Mo., was investigating delegate for a body of 150 members. Dr. C. M. Fike of Waterloo was sent on by three clubs, with a heavy total in membership. Messrs. Davis, Orendorff and Dorwin of Springfield stood for 150 more. The Chicago men had many behind their backs, and so had Messrs. Duncan and Watlington, who came from the Illinois Valley Association of La Salle.

There were actually present the following: Messrs. Henry Davis Jr., A. Orendorff, H. F. Dorwin, J. M. Higgins and C. M. Bartlow of Springfield; Messrs. Geo. E. Cole, A. H. Harryman and E. Hough of Chicago; Dr. D. H. Shields of Hannibal, Mo.; Dr. C. M. Fike of Waterloo; B. S. Prettyman of Pekin: H. L. Watlington and N. J. Duncan of La Salle; Jas. Daley of Manito; Dr. S. P. Bartlett, Secretary of the State Fish Commission, Quincy, with Mr. Geo. Brenning, of Centralia, also of the State Fish Commission.

The organizations represented were the Fox River, Kankakee River and Illinois Valley Associations, embracing many clubs and individuals; the Springfield Fishing Club, the Pekin Club, the Sni Ecarté Club, Charleston Club, Schorr Lake Fishing Club, Island Pond Club, Lake Bartlett Club. The total membership of these different bodies is over 1,000. The lower portion of the State is flatteringly represented.

Mr. Cole in the chair, the meeting was called to order and the minutes of the preliminary meeting read, also the call for the present meeting. The committee on constitution and by-laws was then called upon for their report. This committee consisted of Messrs. Hertz and Hough, of Chicago; Waltington, of La Salle; Davis, of Springfield; Kampe, of Danville; Bartlett, of Quincy; Young, of Burlington, Ia.; Mr. Cole added *ex officio*. Messrs. Hertz, Kamper and Young were absent.

The constitution, as drafted, was read in full by the secretary, and was then taken up clause by clause and discussed spiritedly throughout. Under the preamble alleging the purposes of the league, Mr. Prettyman, of Pekin, brought up the old and mistaken idea of joining the purposes of game protection with that of fish protection. Mr. Davis and Mr. Darwin were inclined to agree. It was shown that history did not warrant this; that the Illinois laws relative to fish and game were different in many ways, and the fish-laws much the better; that to try to protect game also would be to speedily exhaust a fund all too scanty, and to lead to endless delay and bickering. It was shown further that the Illinois State Sportsmen's Association, under its president, Mr. Abner Price, had lately shown a new sense of the realization of its purposes, and was doing good work in game protection. Fish matters and game matters did not mix well. Something definite could be done in fish matters with such funds as could be raised, but to take in game would mean to accomplish nothing. Upon the vote the game idea was lost without a voice to favor it. The discussion then went on as to other clauses, and the draft was much altered. The full text of the constitution and by-laws, as finally adopted, is given below, and will serve as official record:

CONSTITUTION OF THE ILLINOIS STATE FISH LEAGUE.

PREAMBLE.

Whereas, The increased public interest in the preservation of the fish supply of the State, the necessity for improved legislation thereon, and the need of better enforcement of existing laws demand system and centralization in effort looking thereto; now, therefore, it is deemed wise to organize this State League of the fishing clubs and associations.

CONSTITUTION.

Article I.

The name of this corporation shall be the Illinois State Fish League. Its purposes shall be set forth in its articles of incorporation.

Article II.

The Illinois State Fish League shall consist of the fish associations and fish clubs in the State of Illinois, and individuals who may desire membership in the League and who will conform to the constitution and by-laws thereof.

Article III.

The annual sessions of the League shall be composed of delegates from the different associations and clubs holding membership therein, and each association and club shall be entitled to one vote for each ten members in actual good standing. Each delegation must bear credentials from its proper president and secretary. The membership of each club or association shall be evidenced by the per capita amount paid in by it as a body, according to the provisions of the clause relative to dues. Furthermore, any individual holding a life or annual membership card shall be entitled to a voice and vote in the annual meetings.

Article IV.

The officers of the League shall consist of president, vice-president, treasurer and secretary, each to be elected by the board of directors at the annual meeting of the League. They shall hold their offices for the term of one year unless vacated by death, resignation, or removal from the State.

Article V.

Sec. 1.—A board of directors, consisting of seven members of the League, shall be elected at each annual meeting. They shall elect the several officers from among their own number, except in the case of the secretary, whom they may select at option. They shall conduct the business of the League, making a report of their doings to the League at its annual sessions. Any vacancy occurring in said board of directors shall be filled by the remainder of the board, and, when practicable, from the association or club to which the member belonged prior to said vacancy.

Sec. 2.—The board of directors shall have full charge of the funds of the League, with full power to expend the same, but they shall be prohibited from incurring any obligation for any sum over and above the amount of funds in the hands the treasurer.

Article VI.

The president shall preside at all meetings of the League and at all sessions of the Board of Directors, and shall appoint all standing and special committees.

The vice-president shall perform all the duties of president in the absence of that officer.

The treasurer shall be present at the annual meetings of the League, shall receive all moneys paid to the League as dues and contributions, and pay out the same upon warrant signed by the president and secretary. He shall keep full and just account of all receipts and disbursements, and keep a true account between the League and all associations, clubs and individuals therein, and for that purpose shall keep a set of books which shall always be open for the inspection of any member of the League; and he shall make a full report of his doings at the annual session of the League. He shall give bonds in such sum as the board may direct.

The secretary shall be present at each session of the Board of Directors and annual sessions of the League. He shall keep in a book a concise record of the proceedings of each meeting and perform such other duties as the board may direct.

Article VII.—Committees.

There shall be annually appointed by the president the following standing committees: Legislation and fish protection.

It shall be the duty of the legislative committee, in connection with the board of directors, to suggest amendments of the fish laws, and to bring the same before the General Assembly.

It shall be the duty of the committee on fish protection to see that all reported violations of the law are prosecuted; that all illegal destruction of the fish in the waters of the State be prevented, and to make such recommendations to the board of directors as shall be deemed necessary.

Article VIII.—Dues.

The dues to the League shall be paid by each club or association per capita of the membership of such club or association. The amount shall be paid annually. The amount shall be based upon the highest number in such club or association at any time during the previous year. The amount shall be paid in bulk from the treasury of such club or association. The sum of twenty-five cents shall be the rate per capita of each club or association.

For any individual desiring membership the annual dues shall be $2.50. In all cases the membership shall be evidenced by a certificate signed by the president and secretary. Life membership may be taken for $20.

Article IX.—Amendments.

This constitution shall only be amended upon a two-thirds vote of the membership of the League, at a regular meeting thereof.

BY-LAWS.

Article I.

This League shall meet annually on the third Wednesday of January, and under the order of New Business shall select the next place of meeting for the next annual session.

Article II.

In case of death, resignation, or absence of the president, the vice-president shall act as president, and in case of the absence of both the secretary shall call the meeting to order, and the board of directors shall elect a president pro tempore. In the absence of the secretary or treasurer his place shall be filled pro tempore by the presiding officer.

Article III.

Should any association, club or individual, fail to pay the annual dues, such failure shall work a forfeiture of membership in the League; but said association, club or individual shall be reinstated upon the payment of amount in arrears.

Article IV.

It shall be the duty of each fish association, club or individual in the League to render all possible information and assistance to the president or secretary, to furnish sureties for bonds if so requested.

Article V.

The League shall, through its proper officers, render all necessary assistance to associations and clubs in the protection of fish and the prosecution of offenders; shall when possible supervise the policing of the rivers, lakes and other waters where poaching is reported, and shall relieve all local associations and clubs whenever possible to do so. It shall be the function, purpose and duty of the League to help the local organizations, to strengthen the weak ones and to aid the strong ones. This shall be done without interfering in any way with the government or plans of the local organization, nor shall the existence of the League render less desirable the continuance and perfection of local effort in protective matters.

Article VI.

The by-laws may be amended at any time by a majority vote of the Board of Directors upon motion or resolution.

RULES OF ORDER.

In all meetings of this League ten delegates or members shall constitute a quorum; in all meetings of the Board of Directors four members thereof shall constitute a quorum for the transaction of business.

In the meetings of the Board of Directors, and in the annual meetings of the League, business shall be taken up as follows: 1, Calling meeting to order; 2, Reading minutes of last meeting; 3, Reports of officers; 4, Reports of Standing Committees; 5, Reports of Special Committees; 6, Unfinished business; 7, New business.

The text of the above will serve better than any explanation. Article III. evoked much discussion, Messrs. Prettyman, Davis, Darwin, Shields, Watlington and Duncan speaking thereupon. It was finally settled upon as above, being thought the best way to balance the individual and the delegate in the matter of representation at the annual meeting. As it stands it is very just and fair.

Article VIII., on dues, was deliberated upon at some length. Dr. Shields and Dr. Bartlett favored a straight fee of $50 a club. Mr. Davis and Mr. Darwin thought their club would not stand fifty cents a head. Many ideas came up. The clause as it stands is not hard upon any club, for twenty-five cents per member is as light as could be asked. At the same time the way is left clear for unlimited individual contribution on a basis perfectly fair. Certainly every club and association of the State should join this League, and so should every individual interested in angling. Then something can be done, and that very quickly, toward breaking up the illegal fishing. That done, the angling will be good for all anglers.

The purposes of the League, it will be seen, do not interfere with the local society or the local warden. The League's work will be rather one of agitation, of education, and of reform and legislation. It will help in local prosecution only when the local men cannot help themselves, and will aid rather than interfere. It will have a regular secretary and an office. It will furnish headquarters for the protective work in the State. It will offer a place where you can go and get something done. It will be its business to hear and act upon complaints in the simplest and most immediate way. It may be easily seen what has been the need for such an organization, and what will be its value to the anglers of the State. Let the local societies raise their money and spend the bulk of it where it was raised; but let them also give a mite of it to this wider society, to be spent for the good of the whole State, in the work of securing better sentiment, better laws and better execution of the laws. There never has been this chance before. Protective work in Illinois is stepping into a higher plane and one of more accomplishment. Let the angler at least go with it.

After the adoption of the constitution, the chair upon motion appointed a committee of three, Messrs. Hough, Orendorff and Bartlett, to nominate a board of directors. The committee recommended Messrs. Geo. E. Cole and E. Hough; Henry Davis, Jr., of Springfield; N. J. Duncan, of La Salle; Otto Weiss, of Charleston; Dr. D. H. Shields, of Hannibal, Mo.; and Dr. C. M. Fike, of Waterloo. The above were elected.

Upon motion the chair appointed a committee of five to secure a charter. The chair appointed Mr. A. Orendorff, he to choose four associates. Mr. Orendorff chose Messrs. Harry Dorwin, F. K. Whittemore, Henry Davis, Jr. and Col. N. B. Wiggins. All the above are of Springfield.

Upon motion the city of Springfield was selected as the place for the next annual meeting. This was demanded by the interests of the lower portion of the State. Mr. Davis spoke for his club and promised a hearty reception next year. The convention then adjourned.

The board of directors met directly after the close of the above proceedings, Dr. Shields being called to the chair. Mr. Geo. E. Cole, of Chicago, was at once elected president of the State League. Comment is out of place, Mr. Cole has been the leader and teacher of amateur protective work in Illinois. No one else could be president. *In hoc signo vincimus.* Mr. Henry Davis, Jr., of Springfield, was elected vice-president and Mr. N. J. Duncan, of La Salle, treasurer. E. Hough was chosen secretary temporarily, on the understanding that when some funds had been raised a good secretary was to be hired regularly.

Dr. Fike was instructed to district the State for a canvas of the clubs. The board adjourned to meet in May. By that time some funds will be on hand. Several members pledged their clubs for the *per capita*, and some money is even now in sight.

Dr. Bartlett, the State Fish Commissioner, was elated to the last degree over the outcome of the meeting. He can in this foresee a practical assistance such as no Commission of this State ever had.

Mr. Cole, himself rather conservative of belief, was scarcely less pleased. "This is the best day's work ever done in Illinois," said he.

Dr. Shields, of Hannibal, Mr. Davis, of Springfield, and indeed all accosted, were highly satisfied with the work and the outlook.

In the evening the visiting party were entertained at the Elks' Club by Col. Reeves, the urbane private secretary of Governor Fifer. On the day following Governor Fifer received some of the party at the State House.

"I hear you have been organizing a State League to take care of our fish," said he. "That is a very good idea indeed, and I hope it may result well, as I have no doubt it will. I am very foud of fishing myself—always go when I get a chance."

"Where is your favorite fishing ground, Governor?" he was asked.

"Oh, I have fished pretty much all over this region, and over the Northwest, especially Minnesota and Wisconsin. I have caught many a bass in Minnetonka, and many a trout in Wisconsin. I have had some very fine trout fishing east of Marquette, on the south shore of Lake Superior, and also near Elk Rapids. I like trout fishing. If I were not so busy, I would go shooting and fishing a great deal more than I do."

Let us hope that Governor Fifer and all his loyal subjects will reach a day when they will not have to leave their own State for sport, at our native fishes at least. Illinois was once as good as any. It can be so again.

E. HOUGH.

POTOMAC BASS.

WASHINGTON, D. C., April 13.—The first black bass caught in the Potomac this spring, as far as I am aware, were taken by Messrs. Demonet and Hunter at the Great Falls to-day. These gentlemen succeeded in taking two only; the water was in fair condition, but the temperature of both air and water was too low for hook and line fishing. Just as soon as the water clears again and the weather grows warmer there will be a large turn out of anglers. The river is full of white perch and a large number of rock fish have been netted.

On March 22 I saw in the market a small-mouthed black bass that had been netted in the Potomac somewhere below Washington. It weighed 1½lbs., and was of a most singular color, a sort of dirty light-brown. Quite a large number of black bass are taken each year in this river between Washington and a point forty miles down. There is no question in my mind that the large-mouthed bass would thrive in this stretch of water, as the conditions would seem more suitable for it than the small-mouth, and I would advocate the stocking of it with a liberal supply of that fish. The river here is alive with minnows of various kinds, both toothed (*Cyprinodontidæ*) and toothless (*Cyprinidæ*, including the carp, Potomac smelt and spawn-eater; the former family the pike minnow, killifishes, etc.), so it is not probable that the bass would destroy the young shad and other valuable food fishes.

This morning (April 5) there hangs at one of the stalls in Center Market a channel bass very curiously marked, there being on the right side of the body twenty black spots; first one, then nineteen as close as they could well be placed, making a horizontal line 5in. long. This line of spots commences under the dorsal fin and runs to within 2in. of the tail fin; its position is about 1in. below the back, with which it runs parallel. On the opposite side are sixteen spots, similarly arranged, and four spots on the tail fin, instead of two as on the right side. The bass weighs about 8lbs.

BON.

SALE OF FISH IN CLOSE SEASON.

PLYMOUTH, Mass., April 13.—*Editor Forest and Stream:* I saw many black bass in the market yesterday and upon inquiry found that they came from Maine. I ask why are black bass allowed to be sold during the close season, even if they do come from out the State, and trout under the same conditions excluded? when the provisions of the laws for both fish are almost identical.

If it is true that all the trout in our streams will be exterminated if we are allowed to sell our artificially reared trout during February and March as the Massachusetts Fish and Game Association would have the people of the State believe, why is it not equally true that all the black bass in our public ponds will be exterminated if they are allowed to be sold out of season? This subject is worthy of the serious consideration of the above association, also of the Massachusetts Commissioners on Inland Fisheries and Game.

W. L. GILBERT.

VON BEHR TROUT IN VERMONT.—On April 7 a lot of fry of the brown trout, or Von Behr trout, a few weeks old were distributed from the State hatchery at Roxbury, under the direction of Fish Commissioner John W. Titcomb. In ponds at Pine Hill 5,000 were planted, 5,000 were forwarded to the Chittenden Fish and Game Club for a pond near Chittenden, and 5,000 went to Lake Paren in Bennington.

NEW ENGLAND ANGLERS.

THE ice cleared out of Lake Sebago, in Maine, about the 5th of April, an unusually early date for that event to happen. But the State of Maine landlocked salmon anglers are congratulating themselves that such has happened to be the case once, and some of them would be pleased if the ice would go out every year, even in the trout lakes, so as to give them a few days fishing before it became legal for sportsmen out of the State to fish. The fact of the matter is that inhabitants of the State of Maine may legally take trout and landlocked salmon for their own use during the months of February, March and April, but persons residing outside of the State cannot lawfully do so. Boston sportsmen are considerably disgusted this season at this feature of the Maine fish laws, and several who were planning to go to Sebago after landlocked salmon will be very likely to give up the trip altogether. But several landlocked salmon have been taken from Sebago, so report says. Portland fishermen were after them the day that the ice went out, and W. G. Latimer, of Gray, Mr. Thompson, of Portland, and Link Daniels of the same city, have been among the successful ones. During the very warm weather early in April several salmon were seen jumping in the pool below the dam at Bangor, and Mr. F. W. Ayer is reported to have taken one or two. But since the cold weather came on but few fish have been seen there; at least so say the reports written to fishermen here.

Had the weather continued as warm as early in April, the ice must have gone out of the Maine trout lakes unusually early this year. But the warm weather has been followed by very cold weather for April, with the mercury down below the freezing point morning after morning in Maine, and up to date the ice in the Rangeleys and Moosehead is reported hard and solid. One guide writes that it is still nearly two feet thick at Rangeley. This is remarkable when it is considered that the ice is out of the Sebago and out of Winnepesaukee in New Hampshire. Trolling for lake trout has begun at Winnepesaukee and at Newfound Lake, but I have not yet learned of any catches. The weather is evidently too cold. Boston fishermen have not yet started for these lakes that I can learn of.

Unusual preparations are being made for trouting trips to the Maine lakes this spring. Some of the parties will be off as soon as the ice is out, while others will wait for milder weather. A very pleasant party will depart for the Rangeleys on May 21. The party has been booked for that day because, taking year by year, the ice has always been out by that time, and almost always the weather is warm enough for comfort and fishing, while the dreaded black flies will not have begun. This party is composed of Mr. and Mrs. S. C. Dizer, Mr. and Mrs. L. S. Davis and Mr. and Mrs. L. Dana Chapman. Mr. Dizer is of the boot and shoe house of Prouty & Dizer; Mr. Chapman is a salesman with Dame, Stodard & Kendall, fishing tackle and cutlery dealers of Boston. The trip will be new for the ladies, and the plans are great. The party will be quartered at Capt. Fred C. Barker's camps at Bemis. The guides are already engaged, and the number of trout to be taken is—well, yet uncertain. Mr. Ackerman, of Brooklyn, N. Y., is also expected at the Rangeleys at about the same time.

Mr. Pearson, of New York, is booked with a party of old-timers at the Rangeleys, Mr. G. W. M. Guild, of Boston, and Mr. H. Fox, of New York. They are now expecting to go to Haynes's Landing, on the Moosehead-maguntic. For a couple of seasons at least they have visited Richardson Lake, where Mr. Guild has a record of a 9lbs. trout. Mrs. Bartleman, of Boston, who has spent several seasons at the Mountain View House, at the foot of Rangeley Lake, will doubtless go there later in the season. Her son, who has always spent the summer with his mother, has already left Boston for the home of the big trout. Doubtless he will be one of the first to try them, as soon as the ice is out.

J. Parker Whitney, owner of the beautiful camps at Mosquito Brook, Richardson Lake, though in California at the present time, will visit his camps this spring. Mr. Whitney is one of the veteran anglers of that section. His camps were built more than thirty years ago, when the genial owner was a mere boy, and he has visited them almost every season since. He has fished in nearly all quarters of the globe, and yet he falls back to his home on Richardson Lake as soon as the cares of a very active and successful business life will permit. He usually takes his entire family and corps of servants with him.

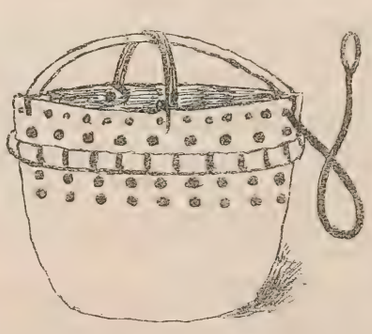
There is scarcely anything that is new with the anglers of the Bay State. The weather has been very cold since the very warm beginning of April, and the rods have been neglected. Still, good catches of trout are reported from the Marshpee River, and from some sections on Cape Cod.

Much to the disgust of the lovers of angling in this State, the Senate has gone back on its first record and has actually passed the Gilbert trout bill to be engrossed. That body has killed this bill once, but in a sudden fit of reaction, such as usually affects such bodies when politics begins to turn against sound sense, the matter was called up again and was passed in spite of the efforts of those who saw in the measure great danger to the wild trout of the State. The bill permits the selling of trout raised by artificial means when it is close season on wild trout, and it is regarded by the lovers of angling as simply an entering wedge that is liable to split the whole system of trout protection. The bill has already passed the House and the only hope of the lovers of trout protection is that the Governor will see fit to veto the measure on the grounds that it is designated to favor only a half dozen owners of trout ponds, and dangerous to the whole angling interest of the State. Governor Russell is a sportsman himself, and very fond of fishing, and the anglers have hopes that the celebrated Gilbert trout bill may die in his hands. A committee of members of the Massachusetts Fish and Game Protective Association, at its last regular meeting, was chosen to wait upon His Excellency and present the evils of the bill to him before it receives his signature.

The latest thing in fishing rods has been designed by Mr. L. Dana Chapman, mentioned above. For a long time this gentleman has observed that the guides use the wood of the wild service tree, sugar plum (*Amelanchier canadensis*), or sugar pear, as it is often termed by the people of Maine, for mending rods and often for tips. The wood, he noticed, is extremely fine grained, almost equal to boxwood in that respect, and remarkably tough. He had his guide look him up some nice pieces last season and forward them to Boston. He has had some rods made and they prove to be remarkably handsome. The rods he has tested in all the ways possible, except actual use, and in this way they will be tested as soon as the opportunity offers. The wood takes a remarkably fine finish, is much like boxwood in color, and seems to be very light for a wood so very hard. The rods will be thoroughly tested for good or bad qualities.

Word comes up from the Monomoy Brant Club that the third squad has taken 120 brant, a remarkably good number for one squad to take. It is also reported that three or four decoys have been secured from winged birds. As mentioned in the FOREST AND STREAM of last week, the fifth squad will start from Boston on Wednesday the 20th.

Mr. Al Tompkins and Nick, both of Waltham, went up to Nick's camp on the Sudbury River Saturday evening. Though it was dark and cold they could not wait for morning to try the hornpouts. They fished for an hour by the light of a lantern, with the result of 138 hornpouts. The weather was so cold that they then begged each other to stop, and stop they did and went to camp. They almost blamed themselves for their good success when they came to dress their fish. To skin 138 hornpouts is no small job, even in camp. The next day they tried the pickerel, but without success. Mr. Tompkins says that they "could not make them bite, not even if they took them out of the water and gave them a good flogging."



There were several reports Monday of a number of landlocked salmon taken at Sebago. One report from a gentleman who came through by train Sunday night was that "they are taking salmon like the mischief," but that "the weather is so cold that the lines freeze when taken out of the water."

The Boston *Herald* had a special dispatch on Monday morning which stated that nothing like the present run of salmon has ever been known at Bangor. Seven fish were taken with the fly Saturday, and the next day 10 beauties were captured weighing from 20 to 25lbs. This report up to Monday evening had not been confirmed by anglers here, who are daily expecting advices as to the rising of the salmon. SPECIAL.

A NEW MINNOW BUCKET.

THE game qualities of the black bass are too well known to require any commendation in this article; in him the angler finds a foeman worthy of his steel. The wide extent of country he now inhabits places good fishing within the reach of that large class of anglers who have neither the time nor money to expend on journeys to distant resorts. Many are the devices used to effect his capture, from the gaudy fly to the glittering spoon. The minnow, alive or dead, is undoubtedly the best general bait for black bass.

For convenience in carrying live minnows, and keeping them in good condition, the old-time pail and wire bucket will suffer by comparison with the collapsing minnow bucket, of my own invention, which I now

place before the readers of FOREST AND STREAM. A fair trial will prove all I claim for it. I have used a bucket with a seam in the bottom about two seasons. I intend to use it through the coming season, as it appears to be in excellent condition. This bucket, with a little maneuvering, will stand on a perfectly level surface; a trifling inequality of ground, or a few blades of grass, give perfect support, or you can hang it up. Observe the following directions for making the bucket.

The bucket should be seamless, of close-woven canvas, waterproofed, so as to leave it tolerably flexible, about 33in. in circumference and 12 or 14in. in depth is about right. It will carry enough minnows for two anglers' use during a half day's fishing. It can be collapsed into the space of a hat brim, and readily carried in a large pocket, otherwise it is better to carry it in its proper shape, as it will undoubtedly last longer. The holes should be about ¼in. in diameter. After punching them neatly, take a piece of copper or brass wire, about one yard in length and ¼in. in circumference, and fill it nearly full of corks about 4in. in circumference, now bring it around the bucket and pass the ends through one of the corks and turn them up. Or you can use rattan; in this case bevel and lap the ends together and force a cork or two over them, fasten by passing cord through the holes and over the wire, to give greater floating capacity; place the corks perpendicular; for the handles use stout cord. Tie a secure knot in the end and pass the cord through the canvas, which must be doubled either by making a fold or sewing a piece on the inside; have the cords in position about the width of the bucket; the cord attached to any object keeps it from floating away when off the bottom.

The bucket is ready for use when enough water is put into it to bring it down to the level of the corks. A constant supply of fresh water passes through the holes below. There is about five inches space between the corks and the top, to prevent the minnows from jumping out. After your minnows are in you can sink the bucket to the first row of holes above the corks; they will make no attempt to jump out after being in a short time. Always drop your minnows in quietly. Minnows are never injurnd in this bucket, as it is soft and pliable. Do not crowd too many in, particularly if you intend carrying them some distanse. The minnows need fresh water occasionally when away from the stream. Spring water is too cold for them. You can buy a gauze ladle for lifting them out, or use your hands. If they are few and troublesome to grasp, pour the contents out on the grass, select the minnows you want, and return the rest. One bucket to every two anglers is about right. For a large party fishing from the shore this arrangement will save needless trouble in hurrying back and forth for bait, as would be the case if you used one large bucket. To give it a trial, take a piece of canvas and cut it in a circle about four and a half yards; now pucker the canvas around the edge and sew it with cord; the rest is easy enough. This arrangement will answer well enough in actual service if you are hard pushed. For waterproofing try sugar of lead and powdered alum, ¼ pound of each, dissolved in half a bucket of rain-water. Soak the canvas thoroughly and hang it up to dry without wringing. To buy the bucket ready made the anglers must create a demand at the tackle shop—*verbum sap.* ARTIST.

RAHWAY, N. J.

A GAME SUCKER.

Editor Forest and Stream:

I noticed in a recent issue of our loved journal an article from this place, signed E. Brown, relating the capture of a 3¼lbs. trout in Mill Brook, and it put me in mind of a capture of mine in Broad Brook. I was fishing about half way down the stream, using worms, as the brush prevented the use of the fly, and have been having very poor luck, when suddenly I got what I can only describe as a heavy bite and, striking, I hooked what I knew would be the record trout of that season if I landed it. What rushes it made, now down stream, then up, then to the bottom for a fit of sulks! Giving it the butt, I started it again, and to curtail a long story, after fifteen or twenty minutes, I finally landed the most magnificent sucker (with the exception of the man) that ever was seen on Broad Brook. I have never before or since had a sucker act in such a game manner as that one did. I have, for an experiment, been making me a rod out of hornbeam; I have it finished and, from what I can judge from a dry land test, it will prove satisfactory. If the weather indications prove of an auspicious character, I shall give it its trial trip to morrow and will let you know the result. If something is not done here very shortly there will be no fish to catch or game to hunt. Seining goes on whenever any one feels like it. I know of at least two instances of illegal trout caught during the past week. We had some few years ago quite a strong club here, its chief promoter being the late E. W. Yerrington, than whom no truer gentleman or sportsman ever lived; but I do not know whether the club is in existence now or not. I left this part of the country before his demise, and have only returned this previous fall, so am not so well informed as I should be but I shall renew old associations and do the best I can to prevent illegal capture of game of any kind. A. F. D.

NORWICH, CONN.

TROUT OPENING IN PENNSYLVANIA.

ANGLERS were out in force from Harrisburg, Pa., Newville and other points in Cumberland county, notwithstanding the cold, snowy and generally unpromising weather. April 15 will be remembered for its unmitigated severity as well as for the unexpected catches of trout. Governor Pattison did not go out on the opening day because of the bad weather, but the success of the Harrisburg party sent him to the Cumberland Valley on Saturday eager for the fray.

Silver Spring, about seven miles from Harrisburg, and Big Spring, near Newville, are now restored trout streams, and if you ask the fishermen how these famous waters were renewed, they will tell you it was done by the State Fish Commission, aided by the United States. Brook trout are even nore plentiful than they were in the good old days, and rainbows have become a welcome addition to the trout life of the region. How were these happy results obtained? By stocking the streams with fish old enough to subdue their enemies and grow by what they conquered. But to return to our fishing. A FOREST AND STREAM representative asked the veteran angler, Jacob Hähnlen, who was high line, and he modestly confessed that he had creeled thirty fine brook trout. Other Harrisburg fishermen, among the thirty or so that whipped the brooks, were Alderman Fager, George Boyd, L. Lehmer, John Lehmer, Horace Lutz, Prof. Seiler and Dr. Valerschamp. Fully ten of the trout taken weighed 1lb. each, and one of Prof. Seiler's fish was a plump two-pounder. L. Lehmer caught seventeen, and it is certain that nearly all of the thirty creels which were brought to Harrisburg in the evening were as heavy as the hearts of their owners were light. The champion trout, taken in Silver Spring by George Boyd, measured 17in. and weighed 2½lbs. The stone fly was most killing, but for the big trout the worm took the prize.

An unpleasant "opening" for Gibler & Sons, of West Fairview, was their arrest, about April 1, for seining Susquehanna salmon or pike perch out of season and out of reason, for these fish cannot be legally taken in the waters of Pennsylvania, except in Lake Erie, at any time "save with a rod, hook and line." The fish were heavy with spawn, but this did not deter the Giblers from seining them, and meeting the warden sent over by Commissioner Powell. T. H. B.

VORACITY OF THE EEL.—Two eels having ascended through a rill of water into a newly made pond and hid in a hole, remained there undiscovered. In the month of May, 1,760 yearling trout were placed in the pond; in the following August, when the pond was emptied, not more than two-thirds (1,220) of them were found. The two eels, which then weighed 3lbs., had consumed 500 yearling trout. This is an example of the extensive damage which the eel may cause unless the fishculturist is very watchful. Eel traps should be freely used in all trout waters which contain the eel, and what waters do not contain it?—*Bull. Soc. Centrale d'Aquicult. de France, tome IV., No. 2, p. 63.*

DR. J. A. HENSHALL has returned to his headquarters at Washington from Key West. The results of his trip are very satisfactory, but owing to the fact that there was a "norther" on every week of the Doctor's visit, his work was much delayed. Saltwater trout (black-spotted weakfish) and Spanish mackerel were just commencing to run as the Doctor left, about April 1.

THE CANADIAN ANGLING SEASON.

QUEBEC, April 14.—Canadian anglers, and no doubt those of their American cousins too, whose mecca is among Canada's lakes ands treams, are looking anxiously forward to the opening of the trout season. Heretofore the close season for *Salvelinus fontinalis* has been only from Oct. 1 to Jan. 1, and the slaughter of trout by pot-hunters fishing through holes in the ice, in the first four months of the year has attained regrettable proportions. A recently published regulation of the Canadian Fishery Department makes the close season for trout from Oct. 1 to April 30, and for bass and maskinonge from May 25 to July 1, so far at least as the Province of Quebec is concerned. The new order is gladly welcomed by sportsmen, and by all interested in the preservation of the fish which has made so famous the waters of the northern part of this Province. As a matter of fact, it is close on to the end of April and sometimes well on into May, before the ice has left the surface of Canada's northern lakes.

In Lake Beaufort, as in Lake St. Joseph and Lake Edward, along the line of the Lake St. John Railway, trout may be taken within a week after the disappearance of the ice. The fish are then in good condition and are nearer the surface of the water than later, when July suns beating down on them drive them in search of the deepest and coolest holes. But the black flies *et hoc genus omne* are less abundant in the woods in May and June than in the succeeding months, and the angler hears little or nothing in the early part of the season of the melodioas strains of the tuneful mosquito. In Lake St. Joseph I have never had much success in the heated months, except when bass fishing, but in May and the early part of June, it is no uncommon occurrence to fill a champagne basket with speckled trout running up to four pounds in weight. The gray trout or lunge, called by French-Canadians *touladie*, are also plentiful in this fine body of water, which has the advantage of being but two hours' run from the city by rail. These magnificent red-bellied specimens of *fontinalis* that have made Lake Edward or Lac des Grandes Isles famous all over the continent, and of which the New York author angler, Kit Clarke, has so poetically sung, are not, so far as my experience and observation have gone, to be so easily lured to the fisherman's fly at any other season, as in the months of May and September, and in the early part of June.

I will not trespass upon your space to-day by indicating where the best sport in this northern country is to be had later in the season, but on a subsequent occasion may take the liberty of addressing your readers in this direction, confident that you will gladly encourage any effort having for its object the protection of American anglers from returning home disappointed from a fruitless trip to Canada, which, though not very probable, is always possible, even though they have whipped waters teeming with game fish, if they have selected the right river or lake at the wrong season, or vice versa as the case may be.

No definite answer has yet been sent by the federal government to the signers of the salmon fishers' petition asking for restrictions upon the present system of netting the fish at the mouths of the rivers. Mr. Joncas, M.P. for Gaspé, has espoused the cause of his constituents, the netters, and is engaged in influencing the government and Canadian public opinion against the application of the petitioners. The Toronto *Empire*, which is the official organ of the government, has been informed by a prominent officer of the Fisheries Department that if the existing regulations were carried out in their entirety, the wishes of both sides would probably be met. The trouble, according to this officer, has been that in the past the fishermen have been using nets with an illegal mesh, and the regulations have not been enforced because there was nobody to enforce them. Surely then the government has been very much to blame in the matter, and the lessees of the salmon rivers, by the showing of its own press and officers, have had indeed the best of reasons to complain of the treatment heretofore accorded them.

E. T. D. CHAMBERS.

CURIOUS FLORIDA FISHES.

AMONG the singular animals lately shipped from the South to the World's Fair exhibit of the Fish Commission are two fishes about which Dr. Henshall has made some interesting discoveries. One of these is the hogfish or capitaine, a showy food fish of the West Indies and Gulf of Mexico. The form of the fish can be seen in plate 88 of the Fishery Industries, U. S., and it is sufficiently striking; but Dr. Henshall's observation adds additional interest to the species. In the market at Key West, where fish are brought in alive, and are killed after purchase, fishermen usually strike the fish on the skull with a stick to stop their struggles quickly. The hogfish is chiefly brilliant red in color and after having been struck on the occiput this color disappears rapidly and in less than two minutes the body assumes almost a white tint. Nothing else could better illustrate the power fish have to control their colors at will.

Another curious animal from Key West is the so-called "electric shark." This is not really a shark, but is related to the common skates or rays. In the books its name is given as *Rhinobatus lentiginosus*, and its power of giving an electric shock is not mentioned in any of the works before us at present. About a dozen species of *Rhinobatus*, however, are recorded, chiefly from the East Indies, South America and the Mediterranean, and one of these. a South American form, has received the name *R. electricus* from an old author. The family is described as lacking an electric organ, but Dr. Henshall says the "electric shark" of Key West certainly has electric powers and the fact was proved to him by some fishermen of that locality. The glands, he states, are situated immediately behind the eyes and a shock can be felt by placing the fingers upon them.

There is in Florida a little electric ray, similar to the crampfish or torpedo of the seas further north; this has a well developed electric organ between the breast fin and the head, and to this one, perhaps, the name may be more generally applied.

CONNECTICUT TROUT OPENING.—Norwich, Conn., April 10.—The opening of the trout season here has been a bitter disappointment to the anglers of this vicinity; the fishing has been the poorest known in many years, notwithstanding the predictions to the contrary. Only two or three good catches have been reported since April 1, the only trout worthy of note being a fish of 3lbs. weight caught by T. Wallace, of Greenville. My own experience has been the same as the rest, and I shall do no more fishing until we have rain and warmer weather. This state of things is due no doubt to the continued drought of last March, causing the streams to be in a low, sluggish state, and the weather here continues cold and raw. We are in hopes of better luck bve and bye, and when it comes will write to that effect.—PRESTON.

Fisheulture.

PLANTING TROUT FRY.

FROM the Pennsylvania Fish Protective Association we have the following instructions for handling and planting trout fry. We are frequently applied to for information on this subject and are glad to have it in the concise form devised by this active and useful society. The demand for trout in Pennsylvania was greater than the supply this year and the Legislature will be asked to appropriate money for a new hatchery, centrally located.

DIRECTIONS.

Trout fry should be planted in small spring runs tributary to the larger stream in which they will live until large enough to run into the latter.

If the water in the can is warmer than that in the run, the temperature should be equalized by mingling in the can before emptying, as the young fish are sometimes killed by a too sudden change of water.

If trout fry are transported a long distance from the station before depositing, a small piece of ice occasionally placed in the can will be useful, especially if the weather is warm.

The cans wil be prevented from excessive heating if partly covered with a light cloth.

If the fry show signs of exhaustion, coming to the surface, the water should be frequently aerated. This is best done by dipping the water from the can, and letting it fall into it from some height, so as to force air into the water.

Not more than four cans of fry should be placed in a stream eight to ten miles in length, and these should be deposited in spring runs at nearly equi-distant intervals, as when too many trout are deposited in any stream, the supply of fish food will soon be exhausted.

Fry should be deposited in the run when the journey's end is reached. They will not live over night without constant attention.

Trout are sent from the hatcheries of the Pennsylvania Fish Commission when over three months old, and are amply able to look out for themselves if deposited in the spring runs where large and voracious fish cannot get at them.

The Kennel.

FIXTURES.

DOG SHOWS.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.
May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.
Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.
Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

FIELD TRIALS.

Nov. 8.—Second Annual Trials of the New England Field Trials Club, at Assonet, Mass. Geo. E. Stickney, Sec'y.

RETRIEVING AT FIELD TRIALS.

Editor Forest and Stream:

I feel the subject of retrieving at field trials to be an important one, and a matter that concerns all sportsmen, particularly those that are interested in the development of high-class dogs and wish them brought before the public as near as possible on an equality.

There is no sportsman but that loves to see a fine retriever, and nothing in a day's sport that gives one more satisfaction than to see his dog go promptly and pick up a dead bird and fetch it cheerfully. We all love a nice retriever, but is it practical and can it be put on an equality at field trials? I do not think it can be, and if it cannot be on an equality, then I say do away with it in all classes and at all the trials, and start the dogs under such rules that none of them are handicapped by asking them to do work that is fair to one and unfair to the other.

Many of your readers will ask, why fair to one and unfair to another? For this reason. There are so many complications that come up during the running of a series of heats that cannot be provided for, and in this the handler comes in as a very important factor, in fact I might say, he can entirely control his part of the work, and the dog he is handling may not get a chance to retrieve, owing to the handler persistently missing birds when ordered to shoot. Particularly is this the case if the birds are found in bad places, even though the dog is a fine retriever. I do not recall any handler that would kill a bird and take the chances of its falling in a bad place for his dog to find, and, after trying, have to give it up, thereby hurting any good work done before.

Another bad feature. A brace of dogs are started, they go out nicely, one dog finds a covey, the other dog comes up and backs, a nice piece of work for both dogs, the dog on point having the advantage, the handler is ordered to shoot and kill. His dog being a nice retriever, he puts up the birds and kills one, apparently; both dogs are in position to mark the covey, the dog backing is held steady, with his eyes riveted on the spot where the birds disappeared; the other dog is now ordered to retrieve, he starts promptly, and goes to the spot where he marked the bird fall, and he tries to find it, it is only crippled, and has run, the dog gets the trail, and dashes off for it, and after a hard struggle the bird gets into a brook or under a log and gets away, and the dog, though a good retriever, gets no credit. The judges not having seen the dog before, possibly demerit him. The dog comes back from his chase hot and completely demoralized, and now comes the worst feature of the whole thing, he has completely forgotten about the covey or where they went. Not so with the other dog, he is eager to go to them, and the dogs are started for the single birds, and the dog that did the backing goes for them like lightning, and before the other dog has a chance to get straightened out, points one; the tired dog is called up to back, and does so promptly, the dog pointing this time will not retrieve, or if so very poorly, his handler is ordered to shoot and kill, but here the handler is captain, and misses purposely; the dogs are ordered on, and the same dog knowing he is among scattered birds, nails another, the handler is ordered to shoot. This time he forgets to load his gun. Dogs ordered on again, the same dog makes another point, possibly has not gone 10ft., handler ordered to shoot again, his gun misses fire. Handlers with a poor retriever always have just one more scheme by which they can make it appear natural. By this time the birds have all gone, and the good retriever is losing caste, and why? because he was asked to do something that cannot be put on an equality.

Another brace go down, one a good, and the other an ordinary retriever, each dog makes a nice point on single birds, the handler of the fine retriever is ordered to kill and he does it, but unfortunately the bird falls in a very bad place, and the fine retriever works industriously, finally gets hold of the bird, but is compelled to go around the briers to get to his handler, thus the whole piece of work seems ordinary.

The other handler is now ordered to kill, and, fortunately for the poor retriever, the bird goes in another direction and his handler kills the bird and it falls in plain sight of the poor retriever on a bare piece of ground; the dog is ordered to fetch, and he sees the bird fluttering in plain sight, dashes out, picks it up and brings it in nicely, and everybody, including the judges, are delighted. That settles that dog; he is a fine retriever. I do not want you to feel I am hard on the handlers, but I will wager any amount there is not a professional handling dogs to-day that any set of judges could get to kill another bird for this same dog during the balance of the race. Why should he? His dog went out nicely and picked up a bird that was lying in plain sight, and made a good retrieve, he has nothing more to gain, and if he kills luck might be against him this time, and the dog fail completely; the good retriever of this brace might not get another opportunity, and consequently he has lost to a lucky dog.

There are other reasons why I believe retrieving should be done away with at field trials. Among them is this: A field trial competition cannot possibly be rated as an ordinary day's shooting; it cannot be conducted as one, and the dogs cannot be handled in the same manner and give satisfaction to the people who pay out their money to run their dogs, or to the people who attend the trials as spectators. A field trial is a contest from start to finish, and every person there is eager to see the winners, consequently they do not want any delay, they want to see the dogs go, and a little hitch in the programme causes unpleasant feelings and dissatisfaction, and retrieving causes delay.

After running the Derby, where no retrieving is required, then comes the All-Aged class; the change is marked, and every person seems uneasy, as though they felt that retrieving was an unnecessary delay without any benefit.

Personally, I could submit to any delay, providing I could see where retrieving assisted in arriving at a positive conclusion as to which was the best dog in a race, but I cannot; I can only feel that it complicates matters and is of no consequence.

A field trial dog is standing there alone, and as long as he is used for that purpose you cannot make him a sportsman's shooting dog; he must be fitted for the purpose, and kept there like a racehorse or trotter. After he has finished at field trials he can then be brought down to a sportsman's shooting dog; and if he is a first-class field trial dog, with good management he will make a sportsman happy, and can be taught to retrieve. N. WALLACE.

SAVANNAH, Ga., April 9.

Editor Forest and Stream:

Mr. B. Waters, the most able writer "this side of the equator" on field work, says that the position held and set forth by me is also held by a large number of sportsmen throughout this country, but thinks the illustrations that I selected were unfortunate ones. Perhaps so; certainly just as unfortunate as to say that the younger associations that have been organized by gentlemen of experience and ability are "too impulsive" and "retard progress." I know that many Smiths and Joneses have attempted to lead in what they deemed great undertakings and have failed, but the Smith and Jones that I referred to did not fail, although they were scoffed at by the all powerful associations, cliques and dogmas of their day, but became the most glorious, enlightening and progressive of all movements in the known world. So do not denounce my illustrations, for some of these younger field trial associations may yet bring out something good enough to educate even the old Southern field trial clubs of renown whether they are good or evil. Now there is but little use in our arguing about these matters even though I had the ability to cross foils with you, for you now seem to take the ground unqualifiedly, that it's an entirely different business, principle and purpose, to work a dog in a public field trial from working a dog in the usual way sportsmen use them, when following their inclinations to go afield for a day's pastime in search of health and a few birds. If the object of the field trials is not to teach the lover of the dog of the best breed or strain for the work that he is intended to perform, then I for one don't know anything about them. I used to read your writings with much pleasure and admiration for you, when you gave us so much of the practical good common sense. No longer ago than Feb. 11 I read the following from you. Let us read it again; it's grand:

"Now, I am engaged in training dogs, and consequently have to suffer to a certain extent for many of the foolish decisions rendered heretofore. The dogs who have won because the judge said so, and many times have exhibited qualities undesirable in a dog intended for breeding purposes, have on the strength of their record been extensively bred to; and consequently the market is flooded with a lot of pedigreed curs with a field trial record as long as your arm.

"My candid opinion is that the qualities most essential in a field dog cannot be exhibited until that dog is trained for the purpose for which he is intended; for this reason there should be strict rules defining the term 'training,' and no dog should be eligible for a place until he is trained. Some people think that some of the rank brutes, that are now ranked as 'high class,' can be broken and still show the brilliant work exhibited by bolters and chasers. Some of them, perhaps, can be placed under control. Possibly so—if so, make the trainers do it or keep them in their kennels. Their disposition will not admit of it. As long as they can have their own way they are 'brilliant,' but when they are crossed they quit the game and become 'plug shooting dogs.'

"Now, I am an admirer of great speed, dash, style, and every other desirable quality in a field dog, but I want all of these qualities under control; and I am positive that field trials are the proper places to prove that such qualities are under control. I believe that you and I fully agree on the technical terms in common use. I believe that pointing is a voluntary act, and backing identical to it A dog that drops on his belly in either act is not assuming a pointing attitude. He drops all right, but what proof have we that he drops at scent or sight, or through fear of being knocked down with a club.

"This same rule applies to steadiness. I believe the act should result from previous training rather than a bat with a club or a loud yell at every occurrence. In short, I believe a field trial should be a place to exhibit the manner of handling trained dogs rather than the exhibition of dog training."

There is no question but that better training should be insisted upon at field trials; not that it should have any competitive value, but that the dogs cannot exhibit properly their abilities or compete in a fair manner without.

It is also true that many dogs will work with great dash and earnestness while working to suit their own inclination, but if under the restraints necessary in working to the gun they become indifferent or partially so and sink to the very ordinary. Many of the dogs which apparently do not "train on" in their second or later years are generally of this kind. It is not that they do not train on so much as that they were never trained or not broken in their first working year or were very imperfectly broken, and in their second or later years, when the training is more thorough, the dog, being unable to indulge his hunting inclination to his own selfish purposes, drops from the grade designated by that much-abused and perverted term "high class" to the level of the mediocre.

By some inexplicable growth in field trial sentiment, a dog with a lively set of legs, and powers to gallop long stretches here and there, is almost certain to be foisted on the sporting public, if possible, as a high-class dog. He may be hard-headed, a blunderer on his birds, a self-hunter in part, erratic in disposition or flighty in head, and with poor judgment in his work and perfect disso-

bedience; yet all these parts apparently are ignored or lightly considered.

A well-broken dog is hopelessly handicapped at a field trial as conducted at present. The continuous blowing of whistles and loud interminable orders will balk such dog so constantly as to bewilder him or at least so mar his work as to place him outside of all chances to win.

Then on April 7 you give us something that sounds very different to me; your first love must have turned the cold shoulder, or you have joined another church. Let us read again from your powerful pen:

Now, what are the purposes of a field trial? They are generally considered as being a test of the natural capabilities of the dogs; and by actual competition it is apparent wherein the superiority lies. The purposes are not at all as in field shooting. Two dogs compete, one endeavoring to beat the other, and two handlers are at the same time applying their skill to attain the same end. Thorough training is here necessary for several reasons. It is necessary so that a dog's qualities can be properly and methodically exhibited, and it is specially necessary so that an imperfectly broken dog shall not unduly interfere with his competitor.

All associations have wisely refrained from giving any value to breaking or training in the scale of points. To do so would be to give value to qualities due to education and the superior skill of one handler over another. The natural qualities of setters and pointers, so far as they relate to field work, are pointing, ranging, speed, tractability and bird sense, which includes intelligence, memory, knowledge of the habits and haunts of birds, and the best manner of locating and pointing with skill and precision. Backing is by some considered a natural quality, but, at least, it is chiefly peculiar to pointers and setters. If to these qualities retrieving is added then is a quality admitted which is educational and which is not peculiar to the setter and pointer, inasmuch as it can be taught to all kinds of dogs. As between two dogs of equal capabilities, the one which was the better retriever would probably have had the better trainer. A field trial being for the improvement of the pointer and setter, and it not being an ordinary day's shooting, why should a setter or pointer be required to do something in competition which is foreign to it? It is true that some setters and pointers retrieve better than others, but it is not simply because they are setters. There is just the same difference in the performance of other breeds, or even curs, as retrievers. Moreover, if the value of retrieving, which is largely educational, is admitted in a scale of points, other educational qualities, such as turning to whistle, remaining at heel, dropping to order, steadiness to shot, etc., should also have a value, since they are all essential in an ordinary day's shooting.

You see by the above that when he gets retrieving ignored, then he will want to have us all ignore "steadiness to shot," etc., and in fact it would seem, all orders that makes him practical and useful. In other words, let the dog run as his will dictates and the handler be only able to follow when mounted on a Longfellow, Ten Broeck or Salvator. Please allow me to make an amendment to your ideas of field trials with your so-called "high class dogs" without education. Resolved, that in all future field trials we shall have greyhounds sent out in all directions with men operating powerful telescopes to see if there are any birds in the county, and when there are birds flushed by said greyhounds the men at the telescopes shall mark them down and announce where they are, and then the judges by a given signal (I would suggest firing a gun) will start the handlers on their high-mettled horses with their "high-class dogs," and the dog that gets there first in a single-dash heat shall win the prize. Then there shall be an attendant provided for each handler, to follow on horseback, carrying in his arms a retriever to bring in any bird that the handler may have dropped by his expertness on some smooth, open place, where it can be easily found. Wouldd't it be grand and high-class sport, you know!

Now, my good friend B. Waters, don't try any more to erase from my memory those glorious days when I have been out with dog and gun and have strolled so leisurely and comfortably about the stubble field watching my dog making the circuit, knowing full well that if a quail had run off, or on, my educated dog would find the trail and locate the bird, standing steady to wing and shot, and at the word he would retrieve in the most careful and considerate manner. Don't use your eloquenee to make me forget the days, when by some cooling stream I have hied on my dog to search its bushy banks for partridge or woodcock, but instead do all you can to make life's memories more agreeable and enjoyable, for there is nothing that clings more pleasantly in one's memory, except it be what has been termed by some "the spirit of the press," when that spirit comes over a young man and he has just the good, intelligent and enlarging nature to assist him. He may take his dog from his kennel, but he will not go to any field or thicket unaccompanied by such human friend, although the fields may present all the spirit of invigorating grandure, outstripping in its autumnal tints the bow of promise itself, but there is nothing else in this wide, wide world that by preference will keep those from the field with dog and gun, whose taste and fancy leads them in that direction on a beautiful day, when the frost has thiuned the leaves and the game birds are fat and plump. Give us the dog that is fast, intelligent and staunch, well educated and under perfect control, and one that will retrieve a bird that has fallen on thin ice over the pond, even though he has to break a channel through the ice for two rods to get it. S.

NEW HAVEN, Conn., April 9.

Editor Forest and Stream:

A few words on retrievers, not on the manner of teaching, as that, I hold, depends upon the dog entirely. Some will take to it naturally, others will need force, and no arbitrary rule will apply to all. But shall we allow our "smell" dogs to retrieve? That is the question I would discuss, and with a good many years experience say positively, no. I believe it a serious handicap on our dumb friends to have them pick up and bring in a fluttering or even a dead bird, that their nose must become tainted and the delicate edge dulled by contamination. I am not very "English, you know," but have always believed in their way of having an extra dog for the retrieving, and where this cannot be had, break your dog to point dead. This, I say, is and always has been my belief, but must admit never my practice. My dogs have always been first-class retrievers from land or water; and when I first began shooting, thirty-five years ago, birds were more plentiful than now, and it wasn't necessary to draw the cover with so fine a comb to get a fair bag of birds as it is to-day, and my dogs always got so much pleasure from bringing in a shot bird that it seemed like robbing them of half the delights of the day to deny them retrieving. Did you ever start out for a day's sport and early in the morning have your dog interview a skunk, and get it in his face? I have. And do you know what I did? Took him to a brook and washed off what I could of it, and went home. That's probably what you would have done. You wouldn't expect a dog to smell a bird that day—no. He couldn't smell another skunk.

Do you know how close an old ruffed grouse will lie when skulking, she hears you when you first come into the cover, brings her feathers down and gives out very little scent. A dog's nose must be fine to catch it, and unless he happens to, or yourself, step too near, she stays and you go by. A man never knows how many times this happens to him, but if he chances to wing a bird and loses it, it's all his dog's fault, because not a good retriever. We will suppose you walking on the street, and from some neighboring garden came to you the faintest smell of roses, then take a rose and rub it over your nose and beard and walk the ground over again, do you think you would detect this fragrance in the air a second time?

I have shot but very little for the past seven or eight years, trouble with eyesight being the principal reason, but last fall I accepted an invitation from Mr. E. O. Damon, of Northampton, for a day's outing, and a most enjoyable day it proved. Mr. D. is a sportsman and the owner of general high-class dogs. We had this day but one, his Rod's Whim, and a thoroughly good dog he is, tractable, quick in his work, going to his birds intelligently and holding them well.

I am not trying to advertise Mr. D. or his dogs, but wish to give a circumstance that occurred in support of my opinion and what I have written. It so happened in driving out in the morning Mr. D. had asked my opinion in regard to retrieving and I had given it much in substance as I have given in this letter. We had been to lunch and already had seven or eight birds in the bag, in the getting of which the little dog had made no mistake, showing a nose as fine as silk. As we stepped over a brook a woodcock jumped, which was killed and Mr. D. sent Whim to "fetch." They had a little argument before it was over, but it resulted in the dog retrieving, sitting down and delivering nicely into his master's hand.

We had gone only a few rods, when directly between the dog and ourselves, not more than 20ft. from us, jumped a ruffed grouse. The dog had been entirely around the bird and was not 20ft. from her when she rose, but got no scent whatever.

Mr. D. turned to me and said: "What do you think of that? How do you account for his not scenting the bird?" I only replied that it was a practical, and I thought beautiful, illustration of my theory on the retrieving question, and called his attention to my remarks on the rose in the morning; but the woodcock being so entirely different, it was like rubbing his nose full of geranium and then expecting him to catch the faint scent of the rose. Had not the bird happened to lie directly in our course, she would have been passed, as I believe many more are, than are lost, when a dog is broken to point dead. WM. M. WILLIAMS.

SPRINGFIELD, Mass., April 10.

Editor Forest and Stream:

With regard to whistling at field trials it appears to me that it is a question that involves the much more important consideration of ranging. The way in which a dog ought to range, is I think the great question of the day, and the present difference of opinion on that subject is the real cause of nearly all the dissatisfaction we hear of after the trials.

To teach a dog to range to perfection, requires more time and skill by far than any other part of his education, and when he is thoroughly trained in that respect, whistling to him is only necessary when it is desirable to attract his attention or call him in. No dog can be called "high class" which does not range fast and wide in open ground, but a dog that persists in ranging wide in ground that is unsuitable for wide ranging, and ought to be hunted close, is not properly trained. A "high class" dog is one that does all his work in the best form; many dogs are very strong in some respect and weak in others, it is the dog that handles his game properly, and in good style, neither false pointing, nor flushing, nor pottering, and that hunts his ground well, that is entitled to be called "high class."

With regard to retrieving, I think that a shooting dog ought to retrieve in this country, as it is a great convenience to most sportsmen his doing so—at the same time I do not think that a good retriever is necessarily a high-class dog, for it is a matter of fact that many potterers are excellent retrievers. The only value I would place upon it in a field trial dog is: that it gives one an opportunity of judging of his disposition, a dog that cannot be taught to retrieve well, must be sulky or miserably timid. I am sorry I have not time to write more fully at present, but I have given you my views in a general way. C. E. MCMURDO.

Letters from W. B. Wells, Thos. Johnson and A. J. Gleason have been received and will be published in our next issue.

THE DENVER SHOW.

THE third annual bench show of the Continental Kennel Club Company was held in Coliseum Hall, Denver, Col., commencing on April 13 and lasting four days.

Mr. John Davidson judged all classes, and his awards were well received, there being very little grumbling, and what little there was was from the inexperienced exhibitor. The judging was very good and correct, but it was not a difficult matter to place the winners, as, except in one or two classes, the competition was not close.

The dogs were fed on Spratts Patent biscuits, on which they thrived well during the show. The benching was good, the partitions being of wire work. The building was well suited to the purpose, there being plenty of room and good ventilation. The show was kept sweet and clean. The management was excellent. Mr. R. W. Isenthal, secretary of the bench show committee, acted as superintendent, and it is due him to say that he performed the duties of the office skillfully, thoroughly and obligingly. The preparatory work was done by him. Mr. F. W. Rand, the secretary, assisted Mr. Isenthal in running the show, he acting as ring steward. The disinfecting was done with Sanitas.

The wolf, Greely, which made such a great reputation on such a small performance, was on exhibition in charge of the boy who has cared for it since it was captured. Greely was a most uncomfortable animal on the first day, he walking restlessly and nervously to the length of a long chain with which he was fastened on the gallery in plain view of all spectators. In front of his bench, hanging over the gallery railing, several large wolf skins were hung, and on these a large placard was hung which bore the legend, "The wolf that couldn't be killed by any dog." Notwithstanding this very broad claim, the wolf excited very little interest. He was handled freely by visitors, and was led through the crowd of spectators repeatedly in bringing him to and from his quarters, and the only alarm manifested was by the wolf. In this connection it may be said that the defeat of the Psovois was a foregone conclusion in the opinion of resident sportsmen, and they predicted the failure. The fact alone that the dogs were unacclimated would alone insure their defeat, the high altitude and rarified atmosphere incapacitating them from any prolonged exertion. Some of the best wolf hunters of that region maintain that the trial proved nothing as to the Psovois' real merits. It may be mentioned also that in Denver the price paid for the wolf, according to Mr. Lowe, the purchaser, was $50, a reduction of 75 per cent. from that given to the public in the reports of the match. What good could be accomplished by adding $150 to a $50 transaction is not apparent. But this is a digression from the main subject.

The attendance was good and there was every indication that the club would come out ahead financially, as it deserves to do. The managers deserve every encouragement in holding their show.

Mr. Harry L. Goodman, of Auburn Park, Ill., took the first special prize, $65, for the handler showing the largest number of dogs in the best show condition; John H. Naylor, of Mount Forest, Ill., taking second.

MASTIFFS.—These classes made a good showing in numbers, although a number arrived too late to be judged. Mode had a walkover in the challenge class. He was not in good condition. He is light in barrel, weak in back and stands badly on his legs. Hector was first in the open dog class. He is somewhat coarse, ears too large, and he is deficient in symmetry. Lyon, second, is long in face, has large ears, was in poor coat and is somewhat coarse. Prince, the reserve, has a poor head, a long, light muzzle, carries lumber in his shoulders and is coarse; he has a good body. The remainder of the class was ordinary. Countess, first in the bitch class, has a fairly-good skull and shadings, and was easily the winner. Her forefeet turn out, muzzle light, sway-backed, lacking in character. Duchess, second, is ordinary in every respect.

ST. BERNARDS.—There was quite a good showing in these classes. First went to Don El Paso in rough-coated dogs, open class. He is a large dog and displayed remarkable activity. He has not sufficient depth of muzzle. He stands well on good legs and feet, has a good body and symmetry. Second went to Caleb, a dog of moderate quality. Prince Bedivere, narrow in muzzle, heavy dewlap, a bit light in body, although the dog was too thin in flesh, forefeet turn out somewhat; he has good bone, excellent hips and hind-legs. In bitches, Alta Berna took first. She was too thin in flesh; legs well-shaped and muscular; good bone, head, skull and markings. She is only 16 months old and is a remarkably good puppy, and will improve more with age. Lady Glenwood, second, is weak in hocks, long in face; she has good body, legs and feet. But one rough-coated puppy was shown, Montrose II., narrow in skull, long nose and light body. Victor had a walk over in the open class for smooth-coats, and was ordinary. In bitches, Youla, a clean-limbed, active bitch, won first. She has a well-ribbed body and good symmetry, but having recently weaned a litter of puppies, was not in good condition. Second went to Queen Vera, light in loin, poor in head, and inferior in quality to Youla. The rest of the class was ordinary. In puppies, Valkyrie, a fair but undeveloped puppy, took first. Jean, second, was in poor condition, lean, and of ordinary quality.

GREAT DANES.—Pedro, well known and looking in good condition, had a walkover in the challenge class. There were three competitors in the open dog class. First went to Hindoo, light in body, plain head, rather light built and long cast, and in color a poor brindle. Don Juan, second, was a common, coarse dog. Charmion took first in bitches. Her skull is narrow and head roughly shaped; she shows throatiness, is light in body and poor symmetry. Second went to Bell; she carries one ear hanging, the other cocked, which mars her expression; she has a coarse head, flat ribs, short, thick neck, and is lacking in symmetry.

NEWFOUNDLANDS.—But two were shown in the one class provided for them. Jim, a fair specimen, was awarded second, first being withheld, which was a mistake, as he was entitled quite as much to first as were some poor specimens which were awarded prizes in other classes. Ben, the other entry, was weedy and small, and had no merit.

BLOODHOUNDS.—Jack Shepard, well-known as a winner, had no competition.

PSOVOIS.—All the entries were Mr. Hacke's. Having been worked on the plains, rabbit coursing, for the past few weeks, they were thin in flesh and out of coat. Pospekh, a dog of good bone and muscular development, won first, second going to Zloeem. Two bitches were shown, Prokaza and Zanoza, first and second in the order named.

GREYHOUNDS.—Greyhounds were well represented both in number and quality. Lord Neverstill, a large hound of great muscular development, won first in the open class; he stands badly on his pasterns; as he was described in the report of the Chicago show lengthy mention is unnecessary. Prince Charley, second, stands on good legs and feet, has a plain head and is pig jawed. Saint, coarse head and ordinary in character, got vhc. In the open bitch class there was a keen and close competition for first prize between two rare good ones, Pearl of Pekin and Little Climber. The judge, after a most careful scruteny, awarded first to the former and second to the latter. Both were in excellent condition and hard as nails. Pearl of Pekin had better and more uniform muscular development, and better loin and back; both have excellent symmetry. Mr. Lowe objected very positively to the decision, but, while he has a remarkably good bitch, the judge's award was correct. The rest of the class was about average in quality. Four puppies were shown. Lord Severnettle is strong in back and has good quarters, his neck is somewhat short, legs and feet good. Punch, second, is quite a fair puppy, poor head, otherwise fairly good.

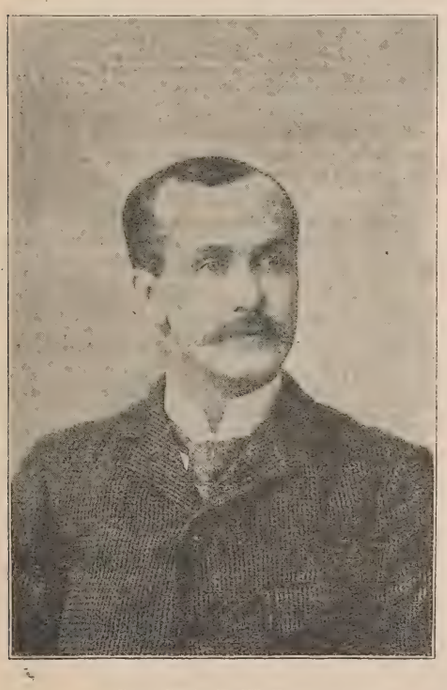
POINTERS.—As a whole, they were an ordinary lot. In the open class for heavy weight dogs Count Graphic, a well-known winner, won first. Second went to Governor Fritz, heavy in skull, coarse head, stands a bit out at elbows, coat out of condition. Two bitches competed. The winner, Nellie Buckles, is sprung too much in ribs, heavy neck, narrow muzzle, carries lumber, ordinary quality. Graphic's Rose, second, has a plain, light head, narrow skull, is a bit high on legs, but her symmetry is fairly good. In the class for dogs under 55lbs. two competed. Graphic's Topic, the winner, is too heavy in neck and shows some throatiness; he was not in good coat, ribs not sprung enough, good back, loin and quarters. Two light-weight bitches were shown, Dido and Bangle R., the former first, light in bone, narrow in skull, good back and quarters. Bangle R., second, has a short, light head and light body. Aberdeenshire Boy was the only puppy shown.

ENGLISH SETTERS.—The open dog class had eight competitors. Frank Doncaster, the winner, is good in bone, has an excellent back and loin, stands on good legs and feet, a well-shaped head, the outline of which is marred by throatiness, excellent symmetry and muscular development. Second went to Donald Furness, quite a good setter, but was shown in poor coat and thin flesh. The reserve, Menifee Doncaster, is out a bit at elbows, good back, shallow chest, good legs and feet, and fairly good head. The rest of the class was hardly up to the average bench-show quality. There were but two bitches, Sis and Crazy Queen; the former winning. The latter is out at elbows, thin in flesh, ears set on too high, a bit flat in ribs. Sis has a heavy masculine head, good legs and feet, fair symmetry. Sandy won in the puppy class without competition.

IRISH SETTERS.—Two poor ones were shown in the open dog class. Dawn, the winner, was shown too fat, carries a great deal of lumber, is not first-rate in legs. Sir Sharon, second, is light in body and weak in hind legs. First could have been very properly withheld in this class. Gipsy H., the only entry in the bitch class, was absent. Two puppies competed. Mohawk Fancy, first, has a poor head, but otherwise is quite a good puppy. Her competitor was ordinary.

GORDON SETTERS.—Tom II., a well known dog, had a walkover in the challenge class. The open class for dogs had no entry. Topsy II. had no competition in the bitch class. She was only average in quality.

CHESAPEAKE BAY DOGS.—Wyoming Belle, a weedy bitch with no particular merit, was the only entry and was awarded second, fully as much as she merited.



IRISH WATER SPANIELS.—Four were shown, all of which were out of coat. Two competed in the open dog class. The winner, Tough, is long and light in body, and has a well developed moustache. Fritz, second, has a tail well covered with hair, light body, coarse head. Lilly Pad, first in bitches, has a straight woolly coat, a good tail, light body. Rags, second, has a poor coat and is ordinary in quality.

CLUMBER SPANIELS.—A fairly good lot were shown. Bustler had a walkover in the open dog class. Lady Florence, first in bitches, has good legs, feet and body, but is rather small. Second went to Denver Lass, shown too fat.

FIELD SPANIELS.—Newton Abbott Torso, first, is a very good spaniel, well known as a winner at Chicago this year. Second went to Don, high on legs, plain in head but good bone; has some topknot and poor field spaniel character. Pippo, the reserve, is high on legs, plain head, open curly coat. Fleet, vhc., is only moderate in merit. In bitches, Denver Dell won first. She has a narrow, light muzzle and is a bit high on legs. Topsy, second, has a plain head, a light muzzle, and poor symmetry. Feunie, the reserve, hardly deserved mention.

COCKER SPANIELS.—King of Obos had no competition in the challenge class. He was weighed before being judged, and turned the scales at thirty-three pounds. As he had no competition nobody protested, and he was neither disqualified nor transferred to the field spaniel class. The importance of the omission was not discovered till the competition for cocker kennel prize began, when a nice question arose. The weight having been known before the judging, the managers having allowed the dog to compete thereafter, none of the exhibitors protesting, the question arose whether a protest could be made, and whether the club could make a dog suffer a hardship by an act of negligence; for, King of Obos being overweight, he could have been transferred to the field spaniel class before the judging, whereas, after the judging, he could not have won anything if disqualified. As it was, the Ancient and Modern Kennels won the kennel prize, which was an injustice to Mr. Kellie Cookson, whose kennel should have won. He made no protest, although he knew that he was entitled to the award, and desired very much to have the win as a matter of record. In consideration of the whole matter being the result of what was intended as a kindness to King of Obos, with no intention to harm others, Mr. Cookson made no protest. In open dogs, Bob Obo, Jr., good in bone; legs and feet well made, good head, but a bit full under the eye, won first over Amusement, a good spaniel; his head, however, is more of field spaniel than cocker type. Rideau Romulus, the reserve, has a head of field type; light body; good coat. In bitches, Queen of Spades, too high in flesh, won first over Tiney Obo, plain in head, shown too fat, but of good spaniel character. The rest of the class was about an average lot. In puppies, Bob Obo, Jr., won, Amusement second, the same positions as in the open classes.

COLLIES.—In the challenge class, Maney Trefoil, the only entry, has greatly improved in coat, has an excellent frill and mane, has thickened some in skull, eyes a bit full, ears could be better carried, coat ample and dense. In open dogs a puppy six months old won first. He is of fair size, coat somewhat soft, is not yet furnished, fairly good expression, ears large, thick and set on high. Oscar, second, is a poor specimen of a collie; he has no collie character, ears large and badly carried, hard but scant coat, heavy head. In open bitches first was won by Louie Long, a sweet little bitch, a little undersized; good, plentiful coat, good expression, ears

CLUB SEC'Y F. W. RAND.

good size, but not always well carried, frill a bit short and bone not quite heavy enough, body well shaped and well ribbed. Heatherwig, second, would have been a better first; she is better in bone, ear and expression, the best of feet, tail well carried, a trifle short of frill and cheeky. The reserve, Spoiled Miss, shows age, but is still a good one. Mermaid, vhc., is not a bad bitch, but has several faults; head short and thick, coat scarce and soft. Denver Jack took first in puppies. Princess Sheila, a litter sister to the winner, is light in bone, large ears badly carried, coat soft.

BULLDOGS.—The bulldogs on exhibition numbered four. Bo'swain, well known, had a walkover in the challenge class, Duchess of Palma being entered to compete for special only. African Monarch had no competitor in the open class. His head lacks bulldog characteristics. Peckham Lass was shown at Chicago and New York this year. She had no competition in her class.

BULL-TERRIERS.—Sir Monty II., showing cheekiness, and though a fair dog, is lacking in symmetry, won without competition in dogs. Chautauqua Lottie, a weedy, small bitch, without any merit, won without competition in bitches. The prizes should have been withheld from her.

BEAGLES.—One beagle only was shown, Dottie R , a fairly good all-round beagle.

FOX-TERRIERS.—In open dogs Dixie Tartar won first. He shows middling character, head fairly good, ears small and well carried, feet a bit flat and open, elbows turn out a little, good coat, condition bad, legs a bit long. Second was won by Blemton Match, too full in eye, lacks expression, cheeky, slack in body, legs and feet good, good ears, soft and scant coat. Little Tot, vhc., is a poor specimen. A fairly good wire-haired was first easily in bitches; she is good type, a trifle large in ear, coat hard, good bone, a little wide in front, out a little at elbows. Tuggy, second, hardly merited the place. Susie, vhc., is a wire-haired, is long cast, being high on legs and long in body; she is lacking in quality.

SKYE TERRIERS.—But one, a poor specimen, was shown.

TOY TERRIERS, OTHER THAN YORKSHIRE.—Two apple-headed small black and tans were shown, neither of which had much merit.

PUGS.—There was a good lot shown. Sateen had a walkover in the challenge class, the other entries being for specials only or absent. In dogs, Little Duke, a nice dog in every respect, and shown in good condition, won first. Jay Bacon, second, had some throat trouble, which marred his appearance. His color looks a little faded; his head resembles that of his celebrated sire, Sprake. Punch, vhc., is coarse, too large, and his color is smutty. Toadie, a bitch of excellent merit, won first over Nobody's Baby, a bitch of nice size and a winner this year at recent shows. Lady Talent, the reserve, is long in face, high on legs and long in body. Bonita, vhc., is an unfurnished puppy, very fine for her age and undoubtedly will greatly improve. Penrice Boy had a walkover in puppy class.

ITALIAN GREYHOUNDS.—But one was shown, Dude V., too large in size, straight in back, full in eye.

MISCELLANEOUS.—Fritz, a good Pomeranian, was the only entry in this class. B. WATERS.

PRIZE LIST.

MASTIFFS.—CHALLENGE—1st, Badger & Clark's Mode.—OPEN *Dogs:* 1st, Badger & Clark's Hector; 2d, F. W. Willington's

THE BOSTON TERRIER TUMBLER.

Owned by Mr. John I. Taylor, Boston, Mass.

Lyon. Very high com. reserve, John Gaul's Prince. Very high com., F. W. Helmreich's Denver Caution. High com. and com., Dellwood Farm's Duke of Denver and Max. *Bitches:* 1st, M. Miller's Countess; 2d, Badger & Clark's Duchess.

ST. BERNARDS.—ROUGH-COATED.—OPEN—*Dogs:* 1st, Myrtle Kennels' Don El Paso; 2d, Burr R. Geddes's Caleb. Very high com. reserve, A. C. Shallenberger's Prince Bedivere. Very high com., Edward Eddy's Bonaparte. High com., J. J. Huddart's Aldebran. Com., Harlan & Robinson's Montrose II. *Bitches:* 1st, A. C. Shallenberger's Alta Berna; 2d, Fred Ewing's Lady Glenwood. Very high com. reserve, Edward Jones's Nellie J. Very high com , A. C. Shallenberger's Countess Loua. Com., Charles McMillen's Leoma. *Puppies:* 1st, Harlan & Robinson's Montrose II.'s

ST. BERNARDS.—SMOOTH-COATED.—OPEN—*Dogs:* 1st, S. H. Waldo's Victor. *Bitches:* 1st and 2d, A. C. Shallenberger's Youla and Queen Vera. Very high com., high com. and com., Harlan & Robinson's Jean, Thunole and Biddie. *Puppies:* A. C. Shallenberger's Valkyre; 2d, very high com. and high com., Harlan & Robinson's Jean, Biddie and Thunole.

GREAT DANES.—CHALLENGE—1st, Shoquoquon Kennels' Pedro.—OPEN—*Dogs:* 1st, A. S. Tooke's Hindoo; 2d, John McAuliffe's Don Juan. *Bitches:* 1st, Herbert Nichols's Charmion; 2d, and very high com., A. S. Tooke's Belle and Volga. High com., A. L. Weston's Juno.

NEWFOUNDLANDS.—2d, E. P. Penfield's Jim.

BLOODHOUNDS.—1st, R. G. H. Huntington's Jack Shepard.

PSOVOIS.—*Dogs:* 1st, 2d, very high com., high com. and com., P. H. Hacke's Pospekh, Zloeem, Osmaday, Odinor and Oudaff. *Bitches:* 1st and 2d, P. H. Hacke's Prokaza and Zanoza.

GREYHOUNDS.—*Dogs:* 1st and 2d, H. C. Lowe's Lord Neverstill and Prince Charley. Very high com., Chas. Barrows's Saint. *Bitches:* 1st and very high com., St. Patrick Kennels' Pearl of Pekin and Miss McGinty; 2d and reserve, H. C. Lowe's Little Climber and Comedy. High com., American Coursing Club's Belle of Eltham. Com., J. W. Shaw's June. *Puppies:* 1st, J. H. Gower's Lord Severnettle; 2d, L. H. Blethen's Punch. Very high com., R. W. Byrns's Senorita. Com., Chas. Barrow's Saucy Bob.

POINTERS.—*Dogs* (55lbs. or over): 1st, Dr. John R. Daniels's Count Graphic; 2d, F. B. Alsip's Gov. Fritz. Very high com., Alex Simpson's Aberdeenshire Boy. *Bitches* (50lbs. or over): 1st, Alex Simpson's Nellie Buckles; 2d, Dr. Frank R. Daniels's Graphic's Rose. *Dogs* (under 55lbs.): 1st and 2d, Dr. John R. Daniels's Graphic's Topic and June. *Bitches* (under 50lbs.): 1st, L. M. Aldrich's Dido; 2d, Mrs. Bret Cassidy's Bangle R. *Puppies:* 1st, Alex Simpson's Aberdeenshire Boy.

ENGLISH SETTERS.—*Dogs:* 1st, M. C. Wiles's Frank Doncaster; 2d, W. S. Howland's Donald Furness. Reserve, Ernest F. Thomas's King Leo. Very high com., M. C. Wiles's Menifee Doncaster and Ernest F. Thomas's Denver. High com. and com., Ernest E. Thomas's King Leo's Pinto and King Leo's Perry. *Bitches:* 1st, John Jones's Sis; 2d, Seymour Warren's Crazy Queen. *Puppies:* 1st, J. W. Fleming's Sandy.

IRISH SETTERS.—*Dogs:* 1st, F. G. Patterson's Dawn; 2d, Kil-

THE COCKER SPANIEL I SAY.

Owned by Mr. Geo. Bell, Toronto, Can.

dare Kennels' Sir Sharon. *Puppies:* 1st, Mohawk Kennels' Mohawk Fancy; 2d, S. D. Barnes's Vic Acushla.

GORDON SETTERS.—CHALLENGE—1st, C. E. Paris's Tom II.—OPEN—*Dogs:* No entries. *Bitches:* 1st, Emma Nell Bein's Topsy II.

CHESAPEAKE BAY DOGS.—2d, B. S. Marshall's Wyoming Belle.

IRISH WATER SPANIELS.—*Dogs:* 1st, Milward Hewitt's Tough; 2d, Chas. W. Smith's Fritz. *Bitches:* 1st, C. M. Hampson's Lilly Pad; 2d, Milward Hewitt's Rags.

CLUMBER SPANIELS.—*Dogs:* 1st, Somerset Weston's Bustler. *Bitches:* 1st and 2d, S. H. Laverty's Lady Florence and Denver Lass.

FIELD SPANIELS.—*Dogs:* 1st, T. E. Taylor's Newton Abbott Torso; 2d and high com., C. M. Graff's Don and Pedro. Very high com. reserve, H. Bohm's Pippo. Very high com., Mrs. Bert Cassidy's Fleet. *Bitches:* 1st, S. H. Laverty's Denver Dell; 2d, J. C. Dressler's Topsy. Very high com. reserve, H. Bohm's Fanny.

COCKER SPANIELS.—CHALLENGE—1st, Ancient and Modern Spaniel Kennels' King of Obos.—OPEN—*Dogs:* 1st and reserve, Kellie Cookson's Bob Obo, Jr. and Rideau Romulus; 2d, Ancient and Modern Spaniel Kennels' Amusement. Very high com., F. Guiterman's Rex G. High com., Preston Power's Puck. Com., Harlan & Robinson's Laddie III. *Bitches:* 1st, Ancient and Modern Spaniel Kennels' Queen of Spades; 2d and reserve, Kellie Cookson's Tiney Obo and Yampa Nellie. Very high com., Herman Bohm's Kalula. *Puppies:* 1st and very high com., Kellie Cookson's Bob Obo, Jr. and Yampa Nellie; 2d, Ancient and Modern Spaniel Kennels' Amusement. Reserve, Mrs. Bert Cassidy's Yampa Kulu. High com., Preston Powers's Puck.

COLLIES.—CHALLENGE—1st, Carlowrie Kennels' Maney Trefoil.—OPEN—*Dogs:* 1st, W. L. Rouse's Denver Jack; 2d, Wm. J. McDonald's Oscar. Very high com. res., W. H. Nicholson's Rob Roy III. *Bitches:* 1st, 2d, very high com. res. and very high com., Carlowrie Kennels' Louie Long, Heathertwig, Spoiled Miss and Mermaid. *Puppies:* 1st, W. L. Rouse's Denver Jack; 2d, Carlowrie Kennels' Princess Sheila. Very high com. res., W. H. Nicholson's Rob Rob III.

BULLDOGS.—CHALLENGE—1st, Illwiss Kennels' Bo'swain.—OPEN—*Dogs:* 1st, Illwiss Kennels' African Monarch *Bitches:* 1st, Illwis Kennels' Peckham Lass.

BULL-TERRIERS.—*Dogs:* 1st, George W. Clayton's Sir Monty II. *Bitches:* 1st, Geo. W. Clayton's Chautauqua Lottie.

DACHSHUNDS.—No entries.

BEAGLES.—1st, R. C. Rinearson's Dottie R.

FOX-TERRIERS.—OPEN—*Dogs:* 1st, G. W. Sentell, Jr.'s Dixie Tartar; 2d, Kempton Park Kennels' Blemton Match. Very high com., Burr P. Geddis's Little Tot. High com., F. M. Shouler's Jo Jo. *Bitches:* 1st, L. Ogilvy's Nellie (wire-haired); 2d, F. M. Shouler's Tuggy. Very high com., Geo. Wille's Susie (wire-haired). High com., W. E. Foster's Flossie.

SKYE TERRIERS.—1st, Thos. Kilpatrick's Florence May.

TOY TERRIERS, OTHER THAN YORKSHIRE.—1st, W. O. Brinker's Tony; 2d, Frank S. Wild's Diamond.

PUGS.—CHALLENGE—1st, Howard Kennels' Sateen.—OPEN—*Dogs:* 1st, Howard Kennels' Little Duke; 2d, W. H. Bacon's Jay Bacon. Very high com., J. J. Hudddart's Punch. *Bitches:* 1st, Mohawk Kennels' Toadie; 2d, Howard Kennels' Nobody's Baby. Res., F. M. Adams's Lady Talent. Very high com., Mohawk Kennels' Bonita. Com., Ernst R. Biel's Judy. *Puppies:* 1st, Howard Kennels' Penrice Boy.

MASTIFFS.—Best kennel, Messrs. Badger & Clark's; best mastiff, Badger & Clark's Mode.

ST BERNARDS.—Best kennel, A. C. Schallenberger's; best rough-coat in show, A. C. Schallenberger's Alta Berna.

SHOW SEC'Y R. W. ISENTHAL.

PSOVOIS.—Best kennel, P. H. Hacke.

GREYHOUNDS.—Best kennel, H. C. Lowe.

POINTERS.—Best kennel, Dr. J. R. Daniels: best in show, Dr. J. R. Daniels's Count Graphic; best bitch, Alex. Simpson's Nellie Buckles.

ENGLISH SETTERS.—Best kennel, E. F. Thomas's; best dog in show, M. C. Wiles's Frank Doncaster; best bitch, J. Jones's Sis.

IRISH SETTERS.—Best bicth in open class, Mohawk Kennels' Mohawk Fancy.

COCKER SPANIELS.—Best kennel, Ancient and Modern Spaniel Kennels.

COLLIES.—Best kennel, Carlowrie Collie Kennels; best collie exhibited by a member of the Collie Club, Carlowrie Collie Kennels' Maney Trefoil.

BULLDOGS.—Best kennel, Ilwiss Kennels.

PUGS.—Best kennel, Howard Pug Kennels; best in show, Mohawk Kennels' Toadie.

FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The Ottowa bench show committee met on the first inst. for the revision of the prize list etc. The fair association in connection with which the bench show is held, would grant no increase for prizes, so the committee can make little or no improvement on last year's schedule. The show dates will be Sept. 27-30.

A prominent Canadian breeder writes me that he hopes Toronto this year will add classes for stud dogs in a few prominent breeds and also selling classes. To use his own words, "I would like to see a stud dog prize in a few of the important breeds, such as cockers for instance. This would help to increase the entry as the owner of a good dog would do his best to have as many of his get entered as possible. Another class that would fill well would be the 'selling class' if a reasonable maximum price were fixed. These classes have filled well in England and are worthy of being tried here." There seems a good deal of sense in my correspondent's arguments, and there is no reason why such classes should not be made a drawing card. I commend the idea to other committees as well as that of Toronto.

Mr. W. S. McCullagh, Kingston, is about to cross the line to reside in Jackson, Mich. He takes his kennel of spaniels with him, including Vic, first Toronto 1889; Gipsey Queen, first Kingston (field spaniel) 1890; a red puppy, Lally Selden; King Roy, by Ch. Red Jacket out of Brantford Dora, and Black Prince, by King Roy out of Gipsey Queen.

Mr. W. Barclay, Georgetown, has lost through poisoning the black cocker bitch Daisy, dam of Mr. Bell's phenomenal I Say, I Guess, Obadiah etc. He is fortunate, however, in

having left a litter sister of I Say's which he purposes breeding to the Rideau Kennels' (Ottawa) Bob Obo.

Canada so far has led in spaniels of all kinds and it now looks, from the number of terriers being imported, that we are going to have a look in in these sections also. Dr. W. H. Drummond, Montreal, informs me that he has purchased through the medium of his cousin, Mr. A. Morris, Belfast, Ireland, a brace of Irish terriers. The dog, Commisariat, is by Apprentice Boy (champion Playboy—Judy) out of Belmont (Playboy—Alpina), was whelped Dec. 22, 1890, and was bred by Mr. Geo. L. Jameson, Belfast. Belmont is the dam of Hanover Jack, who at time of writing had won two firsts and a special at the Crystal Palace. The bitch, Cora, was bred by Mr. Sales, Belfast, was whelped Aug. 6, 1890, out of Nettle by Stanley (Argus—Benedict). They will be shipped as soon as navigation opens in the St. Lawrence, the bitch being bred to a suitable dog before being despatched.

Mr. T. J. Fitzsimmons, Toronto, has an "Irishman" on the string, also from Belfast. Particulars later.

Mr. T. A. Wilgress, who recently sold Edgewood Fancy back to Frank Dole, tells me he has a great brace out of this bitch, which he hopes to show next fall.

The list of dates for the Canadian fall circuit now reads: Hamilton, Sept. 6 to 9; Toronto, 12 to 16; London, 19 to 22; Ottawa, 27 to 30, with Kingston and Montreal yet to hear from.

Major J. C. Guillot, Royal St. Bernard Kennels, Windsor, has purchased a half interest in the Dudley Kennels, Detroit. This includes an interest in Earl Douglas, a son of Lord Bute, and bitches on either side of the line can now be sent to him.

Mr. H. W. Tools, Toronto, has purchased the fox-terrier brood bitch Kismuth from Mr. T. G. Davey, London. She is by New Forest out of Elora Nettle, and is in whelp to Suffolk Coronet. She was shown but once, some two or three years ago, at London, when she was placed first in puppy class.

The path of the St. Bernard breeder is beset with briers and thistles. Mr. Frank Glass, of the Pottersberg Kennels, London, tells me that from the union of Glenisla (first puppy class Toronto and London 1890, and Toronto 1891) and Refuge II., he had nine grand puppies, but, alas! all but three have succumbed to the trials of babyhood. He had a man with them night and day, but unavailably. As the three he has left are now four weeks old, he is in hopes of pulling them through. The union of Phyllis and Kingston Regent proved non-productive.

Dr. Wesley Mills's new book "The Dog in Health and in Disease" is having a big sale in Canada. I hear 150 copies have been sold in Montreal alone.

A meeting of the Executive Committee of the Canadian Kennel Club will be held in Toronto on May 7.

The show committee of the Toronto Kennel Club met April 9 and decided that classes for all breeds will be offered for the coming club show to be held May 7. One hundred and fifty to two hundred dogs are expected to be benched, and valuable special prizes will be offered for competition. It will be purely a club show, confined to Toronto and suburbs. Messrs. I. S. Darby and J. F. Kirk have been invited to judge.

Mr. A. T. Wilgress, Clarksburg, Ont., has sent a brace of bull-terrier puppies by Gully the Great out of Edgewood Fancy to Supt. W. D. Breed, of Regina, Northwest Territory. They stood the long journey well.

A line from Mr. F. H. F. Mercer, Ottawa, tells me that he is going South for his health, and on his return to Canada will bring back with him the Psovoi bitch Lois, presented to him by Mr. Wade. Lois is by Vladimir out of Princess Irma and will be bred to Mr. Huntington's Argoss.

Mr. C. A. Elliott, Ottawa, has bought the mastiff bitch Wucouta Rose, a frequent winner in the Western States, indeed, I understand is in the challenge class if not already a champion. She is to be bred to Mr. Mercer's Faufrid (Baldur—Elgiva). H. B. DONOVAN.

DOG CHAT.

THE executive committee of the American Coursing Club in the Pearl of Pekin vs. Chicopee Lass matter, has sustained Mr. T. W. Bartels in his protest and have awarded first money to Pearl of Pekin, thus reversing the decision of Judge Grace. The report is signed by Messrs. H. C. Lowe and C. B. Page, and thus conveys the title of champion of America. It will be remembered that in the final course at the Great Bend meeting in October between the above-mentioned dogs, Mr. Edwards, the owner of Chicopee Lass, rode over Pearl of Pekin. Judge Grace, not seeing who it was, gave the course to Chicopee Lass, whereupon Mr. Bartels, the owner of Pearl, filed a protest with the Executive committee which has finally been sustained. This ends a controversy over a time-honored rule that admits of no question, and should have been upheld from the first. Mr. H. C. Lowe had the whole matter, he being a member of the executive committee, but withheld it, we are told, from all other papers excepting the American Field, a piece of favoritism which, as an officer of the club, he had no right to show.

Mr. Joe Lewis writes us that "Any person who has been writing to me in regard to dogs can still address me at same place. I am no longer manager of the Mount Washington Kennels, neither have I charge of any of their dogs; but the kennels will still be run in charge of Harry and Mark Lewis, who will have charge of all my dogs, such as setters, pointers, beagles and Italian greyhounds."

Messrs. Toon & Symonds write us that their Kilstor and Scotch Hot won the special for best brace of Scotch terriers, and not Mr. Brooks's brace, as stated in our last issue and also so marked in the official catalogue.

The Androscoggin Kennel Club, of Lewiston, Me., have decided to have Mr. James Mortimer to judge all classes at their show, May 17 to 19. Mr. Cartland is the secretary.

The pointer bitch Nadjy of Naso, owned by Mr. Geo. H. Holtham, Bangor, Me., is a prolific brood bitch, for in the last three litters she has thrown 32 pups, 16 dogs and 16 bitches. She has just whelped at Mr. Robert Leslie's kennels a litter of 11, 8 dogs, and Mr. Holtham has given Mr. Leslie full control of the litter.

Mr. Herbert G. Nichols's great Dane Melac was stolen from Harry L. Goodman's kennel, at Auburn Park, Ill., on Friday afternoon last. Melac is one of the most interesting great Danes in the country, and considered by many to be the best, though his only rival, Imperator, has more than once been put above him in the ring. Melac will be five years old next October. He was brought to this country by Mr. Ulrich, and exhibited at Chicago in 1889, where Mr. Nichols bought him as a pup. Melac, as well as his owner, was very popular and well-known in the Windy City. That there must have been some concerted plan to steal or make away with the dog is obvious. At the time he was stolen Mr. Goodman was at the Denver dog show. It is thought that he has been taken to some other city as he is too well known in Chicago to be hidden away for very long. The police have been notified. Melac is a dark tiger brindle, and because of his great height and size a very noticeable animal. We sympathize with Mr. Nichols and trust that he will soon hear something of his favorite. Melac was recently illustrated in "Portraits of Dogs of the Day."

There are several new advertisements this week; among them we notice that Walter Tozier offers greyhound pups for sale: J. Hellen, St. Bernard pup; No. 60, English setter bitch; W. H. Martin, greyhound bitch; R. Carey, collie bitch; S. L. P., black and tan bitch. Woodhaven Kennels want a greyhound bitch in whelp. We also draw attention to the advertisement of the Eastern Field Trials Derby, full particulars of which can be obtained from Mr. W. A. Coster, Saratoga, N. Y.

We publish this week an illustration of Mr. Geo. Bell's noted cocker spaniel bitch champion I Say. This bitch was whelped September, 1891, and is by Ch. Brant out of Daisy. Her winnings include challenge prizes at Rockford, Freeport, New York, Pittsburg and Boston. She will probably be sent to England this summer to compete at the Kennel Club and other shows. We also give an illustration of the winning Boston terrier, at Boston, in 1891-92. Tumbler is what is called a heavyweight, being over 20 lbs. He is by Sport out of Daisy, but the particulars regarding his birth are wrapped in mystery. He is owned by Mr. John I. Taylor, of the Boston *Globe*, Boston, Mass.

Mr. N. Wallace, so well known to field trial men, has been having a glorious time in Georgia and South Carolina this past winter among the deer, turkeys, woodcock, quail and snipe. Last week he returned to Connecticut, where at his place at Farmington he will enjoy some trout fishing.

Mr. Geo. Bell purchased Blemton Edelweis when on a visit to Hempstead. She is the dam of three first prize winners at New York. Mr. Bell had her bred to Mr. Thayer's Starden's King.

The Omaha (Neb.) Kennel Club seems to have been organized on a solid foundation, judging by the list of officers and members contained in a copy of the constitution and bye-laws which we have received. They intend to hold a dog show soon, and if only a few more cities in the west will join, in time a series of shows commencing at St. Louis could take place that would end with the California shows, and so make a paying trip for some of our best handlers. The Omaha Club is incorporated with a capital stock of $2,500, consisting of 100 shares of $25 each. The delegate to the A. K. C. is Mr. W. F. Cadogan, the secretary.

Mr. A. H. Moore, of Philadelphia, although he has dabbled lately in setters and St. Bernards, has not given this portion of his stock the attention and money that he is devoting to horseflesh. He has made numerous high priced purchases in trotters lately giving $75,000 for Director not long ago, and $10,000 and $14,000 for other horses; now he has just purchased Can't Tell, a full sister to Axtell for a big figure.

They say some people are feeling pretty sore about that Washington ride.

If the idea that the A. K. C. officials have in view in regard to a sort of social club can be carried out, it is bound to further the interest of kennel affairs in both New York city and its suburbs. The committee expects to secure a house on Madison avenue, allowing the necessary rooms on the ground floor for A. K. C. offices, and the remaining rooms throughout the house to be arranged as a club, with buffet, billiard room and parlors, and also have several rooms which will be set apart as bedrooms for visiting dogmen. Such a club would tend to draw the dogmen together, and would be a very acceptable arrangement for the kennel reporter in quest of news. Another good point about it would be that dogmen seeing more of each other than they do at present, perhaps the cry of cliquism would not be heard so often. The club is intended to be kept separate entirely from the Associate membership, being run simply as a club with annual dues of not more than $25 per annum for resident members, and half these dues for non-resident members. The club will support itself, or is intended to do, and be in no way dependent on the A. K. C.

The out-door horse show to be held in New York city by the United States Horse and Cattle Show Society will have classes for packs of hounds with the whole equipment of huntsmen and whips. This will be an interesting exhibition. Now that the Greyhound Club cannot get the hall in Brooklyn for their intended show during Thanksgiving week, would it not be a good idea for them to hold an open air show after the manner of the English ones? The present idea of the Greyhound Club is to have their show in Brooklyn during Christmas week. This will however bring it dangerously near the W. K. C. show in the following February.

The Pet Dog Club at a meeting held April 13, decided to hold a show during Thanksgiving week in a hall in the Madison Square Gardens. As far as we can learn it will be for pet dogs only.

The Newport Drag Harriers held a successful opening meet last Wednesday. The hounds were imported by Mr. Harry Astor Carey. There will be two meets a week until May 20, when the hounds will be given rest preparatory to the opening of the summer hunting season. One of the meets will take place on Conanicut Island. Mr. Carey will be the huntsman and Mr. F. M. Ware will be his assistant. The kennels will be at Bryer's farm, which Mr. Carey has leased for a term of years.

We understand that Mr. Pybus-Sellon, the noted judge and breeder of bulldogs in England, sailed from England on steamship Etruria, which arrived April 16, for a short visit to this country

The Advisory Committee of the A. K. C. held a meeting Wednesday morning, April 20, at Mr. August Belmont's office. The matter of club rooms was the chief subject discussed, but as the house selected on Madison avenue could not be rented for a club, the plans of the committee will now be referred to the Executive committee that meets May 19. No other business of importance was transacted, if we except the discussion as to whether *Turf, Field and Farm* should be given a copy of the Stud Book for 1891 gratis. It was decided they could have one by paying for it.

Mr. Bartels having gained the verdict in the "Pearl of Pekin Incident," probably feels somewhat elated. Mr. H. C. Lowe attending the Denver show heard of this and issued the following challenge:

"From information derived from the local papers I understand that the Bartels Brothers claim to possess in Pearl of Pekin the champion coursing dog of America and a better bench show bitch than my Little Climber. At any coursing I am willing to match against her on neutral grounds either one or two dogs I own for any reasonable amount over $250."

He also desires to match her in like amount as a bench show dog.

On Thursday night of the Denver show the gray wolf Greeley was exercising in the ring when Mr. W. L. Washington, who had charge of the Hacke's dogs at the show, led Zloeem into the ring on chain. The wolf looked at the dog and the dog looked at the wolf, and there was no "spasm." They just looked.

From an interesting story in *British Fancier* we find that Mr. W. J. Comstock's new purchase, the Irish terrier Merle Grady, was hawked round Sunderland, Durham, one day, when five and one-half months old, at a soverign ($5). A Mr. Gurnett saw him under the seat in a sporting "pub," and offering $10 for him secured a gigantic bargain, changed his name, and the record of his subsequent winnings we have already told. At the same time Merle Grady is a well-bred one.

Some one on this side has offered Mr. T. Stretch a price on his crack collies Ormskirk Ormonde and Ormskirk Hilda, but it is not known whether a deal has been consummated.

Ottawa is to hold another show this year, Sept. 27 to 29, the week following the London show. The committee are Messrs. P. G. Keyes (chairman), Alfred Geddes, W. H. Middleton, H. Kirby, C. E. Living, F. P. Robson, J. W. Wirtels, L. N. Bate and F. H. Cunningham. Honorary members, Dr. S. Wesley Mills, Montreal; T. G. Davey, London; A. D. Stewart, Hamilton, and C. A. Stone and H. P. Donovan, Toronto. Mr. Alfred Geddes has been appointed superintendent, and with the experience gained at previous shows he expects to improve considerably on the past.

GLOVERSVILLE DOG SHOW.—Gloversville, N. Y.—At the annual meeting of the Mohawk Valley Poultry and Kennel Club, held at Fonda, N. Y., April 9, the following officers were elected: President, A. E. Blunick; treasurer, Chas. McEwen; secretary (kennel department), F. B. Zimmer; Haversville, N. Y., delegate A. K. C., Will. Littauer, Gloversville, N. Y. It was voted to hold the next show at Gloversville, N. Y., early in January '92. The exact dates, also our judge or judges will be announced later. Every effort will be made to make the coming show better than any previously held by the club.—F. B. ZIMMER, Sec'y.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Music C., Bally and Decker. By Hornecker & Wells, Toledo, O., for black, white and tan ticked beagle bitches.

Englewood Beagle Kennels. By Hornecker & Wells, Toledo, O., for their kennels of beagles.

Roger—Sunol whelp. Chestnut and tan English setter dog, by L. Gardner, Mount Vernon, N. Y., to A. L. Sanford, Portsmouth, Ohio.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

JAS., Kittaning, Pa.—You do not give the breed of dog you require information about.

CONSTANT READER.—If you will send in your name and address and the name of the person you purchased the beagle from, we will do whatever we can to help you.

J. McW., Waseca, Minn.—What is the first St. Bernards, the long or short-coated? Ans. As we understand your question, the smooth-coated are supposed to be the original breed.

E. T. J., Shenandoah, O.—Write to Avent & Thayer Kennels, Hickory Valley, Tenn.; Blue Ridge Kennels, Sherryville, Va.; R. Merrill, 3,355 Grand avenue, Milwaukee, Wis.; Gen. F. F. Myles, New Orleans, La.

J. T. B., Philadelphia, Pa.—I have an Irish setter which has had a litter of puppies by a mongrel dog. I would like to know if it will in any way affect the next litter if served by a good dog. Ans. Read Mr. Wade's letter in next issue.

W. O. D., Albany, N. Y.—1. First give each dog a dose of Epsom salts, say half an ounce, and then the following mixture: Acid nit. dil. and acid hydrochlor dil., of each 1 dr., infus. quassia co. 6 oz. Give one tablespoonful three times a day. Wash once a week; add to bath 1 oz. of Squibbs' solution of coal tar. Give plenty of exercise. You might also treat for worms. 2. We would advise keeping the same color for the boat.

A. F. D.—I have been looking through FOREST AND STREAM for 1891 for a prescription that I remember reading in the correspondents' column, for canker in the ear, but cannot find it. Please insert it again for me and you will do an old subscriber a favor. I have tried almost everything, but with no good results, my spaniel is as bad now as ever. Ans.

℞ Liq Plumbi Sub. Acet.....3 iv
Sol. Coal Tar (Squibbs).....3 i
Aqua.....3 iv
Mix. Lotio. A little to be poured into the ears twice a day.

O. B., Marsh, Pa.—My setter puppy, a dog about four months old, has lately shown a flimsy white substance growing on both eyes, and showing in both corners toward his nose, the eye also seems quite inflamed under the upper lids. This morning they discharged somewhat and he seems unable to keep them open for any great length of time. Please tell me what is the matter, and also what to do for him? Ans. Apply the following ointment:

℞ Cocaine Hydchlor.....grs. vi
Atrophine Sulph.....grs. ½
Aq. Distil.....m x
Hyd. Ox. Flav.....grs. iv
Vaseline.....℥ ii
Mix. A little to be placed into the eyes twice or three times a day. Hold the dog for a few minutes after applying the ointment, so that he does not rub the eyes. If necessary, treat for worms and afterward give a tonic.

H. W. S., Tom's River, N. J.—Will you please tell me what ails my hound dog? He has a wheezing cough, ending in an effort like hawking up phlegm. Can it be distemper? He is 13 years old. Nose dry and warm at intervals, appetite good, and dog seems bright. Ans. First give a couple of compound cathartic pills, then the following pill:

℞ Ex. Belladona.....
Ex. Hyoscyamus.....a a grs. iv
Pulv. Ipecac Co.....grs. xii
Mix and make 12 pills.

G. McG. G., Norfolk, Va.—Will you kindly give me some information as to how greyhounds are judged, also the weight of some large ones? Ans. Greyhounds are judged according to the "Stonehenge" standard. You will find a description of the points of this breed and every other information in Dalziel's monograph, "The Greyhound." We can supply it; price $1.25. We cannot give the individual weights of heavy American dogs, but the Waterloo Cup winner Snapdragon weighed 72lbs. (running weight) and Chimney Sweep 66lbs.

CANOE NEWS NOTES.

At a meeting of the Sewaren Land and Water Club, held on April 11, a full set of rules governing the aquatic department of the organization was adopted and Mr. Wm. M. Ballard was made commodore and Mr. Frank D. Wright vice-commodore. The club also appointed a committee to obtain estimates for the purchase of a club house, and to report in detail at a meeting to be held on April 20. If the report is favorably received an assessment on the members will then be made, in accordance with the by-law, to cover the expense to be incurred. The club will give a reception and dance at Sewaren on the evening of April 22, and during the month of May or June will have a "Dutch" on an elaborate scale.

Hulbert Bros. & Co., of 26 West Twenty-third street, opposite the Fifth Avenue Hotel, New York, have now their boat department open and are displaying a line of rowboats, sailboats, canoes, and yacht tenders in variety and finish seldom if ever seen in this city. It would pay any one that is interested in boating pleasure to visit their show rooms, as they have boats adapted to all waters. Their display of fine fishing rods, tackle and sportsmen's goods is such as to supply every want of the sportsman. It would repay our readers to inspect the goods shown by this house in their varied departments.—*Adv't.*

THE New York C. C. at a meeting on April 11 finally passed the amendment altering the titles of officers to captain, mate and purser and also made several changes in the rules governing the club's international challenge cup. A three years' lease was made with the Bensonhurst Club, and the club house will shortly be towed to Bath Beach, where it will be raised on piles in place of lying afloat. A challenge from the Brockville Boating and Canoe Club was accepted, Mr. Ford Jones being the representative named by the challenging club.

The annual meeting of the Island Heights C. C. was held on April 14, the following officers being elected: Com., John H. Lenning; Vice-Com., Riley Roby; Fleet Captain, R. L. Penn; Sec., Joseph Page; Treas., W. M. Wood. The club will build a club house at once and will hold a number of races during the season.

The annual meeting of the Associated Canoe Clubs of the Passaic River was held on April 13, at the Orange C. C. house, Arlington, the chairman and secretary, Messrs. W. H. Hillier and R. W. Strachan, Jr., being re-elected. Messrs. Manley, Strachan and Markham were appointed a regatta committee.

The annual regatta of the Knickerbocker C. C. will be held on June 4, off 152d street, North River. The club will hold a two days' camp, with races, etc., later in the season, at Egg Beach, N. J., under the Palisades.

A. C. A. Membership.—Eastern Division: C. E. Harris, St. Johnsbury, Vt.

THE RED DRAGON'S SMOKER.

ON the evening of March 30 the Red Dragon C. C. gave a smoker to its members and friends at the residence of Mr. MacCormick, 2120 North Twentieth street, Philadelphia. After the customary introduction of friends, an exhibition of lantern slides was given; among the number were the slides of Mr. W. Underwood, of the Puritan C. C., of Boston, of scenes and events at the A. C. A. meets at Lake George and Jessup's Neck.

The gentlemen subsequently repaired to the dining room and soon the viands disappeared. Amid the fumes of tobacco, popular selections were rendered upon the guitar, mandolin and banjo by Messrs. H. and D. MacCormick, Scott, Gray and Commodore Noyes. Songs were sung and recitations delivered, those of Mr. Blumner and Mr. Fleischman, of the Quaker City Boat Club, of the Schuylkill Navy, were received with great enthusiasm. The boys departed for home at a late hour, all voting the smoker a great success.

The club will give a theater benefit on April 29 at the Chestnut Street Opera House, the proceeds to be used for erecting a new club house. Owing to our increasing membership, we have found our present quarters inadequate to meet the demands and are therefore compelled to seek quarters new and more commodious. It is our purpose to be located in our new house some time during the early part of next month, when the club will give a house warming and a club regatta. F. O. GROSS.

PHILADELPHIA, April 11.

Yachting.

SAILING LENGTH.

Sailing length, commonly called "corrected length," is obtained by adding together the length on waterline and the square root of the sail area, and dividing the sum by 2, the result being in lineal feet. In this method of measurement, adopted by the Seawanhaka Corinthian Y. C. in 1884, and since known as the "Seawanhaka rule," the sail area is measured from the spars, club topsails not being included. The principal clubs now using the Seawanhaka rule are the Seawanhaka Corinthian, New York, Larchmont, Atlantic, Eastern, Beverly, Hull, Massachusetts, Philadelphia, Riverside, American, Knickerbocker, Royal Canadian, Royal Hamilton, Queen City, Oswego, Rochester, Marine and Field, Corinthian of New York, Marblehead, Philadelphia, and Corinthian Navy and Corinthian Mosquito Fleet. The full details of the rule were published in the FOREST AND STREAM of Feb. 25, 1892.

RATING.

The rating of a yacht is obtained by multiplying the length on waterline by the sail area, and dividing the product by the constant number 6,000, the result being a measurement in cubical units approximating to the old Thames tonnage. In this method of measurement, adopted by the Yacht Racing Association in 1887, the sail area is calculated from the drawing of the sail plan, such topsails, working, sprit or club, as are carried being included in the measurement. The established rating classes and the varying proportions of length and sail found in practice, are as follows:

½-rating.....16ft. l.w.l.×183 sq. ft. sail to 17ft. l.w.l.×178 sq. ft. sail.
1-rating.....18ft. l.w.l.×338 sq. ft. sail to 20ft. l.w.l.×300 sq. ft. sail.
2½-rating.....25ft. l.w.l.×600 sq. ft. sail to 28ft. l.w.l.×536 sq. ft. sail.
5-rating.....28ft. l.w.l.×1071sq. ft. sail to 32ft. l.w.l.×909 sq. ft. sail.
10-rating.....34ft. l.w.l.×1765sq. ft. sail to 36ft. l.w.l.×1666sq. ft. sail.
20-rating.....45.5 l.w.l.×2637sq. ft. sail to 46.5 l.w.l.×2530sq. ft. sail.
40-rating.....59ft. l.w.l.×4067sq. ft.
60-rating.....64ft. l.w.l.×5625sq. ft. sail to 68ft. l.w.l.×5294sq. ft. sail.

The rating rule is used exclusively in Great Britain, but is used in America by only one club, the Royal Nova Scotia Yacht Squadron, of Halifax, N. S.

CLASSIFICATION.

In America yachts are classed by some clubs by their waterline lengths alone; in others by their sailing length.

In Great Britain all yachts are classed by their rating, and not by waterline.

THE most absurd misapplication of the much-abused theorem that length gives speed is found in the proposal lately made in England to tax the total waterline of the two hulls of a double boat or a catamaran. The only parallel to it which occurs to us is the proposal really made by some yacht owners of the New York Y. C. to measure the water between the two, and later three, hulls of the Stokes catamaran Nereid as a part of her cubic contents, under the rule then in use, in 1878.

If it is reasonable to measure the two hulls to obtain the true waterline length, it would be equally reasonable to measure the length of the lead cigar below the new fin keels and add it to the waterline.

NAUTICAL ORTHOGRAPHY.

The controversy waxes gay
On matters orthographical,
For whether sailing's "weigh" or "way"
Is thought quite problematical.

For "jibe," not "gybe," some people fight.
As being orthodoxical;
And whether "reach" or "ratch" to write
Is also paradoxical.

To hoist a "pennant" or "pendant"
At our discrimination,
On "halliard" or "hautyard," one can't
Come to determination.

A "cleat" or "cleet" one may expect
In equiponderation;
But to determine what's correct
Is simple botheration.—KINGSTOWN.

—*Yachtsman.*

SIZE VS. LENGTH AND SAIL AREA.

Editor Forest and Stream:

My letter published in your issue of April 14 mentions "big humbugs," and as the term is somewhat irritating I will explain that by big humbug I mean calling one boat larger than another, because the former is larger in one dimension—namely beam—while in other dimensions, and as a whole, she is actually smaller.

You ask me to prove this with figures of hulls and sail plans so that the question can be argued seriously. Allow me to say that sail plans have nothing whatever to do with the question I have raised, *i. e.*, "What is the size of a boat?"

I state, in effect, the fact that a boat the dimensions of whose hull are say 25ft. on waterline by 35ft. over all, by 7ft. beam by 6ft. depth is larger than another boat of say 25ft. waterline by 35ft. over all, by 11ft. beam by 3ft. depth. It would be interesting to hear from some of your readers who have sailed small cutters fitted with a deep keel of any kind loaded with lead.

No question can be "seriously argued" until the thing under consideration is clearly defined. Let me say in conclusion, that as matters now stand I think it would be well to continue classifying boats by length on load waterline and taxing them for time allowance on waterline length and actual sail area, including all light sails. If this method is pursued every yacht owner will know by the simple waterline length of his boat just what class he can enter, while excessive sail area will have to pay its penalty. THOMAS CLAPHAM.

ROSLYN, L. I., April 18.

[We cannot agree with Mr. Clapham that sail plans have no bearing on the question of size as applied to yachts, but we are willing to accept his definition of a "big humbug." The examples which he gives are excellent ones, as they are evidently taken from actual yachts; the small cutter 25×7×6ft. would be such a craft as the Gardner 25 footers, Nameless and Needle, while 35×11×3 would be about the dimensions of a modern Cape catboat, Almira for instance. The small cutter will carry less than 600sq. ft. of sail, while the other boat will swing a rig of nearly 1,000sq. ft., or say fifty per cent more than the narrower boat. Now will Mr. Clapham seriously claim that the narrow cutter is of greater size than the wide catboat? The catboat would far exceed the cutter, both in power, which must be considered to a certain extent in discussing the size of a yacht, and also in actual cubic contents of hull in feet. If we are wrong in this, and the catboat is really the smaller, there are many who share our error, and who will gladly listen to Mr. Clapham's proofs on the other side. Instead of calling the two of the same size because their waterlines are equal, it would be much fairer, even though not absolutely accurate, to compare them by their sailing lengths, 25ft. for the cutter and about 28 for the catboat. In our opinion the boat with 900ft. of sail which asks to sail on the same terms with one of 600ft. merely because their waterlines are equal, is as near the realization of the "big humbug" as will ever be found in practice. If as Mr. Clapham says, he is contented with the present rule of length classes and length and sail area measurement, there was no need for his hearty seconding of the *Boston Herald's* proposal to do away with sail area, which provoked this controversy.]

IN THE BUILDING YARDS.

AT Piepgrass's yard, City Island, the new steel schooner designed by Mr. A. Cary Smith for Mr. J. E. Brooks is plated up, the deck beams laid and the planksheers in place. The latter are of 4in. teak and will give a very handsome finish to the deck. The lead has been run into trough keel. The joiner work is well advanced in the shops. The spars are as fine sticks as ever went into a yacht, the main boom in particular, a hollow stick of Oregon pine, being a handsome stick and well put together. The centerboard is completed already. The new steam yacht Evelyn, designed and built by Piepgrass, lies afloat at the wharf, a trim and stylish little craft, well suited for use about the Sound. Liris also lies afloat in the basin, her crew being at work on Nameless, also owned by Mr. Wetmore. The schooner Tioga is also in the basin. On the railway is the steam yacht Oriente, up for general repairs. Hauled up ashore are Katrina, Bedouin, Titania, Nonparielle, Jessica, Montecito, Banshee, Delvyn and the little Scotch cutter Circe; which latter is in for a general overhauling, new deck, new caulking of bottom plank, new mast and topmast.

In the old shop at Woods' yard next door is the new 25ft. sailing length boat designed by Mr. Gardner for Mr. Oswald Sanderson, a craft not unlike Wasp in model, the lead keel showing the same jog, the fore and after overhangs being similar, but showing less bilge. The workmanship is very neat throughout, the framing being light but thoroughly fastened, steamed oak frames with hewn oak floors. The deck is in two thicknesses, as in Liris and Kathleen, but with canvas between, the upper thickness being of mahogany, to match the planksheer, bulwark and coaming. There will be one large hatch amidships which will be removed in racing, leaving the body of the boat open, while there is a large but shallow cockpit abaft it. The rig will be similar to that of Nameless, Smuggler and Needle, a pole-masted sloop. The Coggeshall steamer, also designed by Mr. Gardner, is safely housed from prying eyes in a new shed specially built for her, but if reports are true the Woods have turned out a very handsome job of woodwork, the odd-shaped stern in particular calling for some skilful work in planking. The skin is double, of mahogany throughout, with steamed oak frames and an abundance of light steel bracing. The engine and boiler are now building at Newark, N. J., where the yacht will be towed after launching. Nameless is fitting out, preparatory to launching, and Laxen, the Gardner 30 footer, both built at this yard last year, is still waiting a purchaser.

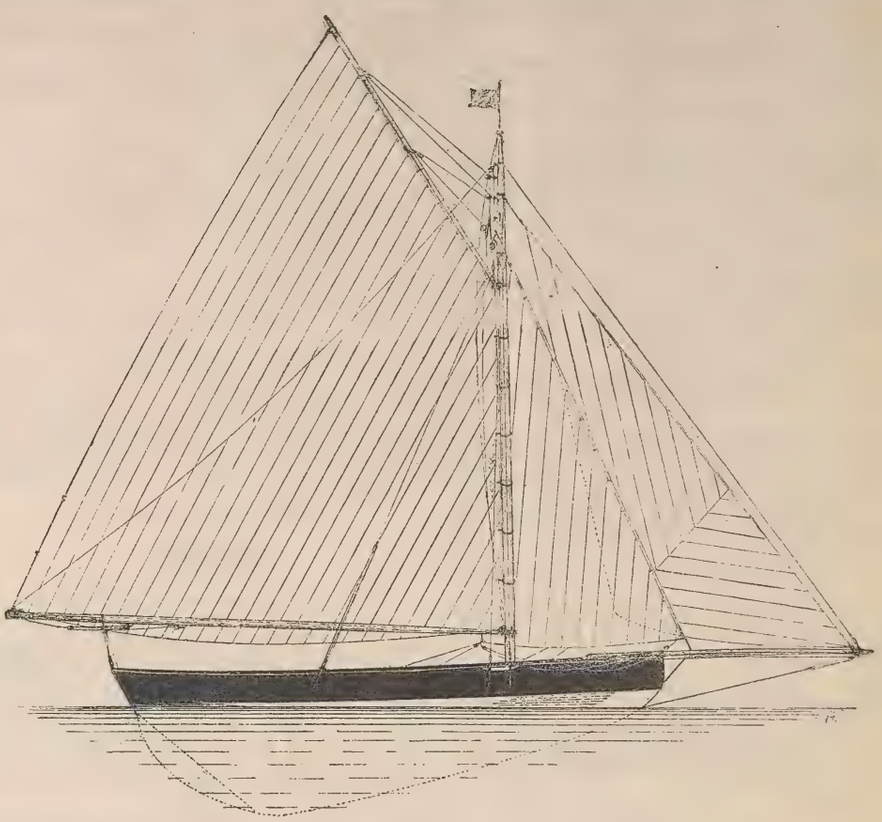
At Wintringham's yard Shamrock has been hauled out to be converted into a schooner. Mr. Maxwell having abandoned the idea of building an 80-foot steel schooner. A 27-foot l.w.l. catboat, with overhanging ends, designed by Mr. Gardner, has also been started in the yard. Mr. Gardner is now busy over a design for Mr. DeForest of Oyster Bay, a member of the Seawanhaka C. Y. C., a boat for the 25 foot S. L. class.

The centerboard 21-footer for Mr. J. F. Small, the Exile, is building by Jenkins at Harwichport. She will be 30ft. over all, 21ft. l.w.l., 11ft. beam, 1ft. 6in. draft. The sheer plan is very peculiar, there being the clipper stem and shallow but abrupt forefoot that is seen in so many modern yachts, but the turn of the forefoot will be just above instead of below the water. The sail plan will be very large, the mast, as reported, being 40ft., boom 33ft., and base line 55ft.

At Smith's yard, South Boston, the McVey centerboard Shark is completed, and a fin-keel for Mr. John B. Paine has been started. She will be 21 feet l.w.l., 7 ft. 8 in. beam, 1 ft. 2 in. draft of hull and 7 ft. extreme draft. The fin will be of Tobin bronze, 5 ft. long on the lower edge, with a ton of lead in the keel. The sides tumble home 4 in. amidship. The planking will be double, with an outer skin of 5-16 in. Spanish cedar.

At Bristol the centerboard 21-footer for Messrs. Dunne, Brown & Hunt has been launched and tried. She has a small sail plan, mainsail and jib, and a metal centerboard. The 30ft. fin-keel is partly finished and the firm have an order for a 30ft. centerboard boat for New York. The fin-keel boats for Messrs. Morgan, Bigelow and Kersey are all completed.

As Lawley's the topsides of Alborak have been cut down 9in. forward and the deck lowered, while an oak stick 28in. deep has been bolted under the wood keel. The lead will be re-cast in a fin and bolted underneath. Marguerite's keel has been re-cast in new shape. The 90ft. schooner is all plated and ready for her joiner work.



Stewart & Binney have designed a 21 footer for Mr. C. D. Owen, of Providence, one of the original owners of Sachem, which will be built by A. J. Frisbie at Salem.

GLYCERA, FIVE-RATER.

THE gradual removal of all restrictions on overhanging ends has led to the almost universal adoption of the clipper stem and long counterstern, and so general have these features become in America, and to such an extent have they been carried, that it will be a matter of surprise to many American yachtsmen to learn that there is still one prominent designer who is voluntarily designing yachts with little or no overhang, these same yachts being most successful alongside of the more fashionable type. The 5rater Glycera, whose lines we reproduce from the new Italian yachting journal, the *Revista Nautica*, is an excellent illustration of type, being one of the many successful yachts of 5 and 2½ rating designed and built by Mr. Arthur E. Payne, of Southampton, England. Mr. Payne's trademark, the short pilot-boat stem, is found in nearly all these boats, as well as in his very successful 10-rater Decima, and even on the 70ft. fishing cutter L'Esperance built last season for Lord Dunraven.

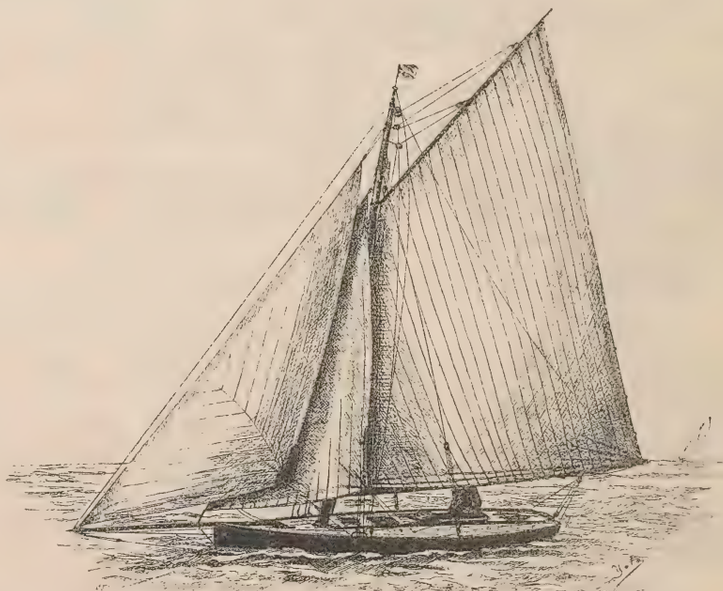
Glycera was built in 1890 for Mr. Philip Perceval, starting in 43 races and winning 19 first and 12 other prizes. In 1891 she was owned by Mr J. H. Gubbins, of Cork, Ireland, starting 17 times and winning 13 first and 2 other prizes. The success of the numerous Payne boats of this type, Glycera, Awilda, Babe, Humming Bird, Windfall, Fiera, Savourna and Janetta against the conventional type of modern clipper-stemmed craft turned outby Watson, Fife and other designers, offers strong proof that American yachtsmen have of late placed entirely too high a value upon overhanging ends as factors of speed. While several good reasons may be advanced for overhangs at least as long as those of Minerva, Liris, Gossoon and Katrina, it is more than probable that their speed is almost entirely independent of the amount of overhang, the same being largely true of Gloriana and the other Herreshoff yachts. At the end of last season Glycera was sold to Messrs Garaccio, of Nice, and she has recently made a successful debut in the Mediterranean under the name of Va Partout. Her dimensions are as follows:

L.W.L.	30ft. 10in.
Fore overhang	1ft. 4in.
After overhang	1ft. 5in.
Length over all on deck	33ft. 7in.
Beam extreme	8ft. 10in.
L.W.L.	8ft. 4in.
Draft extreme	7ft. 2in.
Rake of sternpost	52deg.
Least freeboard	1ft. 10in.
Sheer bow	1ft. 2in.
Sheer stern	— 3in.
Mast from stem at l.w.l.	8ft. —
deck to hounds	25ft. —
deck to truck	32ft. 2in.
Bowsprit beyond l.w.l.	13ft. —
Boom	30ft. 3in.
Gaff	19ft. 3in.
Sail area, Y. R. A. rule	966sq. ft.

SAIL PLAN OF "GLYCERA."

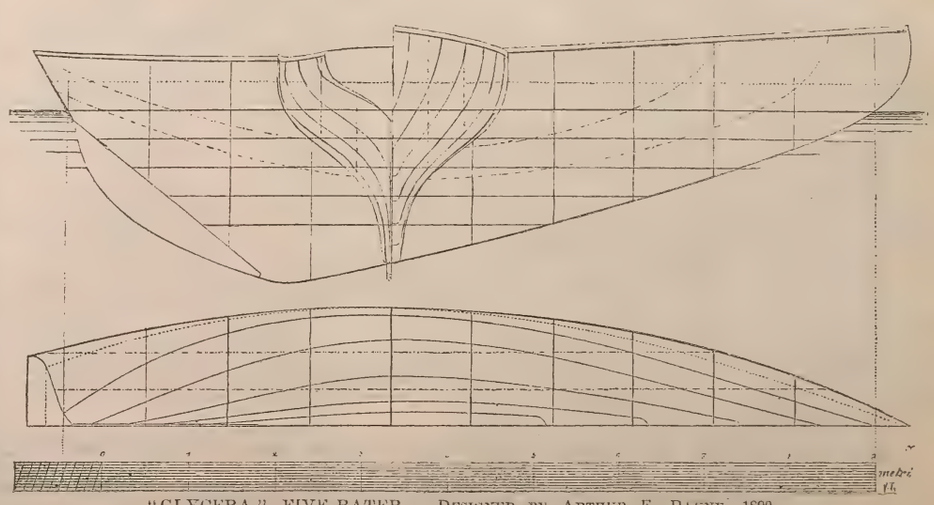
ON FLORIDA REEFS.

I HAVE just returned from a trip down on the Gulf coast in company with two other fellows, and of all the experiences that I ever passed through that undoubtedly takes the lead. From Homosassa, a small place on the river by that name, we planned a camping tour via sail boat to the mouth of another river about twenty miles distant, and one-half of it we had to make on the open Gulf.



We bought provisions, cooking outfit, etc., hired a boat and a skipper who claimed to be well posted on the course that we had to go, and left the town about noon on Thursday. Everything seemed to be in our favor, and after we got on the open water we fairly flew, and no one had any doubt but that we would be in camp that night. After we had made quite a distance the pilot turned in at one of the numerous channels that make out from the saw grass marshes, assuring us that we had struck the right one. We followed it up, running on rocks and oyster reefs until after dark, and finally came to a very narrow place where the inlet ended. We then concluded to find an island and make ourselves comfortable for the night. We found a small one covered with cedar and palm trees, and after eating our supper rolled up in blankets and went to sleep. Some time in the middle of the night one of our party who was too nervous to sleep, punched us in the ribs and told us that if we did not want to take an involuntary bath we had better get out of that. The water was then within a few inches of us and coming up fast. We moved our calamities and selves to the highest point that could be found and like a prisoner awaiting his doom waited for the water to require us taking to trees. However, it rose but little afterward and we were spared the inconveniences of a roost in the treetops.

The next morning the wind was blowing a gale and we tarried for awhile, hoping it would subside. Instead of doing that it seemed to grow worse, and in our anxiety to reach a fishing ground we started out any way. In order to lighten the large boat I took the skiff and pulled out ahead and then waited to see the other party beat up against wind and tide. I had not been watching them long when a squall struck the mainsail, and over they went, dipping two-thirds full and leaving all our bedding, provisions, ammunition, tackle, etc., floating around. We gathered them in and put for an island as soon as possible, where we spread out everything that was not spoiled and let the sun work up the moisture until night. During that time we built a shelter out of palmetto leaves and logs and prepared to spend another miserable night without any covering, as our bedding was soaked. All of this time you are assured that our fool guide was "catching it." First one would engage in roasting him for awhile, to be followed by another of us. If he had been up to his work and of any account whatever we would not have been in such a pickle.



That afternoon we sent a man and boat over to a settler's, about two miles distance, after an addition to our larder, and when he returned we sat down to a genuine "cracker" meal—biscuit with Florida syrup and sweet potato pie.

The next morning we held a consultation and decided before blundering around any longer that we would get some reliable information as to our route. So we put back to the house where we got the provisions and there found a German who had lived on the river we were in search of for six years. We soon had him engaged as pilot. We left his house about noon, and after pulling, poling and sailing until midnight, we landed on John's Island at the head of the river, and were lucky enough to find a deserted palmetto camp with fire still burning. Best of all a large cavalia fish was found cooking just as though the previous occupants had anticipated our coming. We camped on the river for nearly a week and during that time the fish we did not catch and the game we did not shoot would not be worth mentioning. The fish that give the anglers down here the most delight is the cavalia. It does not have its equal for gameness. I landed the largest caught on my nine ounce rod, and with 600 feet of line out it took me over a half hour to kill him. On returning home we were not afflicted with as many trials as was our journey there. We ran amuck once, however. Three of us decided to make a cut in the rowboat to save a sail of fifteen miles around, whereas we would have to row but five. We could not get through till the tide came up to a certain height, which the guide told us would happen in a short time. We passed the hours away by stopping on the oyster reefs and feasting on the bivalves. About 8 o'clock we thought that by going to an island and building a fire we could make ourselves comfortable for several hours, when the tide would surely be up sufficiently to make the crossing. We did this but it still lacked six inches of water. It was then one of two things to be done; one to go back to land and stay all night, or the other, which we adopted, was to pull the boat over a mud flat nearly three-quarters of a mile. On arriving at our guide's house we were about as hungry, dirty and tired a trio as one would wish to see. A little "hot moonshine" and a good supper prepared by his estimable wife soon straightened us out.

TANGERINE, Fla. C. J. H.

"GLYCERA"—FIVE-RATER.

"GLYCERA," FIVE-RATER. DESIGNED BY ARTHUR E. PAYNE, 1890.

RESTRICTIONS ON RACING.

AMONG the small fry which are vexing British yachtsmen of late is the double-hulled boat, for which a great future is promised by some of its enthusiastic admirers, while other conservative yachtsmen are filled with dire dismay at the prospect of the extinction of the prevailing single-hull types by the new invader. One club, the Royal Portsmouth Corinthian, has already taken action in the matter, and has resolved to accept no entries from double hulled craft.

Such a policy can only hurt racing and hurt the club; it is clear to observant yachtsmen that the present is no time for other than the most necessary rules of measurement and classification. If racing is to be kept alive, it must be by increased competition and renewed interest, and though harm may come through the present tendency to abnormal machines, it will be less in the end than will follow from arbitrary restrictions on design.

The prevailing fashion of light weight has naturally extended from the hull to the fittings, and the makers of stoves, waterclosets, etc., have begun to cut down superfluous weight. Messrs. Sands & Son, the yacht plumbers, have within the last two years reduced the weight of their No. 2 closet, the size used in a 40-footer, from a total of 135 lbs. to 75 lbs., including all connections. They now have an order from a well-known designer for a closet not to exceed 40 lbs. total weight, which limit they hope to reach by the use of new and lighter castings, and drawn brass piping in place of lead pipe.

WORLD'S FAIR SCHEMES.

CHICAGO, Ill., April 5.—The near dawning of the Columbian Exposition brings to light all sorts of schemes and schemers, among the latter the individual adventurer who stands ready to do something singular provided somebody will pay him for it. Messrs. Thos. Kane & Co., the well-known boat making firm of this city, have handed me a couple of letters lately received from specimens of this class, who find a mark in enterprising manufacturing firms. The first is from a native of this country and is of interest sufficient to merit publication. It is as follows:

"CHELSEA, Mass., Dec. 28, 1892.—Thomas Kane & Co., Chicago, Ill.: Knowing the reputation of your firm, I thought I would write and make you a proposition. I will take one of your steam launches, 16 to 20ft. long, from Spain to the United States, sailing over the same course followed by Columbus. The boat could be named the Christopher Columbus She could be carried over in a steamer. She could start from Spain next spring.

"It could be made the grandest advertising scheme of this century. I should go as special correspondent for the Associated Press. She could get back in ample time to take part in the great pageant in Chicago, next October, celebrating 400 years of America's progress and dedicating the Columbian Fair at the same time. I will undertake the contract for the same liberal terms I received from the Norton Co. for sailing the 30ft. boat Neversink from New York to Paris, France, 1889, getting a medal for the company and a favorable report from the French Government officials commissioned to inspect the system of water ballast at Cherbourg. I sailed the 40ft. flat-bottom schooner from Boston to Norfolk, leaving Jan. 24, arriving some fourteen days later. Last summer in the Sea Serpent I broke the world's record for size, time, etc. I have a world-wide reputation from my many ventures, and I am the only man that has twice crossed the Atlantic in a small boat from America to Europe. I am the s n of the oldest naval architect in the United States, so there is no guess work about what I undertake. By naming the boat as suggested might be able to make arrangements with World's Fair folks to assume the expense of the undertaking. There are grand possibilities ahead if carried out successfully. I have lots of things to suggest if you are in a position to appreciate the scheme. Was correspondent for the Boston *Globe* last voyage. Respectfully, CAPT. JOSIAH W. LAWLOR, Lone Voyager."

The other letter is from a combination oarsman, journalist and lecturer, who has his eye firmly fixed on the great American dollar, although from his remote situation in the Old World he is still unable to get his hands equally well placed. It is as follows:

"AMSTERDAM, Jan. 12, 1892.—I think it is a duty of mine to tell you that I, from July 4 to Oct. 31, 1891, have made in a boat manufactured by your firm for the exhibition in Stockholm, some years ago, one of the most daring rowing voyages ever made. I have rowed in this boat from Gottenburg in Sweden to Calais in France, a distance of about 1,000 miles, mostly by sea, along the coasts of Sweden, Denmark, Germany, Holland, Belgium and France. Everywhere has my voyage created much interest, and has been reported in most European newspapers.

"A journalist of profession, I am now writing a book of my travels which is to be published in Swedish, English, German and French. When this work is finished I will go on a lecturing tour to the principal rowing clubs in this continent. In my book as in my lectures I will always mention your name as the manufacturers of the boat.

"I feel, however, also very much inclined to make a similar lecturing trip to America. I think it will be remunerative to me and it will doubtless be a great *reclame* for your own firm. But I do not think that I can raise enough money to do this. I therefore ask you, who must be interested in the matter, to assist me in carrying out my plan. If you would take the boat and myself over to America I will give you a certain per cent. of my earnings and promise to let you have my boat exhibited at the great exposition next year in your town. I will also write a special edition of my book for America.

"I send you nereby a couple of papers and a photograph of the boat as she is now, if you would like to publish something about me in American papers.

"Trusting that you will pay attention to my proposals, I should be much obliged to you for an answer at your earliest convenience. The business between us might be carried out by the American or Swedish consul in London. The Swedish Ambassador also can give you references about me.

In a few days I am to commence my lectures here in Amsterdam.
I am, dear sirs, yours very truly,
C. G. UDDGREN. Amsterdam, Holland."

"The above letters are but two out of many similar ones," said Mr. Carse, for the firm, as he gave them to me. E. HOUGH.

THE LENGTH AND SAIL AREA RULE.

It seems rather late to be discussing the merits of the "length and sail area rule," but FOREST AND STREAM has found it necessary to do so a fortnight ago. It is very justly pointed out that in the length and sail area rule we have a very fair gauge of the "size" of the yacht, and that no other method of grouping yachts in competition has proved so fair and equitable as this rule. It is further pointed out that, although the designer is limited, that is the object of all rules, and under this particular rule he is less restricted than under rules which only deal with one dimension. Under the length and sail area rule, the designer's choice of type model, dimensions, ballast, and sail area is unfettered, and all this is carefully set forth by FOREST AND STREAM; and the futility of rules which tax one dimension only is written upon with elaborate lucidity.

That such an exposition of the universal rating rule should be necessary is a little vexatious; but, after all, it only shows that it is not unusual to find that men often write and discuss matters on which they are imperfectly informed, or have to learn the elements of the subject as the discussion proceeds. A correspondent last week recorded in our columns that the length and sail area is responsible for the present high prices of yachts, meaning, we presume, in comparison to the prices which were charged under the old tonnage rule or length rule; but the fact is, judged by these rules, prices are all in favor of the length and sail area rule. There is, however, no doubt that the cost of designing and building has increased generally during the last few years, entirely irrespective of either tonnage or rating rule; but we think it will be admitted that we have in return yachts more scientifically designed and handsomer, and also more elaborately built. The knife-whittled model and homely constructed yacht of a generation ago would not be a satisfactory craft to match against the beautifully drawn forms and highly finished vessels of to-day; and we do not see how we can go back to the old style, whatever the rating rule may be.—*Field.*

YACHT NEWS NOTES.

There is something quite pathetic in the group of 70-footers now hauled out at Piepgrass's yard; Katrina, whose owner, Mr. E. S. Auchincloss, is just dead; Titania, never in commission since the death of Mrs. Iselin; and Bedouin, on the sale list, her racing days now over. Shamrock will come out this season as a schooner, and it is probable that the ever youthful Gracie will be the only representative of the class this year. Mischief, once top of the class, though the smallest yacht in it, is now hauled out at Hawkin's yard, and beside her lies Wenonah, of later date but the same length. The two are excellent representatives, different, but very interesting types, Mischief representing the final point of development of the American sloop before it merged into the mongrel cutter or "compromise," while Wenonah was a typical cutter of the time, in model, rig and ballasting, save that she had about 3ft. more beam than would have been given her in England.

With a persistence worthy of a better cause, another effort is now being made to convert the unfortunate Ventura, of Bronx River fame, into a yacht. An attempt has been made to remedy her serious lack of stability due to her bad form and insufficient displacement, by removing her lead keel and hanging it still lower, while the ugly overhang aft has been spun out some 6 or 7ft. longer to a narrow archboard. A very small percentage of the money spent in alterations alone would have paid for a design from the best of the designers and have saved the waste of quite a large sum as it is very unlikely that the vessel can ever be sufficiently improved to be used for a yacht.

"Patterson's Nautical Dictionary."—Captain Howard Patterson, well known to yachtsmen through his "Yachtsman's Guide" and other useful books, as well as through his connection with the School of Navigation, in New York, has lately added another valuable work to the yachtsman's library in his "Nautical Dictionary." The book is a large octavo volume of 499 pages, profusely illustrated, its definitions covering the whole range of shipbuilding, seamanship, navigation, marine engineering and naval science. The definitions and explanations are concise and practical, and every subject is brought down to include the most recent developments.

Among the funny things lately printed about yachts is the announcement, apropos of the sale at auction of the old sloop Vision, that *maps* of the yacht might be had on application. The following notice is copied *verbatim* from a daily paper: "The steam yacht Judy, from Jacksonville for New York, arrived at Charleston, S. C., to-morrow." From the same paper we learn that the new fin keels are not anchored or moored like common craft, but are "hitched" to buoys.

On the hill at Wallin & Gorman's is a curious procession, the four new catboats for the Seawanhaka Corinthian Y. C., a perfect symphony in color as they lie in a line. The first is painted colonial yellow, the second green, the third red and the fourth blue. They are of excellent model, all identical, and will make a fine fleet for the inauguration of this new sort of racing. The builders have turned out several other catboats of various sizes this winter.

We have received from Messrs. Clay & Torbensen, of Gloucester City, N. J., a very neat and artistic catalogue of pleasure craft, the firm making a specialty of steam launches, electric launches and houseboats. Both hulls and engines are built on the premises, the latter burning kerosene by preference. The engines are compact and powerful, and the oil is used in a special burner, which is easily kept clean. The stock sizes of launches run from 18x5ft. to 35x7ft.

The Jersey City Y. C. will open the season with its regular planked shad dinner on May 1, at the club house at Communipaw, N. J. The following dates are announced for the season: May 30, Opening squadron sail, to be followed by dinner at the Club House. June 15, annual regatta. June 11, July 9, Aug. 9, Sept. 6 and Oct. 6, Ladies' Days, moonlight sail and dancing. The club has given up its house at Tottenville, Staten Island.

Cruising.—Utowana, steam yacht, W. W. Durant, was at Alexandria, Egypt, on March 29, and expected to be there until the middle of April... Sultana, steam yacht, T. L. Park, is now due at Southampton from the Mediterranean, whence she will sail for New York. Mr. Park was to leave her at Brindisi and return by steamer....Sanibel, steam yacht, Mr. Rutherford Stuyvesant, is now on her way North from Florida.

The officers of the Baltimore Y. C. are: Com., Alexander Brown; Vice-Com., E. L. Bartlett; Sec'y, F. W. McAllister; Governors, Alexander Brown, F. W. McAllister, E. L. Bartlett, George W. Cole, Bradley T. Jones, and S. C. Townsend. The club is now looking for a site for a fine new house, to be built this season.

The question of combining has been discussed by the Hull and Massachusetts yacht clubs, of Boston, and it is possible that arrangements may be made to unite the two in one club of some 500 members, with the city quarters and landing of the Massachusetts and the handsome new club house of the Hull Y. C.

The Great South Bay Y. C., at a meeting on April 14, elected the following officers: Com., Alden S. Swan; Vice-Com., Leander T. Powell; Rear-Com., J. T. Bourne; Sec'y, John W. Richard; Treas., Miles H. Bergen; Executive Committee, Frederick Bliss, Wm. M. Van Anden, and A. Bryan Alley.

The annual regatta of the Atlantic Y. C. will be sailed on June 14, the Tuesday after the New York Y. C. regatta, a departure from the usual custom. Messrs. Banks, sons of Com. Banks, have offered prizes, a gold watch and chain and a set of colors, for a series of races between open and cabin catboats.

The Pequot Association, of Morris Cove, has selected the following officers: Com., W. A. Harris, cutter Mariota, New Haven, Conn; Vice-Com., James Cockroft, schr. Kismet, Northport, L. I.; Rear-Com., P. G. Sanford, sloop Rival, Westport, Conn.; Sec'y, E. O. Brown, New Haven, Conn.

At the annual meeting of the Cedar Point Y. C. of Naugatuck, Ct., on April 13, the following officers were elected: Com., P. G. Sanford, sloop Rival; Vice-Com., W. B. Meeker, sloop Ada; Sec., Edwin Thorne; Treas., E. C. Smith; Meas., O. I. Allen.

At the annual meeting of the British Institution of Naval Architects a very interesting paper on the balancing of marine engines and the vibration of vessels was read by Mr. A. F. Yarrow, the launch and torpedo boat builder.

The Union des Yachts Français has called a Congress of all French clubs and nautical societies, to be held in the fall of this year, in order to consider all questions of racing rules and also of the general good of French yachting.

An English yachtsman in poor health, Lord Ardilaun, has chartered the large steamer Warwick Castle, of the Donald Cunie line to the Cape of Good Hope, for a private yachting cruise to the Mediterranean.

The Bayshore Y. C. has elected the following officers: Com., Harry M. Brewster; Vice Com., John R. Howell; Rear Com., Jesse Clock; Sec., Geo. Smith; Treas., Leander G. Homan; Regatta Committee—Arthur Deming, Samuel B. Gibson and Samuel Alden.

On April 27 Messrs. Gardner and Mosher, of New York, will deliver an address before the Philadelphia Y. C. on the subject of "The Elements and Features of Steam and Sailing Yachts."

The skiff sailors of Montreal are now discussing the formation of an association to act in harmony with the St. Lawrence Skiff Sailing Association, composed of the clubs further up the river.

The old centerboard sloop Truant, sent from New York to England over forty years ago, is reported as still afloat and in good order at Kingstown, Ireland, where she has just been redecked.

The steam yacht Twilight, a sidewheeler built in Cleveland, O., in 1883, was recently wrecked at Musquito Inlet, Florida, the crew escaping, though the yacht was a total loss.

The lines and sailplan of the handsome 40-rater Irene, designed last year by Mr. Watson for Prince Henry of Prussia, are given in the *Wassersport* of April 7.

Hornet, 21-footer, designed in 1890 by Mr. John B. Paine, has been sold to Mr. C. C. Jackson, of Boston, who will cut down her sail, as she will not be raced.

The Pavonia Y. C., of Jersey City, has raised $1,400 by subscription toward further improvements on its fine house and property at the Atlantic Highlands.

The *Atlantic Monthly* for April contains an interesting article on American sea songs, by Alfred M. Williams.

The Dauntless Y. C., of Jersey City, has recently disbanded.

Rifle Range and Gallery.

THE REVOLVER CHAMPIONSHIP.

THE shooting in the race for the Amateur Revolver Championship of America and the possession of the Winans Trophy emblematic thereof, has closed. The final scores were made at St. Louis, and the targets from that city have been added to those already under the measurer's machine. Fifty gentlemen completed scores in this opening competition. New York, Boston, Chicago, Philadelphia, Cincinnati and St. Louis were all represented in the list of places heard from, and in each city a representative of FOREST AND STREAM was present and supervised the work of the contestants. The match has been a very protracted one, but from the start the intention was to give the fullest opportunity for every one who considered himself competent with the revolver a chance to show that competency under the most liberal conditions ever drawn up for a shooting match.

Those who have taken part will bear testimony that it is no easy task to fire 30 shots under the strain of a match at such a distance and with the knowledge that the score is not the mere tallying up of a record, where a "nipper" is as good as a center, but instead, where every shot hole is measured from its absolute center to the similar point of the target disk.

The match has been in its entirety a complete success. It has brought to the front some new shots, it has fixed the position of some of the old shots. Ranges whence fine scoring reports come regularly are not represented by their expert in this match and in some instances the excuses for the failure to make records are more fanciful than convincing. With this trophy as a focus and the continued life which this match will have in individual challenges until it is finally disposed of under the rules, there is a channel open for the making of records which will be beyond dispute in the annals of revolver shooting in this country. There is a broad field yet to be cultivated in this gentlemanly art of single hand marksmanship. Mr. Winans came forward with a generous offer at an opportune time in his favorite sport and the marksmen of America owe him a hearty vote of thanks for what he has done in the donation of the unique bit of art work soon to be handed its initial winner. There should be other trophies. One each for the few various divisions into which revolver work easily divides itself. There is now a large amount of fifty-yard work done, especially in the season for open air shooting, It would be interesting to have a set of authentic records on this line of work. There are other tasks in revolver shooting the stories of which could be best told in a series of matches designed to bring out the best effort in each line. We would be pleased to see such series inaugurated and would assist to our utmost in their successful carrying out. As soon as the 1,500 targets now forming the record in this opening shoot of the Winans Trophy match have been duly and carefully measured up, the entire record will be told in FOREST AND STREAM. In our next or the following issue this interesting set of figures should appear.

"FOREST AND STREAM" TOURNAMENT

FOR NEW JERSEY RIFLE CLUBS.

Essex Amateur Rifle Club vs. Jefsen Rifle Club, shot on Essex range, Newark, N. J., April 12:

Overbough	10	12	10	10	11	10	8	10	10	9	—100—1040

Captain, Malcolm. Scorer, Overbough.

Opening the St. Louis Season.

ST. LOUIS.—The opening tournament for the season of 1892 for rifle shooting will take place on April 24 at Creve Cœur Lake, 200yds., German ring target, off-hand. The weather has been unfavorable for practice work so far, consequently the boys are not in their best form for big scores. Cash prizes will be awarded. Some members of the club met at the range to-day and the following scores were made. Weather cool, and our well-known lake breeze helped to keep the boys guessing:

Bauer	22	24	14	17	24	23	18	22	22	17	—205
Dunkerley	19	22	21	24	22	22	20	21	22	20	—215
Dorman	22	24	19	20	19	15	22	24	23	20	—208
Mueller	21	11	21	22	21	24	15	13	23	19	—190
Priester	12	9	15	10	9	17	16	22	19	17	—146
Minde	17	20	14	21	12	00	14	16	14	18	—146
Lendi	22	13	15	23	24	17	20	14	23	22	—193

Scores of 5 shots each:

Bauer	17 17 17 24 24— 99	Priester	11 19 24 14 16—84
Dunkerley	18 22 17 25 20—102	Minde	18 16 13 16 15—78
Dorman	17 21 23 23 21—105	Lendi	14 17 17 23 00—74

NAMROD.

Garden City Rifle Team.

CHICAGO, April 12.—The team met for their weekly contest this evening at 146 South Halsted street, 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300:

W J Gibbs	272	Geo McCune	260	W J Myers	255
H S Burley	226	Jas Hosie	258	W J Frisby	253
A McBean	264	M Tadro	257	F Arckron	251

In a sweepstake shot by nine members Joseph Hosie and W. J. Gibbs tied on 110, possible 120; in the shoot-off W. J. Gibbs won the money.

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

GREENVILLE RIFLE CLUB, Jersey City, Capt. William H. Robidoux, April 15. The scores made to-night in the regular weekly competitions for class medals are appended below. The conditions were 10 shots off-hand, 25-ring target, possible 250:

H Gotthardt	25	25	25	24	24	23	23	23	23	20	—235
C Boag	25	25	24	24	23	23	23	22	21	21	—231
H Spahn	25	24	24	24	23	23	23	23	22	19	—230
G Plaisted	25	25	24	23	23	23	22	22	22	20	—229
H Barr	25	24	24	23	23	23	22	22	22	21	—229
J Purkess	25	25	24	23	23	23	23	23	21	19	—229
J Hill	25	25	24	24	23	22	22	20	18	18	—221
J Boag	25	23	23	23	22	21	20	19	18	13	—212

The Greenville Rifle Club is strengthening its ten-man team considerably. The latest addition is George W. Plaisted, of the Zettler and Miller rifle clubs, who is a good reliable team shot.

Miller Rifle Club, Hoboken, April 13.—The scores made to-night in the regular weekly shoot are appended below. The conditions were: Ten shots off-hand, 25 ring target, possible 250 points:

D Miller	25	25	25	25	24	24	24	24	23	23	—243
L Sohl	25	25	25	24	24	24	24	23	22	24	—240
E Fischer	25	25	25	24	24	24	23	23	23	22	—278
F Brandt	25	25	25	24	24	23	23	23	23	20	—235
J Carragher	25	25	25	24	24	23	23	23	23	20	—234
A Meyns	25	25	25	25	24	23	23	23	22	20	—234
H D Heneken	25	25	24	24	23	23	23	22	22	19	—230
W Forkel	25	24	24	23	23	23	23	22	22	21	—230
Capt Dewey	25	24	24	23	23	23	22	22	22	21	—227
A Stadler	25	25	25	24	23	23	22	22	22	21	—227
R Zoch	25	25	24	23	22	22	22	22	22	20	—225
F Kloepping	25	25	24	24	23	22	22	20	19	18	17—217
H F Meyer	25	25	25	24	23	22	21	20	18	18	14—218
H Vanderheyden	25	25	24	23	22	22	20	18	17	16	12—292
F Kammel	24	23	22	22	20	20	20	19	19	19	15—200

The Lady Miller Rifle Club held its weekly shoot at headquarters, 80 Hudson street, Hoboken, last Thursday evening, the 14th inst. The conditions were: 10 shots, rest, 25 ring target, possible 250. The scores made were:

Mrs L Miller	25	25	25	24	24	24	23	23	22	21	—237
Mrs J Vogel	25	25	25	25	24	24	24	23	22	20	—237
Mrs E Petrie	25	25	25	24	24	24	23	23	23	22	—237
Mrs M Barrett	25	25	25	24	24	24	23	23	22	21	—236
Mrs H Stadler	25	25	25	24	24	23	23	22	22	22	—235
Mrs B Katencamp	25	25	25	24	24	24	23	23	23	19	—235
Mrs T Meyer	25	25	24	24	24	23	23	23	23	22	—255
Mrs A Cordts	25	25	24	24	23	23	23	23	22	22	—254
Miss K Born	25	25	24	23	23	23	23	22	22	19	18—225
Miss A Petersen	25	24	24	23	23	22	22	21	21	20	—225
Mrs M Meyers	25	24	23	20	20	20	19	18	17	14	—200

Shooting for handsome prizes will be the feature of this evening's shoot of the club. Several propositions for membership have already been received.

Palisade Rifle Club, Jersey City Heights, Thursday, April 14, Capt. John Reinhardt. The scores made to-night in the regular weekly shoot are appended below. The conditions were, 10 shots, off-hand, 25-ring target, possible 250:

First Class.

F Liell	25	25	25	24	24	24	23	23	23	22	—238
H Boddey	25	25	25	25	24	24	23	23	22	19	—235
A Maiz	25	25	25	24	24	24	23	22	22	21	—235
G W Graf	25	25	24	24	24	23	23	23	22	21	—234
J H Kruse	25	25	24	24	23	23	23	23	22	21	—233
L Sohl	25	25	25	24	23	23	23	23	23	21	—233
J Carragher	25	25	24	24	24	23	23	22	22	21	—233
Capt Reinhardt	25	25	25	24	23	23	22	22	22	21	—230

Second Class.

C Burk	25	25	24	23	23	23	23	21	20	19	—225
H Rosenthal	25	24	24	23	22	22	21	20	19	19	—219
F Kehrwald	25	24	24	23	23	23	22	19	17	14	—214
A Rossy	25	24	23	22	22	22	19	19	19	17	—212

Treasurer Charles Burk and Secretary Herman Rosenthal, who were elected at the last quarterly meeting, have entered upon the duties of their new positions, which duties both parties thoroughly understand.

Excelsior Rifle Club, Jersey City, April 15.—The scores made in the regular weekly outdoor shoot in Ambruster's Greenville Schuetzen Park. Ten shots, off-hand, 25-ring target, possible 250, 200 yds:

L P Hansen	24	23	23	25	25	23	18	19	24	25	—223
Geo C Varick	23	24	21	20	18	22	23	17	24	23	—214
Wm Weber	20	23	20	19	23	24	23	25	20	18	20—212
W H Rob'doux	21	19	19	19	22	24	21	20	22	21	—208
H Chavant	24	20	20	19	22	19	18	19	25	17	—201

The outdoor season is as yet not in its height, and not until then will more than five or six members appear to shoot. The indoor season of the club terminates this month, when the medal winners in their respective classes will be presented with the handsome and costly prizes.

Capt. Henry Wirth and F. W. Kroeger, of the Hoboken Schuetzen Club, shot another match at headquarters last Sunday morning, the 17th inst. This time the Captain was defeated, though only by a narrow margin. The conditions were ten strings of ten shots off-hand, 25-ring target, possible 250. The scores made were:

F W Kroeger	236	234	243	239	238	240	233	236	239	238—2576
H Wirth	234	238	236	238	237	234	239	232	238	235—2361

Garrett A. Demarest, of Company A, Second Regiment, N. G. N. Y., has been proposed as a member in the Miller Rifle Club, Hoboken. He is one of the company's foremost shots and this would be a good acquisition of the club.

Police officer "Cap" Aldonetta, of the Hoboken Police Department, has waited and received no reply to his challenge published in the FOREST AND STREAM some months ago, to meet any 55 year old policeman in the world in a contest with the revolver. His weapon, a handsomely plated self-cocker affair, was given to him by "Milky" McDonald, the celebrated crook and burglar, upon being arrested for burglary for which he is now serving his sentence. He presented it to genial "Cap," with the remark "You can have it, 'Cap,' I won't need it for a while." The latter would not part with it for a small fortune.

By the way, another shot in the police ranks is Detective Julius Nelson, whose hobby is the rifle, with which he has done some excellent shooting. He is an enthusiastic member of the Miller Rifle Club and Union Athletic Club. At the headquarters of the latter Julius can be frequently seen showing the club men the proper way of holding, sighting and firing a rifle. The members think him the leader in shooting in the police ranks.

The Palisade Rifle Club's members are busily engaged just now in renovating its headquarters, 354 Palisade avenue, Jersey City Heights.

A shoot for a handsome trophy to be presented by Major Charles Hoffman will take place in a short time, among the companies of the Sixth Battalion Germania Schuetzen Bund. The winning team will either represent Herzog Company or Blencker Company. The former could furnish five good men in F. Brandt, F. Meyer, R. Zoch, F. Forkel and A. Meyns, and the Blencker Company's members would place their money on J. Hilpert, C. Von Der Lieth, Capt. Moebmking, J. Czeggneck and C. Hanke. The companies who will enter teams are: Hoboken, Blencker, Freischutz, Herzog and Ernst August. This is the first time in the history of the Sixth Battalion that a tournament has been given, and it may safely be said that all entered will put in their best shots. As a 10-men team neither of the companies would be very strong, as there is a lot of undeveloped shooting material lying around loose in the Germania Schuetzen Bund.

A 50-shot match took place last Friday evening at Russell & Roedel's Schuetzen Hall Ranges, 223 First street, between Paul Schunke and Frank Vanderbergen, of the Hoboken Schuetzen club. The scores were:

Paul Schunke	225	234	230	227	226	—1142
F Vanderbergen	228	234	226	232	232	—1152

The winner received a handsome gold medal presented by Messrs. Russell and Roedel.

The Hudson Rifle Club recently defeated the North Ward Rifle Club in a ten-men team match at the headquarters of the latter on Broad street, Newark, by the narrow margin of three points. A. Braun, Sr., of the Hudson, held the high score of the evening with 245 out of a possible 250. A return match has been arranged to take place at Marion in two weeks, when the Newark boys threaten to turn the tables. The totals were 2,369 and 2,366 an average of $236^{9}/_{10}$ and $236^{6}/_{10}$ per man. Refreshments followed; and after all the sore stuff had been "put away" by the Hudson boys they departed for home tired and weary, having a bigger opinion of the North Wards' pleasant hospitality.

The various companies of the Second Regiment, N. G. S. N. J., are practicing several times a week for the match; the winner of which will be presented with the handsome Stevens trophy presented by Colonel E. A. Stevens. The boys of Co. "A," Capt. Sagendorf, are practicing almost daily at Russell and Roedel's Schuetzen Hall Ranges and under the able tuition of Captain Sagendorf and Lieutenant "Sam" Allison are putting up good scores. Those made last Sunday are appended below. The conditions were strings of five shots, off-hand, distance 100ft.:

G A Demorest	55345—22	55344—21	45545—23
C Buck	44434—19	44444—20	53435—20
S Allison	43444—19	35434—19	35435—20
J McEvoy	35542—19	44432—18	53535—21

The race for the cup is conceded to lay between Companies "A" and "D," but at the rate the former are shooting now, Company "D" will have to hustle. A visitor to the range made the following score with the company rifles in ten shots, possible 50: 2032244022—18. Then taking a Ballard the score he made was, 5545555555—49.

The following scores were made at the weekly outdoor shoot of the Excelsior Rifle Club at Ambruster's Greenville Schutzen Park, last Friday afternoon, the 8th inst. L. P. Hansen, as usual, led in the scores with a total of 219. Wm. Weber being second with 207. As it is the Excelsior "boys" have as yet not knuckled down to their work, and as a result the scores are low, but when they do the scores will be considerably higher. Those made are below. The conditions were 10 shots off-hand, 25-ring target, possible 250, distance 200 yds.:

L P Hansen	24	23	20	23	22	22	18	19	24	21	—219
Wm Weber	22	18	18	19	21	23	22	20	23	21	—207
Geo C Varick	18	19	18	19	20	25	18	22	20	20	—199
James Hughes	18	18	19	20	21	20	17	18	23	23	—197

L. P. then fired 50 shots, making these scores:

L P Hansen	219	211	204	219	219	—1072

The Palisade Rifle Club, Captain John C. Reinhardt, of Jersey City Heights, are anxious to engage in a ten-men a side team match, or say a series, best two out of three matches, loser to pay for the refreshments with the A. Lischke Rifle Club. The Palisades have noticed the scores of that club in FOREST AND STREAM, and notwithstanding the high scores think they can meet the Lischke club in a five, eight or ten men team match and defeat them. An early reply is awaited by Captain Reinhardt, at headquarters, 354 Palisade avenue.

The Greenville Rifle Club, Capt. William H. Robidoux, has arranged a ten-men team match with the Warren Rifle Club, of Newark, to take place on April 27 on Joe Kaiser's Metropolitan Hall ranges, Greenville.

George Schlicht says he knew nothing of a match being arranged between himself and Ernest Fischer. It was probably a joke of the latter.

Company A, Second Regiment, N. G. N. J., are doing better work than ever in their practice at Russell and Roedel's Schutzen ranges, in Hoboken. G. A. Demorest leads with scores of 22, 22, 21, 21, 20, 20, each out of a possible 25. It is the intention of the company after the shoot for the Colonel E. A. Stevens trophy to form a permanent rifle club to practice once a week. The members are all thoroughly interested in shooting and would gladly form a club.

Charles Judson is very ill at his home in East 107th street, this city. His absence on the Miller five-men team rather weakens it. But he, however, promises to shoot in the Miller—Our Own match.

Quite a number of matches take place weekly in Gus Thurk's ranges, Hoboken, and it is acknowledged that his is the most popular of any in that little sporting city.

At match took place at Russell & Roedel's range, Hoboken, last Sunday between the proprietors, "Shad" Russell and G. M. Roedel. Company A were practicing at the time and the shooting was done with the regulation Springfield rifle. It was the first time they ever fired a rifle of this kind and poor scores were the result. The scores made were:

Russell	..3 4 0 5 2—14	Roedel	..2 3 0 3 0—8

The former, who is the senior partner, then laughingly told his partner that the latter knew nothing of shooting, to which Mr. Roedel acquiesced.

The Hoboken Schuetzen Club, Capt. Henry Wirth, of Hoboken, has done no shooting of any account in the past few weeks, their time being occupied by their hustling to make their ball of the 24th a success.

Nothing further has been done in the proposed 1,000 shots a man tournament which was to have been given by the Hudson Rifle Club, to be open for members only. It was proposed to fire a hundred shots a week, this drawing the tournament out ten weeks. Capt. Henry L. Hansen, of the Hudsons, is still in Connecticut.

Another member of the club will be absent for a while. Henry Boddey leaves for England in a week to visit relatives of his who reside there. His absence will extend for a period of two weeks.

The Palisade Rifle Club, Captain John C. Reinhardt, has just inaugurated a medal shoot open to members only, which has already proved an immense success. Henry Boddey leads with scores of 73, 73, 73—219. Captain Reinhardt and several others are close behind. The shoot will be open for two months, when the winner of the medal among the first and second class men will be presented with the handsome prizes.

It is as yet rather too cool for outdoor shooting but several clubs unmindful of the rather chill weather have already commenced practicing, among them the Greenville Rifle Club and the Excelsior Rifle Club, at Ambruster's Greenville Schuetzen Park.

The Union Hill Schuetzen Park ranges are being thoroughly fitted up in first-class order. In back of the targets new blocks had to be put in, as George Schlicht says every block in use last season has been stolen by parties living in the neighborhood of the park and had made use of it as firewood. This is the case every year. As any one who has ever shot in the park knows, it takes quite a large amount of blocks to fill in the space behind these targets.

That Mecca for rifle shooters, the park mentioned above, is again under the able management of Hugo Kroebel. His manager for the ranges, shooting house, etc., is George Schlicht, of the Miller Rifle Club, Hoboken.

John R. Havens and Judge George F. Seymour defeated Louis Thiebault and Thomas Wright at the ranges of Russell & Roedel, 223 First street, Hoboken, last Tuesday evening, the 12th inst., by the score which follows. The conditions were 50 shots a man, off-hand, 25-ring targets:

John R Havens	25	23	21	23	22	24	23	23	22	23	—229
	23	24	24	24	25	23	24	25	23	22	—237
	24	25	25	25	25	23	22	24	23	23	—239
	21	21	23	24	24	25	24	25	23	23	—233

Average											—232
											2330

It was expected that the former would enjoy a walkover, but it would have been a different story hadn't Thiebault broken up on his fourth string. However, Wright and Thiebault will try the same pair again in a week or two, as they are confident that they can defeat them. The match will consist of each man firing 100 shots, when the losing team will pay for a spread for the principal and half a dozen friends.

The Hoboken Schuetzen Corps has competed all arrangements for its twentieth annual ten days' shoot and festival, which will take place at the Union Hill Schuetzen Park in June. The corps, which number 125 members, will parade through Hoboken's principal streets in baroucles, after which the drive will be continued to the park. Their affairs have always been well attended and they promise this time to eclipse all former events.

Julius English, a member of the former Independent Rifle Club, of Hoboken, was buried from his home in Madison street, last week. He died of dropsy, in St. Mary's Hospital, after a long illness. His old clubmates attended in a body, bringing with them a handsome floral design.

The Miller Rifle Club intends to put in its strongest team from now until the close of the FOREST AND STREAM tournament, to set aside any chance for an accidental defeat, as it would not be pleasant after holding the lead for such a long time to lose it.

Freischutz Company No. 53, Germania Schuetzen Bund, Capt. Joseph Schaner, are now making all arrangements for its first annual spring shoot at Wisch's Hall, Hoboken. An efficient committee has the matter in hand.

The following matches were shot at Thurk's ranges, Hoboken, during the past week:

A Stadler	25	25	25	24	24	23	13	22	22	21	—231

W Schrader then fired six shots, and out of a possible 150 secured 149. Score:

Schrader	25	25	25	25	25	24	—149				

Other matches were:

H Stockfeldt	25	24	23	21	20	20—130
W Jansen	25	25	24	23	21	21—139
W Baker	25	23	23	22	21	20—134
A Hoefell	25	24	23	21	21	20—134
F Meese	24	24	24	22	21	21—136

The Hoboken Independent Schuetzen Corps, Capt. John Koellisch, contemplates making its annual festival a rousing success, and to make it more successful than ever.

The Miller Rifle Club has arranged the following programme for its sixth annual spring shoot, picnic and summernight's festival, to be held at the Union Hill Schuetzen Park, on Monday, May 30 (Decoration Day).

Ring target: First prize $50, second $40, third $30, fourth $20, fifth $15, sixth $10, seventh $8, eighth $7, ninth $6, tenth $5, eleventh $4, twelfth $4, thirteenth $3, fourteenth $3, fifteenth $2, sixteenth $2. Open to all comers, tickets $1 for 3 shots, re-entries unlimited, two best tickets to count.

Bullseye target: First prize $25, second $20, third 15, fourth $10, fifth $8, sixth $7, seventh $6, eighth $5, ninth $4, tenth $3, eleventh $3, twelfth $2. Open to all comers, tickets of 10 shots $1, tickets unlimited, the best bullseye by any one shooter to count by measurement.

Premiums: For first most bullseyes $10, for second most bullseyes $7, for third most bullseyes $3. Morning, first flag $1. Evening, last flag $1.

Ladies' prize shoot: For a handsome gold medal, all entries to be accompanied by a prize.

Target of honor: Three shots, open only to members of the club, for the prizes presented by the judges and members.

Judges' target: One handsome gold medal and one handsome gold mounted umbrella. No member allowed to shoot on this target, shooting to commence at 9 A. M. and to close at 6 P. M. sharp. The well-known rules to be in force.

The shooting committee comprises: Chairman David Miller, Louis Flach, Frederick Brandt, J. H. Kruse, L. Vogel, Charles Judson and August Meyns.

The athletic portion comprises the following, which is open to all, no entrance fee being charged: A one-mile race for a gold medal. A one-mile walk for a gold medal. A sack race for a gold medal. A ladies' egg race for a gold medal.

An elegant fireworks exhibition will be given at 9 P. M. Music will be furnished by Prof. Boenich. Dancing commences on the big platform at 2 P. M. Bowling for prizes will also be a feature. Admission 25 cents. The club leaves headquarters, 80 Hudson street, Hoboken, at 8 A. M. that day, and after parading through the principal streets will enter coaches at 14th street and drive to the Schuetzen Park.

The Winans Trophy at St. Louis.

ST. LOUIS was the last town to shoot for the Winans Trophy. Two years ago it would have been the first, at least in the West. Even to-day there are many who would credit St. Louis with being the first, in point of skill, with the pistol, of any of the Western cities at least. The fact is, the old pistol club of St. Louis became practically disorganized over a year ago. Its members discontinued pistol shooting and went into rifle shooting. In this they have made records for themselves also. To them the news of the Winans Trophy came faint and late. Barely within the thirty days did they determine to establish a St. Louis competition for that interesting prize.

It was Mr. Samuel G. Dorman, leader of the old pistol club, foremost now among the riflemen, and holder of innumerable championships, trophies, medals and emblems, many won only by exertion of a skill which would be remarkable anywhere, who took the initiative in the contest for St. Louis, and by correspondence arranged the preliminary details. It was Mr. Dorman who recently, upon the very wet and disagreeable morning of April 2, met the FOREST AND STREAM representative in the Union Depot at St. Louis. A couple of hours later the full party of shooters were on board the train bound for the park of the St. Louis Sharpshooters' Society. Meantime it rained, and rained again, and rained some more, making a most dismal outlook. It had been determined in advance to shoot in the open air at the park, and this was done, although free choice was offered the shooters of shooting in the open, or in a gallery, on that day, in the evening, or any day or evening they might select during the ensuing week.

It was thought that seven shooters would compete, among these Mr. Perret, of the Meacham Arms Co., on whom the contingent relied largely for a victory for their city. The abominable weather, however, disappointed all, and only five shooters were actually on hand. These were Messrs. Sam G. Dorman, Geo. W. Alexander, Wm. Bauer, Moses Summerfield and Chas. Mueller. It was 10:30 A. M. when the party disembarked at the park and an hour later when the shooting began.

The sharpshooters' park is a beautiful spot, on a high level near by the winding Crève Coeur Lake which forms so prominent a factor in St. Louis sport, although distant 21 miles from the city. A comfortable road house, a grand long building which serves as a firing stand, pretty lawns now just showing green, winding walks, trellises, trees and flower beds—all these show the pride and pleasure alike of the many shooters who frequent the spot in season. The 200yds. rifle range is open and wind-swept, a hard one for high scores, but the prettiest and altogether the best appointed one in all this region. I doubt if there is another approaching it in America.

But the rain continued, falling at times in angry torrents. An indoor range could not be secured where the light was good. Finally the 20yds. range for the short guns was established out from the shooting house toward the rifle butts on the 200yds. range. The flaps of the great firing windows were raised, making a porch which broke glare of light and fall of water. The shooter stood dry and comfortable, on a good floor, with shelves and tables and chairs for his instant use, and nothing to disturb him but the resounding patter of the rain upon the roof. His target faced him from a wooden "horse" placed in the open air. This he must see part of the time through a swimming sea of rain, and part of the time through a wild and eerie sunlight, for after a time the storm clouds parly broke away, though soon to close, and to pour discomfort to the close of the hours of work. Outside, in the rain, stood the range marker, and to his assistance went, from time to time, Mr. Bauer, Mr. Alexander and Mr. Dorman, all amphibians of the first water.

The 2½in. bullseye ruled favorite. Before the contest opened a little practicing was done. Consternation! What was the matter? The men could scarcely find the field. "We never shot like this before," they said.

Is there a hoodoo connected with this trophy? The above is just what they said at Cincinnati. "We have not shot so poorly before." That was in the open air. But at Chicago, in the gallery, the shooters also said, this is nowhere near our regular work." At St. Louis the records of these same shooters prove that they have been shooting a gait right along which is fairly 50 per cent. better than their work in the actual contest. Yet not one, but all, fell down. And not one town, but three went far below the regular practice average. What is the cause of this?

But now our men drew lots to determine the order of shooting. It was resolved to go on in spite of the weather and shoot it out. The first at the score was Mr. Bauer, a dark, lean, wiry, nervous-looking man, but one of enviable skill. In style he was very rapid. He finished his 20 shots in 15 minutes, which breaks the record on that line in the Western shoots. Mr. Bauer was not regular, and though he got close around the center hole of the disk, he sometimes left the 6in. target altogether, to his intense surprise and disgust. He retired amid reproaches. Yet his string will be found better than many which will be measured.

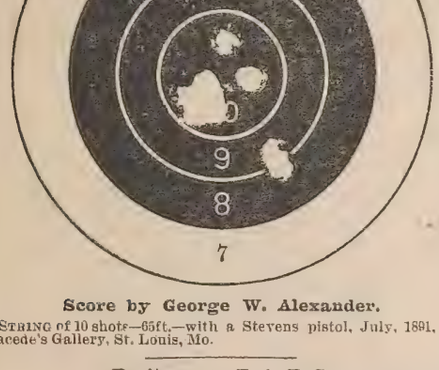
Mr. Mueller was next. A short, compact man, apparently a bit anxious and a trifle disgruntled at his poor performance in practice just a few moments before the shoot. Yet Mr. Mueller shot perhaps the evenest gait of all the five men, and he had three rounds which looked very creditable, though of course it is only guess work as to how they will compare with others on the measuring up. Mr. Mueller also received reproaches as he sat down, and went off to the road house to drown his sorrow with Mr. Bauer.

Mr. Dorman was next. Mr. Dorman is a singularly quiet man, slow of motion, deliberate, tall, sinewy, one of those rare men you see who sit perfectly quiet and at rest, with absolutely no motion to betoken the presence of a nervous system. It would be pleasant to see Mr. Dorman win the trophy, for he is the ideal character for a steady pistol shot. A sigh of relief went up. Mr. Dorman was mainstay of all hope. He always shot well when he needed to. "Now, Sam," said his friends, "get 'em all, and save the honor of St. Louis." Mr. Dorman said nothing, and methodically went to work. But not to the work of old, or even of recent days. He chose the 1½in. bull, but his bullet often crept away

from it. He only got off the disk once, but he often got off the bull, and his occasional unaccountable high or wide shots were out of all keeping with his usually steady gait. A deep groan of depression greeted him as he sat down, and his friends got no comfort from the assurance that Mr. Dorman's score would compare very favorably at least with any shot in Cincinnati or Chicago. Mr. Dorman was not up to his average. Some day, I think, Mr. Dorman will linger very near this silver cowboy. He said little of his shooting, only calling attention to the very small amount of revolver practice they had all had since the year or more of rifle shooting. "It may be the open-air shooting is different from the gallery, too," said he. "Our practice was all in the gallery." During his turn Mr. Dorman was compelled to stop for a time on account of the rain, which fell in a blinding flood.

Mr. Alexander next went to the score, a tall, heavy, florid man, nervous and quick, and it proved a bit red hot by nature. In a hundred contests Mr. Alexander has shown himself a pistol and rifle shot of rare skill. He has a box full of medals. Yet like his predecessors he was off, and could not see why. He grew choleric over it, in a good natured way, and blamed himself roundly. Toward the close of his score he had an accidental discharge as he was about to draw down. The shot was wild, of course. "Can I shoot that again?" he asked.

"No," was the decision. Then, in anger not at the decision but at himself, our friend blazed away, bang! bang! two shots, hit or miss. One shot happened to find the face of the disk, close in, the other missed the earth.



"Here! Here! Stop that foolishness!" called out his friends. "We need your score." So they made him settle down and he did just as well after that as before. He retired amid the usual groans and good-natured chaffing.

Only one shooter remained, Mr. Summerfield, a short, stout-built man, with gray eye and quiet movement. Mr. Summerfield has done some of the best pistol shooting ever done in St. Louis. "We've got Mose left," anyhow, said everybody, in a contented sort of way. "Get 'em all, Mose." But "Mose," as he was familiarly called, followed in about the average of the day, at a gait inexplicably lower than was his wont. Some good shots, some poor ones, several off the disk. One peculiarity of Mr. Summerfield's shooting was apparent. He had the steadiest hand of any. The barrel of his revolver at times seemed as steady as if in a vise. Such solidity of nerve and muscle you will not see among a thousand shooters. After the shooting, Mr. Dorman privately said to me that he considered Mr. Summerfield one of the best pistol shots he ever saw, and that his record had always been high. His falling off in the contest was not accountable.

When Mr. Summerfield had finished he was guyed and groaned at, according to custom, and then everybody shook himself, stopped being sorry and went in to luncheon. "We will go after the trophy when it is won," said the St. Louis gentleman. They could not be persuaded to believe that they had a chance for it. Yet, so far as can be told, it would seem that the averages at Cincinnati, Chicago and St. Louis are not far apart.

With the gentleman named above the representative of FOREST AND STREAM passed a delightful day in the pleasant old city of St. Louis, and we laid many plans, one of which of course was for an early return for another visit. The paper should thank these Western friends for courtesies.

Revolver shooting in St. Louis will again revive after this. It is no mere rude guess to say that the Winans trophy will be very likely to come some day for a sojourn at the city by the Mississippi. There is most excellent material for revolver shooters there, and steady practice will bring our some men who will be hard competitors. E. HOUGH

Score by George W. Alexander.

STRING of 10 shots—65ft.—with a Stevens pistol, July, 1891, in Lacede's Gallery, St. Louis, Mo.

Puritan vs. T. A. B. S.

SHOT on T. A. B. S. range, April 13. Distance 25yds., 25-ring target:

Puritan.		T. A. B. S.	
J Kopf	221	Gallon	226
F Danger	236	Collins	222
S Morris	232	Thornton	227
C Kopf	239	W W Roe, Sr	220
J Woods	235	J W Roe	213
F Weiler	232	Breen	227
E Helb	241	W W Roe, Jr	213
F Miller	233	Fay	229
C Carpenter	240	Donnelley	231
A Sauer	233—2342	McGuire	223—2231

The Empire Club.

THE following scores were made by members of the Empire Rifle Club at their weekly shoot on the 8th inst. at their headquarters, 12 St. Mark's Place, N. Y., on the 25-ring targets, 100ft.:

B Zahn	240	W Meisenholder	231
J Diehl	234	C Zettler	230
W Rosenbaum	232	A Rosenstraus	229
H Zettler	227	H Felzer	223
Gus Hillmeyer	220		

Lischke Scores.

JERSEY CITY, April 14.—The Lischke Rifle Club shot to-night at 110ft., 25-ring target:

Capt A Lischke	231	Reicherg	222
Schuyler	230	Steidel	218
Schulte	208		

The Boston Shooters.

BOSTON, April 16.—The regular weekly shoot of the Massachusetts Rifle Association was held at its range to-day. A large number of riflemen were in attendance. Some good scores were made, and much interest shown in several of the matches, especially the pistol match, where F. Crowninshield scored 95, J. B. Fellows and H. S. Harris 94 each, S. Paine 93. Mr. Crowninshield won the bronze pistol medal, and Messrs. Marshall and Gleason each won military medals.

Heidenreich Rifle Club.

THE following scores were shot at our weekly shoot at our Rifle Range, 425 W. Fifty-third street:

Val Horn	239	W M May	214
W Steckel	230	Jos Hippolet	214
A Busch	225	John Aigeldinger	231
J Heidenreich	210	John Kaufmann	225
		Alex Napier	218
		Dan'l Dieneen	212

The Zettler Shoot.

REGULAR weekly shoot of the Zettler Rifle Club, April 12, 25-ring target, possible 250 points:

M Dorrler	247	F Ross	246
M B Engle	246	B Walther	245
L Flach	246	C G Zettler	245
H Holges	246	F Lindkloster	245
M Tropp	228	F Farbarius	226
G Nowak	244		
G W Plaisted	243		
B Zettler	243		
F Hecking	240		

Trap Shooting.

All ties divided unless otherwise noted.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

April 21-22.—Sardinia, N.Y., tournament. E. Andrews, Manager.
April 22.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.
April 23.—South Side Gun Club, Newark, N. J.
April 23.—Sewaren Land and Water Club, at Sewaren, N. J.
April 23.—John Erb's Old Stone House grounds. five bird sweeps open to all, 1 o'clock P. M., Bloomfield avenue, Newark, N. J.
April 23.—Sweepstake shooting at Watson's Park, Burnside, Ill.
April 23.—New Jersey Shooting Club, weekly shoot at artificial targets, Claremont, N. J.
April 23.—Dexter Park Shooting Association weekly shoot, at Dexter Park, Long Island.
April 23.—Rochester Rod and Gun Club, bluerock tournament, at Rochester, N. Y.
April 23.—Boiling Springs Fish and Gun Club, 100 target match, Klees vs. Jeanneret, at Rutherford, N. J.
April 27.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.
April 27.—John Erb's grounds, Newark, N. J., open to the world sweepstake, at 50 live birds per man, $50 entry; beginning at 10 A. M.
April 27.—Grand sweepstake, open to the world, 50 live birds, $50 entry, birds included, twelve entries, four moneys; sixteen entries, five moneys; twenty or more entries, six moneys. John Erb's, Bloomfield avenue, Newark, N. J.
April 28-30.—Al Heritage's annual tournament; two days at targets, third day at live birds; Marion, N. J.
April 28.—Emerald Gun Club, at Dexter Park.
April 29.—Willimantic Rod and Gun Club, Keystone tournament, at Willimantic, Conn.
April —.—Ridgewood Gun Club tournament, at Ridgewood, N. J.
April —.—Territorial Sportsman's Association, first annual tournament, at Las Vegas, N. M.

DRIVERS AND TWISTERS.

The following pleasant letter has been received from S. H. Brown, secretary of the Hornell Gun and Game Protection Association of Hornellsville, N. Y. "At a meeting of this Association, held on April 8, Sidney H. Crane was elected president; Edward S. Brown, vice-president; S. H. Brown, secretary; Robert V. Goodrich, treasurer. This club was organized in 1886 with a large membership. Many of them did not prove to be good working members however, and it has been 'nip and tuck' at times to keep the few good members together, until last spring we secured an eight year lease of grounds lying very convenient and pleasantly located, built a good club house and fitted grounds up in first class shape This year promises the turning point to success, as financially we can see our way out, our membership is now over forty in good standing with prospects of doubling in membership. The boys are getting the latest improved guns and have made some fine scores this spring. We expect to hold two or three tournaments this season, and shall be glad to have any and all good sportsmen join us in these events. Will be pleased to exchange membership lists with secretaries of clubs in neighboring localities."

* * *

The Altoona *Gazette* has the following anent the new shooting grounds of W. G. Clark of that city: "The grounds have been leased for a number of years and very substantial buildings are now in the course of erection. The main building will be 75×16ft. and 16ft. high. The front of the same serves as a shelter from rain and sunshine, while the building proper will consist of storage rooms and a lounging platform. The platform will be raised 3ft. above the shooter's score, and will be supplied with gun racks, ammunition tables, chairs and other conveniences for the comfort of shooters. There will be six improved Keystone traps used, and they will be arranged to suit either the rapid firing system or unknown angles. Each trap will have a separate screen and will be so arranged that the trapper will not be exposed on rainy days. The traps will be manipulated by an automatic pulling apparatus and will combine speed with convenience. The arrangement carries out the requirements of the American Shooting Association rules, which will govern all tournaments. The background is clear and the surroundings generally attractive. The grounds are situated but a short distance from the hotel and the daily trains connecting with the street cars of this city render access very easy. The various tournaments will be attended by noted trap shots from all over the United States. The idea is to so conduct the events that the amateur will be placed on a similar footing with the expert. This undertaking on the part of Mr. Clark is for the benefit and encouragement of shooters generally and not for any selfish motive. He should have the hearty co-operation of all who enjoy sports afield."

* * *

On April 27, a fifty bird match for $100 a side will be shot at Milford, N. J., between Mahlon Fox "the shooting blacksmith" of Trenton and Mahlon Ruppell of Milford, 30yds. rise, 5 traps, 21yds. boundary. The money is all up and the match is a sure go.

* * *

It will be noted that the dates for the tournament of the Indianapolis Gun Club have been changed to May 17, 18 and 19. This was done in order that the affair might not interfere with the Ohio State Shoot to be held in Columbus on May 10, 11 and 12. A big time is expected at the Indianapolis shoot.

* * *

M. Klees and P. A. Jeanneret, both members of the Boiling Springs Fish and Gun Club, will shoot a match on Saturday. Klees will shoot at 100 bluerocks, Jeanneret at 100 United States targets; $25 a side. The match will begin at 12:30 o'clock and will be followed by open sweepstake events.

* * *

The Willimantic Rod and Gun Club will hold an all-day's tournament at Keystone targets under the Keystone system on April 29, and a big crowd is expected. The programme shows four 10-bird events, $1 entry in each; a "warmer" at five birds, 50 cents; two 15-bird events, $1.50 entry in each; one 20-bird event, $2 entry; one 25-bird event, $2 entry, $25 guaranteed and a contest for two-man teams at 15 targets per man, $3 entry per team. There will be four moneys in each event. Birds are included in all events. Plenty of refreshments and ammunition will be on hand.

* * *

May will be a great month for shooters as well as for the target and ammunition men, there being no less than twenty-two tournaments mentioned in our list of fixtures. The amount of powder that will be burned would supply nearly all the urchins in America with "noise" for the glorious Fourth.

* * *

The Williamsport (Pa.) Rod and Gun Club anticipates a grand time at its tournament on May 10, 11 and 12. Shooters from all over the country have promised to be on hand. As this shoot will immediately follow the Interstate tournament in Pittsburg, many of those who attend the latter shoot will go direct to Williamsport. The programme is an attractive one, there being 10 events each day. In the 10 bird events the entry is $1 and $1.50; 15-bird events $1.50 and $2; 20 bird events $3 and $2.50 and in the 25-bird events, $3. The seventh event on the second day will be a team shoot, open for any two men, 15 singles per man, $3 entry per team. Standard Keystone targets will be used, these being thrown from expert bluerock traps by Paul North's electric pull. American Association rules will govern all events, with the exception that all shooting will be from the 16yd. mark and 1¼oz. shot will be allowed. The targets will be deducted from the purses at three cents each. Five per cent will be deducted from all purses for average money, which will be divided into four equal parts and paid 25 per cent. to the highest in the 90 class; 25 per cent. to highest in 70 class, and 25 per cent. to highest in 60 class. The balance of money will be divided into five purses—30 per cent., 25 per cent., 20 per cent., 15 per cent. and 10 per cent. Shooters eligible to average money must shoot in all programme events. This division of money should encourage the amateurs and give them a chance to get a slice of all purses. Everything will be done by the management to make this one of the most pleasant shoots of the season.

* * *

The four full-page pictures, Young Mountain Sheep, American Elk, Group of Elk, and FOREST AND STREAM'S Grizzly, from the "*Forest and Stream Animal Series*," handsomely printed on heavy paper suitable for framing. The set of four (in tube) will be sent for ten cents (stamps will do).

Live bird experts should not forget the big race to be held on John Erb's "Old Stone House" grounds in Newark, N. J., on Wednesday, April 27. The conditions are fifty live birds each man, $50 entry, birds included, with a division of moneys that will give every man a chance to win. The shoot will begin promptly at ten o'clock, A. M. John Erb promises to have birds that will outclass the guns of the shooters and will wager somewhat against clean scores. This is the biggest sweepstake ever undertaken in this section of the country and it should call out the full strength of the talent. A number of noted Pennsylvania, Connecticut, New York and New Jersey marksman have guaranteed to enter.

* * *

Anent the above shoot it may be as well to state that our newly copyrighted explanatory signs will be used in the report. Strange, isn't it, that FOREST AND STREAM is obliged to cut a pace for all its contemporaries in the matter of getting and publishing news. The trap score type is only one of many surprises that this journal intends to administer to the public. We are at the top in trap matters and propose to remain there. C. H. TOWNSEND.

The South Sides will Meet Bridgeport.

SOUTH NORWALK, Conn., April 17.—*Editor Forest and Stream:* The members of the South Side Gun Club of this city hereby manifest their willingness to meet the members of the Bridgeport Gun Club upon any Saturday afternoon for a friendly team shoot, details of which can be arranged hereafter. We all sincerely hope that the Bridgeport brethren will take up the gauntlet, and that not only one but a series of team shoots will be the natural outcome of this communication. On behalf of the S. S Gun Club, E. H. FOX.

Shoot of South Side Gun Club, April 16.—Association rules, 5 traps, Keystones. Ties for third in No. 2 shot off in No. 3 and won by Coleman and Seymour on a second tie and divided.

Ferris	1011111110—8	0011111111—8	1111101111—9
Seymour	1110101101—7	1011011101—7	1111111111—10
Lewis	1111101110—8	1001101011—6	1110000110—5	1101111110—8

Coleman	1111101101—8	1101010111—7	0111111111—9	1111111110—9
Stevens	0111000110—5	1110101010—5		
Hill	0111001011—6			

For lack of something better we unearthed a barrel of glass balls and proceeded to pulverize them in the latest and most approved style imaginable, balls thrown in any and all directions, 25 cents entrance:

Seymour	10110—3	01110—3	11111—5
Northrop	10111—4	11101—4	11111—5
Fox	10000—4	10111—3	11101—4
Kelly	01111—4	00111—3	11111—5
Sanford	01110—3		
Lewis	11001—4	11111—5	11111—5
Coleman	00100—1	01111—4	01111—4
Drake	10111—4		
Ferris	11011—4		
Sherwood	01001—2		
Fiedler	11000—2	11011—4	11111—5
Hill	11101—4	11100—3	11110—4
Remington	11110—4	00000—0	
Craw		10101—3	01111—4

Ties on 4 balls shot miss and out, Craw dropped out on his third ball, Lewis on his fifth, Fox on his sixth, and the others stayed in until the balls were used up, when those remaining, Messrs. Coleman, Northrup and Remington divided, having each 9 to their credit. E. H. F.

Syracuse Defeats Rochester.

SYRACUSE, N. Y., April 13.—The first of a series of three shoots between the Rochester Rod and Gun Club and Onondaga County Sportsmen's Association came off at Maple Bay yesterday afternoon. The Rochester people issued the challenge and were beaten by Syracuse by a narrow margin in the first contest. Twenty-six men were brought on the field by Rochester. The great event of the afternoon was preceded by five sweepstake shots and was followed by one sweepstake. The records made were high and the average maintained also showed that the marksmen of both cities were on their mettle. After the events of the day at the range the Onondaga Club furnished a fine dinner to their guests in the club house, W. S. Barnum being the caterer. Mr. Barnum was compelled to transfer stoves, chairs and provisions from his hotel to the club house by boat, the grounds being still way under water. The second contest of the series of three between the Rochester and Onondaga clubs will come off at Rochester early in May. The conditions of the match were 26 men per team, 25 kingbirds per man:

Syracuse Team, Courtney, Capt.		Rochester Team, Hicks, Capt.	
Hudson	23	Hadley	25
Ayres	23	Van Ostrand	17
Petit	21	Holton	15
Becker	19	McVean	21
Montgomery	23	St John	24
Lefever	24	Meyer	20
G Mann	21	Tassell	16
Denison	14	Macumber	15
C Walters	17	Rissinger	23
Lansing	20	H Stull	17
Ayling	19	Borst	18
Byron	18	Norton	18
Williams	17	Richmond	19

Luther	22—526	Tass	18—511

The Country Club.

COUNTRY CLUB, Long Island, April 11.—One hundred sportsmen assembled here this afternoon to see the "return" match between Messrs. Parkhurst, of New York, and Thornton, of Liverpool. The conditions were as follows: Country Club rules to govern, 50 birds each, 28yds. rise, 80yds. boundary. The score was as follows:

L Parkhurst, Jr. 1111111111111111111010111111111111111111011111111—47
E C N Thornton. 1111111011111111101011111101111111011111111111111—45

Mr. Allan Nichols was referee, he also acted in that capacity last January when the first match was shot at Nice, which was said to be hottest contest of the kind seen on the Mediterranean shore for years.

The grounds are in fine shape now, and the many improvements, including the addition of Tower Hall and the new kennels, reflect great credit upon the management.

Two good pictures have been given to the club by the president, Mr. Nichols; they were painted by that gentleman some years ago, and are well executed stories of the sea, they are called, "In Twenty Fathoms" and "A Distant Sail."

Of the pack of Derry hounds presented to the club by that genial Irishman, Lord George Collis, two died on the yacht and two died here. The president informed me that the dogs were injured during the very severe weather the yacht encountered in which John Tilney, able seaman, of Cork, Ireland, was lost.

There is some talk of a three-cornered match at clay-pigeons, between Messrs. Parkhurst, Nichols and Gray, to be shot May 5

The shoot for the club cup will come off in June.

Onondaga Shooters.

SYRACUSE, N. Y.—The regular semi-monthly medal shoot of the Onondaga County Sportsmen's Club was held at their range at Maple Bay last week, at 50 kingbirds from five traps at unknown angles:

Class A.			
Mowry	47	Holloway	44
Hookway	45	Courtney	43

D Walters	42	Barnum	33
Ginty	42	Dugald	29
Harwood	w		
Denison	w		

Way Down in Old Virginia.

THE STAUNTON TOURNAMENT.

ARE you a sportsman or a lover of sport? If you are either join us at the Pennsylvania depot in Jersey City at 8 P. M., get in a parlor car of the Cincinnati express, and we'll go where every lover of sport will be assured a specimen of hospitality and royal fellowship such as will move the heart of an anchorite. The scenery between our starting point and Washington is of course familiar. Before leaving Jersey City we are joined by "Little" Neaf Apgar, the hustling salesman for Henry C. Squires, and at Washington the party is still further increased by W. Fred Quimby, the New York sporting goods manufacturer, who has been "doing" the trade for a week between "Philly" and Reading, and by Billy Wagner and Billy Rothwell, two of the Capital City's representative shots and hale fellows well met. And by the way, Wagner is soon to establish an Al sporting goods store in Washington, where such an establishment has long been needed.

At Washington we leave the fine cars of the Pennsylvania road and embark on one of the Chesapeake & Ohio trains, which speeds us away at a fifty-mile-an-hour gait past Alexandria, Manassas, Warrenton Junction, Culpepper, Rapidan, Orange, and finally begins to climb the majestic Blue Ridge at Charlottesville. From here on to Staunton, the end of our ride, we get a diversity of scenery that changes every few minutes. At one instant we are running through a gorge with but a few feet between the car and bluffs on either side, and then again we speed around a quick curve, on the very edge of which the track is built, and from where we catch a glimpse of a fertile valley several miles in extent, with neat white farmhouses, which tell a story of rural comfort as they nestle amid clusters of trees which even at this season begin to show green foliage. Peak, valley and basin follow one another in panoramic style, until at 7:45 the whistle toots and the train pulls up at the depot in Staunton, county seat of Augusta county, Virginia, where we disembark and stretch our weary

IN FRIENDLY RIVALRY.

limbs, the meanwhile heaving a profound sigh of relief at the termination of our long ride. A few minutes later we are shaking hands with genial Wm. F. Summerson, one of the most enthusiastic sportsmen, successful business men and popular all-around good fellows in the county. Possessed of a supply of this world's goods which enables him to suit his own sweet will as to his comings and goings, he makes the most of every opportunity to participate in anything that savors of sport in the forest or field, and has the reputation of being one of the foremost rifle and smooth bore marksmen in the State, as well as being an adept in wielding a fly-rod.

Reaching the Virginia Hotel, one of the old landmarks of antebellum days we meet many familiar faces. Here is Hal Penrose, president of the Standard Keystone Target Company, president of the Interstate Manufacturers' and Dealers' Association, president and chief hustler of the New London (Conn.) Gun Club, talker-up for the "S. S." powder and for the wares of the Union Metallic Cartridge Company and—well, I can't name any more of his business connections at this writing. Billy Fieles, the good-natured youngster who runs a big hotel, raises fancy poultry, high grade dogs and hails from Christiana, Pa., is also in view. Then there is the doughty Mitchell, he of Lynchburg, Campbell county, Va., who glories in the famous Swiss surname of "William Tell," handler of Charley Heath's famous Graphic Kennels and one of the finest live bird shots in the South, as is shown by his recent exploit in defeating "Captain" Jack Brewer by a score of 47 to 46 in a 50-bird race. Enoch D. Miller, of Springfield, N. J., is another of the "familiars" and he is here not only to shoot to show up the Parker gun and the Keystone targets, but in this instance to take a hand in the management of the tournament in place of our popular Jack Parker, who is detained at his home in Detroit, Mich., owing to the illness of his wife. Charles B. Ross, not the lost "Charley" of newspaper notoriety, but the auburn-hued lad from Knoxville, Tenn., who shoots a winning gait all the time; H. W. McVicar, J. P. Haddox, C. F. Nelson and G. W. Haddox, all prime good shots from the historic town of Winchester; E. I. Jones from Buena Vista, Va.; Dr. E. F. Wayman, he whose gun exploded at the Baltimore tournament, these and an army of local shots held possession of the hotel, and I may as well add "owned the town."

After discussing dinner the visiting sportsmen were taken in tow by the members of the Penrose Gun Club and escorted to their palatial headquarters on the main street. The club holds possession of four very large rooms, one of which is used as a pool and billiard room, one as a secretary's office, the third as a reception room and the remaining one as a room where the members and their friends can enjoy a game of cards, dominoes, chess or whatever their fancy dictates. The rooms are all furnished in handsome style. Being pretty tired after the day's travel the party retired early and turned out the next morning all ready for the business which had brought a large number of them so many miles from their homes.

THE FIRST DAY OF THE PENROSE TOURNAMENT.

Tuesday morning, April 12, opened bright and clear, although, as usual in this section at this season, the air was slightly raw and damp, the wind was very tricky and overcoats were in demand. At 8 o'clock the party started for the place where was to be held the tournament of the Penrose Gun Club, assisted by the Inter-State Manufacturers' and Dealers' Association. The Penrose Gun Club, named in honor of Hal A. Penrose, is an offshoot of the Staunton Gun Club, which was organized in 1884, C. McN. Whittle, since deceased, being the first president. The club started shooting Ligowsky clay pigeons from one trap. The club was prosperous for several years but finally began to dwindle, as several of the old organizers passed over to the great majority, the survivors losing their enthusiasm. Several months ago some of the new comers to the shooting ranks organized the Penrose Gun Club, and soon after this organization and the Staunton Gun Club consolidated under the title of the former. The present officers of the club are: John McQuade, Pres.; W. S. Moffatt, Vice-Pres.; W. O. Sydnor, Sec'y-Treas. Every shooter in the city and vicinity is an active member of the club, which shoots weekly at artificial targets. Wm. F. Summerson is at present the strongest shot in the club, although it can turn out a large number of men who can break well up in the eighties. Among the leaders are J. Lewis Bumgardner, a rising young lawyer of the city, W. G. Moffatt, W. O. Sydnor, John McQuade, "Happy Billy" McDonald, City Clerk Argenbright, Worthington, Nelson, Bosserman, Bowman, Allen, McDaniels, Gunther and E. Berkley, Staunton's favorite photographer. All the members are enthusiastic sportsmen and deeply interested in the sport at the trap as well as in the field.

The tournament was held on the Staunton Fair Grounds, about one and one-half miles from the depot. During the last few years it has been the writer's good fortune to attend many tournaments in various parts of the country, and some of these took place in spots where superb views were disclosed to the eye, but I am fain to say that nowhere have I seen anything to compare with the surroundings of the Staunton Fair Grounds. The grounds themselves lie in a basin, the sides of which are formed by a succession of mountain peaks which range from 1,500 to 2,200ft. above sea level. To the east are the Blue Ridge Mountains; to the west the Shenandoah range, these being backed by the Alleghanys. All of these run N.N.E. by S.S.W. The fair grounds are a part of what will be in a short time one of the handsomest parks in America, the guaranteed purses fail to fill. Among the experts present, in addition to those whom I mentioned as being in the hotel on Monday night, was Milton F. Lindsley, who had taken a night ride on the famous "F. F. V." train, of the C. & O. R. R., "just to see the boys," and incidentally to talk up business for the American Wood Powder Company; E. R. Bond, the farmer-expert, from Jessups, Md.; W. Baltzley, from Washington, and Geo. S. McAlpin, the champion live-bird and target shot of Virginia; and a goodly turn out of members of the local club. Squire John M. Kinney and Captain J. R. Jones performed the duties of entry clerk and cashier respectively, while the representatives of the FOREST AND STREAM and the American Field, with the open-hearted generosity which has made them famous in every part of the known world, as well as in Hoboken, acted in the capacities of engrossing clerks and expert mathematicians. After the opening hour everything moved along as smoothly as a carefully-oiled piece of machinery. The scheduled events were concluded shortly after four o'clock, and it was decided not to run any extra events on that day. Everybody was in a holiday humor. So they should have been after discussing the elegant banquet provided by the ladies of the Methodist Church. The meal was gotten up in elegant style, with all the delicacies of the season thrown in, and was highly appreciated by the shooters, who are proverbially a class of good feeders.

The day's sport was very enjoyable and highly pleasing in its results to the large number of Virginia shooters, many of whom had never previously attended a tournament. "Little" Neat Apgar, the boy wonder from Plainfield, N. J., shot in great form in the expert class, winning first average on 88 5 per cent. Enoch D. Miller was second with an even 80 per cent. In the semi-professional class Wm. R. Fieles, "Happy Billy," won first average money with 82.9 per cent., second going to Wm. F. Sommerson on 70.1 per cent. Wm. Wagner was first in the amateur class with 88.8 per cent., E. R. Bond, 88.7 per cent., being second. As soon as the shooting paraphernalia was stored away for the night the party returned to the Virginia and took supper. At 9 o'clock the sound of martial music was heard in front of the hotel and upon investigation it was found that the members of the Penrose Gun Club had engaged the famous Stonewall Brigade Band to tender a complimentary serenade to the visiting shooters. This band is one of the oldest in the South, dating its organization far back before the war. A number of the instruments used by the members were carried in the band when it led the old Stonewall Brigade. Several popular airs were rendered in fine form and "between the acts" stirring speeches of welcome were made by members of the local club, including J. Lewis Bumgardner and Mr. Ker, the latter being local correspondent for several Washington and Richmond papers. The graceful acknowledgment of good fellowship was warmly appreciated by the visitors. Below are given the first day's scores in detail:

No. 1, 10 singles, $1 entry, $10 purse:

THE SECOND DAY'S WORK.

Wednesday was an ideal spring day, the sun having sufficient force to make the air soft and balmy as in June, and there being no wind to bother the flight of the targets. The shooters were all up bright and early to enjoy the air which gave them stout appetites for breakfast. At this meal the writer along with his "deadly friend" of our Western contemporary, enjoyed an elegant dish of trout, served up for their especial benefit by Wm. F. Sommerson, who on the previous evening had sent a "special messenger" to one of the mountain streams in order to provide the feast. That they were a toothsome and "give us some more" morsal can be vouched for by my co-eater Friend Billy, when next we visit Staunton we'll give thee a chance to use thy special messenger once more.

The entry lists on the second day were not as large as on the first, although more targets were thrown. The programme was somewhat changed to suit the local shooters, the majority of whom were rather chary of putting up the amounts called for by the schedule. In events where the entry fee was reduced, the guaranteed purses were cut down proportionately. Fourteen events in all were shot. The scores were fully up to the average in all the classes. Owing to superior shooting on the first day, Bond, Mitchell and Wagner were promoted to the semi-professional class. In the expert class E. D. Miller captured first average money on 85 5 per cent, H. A. Penrose being second with 82, while Neal Apgar got 81. In the semi-professional class W. R. Fieles won first average on 85.5, E. R. Bond being second on 79.9, Wm. Wagner got 75.1 and W. F. Sommerson 71. In the amateur class Dr. E. F. Wayman was first with 88.2, H. McVicar second with 88 and Wm. Rothwell third with 85.7. Late in the afternoon a boy's ten-target contest was arranged, and some of the youngsters showed that they knew something about the game, as the score sheet shows totals of from three to eight breaks. Shooting was kept up until near five o'clock, after which time the grounds were deserted. On that evening Messrs. Wagner, Rothwell, Baltzley, Mitchell and Bond left for their homes. By bed-time the clouds had begun to assume a threatening aspect, and everybody carried to bed with them the idea that the association was to meet with usual luck and be washed out on the third day.

The Second Day.

ON THE THIRD DAY

as soon as the boys jumped out of bed they made a run for the windows and saw the rain descending in torrents with no sign of an abatement. The only thing to do was to await developments, and the party amused itself for a few hours in looking about the town and patronizing the stores in the search for novelties. About noon the rain slacked and a portion of the party drove over to the shooting grounds. It had been previously decided, however, that the day's shooting would be declared off. Once on the grounds some of the enthusiasts decided that rain would not deter them from having a little sport, so they arranged several impromptu events and used up about 500 targets. The first event was a match at 50 singles and 25 pairs between W. F. Summerson, of Staunton, and G. S. McAlpin, of Lynchburg, the scores being as appended:

Sommerson..... .....1601111111111111011111111—22

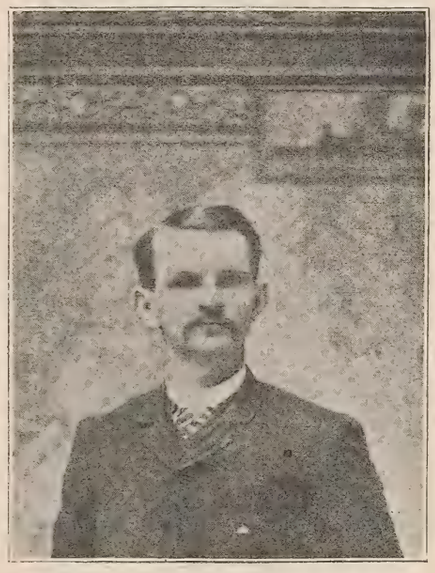
Then came a 50 bird event with six entries, Sommerson and McAlpin counting their first fifty shots in the above race as their scores, Sommerson breaking 44 and McAlpin 46. The other scores were:



Penrose.....1111111111111111111011111111111111111111110—48
Miller.....1111111111111111111111111111111011101111111111—48
Fieles .. ..1111111111111111111111111111111111111111111—49
Lindsley.....1110101111111111111111111101111111111110111001—44

The final event was at 25 singles each as follows:

Allen.....1111001111010100106100110—14
Wayman.....1111111011111111111111111—24
Apgar.....1111111011111111111111111—24

This closed the active work of the week, which was an intensely enjoyable one despite the wet ending. The tournament has undoubtedly done more than could be done by club shoots in a year in the way of creating an active interest in trap shooting, and the small amount of money lost will not be cried over by the stockholders of the association. The field is an entirely new one, and I predict that in a year's time it will be a prolific one, and one where thousands of targets will be consumed monthly. Nearly every man and boy in the region owns a gun and while they have heretofore confined themselves to game shooting, they will now that they have seen a genuine shooting match be eager to perfect themselves in trap work so that when another tournament is held they may be enable to hold up their end with all comers. The Penrose Gun Club contemplates holding an open to all tournament again before the snow reappears and if they do so they may rest assured of a generous share of patronage from those enjoyed their princely hospitality during the past week.

During this tournament the Standard Keystone targets and traps were used and both worked perfectly. During the two days programme shooting only 26 targets were broken by traps; of these 16 were broken on the first day when the trappers were green at

MR. W. O. SYDNOR.

the business. On the second day a tally was kept of the number of targets broken by each trap; this showing as follows:

No. 1,	No. 2.	No. 3.	No. 4.	No. 5.	No. 6.	No. 7.	No. 8.	No. 9.	No. 10.
0	2	0	3	0	2	3	0	0	0

Traps numbers 1 and 9 went through the two days without breaking a target. This is a good showing for the work of the boys as well as for the traps and targets. C. H. TOWNSEND.

Lansing Rod and Gun Club.

LANSING, Mich., April 13.—I herewith send you the scores made by the Lansing Rod and Gun Club at their first regular weekly shoot.

First event, 10 singles:

A H Whitehead....0101001110— 5 C Schelling.....1111111111—10
B F Hall .....0101110101— 6 J E Nichols.....1101110111— 8
E F Cooley .....1101110110— 7

Second event, the same:

Whitehead.....0000101111—5 Nichols .....1101111111—9
Hall.....0110011110—6 Wright.....1101001111—7
Cooley.....1101110111—8 Davis.....0111111110—8
Schelling .....1111110111—9

Third event, the same:

Whitehead.....1101110111—8 Nichols .....0101011111—8
Hall.....0101100111—6 Wright.....0111111110—8
Cooley.....1111011111—9 Davis.....0101011110—6
Schelling .....0111110001—6

Fourth event, the same:

Whitehead.....0101011111—8 Schelling .....1101101111—8
Hall.....1011010011—6 Nichols.....0101011111—7
Cooley.....0011110111—7

Fifth event, the same:

Nichols.....1101101111—8 Cooley .....1111110000—6
Hall.....10 1010.000—3 Schelling.....1110110011—7

Sixth event, 10 singles:

Nichols.....1010111011—7 Cooley .....1101111011—8
Hall.....0011001000—3 Schelling.....1011111111—9

JEN.

New Jersey Trap-Shooters' League.

INDEPENDENTS WIN AGAIN.

LAST Friday was a great day on the grounds of the Brunswick Gun Club, at New Brunswick, N. J. On that day the New Jersey Trap-Shooters' League held their third monthly team contest, under the auspices of the above lively club, and the latter also worked off a programme of a baker's dozen of sweepstake events. The early hours of the day were stormy, rain and snow alternating, and at 10 o'clock the success of the affair was in doubt. After that hour, however, the weather god took on a good-natured streak and allowed the sun to come out in view. The club had everything in apple-pie order for the day's work, having ten traps in position and a goodly supply of United States targets on hand. To the right of the neatly-appointed shooting house was one of Von Lengerke & Detmold's big tents, wherein Caterer Fred Ulrich dispensed sandwiches, coffee, chowder and pie to the hungry and thirsty. Another tent was used as an entry office. Nearly the full membership of the Brunswick Club was at hand to assist in the smooth running of the affair. The financial portion was attended to in good shape by R. J. Smith and W. E. Sperling, Jr. The reception committee comprised Chas. Van Nuis, chairman, V. S. Voorhees, Robert Pettitt, Dr. Harvey Fredell, Joseph Fisher, W. E. Sperling, Sr. and R. Slayback. Before the noon hour arrived a big crowd was on the ground, and from this time until dark the shooting was fast and furious, some of the events having as many as fifty-two entries. The old-timers were out in force, among them being "Uncle Billy" Sigler, of Montclair; Al Heritage, of Jersey City; J. J. Blauvelt, of Rutherford; Asa Whitehead and R. H. Breintnall, of Newark; Frank Post, of Park Ridge; Paul Jeaneret, of Rutherford; "Dutchy" Smith and Tom Keller, of Plainfield; C. M. Hedden and W. G. Hollis, of Newark.

During the afternoon Al Heritage, of Jersey City, proposed a special match for the benefit of the Bandle Memorial Fund, which was started at the recent Wilmington tournament. Each subscriber paid $1 into the fund, and shot at one target, the targets being donated by Von Lengerke & Detmold. The amount raised aggregated $35, the list of subscribers comprising Messrs. Keller, Cockefair, Walters, Hollis, Klees, Whitehead, Hall, Shaw, Pettitt, Voorhees, Sperling, Fischer, Babbage, S. O. Hedden, Brantingham, Simpson, W. Smith, C. Smith, S. G. Smith, Tillon, Iredell, Wise, Sigler, Heritage, Breintnall, Carl Von Lengerke, Van Dyke, Van Nuis, Koegel, Moore, Beam, Force, Apgar, C. M. Hedden, Abbott, Lindsley, T. Dukes, Post and the FOREST AND STREAM.

It was 2 o'clock when the big State championship events were started, there being 10 teams in the list. The conditions were 5 men per team, 25 targets per man, American Shooting Association rules to govern, the shooting being done under the 10-trap rapid-firing system. The United States targets and traps worked admirably, and the shooting was run off in very quick order. As in the two previous contests, the team of the Independent Gun Club, of Plainfield, carried off first honors, raising its record by breaking 114 out of the 125 birds. On the winning team was E. D. Miller, who with M. F. Lindsley, Neaf Apgar and the writer had left Staunton, Va., at half past the previous night and ridden for twelve hours in order to att nd the State shoot.

Below will be found a complete record of the shoot. In the sweepstakes the entries were $1 for 10-bird events, $1.50 for 15-bird events, and $2 for 20-bird events:

The next tournament will be held in Bridgeport. At a meeting of the League here Fast Day it was resolved that: "No one will be allowed to shoot on more than one team at the same tournament."

A. C. COLLINS.

Over Long Island Traps.

WOODLAWN PARK, April 8.—Match between C. Furgussen, Jr., and C. E. Morris, of the Atlantic Rod and Gun Club, for $50 a side and the birds, Hurlingham rules, 100 birds each, Furgussen 28yds., C. E. Morris 30yds. A picked lot of birds. Weather fine, strong S.E. wind. The score:

C Furgussen, Jr....	1111011211111111211121121—24
	2111111111021211111011112—23
	0121121121012211121111111—23
	1111011121211111110111101—22—92
C E Morris	2111120111022101111121111—22

North Shore Gun Club.

PORT RICHMOND, N. Y., April 9.—At the regular monthly shoot of the North Shore Gun Club on Saturday, April 9, each man shot at 25 U. S. pigeons from 3 unknown traps, A. S. A. rules. The wind blew a gale which accounts for the low scores:

Scofield	1110111111101011111001111—19
Schabert	0001100001010000101101000—8
Hanson	0111011111011111011111010—19
Sharrott	0010001010001000101010000—7
Taintor	0010110001010000000100010—7
Schmeigelow	0000000100000000010000001—3
Simmerman	0110101100000000010000000—6
Perry	0001110000000010001101100—8

Three sweeps at 6 singles was shot out of a possible 18 each: Rawson 16, Scofield 14, Schabert 15, Taintor 12.

CHICAGO TRAPS.

CHICAGO, Ill., April 16.—Mr. A. W. Knox, who has since time immemorial published the annual programme of the Illinois State Sportsmen's Association, assures me that this year we are to have the best, most beautiful and most unique programme that has ever been put forth in the land; from what I hear further I think there is justice in that assertion. The June tournament this year will be a vast affair, and new features are in demand to keep pace with the strides of this colossal event.

Messrs. Heikes, Bingham, Rexrodt and Marshall, who arrived here Sunday on their return from Dayton, O., were a discontented lot. Mr. Heikes, it is true, had every reason in the world to be proud of his phenomenal work in the time race, in which he made so grand a run so easily, he having taken it easy and not gone to the limit of his speed. The other boys, however, had had no shooting, and they felt bad. "We went down there to shoot a team race with Ohio," said they, "but when they found we were a man short they would not shoot under any circumstances. They insisted on five men or no shoot. We had only four men along, Mr. Atwater being detained. We had our trip for nothing."

Mr. Harvey McMurchy was in town this week long enough to say that he would shoot anybody in town a match, but he left again before anyone could answer.

Mr. J. E. Pumphrey, of Columbus, O., was present at the Haggerty-Mussey match early this week, an interested spectator.

Col. Jack Winston, of St. Louis, writes me the following scurrilous St. Louis postal-card, in large black letters, about the above match:

"St. Louis, April 12. Can you tell me the exact location of Chicago and the West? Well! Well! We await your interesting explanation anxiously. FOREST AND STREAM will sell this week, here at least. My kindest to all. Yours sincerely, Jack."

We shall be obliged to Col. Winston if he will not repeat any such unkind allusions. G'way f'om hyar, man.

Chicago feels complimented in the fact that a Chicago match was the first to be reported with the new FOREST AND STREAM trap type, showing the course of the birds. This feature has caused a great deal of comment here already, and the only wonder is how shooters have been getting along without it for so long. It is "just the thing," they all say. I must say that I hail this discovery with a sigh of relief, for it simplifies and makes much clearer any trap report. The eye can catch at a glance the whole story of the shooting. FOREST AND STREAM is lining out well in the lead in the journalism of sports. They will ride well who follow. E. HOUGH.

Trap at Watson's Park.

BURNSIDE, Ill., April 13.—Scores made here to-day by the South Chicago Gun Club for the club medal, 20 live pigeons each, A. A. rules:

Larkin	10212221222001000211—14	Fogli	11111102102201112121—17
F Willard	12201221112010102212—15	Watson	11111110101101221121—17

Smith	10100—2	Bond	02001—2
Wies	12012—4	L W Flersheim	20002—2
Koehler	02001—2		

In the shoot-off Hastings won the pot, killing 4 straight.

RAVELRIGG.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

FOREST AND STREAM PUBLISHING CO.,
No. 318 Broadway, N York City

THE SPRING SHOOT.

When you get a bird or beast from Florida or Hudson's Bay, the Chesapeake or Puget Sound, and want it mounted true to life, send it either skinned or in the flesh well salted, to

QUINCY, Ill., Jan. 19, 1892.

Hon. John S. Cochennour, Olney, Ill.:

DEAR SIR—After two years' use of your "Little Daisy Minnow Trap" I find that it does its work well and satisfactorily. It is a source of great gratification to me to have fresh, lively minnows when I want them, and these your trap furnishes me. I can cheerfully recommend it to anglers as a valuable addition to their outfit.

Yours respectfully,
S. P. BARTLETT,

Chas. Daly Hammerless Guns

We are constantly receiving unsolicited testimonials from gentlemen throughout the United States expressing pleasure in having a gun of this make. We mention a few here:

PORTLAND, Ore., April 6, 1892.

Messrs. Schoverling, Daly & Gales:

GENTLEMEN—The Diamond Daly I have been using about a year is in my opinion the finest gun made. I have shot over 30,000 rounds of shells loaded with nitro powders, and there is not the least wear. As to hard and close shooting it will hold its place with any make. I have tested it with Holland & Holland, Purdy and Greener's best guns, and have never had occasion to take a back seat from any of them. Cannot say too much in praise of the gun. I wish to get a very light gun, 12 bore, exactly same finish as mine. Can you make it and how long will it take? Very truly,

H. J. BURRELL.

NEW YORK, April 2, 1892.

Messrs. Schoverling, Daly & Gales:

The new gun is a daisy; shot my first match to-day, my score 18 out of 20, and the two fell dead out of bounds. I cannot say too much in favor of the gun, and everybody admires it very much. Very truly,

JOHN MEHL, JR.

RANGE VALLEY RANCH, Utah, Feb. 11, 1892.

Chas. Daly, Esq., New York:

DEAR SIR—I bought one of your three-barrel guns of Dr. Dart, of Salt Lake City. He was down here and had that gun. I wanted it so bad that he finally let me have it. I can assure you it does most excellent work, and is the best bear gun I have any knowledge of. Killed fourteen bear last fall with it. Very respectfully,

C. A. WING.

The above and many other testimonials are received almost daily by us from gentlemen who buy the

BEAUTIFUL IS THE LAND, WITH ITS prairies and forest of fruit trees. Under the feet a garden of flowers and the bluest of heavens above, resting its dome on the Walls of the Forest. Those who live there have named it the Eden of Louisiana. In this beautiful land is situated my shooting lodge, which I offer for sale. It is at Lafayette, La., 140 miles from New Orleans on the Southern Pacific road. It is a beautiful place, situated one mile from the depot where all trains stop twenty minutes. There are magnificent live oaks in the yard, fruit for the Altars of the Druids, a very neat house containing four large bed rooms and bath room attached, hot and cold water, a large and beautifully furnished dining room, pantry and kitchen attached, kennel for dogs, good out-houses, stable and barn full of corn, twenty head of graded Jersey cows, a thoroughbred Jersey bull, a buck-board for hunting, a light surry with top, farming utensils, a fine pair of hunting ponies, turkeys, ducks, chickens, pea fowls; a navigable stream on one side, plenty of wood and water, pasture. Quail and snipe are very plentiful around the place. The house is elegantly furnished, with all comforts and conveniences, plenty of linen and bedding and carpets. I will sell the whole or part interest. Address

F. F. MYLES, New Orleans, La.

BEAUTIFUL BIRD PICTURES.

I have several plates of Audubon's Birds which I will sell cheap. These are the edition of 1856, on heavy paper, and give the birds the size of life and in their natural colors. Among the species represented are: White-headed eagle, price $12; duckhawk, $10; pine grosbeak, $7; kingbird, $4; wood wren, $4; black duck, $12; and some others. These when framed would make superb ornaments for a sportsman's dining room. Address J. J. A., FOREST AND STREAM office.

WANTED.—FISHERMEN DURING THE open season, fine trout and black bass fishing in the streams and lakes of Sullivan Co., New York. For particulars address the advertiser, W. E. ELDRIDGE, Fallsburgh, Sull. Co., N. Y.

WANTED TO BUY.—A CUTTER OR YAWL rigged boat, about 28ft. over all, 28ft. w.l., 6 to 7ft. draft and 9 to 11ft. beam. Must be in good repair and fitted for day cruising. Address with full particulars G. S., 202 S. 15th st., Phila.

WANTED.—ONE PAIR OF NORTHERN domesticated deer for private park. Address Mr. Q. A. GREENE, Bemis, Mass.

WANTED.—LIGHT WEIGHT SECOND hand hammer or hammerless; must be cheap. Lock Box 95, Dayton, Ohio.

WANTED.—GERMAN HARES. ADDRESS Box 305, Rhinebeck, N. Y.

Rod and Gun and Camera.

THE Sportsman Tourist of to-day is an amateur photographer. The camera has a recognized place in the sportsman's outfit. The results of successful snap-shots often constitute the most cherished mementoes of an outing.

From time to time we have been favored with highly interesting evidences of the skill and success of those who are no less adept with the camera than with rod and gun; and some of the views sent us have been reproduced by the marvelously faithful photo-engraving half-tone process for the benefit of our readers. Notable among these were the group of mule deer, in our "Boyhood Number," and on April 7 the happily successful picturing of the mountain goat. There must be a rich store of such photographs in the possession of those to whose notice this shall come. If they could be brought together for comparison the collection would supply abundant interest and study.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20. Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to the make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies, however, only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp Fire Flickering Vote." Such popular vote, however, will be quite distinct from the award by the committee.

GAME REFUGES.

THE five-acre field defended by trespass signs and strictly protected from intrusion of gunners becomes a refuge for game, whence the supply is likely to overrun into the surrounding covers; and more than one sagacious gunner, barred from entering upon such premises, has amply consoled himself with the overflow. Larger preserves, as the extensive territory of the Tuxedo Club in New York, have been the means of stocking the surrounding country with birds, and the Yellowstone Park is an instance of a game preserve on a gigantic scale.

The establishment and maintenance of such refuges in every State would prove a sensible, economical and effective scheme of game conservation. New York has a game park in the Catskills; and last week, at Albany, in the closing hours of the session, Senator Bloodgood introduced a bill providing for another park in the Adirondack Wilderness. By the terms of the measure the Forest Commission was directed to set apart such a tract of land in the Forest Preserve as they might deem proper, to be known as "a refuge for deer and other game;" to inclose the territory, provide a keeper, and establish rules for the protection of the game. Hunting on the territory was forbidden. Mr. Bloodgood's bill was introduced too late for consideration; but the plan is so commendable that we trust it may be brought up again, and the refuge provided.

SNAP SHOTS.

THE Anglers' Association of the St. Lawrence River have by their vigorous prosecution of offenders earned the reputation of being one of the most active associations in the protection of fish and game. They have just made a raid on netters eclipsing any of their previous records. Recently the fish and game protector chartered a steam yacht, with eight men, and captured in two days 72 nets. They were taken at the mouths of streams entering the St. Lawrence River and Lake Ontario, all the way from Black River Bay down to Cape Vincent.

The famous Nepigon still holds its place and fame as one of the best fly-fishing streams in the world, and it is visited annually by anglers from Canada, the United States and abroad. We find in the annual report of the Port Arthur Board of Trade, an excellent suggestion that the Provincial Government, which has jurisdiction over the river, should set aside a tract of land which is comparatively useless for other purposes, for, say five miles on each side of the stream, between Lake Superior and Lake Nepigon, and convert the whole into a national park. A small charge might then be made to all sportsmen alike (not discriminating against foreigners as is now done), which would pay the salary of an overseer.

A correspondent claims that he has been defrauded by an East Providence sharper to whom he sent $3 for prepaying the expressage on a shotgun, to be forwarded for examination. The Rhode Island man pocketed the $3, and there appears to be evidence to show that he has gulled several other victims in the same way. If ordinary business caution were exercised such fraudulent games would not work. In this particular case, where the party is not a regular dealer, caution would suggest that guns and other goods for examination should be sent C. O. D.

Yachtsmen all over the world will appreciate the complete and exhaustive history of Gloriana and her builders in this and the following number of the FOREST AND STREAM. The reputation of the Herreshoffs for originality, already world-wide through the performances of the catamarans, their many fast catboats and their high speed steam yachts, has been doubled within the past year by the new racer with which, after a long retirement from the field of sailing yachts, they have re-entered against such designers as Burgess, Fife, Gardner and Watson. In these days of combination locks and soaped windows every yacht of note is enveloped in more or less mystery, and Gloriana has had her full share, but we hope in the course of the present article to give our readers a far clearer idea of the boat than has thus far been possible to those who have not seen her.

In response to our inquiry Mr. Orrin Harris, of Paradox, N. Y., the owner of Pyramid Lake, in the Adirondacks, tells us that the lake was successfully stocked with black bass some eighteen years ago, and four years later speckled trout were put into it. Both fish have increased and are now thriving. Large specimens of each reward the angler. The shores of Pyramid Lake are rocky, the water has in some places a depth of 70ft. and is clear. We would be glad to receive reports from other waters stocked with both fishes.

The last Legislature of New Jersey substituted for the former fish commission a fish and game commission of three members, who have authority to appoint a fish and game protector, and the protector in turn shall appoint two fish and game wardens for each county. The law also makes provision for the appointment of special deputy protectors upon the request of ten freeholders. If such a man as Mr. Charles A. Shriner, of Paterson, shall be made chief protector, the New Jersey fish and game laws will mean something.

Kentucky has abundant natural resources of fish and game, but public sentiment has not been educated to appreciation of the advantages of protection. The convention of fish and game clubs at Frankfort last week was an event full of rich promise. The gathering was representative in the broadest sense; steps were taken for a permanent organization; and the comments of the Kentucky press indicate that the new movement will be given public support.

The trout streams of Connecticut have been pretty well fished, and the first week proved fairly good for the sport. But during the second and third weeks the weather has been unusually bad and unfavorable. In protected waters matters are better and some fairly good catches have been made. Very good reports of the fishing in northwestern Pennsylvania reach us. Tributaries of the Schuylkill have as a rule yielded well. These waters, it is claimed, have been wonderfully improved by liberal plantings of trout made by the State Fish Commission.

A summary of the close seasons fixed by the game law just enacted by the New York Legislature is given in another column. From this it will be learned that the objectionable exemption of certain counties from the general woodcock law was in the last hours stricken out, and in that respect the measure is decidedly a better law than was feared. At this writing (Wednesday noon) Governor Flower has not yet signed the bill.

FOREST AND STREAM is intended to be of practical, present and constant value to its angling readers by the interchange of information, experience and opinion. Readers who may have knowledge of fishing waters, with fish enough in them for others, are requested to make them known in our angling columns.

The paper from the pen of Dr. S. A. Binion, the eminent Egyptologist and Orientalist, gives an admirable picture of the all-pervading enthusiasm with which the tarpon inspires its devotees. Dr. Binion's fish has been mounted, and will shortly be on exhibition in this office.

The *Asian* records that Loch Leven trout have been introduced by private enterprise to stock the hill streams of Ceylon. This fish, already known in America, promises to make its way around the globe, to reward the lures of anglers beneath every sky.

The Delmonico woodcock is "on the calendar." So is next Christmas.

The Sportsman Tourist.

"THE SILVER KING."

IF ever any one enjoyed the calm serene delight of the successful angler, mingled with his exquisite moments of eager, keen excitement, it was Izaak Walton—and yet he never caught a tarpon! Had he done so, he would have added another chapter to his admirable book, of which Charles Lamb declares that "it would sweeten a man's temper to read it, and Christianize every discordant passion;" and the "Complete Angler" would have been not simply complete, but perfect.

The tarpon is justly called the "Silver King." Apart from his size, muscular energy and wonderful agility, he surpasses in beauty all the finny tribe that inhabits the Gulf of Mexico. His general appearance inspires the observer with admiration. The scientist has named him *Megalops atlanticus*, or *M. thrissoides*. But the salient characteristic mark, the extraordinary size of its scales, which are proportionably the largest known in the *genus piscis*, seems to have been overlooked. For brilliancy, the exposed part of the scales of this wonderful creature is incomparable. They vary from the dazzling white of polished silver to the oxidized irridescent colors. In life every scale is a separate jewel, forming, together, in their blended hues an indescribably brilliant mass, which, as the stream of life slowly ebbs away, grows fainter and fainter, gradually losing its splendor, and retaining only a portion of its silvery brightness.

Tarpon have been caught on the Atlantic coast of Florida, as well as on the western side of the peninsula, in the Gulf of Mexico. But, from all accounts, Charlotte Harbor and its numerous creeks and inlets, especially the Caloosahatchee River, seem to be the headquarters of this prince of fishes. It is there that the gallants of this gorgeous tribe accompany great schools of their better halves to prepare the cradles for a coming generation, and the river here affords all the advantages to be desired, and necessary for the propagation of the species. But alas, the sportsman has got wind of it. He has found out the wonted haunts of the beautiful creature, and is rapidly decimating its ranks with hook and line. It is only recently, however, that the angler has learned the art of catching the tarpon with hook and line.

All those who have caught salmon, bluefish, muscalonge, black bass or pickerel are unanimous in their praise of tarpon fishing, claiming for it a superiority over every other species of angling. It has, besides, a peculiar charm in its surroundings. In the winter season, when the northern tourist leaves frozen rivers and stormy lakes, he is transferred to the sunny South, where amid semi-tropical foliage, the trees on both sides of the river laden at the same time with blossoms and with fruit, his skiff is anchored in a smooth expanse of crystal water, while the blue sky above and the air redolent of the perfume of the orange and wild flowers wafted from the shores make the very sense of existence delicious. But now comes the crowning ecstasy, a silver king is at the end of his line, and leaping several feet clear out of the water, shows his silver sides flashing in the sun, and dazzling the eyes—a superb fellow who will task all your patience and reward your skill. In examining the registers at the various hotels, at St. James City, Punta Rassa, Fort Myers, etc., I found that, with few exceptions, those who had caught a tarpon, last year, returned this season to catch another, and that those who had not been so successful, returned to try again.

Like all other pursuits and hobbies, tarpon fishing has its magnates. Men like Messrs. Wood and Middleton, from Philadelphia, and Mr. Nixon, from Bridgeton, New Jersey, are universally known, and during the *dies iræ*, *i. e.*, when the winds are adverse, and the tarpon slumbers and will not "strike," these apostles of the hook and line are listened to by the new comers and less knowing ones, at the fireside of the drawing rooms, with the greatest attention. Whoever has not heard their conversation, knows nothing about "fishing."

While I do not pretend to belong to the class of experts, it would be an injustice to exclude me from the ranks of those who go afishing and enjoy the sport. I have taken advantage of my few holidays, both in this country and abroad, to follow the game, and I have spent whole days and nights in angling from fishing boats and skiffs, in the waters of various climes and in both hemispheres. But the largest fish that I had ever caught, until this spring, were two that I captured last summer at Alexandria Bay, St. Lawrence River—two 9lb. pickerel.

My attention was, therefore, entirely absorbed while listening to the wondrous stories of these Nimrods of the gentle art. My skepticism, which, at first, had been a very lively emotion, gradually subsided, and I can now, from personal experience, bear testimony to the fact that the fishing in the southern part of Florida, both on the Gulf of Mexico and the Atlantic side, fully confirms all the big stories told of it. I have seen a little girl (Miss Watkins), the daughter of the hotel-keeper at St. James City, Pine Island, sitting on the wharf, catching in an hour as many as 20 sheepshead, varying in weight from 3 to 6lbs. And there they were left, no one, seemingly, caring to take them, because better fish, such as Spanish mackerel, pompano, sea trout, channel bass, grouper, etc., were abundant, and could be bought for a mere trifle.

I left Tampa en route for St. James City on the S. S. Tarpon. The name of the steamer is signifiant, but one is not at all surprised at it. Tarpon is the order of the day. Everybody talks tarpon, villages spring up near its favorite haunts, and the people flock to them as to some "placer" at the west. Take Fort Myers as an instance, and you must come to the conclusion that it owes its present prosperity, mainly, to the "Silver King." Every branch of its trade is, more or less, influenced by the fishing industry. The hotels, with few exceptions, are more or less crowded with opulent pleasure seekers, whose sole object is to secure a trophy of this beautiful fish—nothing less will satisfy them.

The rooms of the Hendry House, where I put up, were all full. There were politicians and financiers from Gotham; staid, solid men from the Quaker City; farmers from Old Virginia and from the State which nurtures the lively, musical mosquito. Men of divers professions—lawyers who had left their clients to fight their own battles, and doctors who thought that their patients could take care of themselves. Some of these were accompanied by their matronly wives and beautiful daughters, and brought a charming refinement to improve the social life—but all were united in a common aim.

It is worth while to watch the arrival of the steamer, or the train at the railroad station. The tourist, without exception, will have, in addition to his ordinary luggage, one or more long parcels, which contain peculiar treasures to which his heart is tenderly attached. At the hotel everything speaks of tarpon—the walls are adorned with stuffed specimens—and prizes are offered by the landlord to any angler who shall catch a tarpon weighing over 105 lbs. At the tables this forms the burthen of the conversation—the talk is all about tarpon. The early breakfast is hurriedly despatched, while the expressive faces of the different guests would form a study for a Teniers or a Rembrandt. There sits little Mr. J., from Richmond, his beautiful better half near him; his face is bright with smiles, and why? Yesterday he caught a tarpon, and to-day he intends to catch another. Near him is sturdy Mr. D., from New York, a man in whose face character and resolution are finely depicted. Yet his eye is heavy and his brow contracted. Why? Because he came here last summer to catch tarpon, and caught none. This year, with a new corduroy suit, fully up to the occasion, and a spliced bamboo rod of the most approved style, he has tried it again. Yet, notwithstanding his personal advantages, I am sorry to say that he and his chum have again returned to New York—minus the fish.

Fishing, like other sports, has also its grotesque aspects. The following story may be discredited in this part of the country, and yet it is literally true. It afforded an interesting topic of conversation among all the guests in the Handry House at Fort Myers. Mr. and Mrs. T.—the former an elderly gentleman bordering upon 80 years,

THE TARPON'S LEAP.

From an instantaneous photograph, by Dr. J. J. Kirkbridge, showing the leap of a hooked fish.

caught a tarpon weighing over 120 lbs. They caught him literally by the tail, and it took them hauling and pulling, over three hours to land him! The fish succeeded in ejecting the hook and bait, but in some way became entangled with the line. Mr. T. struggled manfully to secure his captive, and Mrs. T., with wifely devotion, struggled to aid him in so doing; finally by their united efforts, assisted by their guide, they hauled the tarpon into their boat—and the prize was won. This is only one of the amusing episodes that are continually occurring.

It was a balmy morning; everything looked encouraging. The orange trees in front of my windows partially obscured the rays of the rising sun, and the air was redolent of the mango and the orange. This, coupled with the fresh greenness of the leaves, the golden hue of the fruit, and the singing of the birds made me forget for the moment where I was. I dreamed that I was in Seville, in Andalusia, in my cosy room at Triana on the banks of the romantic Guadalquivir. Had it not been for the hoarse voice of the colored waiter, knocking at my door and exclaiming in "Cracker English," "pass six," I should have remained in this delicious reverie somewhat longer. But the terse "six o'clock," instead of the usual "*las seis han dado*," and the absence of the customary little cup of chocolate, soon convinced me that I was no longer in the land of Don Quixote.

Dr. Mason, of Boston, and myself had, on the previous day, engaged a sail boat whose "captain" was no less a personage than Felipe Belasquez, a youth of 17 or 18 years. His age, however, does not prevent his being the owner of a sail boat—moreover, he is by no means inferior in station to his senior confreres. He is the son of a Spanish emigrant from Tenerifa. The older boatmen treat him as an equal. For Felice is a power among them. No one would willingly quarrel with Felice for several reasons; one—very potential—is that his father supplies the mullet, the proper bait for tarpon—mullet, which every party must secure before the start.

Everybody was up and on the veranda at the rear of the hotel, where suitably attired the fishermen were busy with their rods and lunch baskets, and the sail boats with sails hoisted and colors flying formed a pretty picture while waiting for their crews. Our Felipe had besides the stars and stripes an additional flag, upon which was curiously embroidered the name "Martin." He was very proud of this. Several boats were ahead of us—this seemed to annoy Felipe—he was anxious to pass them, and although his craft did not carry sufficient sail to fairly succeed, yet by tact and stratagem the young sailor managed very cleverly to leave two of them in his wake. He would now and then hail a captain with some jest or gibe well understood between them—"Hallo John! How many tarpon will your boat land to-day?" This was *sarkasm*, as Artemus Ward would say, for the previous day, the 14th of March, nearly every one got a strike; but John, in spite of his bets, was without a catch. "Will you bet to-day? How much?" John accepts the challenge, but Felipe, who is only joking, adds, "Ah, well, call at my office (?), and we will arrange it." Felipe, you see, is something of a wag.

The tarpon line is about like that for bass, the snood, near the hook, wound with fine copper wire. Quite as cunning as the bluefish, the tarpon leaps ahead of the line to draw out the hook. At the first mad rush and leap, when the whizzing of the line and the whir of the reel tell the story, you let it spin, and row rapidly to catch up with your fleet courser—then as he slacks his speed, and perhaps doubles toward you, you reel in, and back, to keep your line taut. Towing you for miles, sometimes, apparently waiting to recover breath, and then darting off again at full speed, you maneuver and play him, until, finally, he is brought up alongside of your skiff, ready for the gaff. But here you must be on the alert, for often when seemingly exhausted he will, with a sudden flounce, snap your line and disappear. Now, if you are weary of the sport, your skiff is again attached to the sailboat and you are off for home. The tarpon I caught upon this occasion weighed 112 lbs., and measured 6ft. in length. He made five leaps, three times clearing the surface of the water by his full length. It took me not quite an hour to land him. I regarded it as quite a triumph. There were about twenty sailboats on the fishing grounds, but only three fish were taken.

S. A. BINION, M. D.

FORT MYERS, Fla., March 15.

A HUNT BY TELEGRAPH.

WE three had it all arranged for a certain legal holiday. We were to make a flying trip to our native hamlet, starting the evening previous, and traveling by sleeper. Then the whole of Uncle Sam's festal anniversary was to be devoted to scouring the familiar field and woods, known and loved of our boyhood, in quest of the game which used to abound there. We were three young fellows who had come from the same New England village to the great city of New York, to seek our fortunes. So far we had all done pretty well. Lester had a desirable position on the staff of one of the great dailies; Charlie was head of one of the departments of a prosperous wholesale drug house, and I was a telegraphic operator in one of the down-town Western Union offices. We had been planning this outing of ours for months: and as the day approached the pleasure of anticipation grew almost feverishly keen. Imagine, then, my intense disappointment when, at the last moment, there occurred an unexpected crisis in the political world, which caused a perfect Vallambrosa shower of yellow telegrams to drift over all the big cities in the Union; and for the poor telegraph operators all hope of a holiday was suddenly blotted out.

Early in the afternoon of the day we had planned to start, I sent a message to my friends announcing this woful state of affairs, and toward evening they both came in to condole with me.

"What a pity!" exclaimed Lester. "It is probably the only chance for an outing we shall have this year."

"But you mustn't let it make any difference with you, boys," I said. "It would be a shame for you to give up the trip on my account, and if you did, don't you see, I should lose even the pleasure of hearing you tell about it when you come back! I think, if I could only know what you were doing, all the time, I should really enjoy the hunt almost as much as if I were with you."

Charlie's face grew thoughtful for a moment, and then brightened suddenly. "I have it!" he cried. "Why can't you know all the time, just what we are doing? Why can't we send you bulletins by telegraph?"

Lester and I both broke out into a hearty laugh. Then Lester suddenly sobered, and said: "Why, perhaps it isn't so ridiculous, after all. Really, I suppose we might do that very thing, and it would be a jolly lark, too—something quite unprecedented in the annals of sportsmanship. Hourly or two-hourly bulletins—Specials from Willowsville, carrying consternation or jubilation to the heart of the metropolis, or rather, to one heart in the metropolis. I say, Charlie, let's do it! We can get a boy to go along with us and act as messenger, give him one bulletin, and then tell him where to meet us for the next, you know. A great scheme, and we will have no end of fun out of it, besides helping to brighten the weary hours of this poor slave of the ticker. Is it a go? Give us your hand!"

Charlie and Lester shook hands with great animation over their truly benevolent scheme, and I on my part was so delighted with the idea of a hunt by telegraph, that I was almost glad I could not accompany the expedition in person. A few moments more of pleasant anticipatory chat, and then Lester and Charlie hurried away to get their traps together and catch the evening train.

It was with an unwonted sense of exhilaration that I entered the telegraph office next morning, and sat down to my instrument. I felt more as if I were about to be introduced to some new and rare entertainment than as if I were settling down to a hard day's work in the accustomed way. For I had given my friends directions by which their messages were to come direct to my office and my instrument, and after nine o'clock I was in momentary expectation of the first of the "bulletins."

Suddenly, after a string of dull repetitions, or wholly unintelligible messages between political wire-pullers and other parasites of the "machine," together with a death or two, and one or two metallic lovers' kisses flashed over the wire, came the welcome word, "Willowsville." Then, with a beaming face, I bent over my instrument to take the message. It ran as follows:

9:15 A. M.—Just afield. Ridley's woods the objective point. Glorious morning. Messenger secured.

Ridley's woods! I could see the familiar old pines on the hillside, nodding their branches in the morning wind. I could hear the soft, murmuring music they made. I could smell the aroma of the resinous brown carpet under foot. I knew just where the November sun was shining in the sky, right over the ridgepole of Deacon Pratt's old barn on Slate Hill. I could see the clear sunlight changing into diamonds the myriad crystals of hoar-frost on the grass of the meadow. I could see the dogs frisking around Charlie and Lester, and could hear the sharp command, "To heel, there, Fritz!" or "Steady, Marco!" I could see the glittering gun-barrels, and hear the crunch-crunch of hunting boots in the crisp frosty grass. It was almost equal to being there; only I would like to have shied a stone at that old gray mare of Deacon Pratt's—was always out to pasture from March until December—and seen her kick up her heels and gallop away, with many a clumsy antic, like a superannuated dowager trying to tread the mazes of an airy waltz!

Again until eleven o'clock my instrument ticked nothing but politics, and other hum-drum, ordinary affairs of

men. Then came bulletin number two, fresh from the scene of action:

Ridley's woods scoured. Six grouse flushed. Wild birds. Only two points. C. scored one. Old mill in ruins. Woods recently cleared away along the brook. Looks desolate.

Alas, the devasting axe! Along the brook that cascaded through the heart of Ridley's woods, I remember, as a boy, what magnificent giants of hemlock, pine, and ash used to lift their proud heads toward the sky—so grand, it seemed to me that no woodsman would ever dare touch them. But they are all slain now, those giants! I can imagine how the spot looks, with the great ragged stumps here and there, the heaps of brushwood withering and brown, the soil torn by logging and teaming, even the brook choked with refuse, and fast dwindling into a mere thread of water, under the unchecked rays of the sun.

I remember the old mill, too. It was deserted as long ago as when we used to play among the floorless beams, or on the framework of the great log-carriage, truants from school. It had done its vandal work, and nature had covered up the results, before we were born.

I wonder where Charlie bagged his grouse? Not far from the old mill, I am pretty sure. That knoll facing southeast, you remember it? where the brakes grew scattering among the birches and pines. Here we were almost sure to start a brace of birds, every time we visited the woods. I fancy I see Marco on a point, backed staunchly by Fritz; Lester creeping up the knoll to flush the bird; Charlie stationed on the edge of the alders below. Two grouse thunder up. Lester fires a couple of quick snap shots, misses with both barrels, but turns one of the birds, and it swings over Charlie. A quick quartering shot, a cloud of feathers, and out among the alders a heavy thump, and then tattoo of wings. "Dead bird, Marco! Fetch!" And the mottled beauty is brought daintily to hand, duly admired, and then consigned to Charlie's game-pocket, where——But, confound it, here comes another precious bit of demagoguery from Washington!

Another telegram at 12:30, just before I go out to lunch:

Have just sat down by the iron spring to discuss grub. Bag, two grouse and one woodcock; last two Lester's. Woodcock in swale by Milliken's. Grouse in Hillman's woods.

A pleasant picture to take out with me to my own lunch in spite of the sad contrast between a dingy city restaurant and the soft piny bank by the iron spring! I can taste that crystal spring water now—just enough of the iron flavor to make it grateful to the palate and bracing to the system. I would rather have a cupful of it, just at this moment, than a bottle of Madeira.

So Lester has retrieved himself? Well, two grouse and a woodcock make a good foundation for a bag; but I shall expect more of my chums, after they have finished their sandwiches and doughnuts, and smoked their cigars.

At 3:30 came this:

In the midst of a covey of Bob Whites, in the brush just below John Curry's orchard. Flushing and shooting at scattered singles since 1:30. Five birds bagged. Shells running low.

How many times have I started the ancestral covey of that bunch myself! I wager I could tell just where the dogs drew and pointed—in that briery ravine leading from the orchard down toward the scrub-oaks. There was sudden flurry of wings—birds swift as bullets disappearing in every direction. Charlie and Lester fired four barrels for nothing, and then marked the bevy down in the brush. It is curious how quail will lie in almost the same spots, generation after generation of them, year after year. Yet it is no more remarkable, I suppose, than that robins should nest in the same orchard generation after generation, or swallows come back every year to haunt the same chimney. The homing instinct of birds seems to be their most characteristic trait.

The final telegram was received at 5:30. It said:

Hunt finished. Shells all gone. Grand total, 3 grouse, 6 woodcock, 9 quail. Tired and hungry, but had grand time.

Yes, a grand time, my worthy friends and true sportsmen! Keen sport, without slaughter: every bird earned by skill and manly toil; nature's beauties adding their subtle charm to the day's enjoyment—healthful, honest, manly, memorable pleasure, yours! Would that I had been with you. Yet so long as I could not, thanks to that aerial spirit who brought me tidings of you, swift and true as a beam of light. Best of all outdoor joys, an outing with dog and gun. But next to that, it the sportsman must needs be deprived of actual participation, give me the unique pleasure of a hunt by telegraph!

PAUL PASTNOR.

KATAHDIN IN WINTER.

THERE is a vast difference between the blue, far away mountain one sees from Patten and Mattawamkeag stage line and the rugged, cloud-vailed Katahdin a closer acquaintance reveals. On the left, as you follow the Appalachian Club's trail into the South Basin, the rocky wall gradually rises higher and higher until it forms the peak Pomola. The path then leads you through a thick, black growth out on to the shores of a beautiful little pond, shut in from the outer world by nearly perpendicular walls over 2,000ft. high.

The basin is not, as many suppose and as its peculiar shape would indicate, the crater of an extinct volcano. A geologist, who is an authority on all matters pertaining to Katahdin, once told me that the basin, the crater-like shape of which was purely accidental, was once the head of a glacier. White streaks down the mountain indicate the presence of numerous snow drifts until well in June, and early in September morning after morning finds the mountain white with snow.

Those who have visited Katahdin in the cool days of late September can form an idea of the trials and hardships that attend an ascent in winter. Such a trip is not very often undertaken, and you may be sure my friend and I were surprised on arriving at Ayer & Rogers's the 27th of last February, to find a small party preparing for a trip the following day. We soon obtained permission to accompany them and set out to find snowshoes and other things we would need. This camp is known as the Bussell Camp, and is on the head waters of the Wissataquork quite near Katahdin.

By 8 o'clock next morning our party, consisting of the clerk, a cook, a sledtender, the writer and a friend, left camp and proceeded up the logging road a short distance, and then, putting on our snowshoes, followed up a deep run between two mountains.

As we neared the ragged side of the more eastern one the sun rapidly sank and disappeared, leaving us in a somber twilight. We followed the spotted line that we soon found, up the extreme northern end of Katahdin, through forests that the lumberman's ax has not yet invaded, out into the bright sunlight again. By 11 o'clock we were well up the mountain. The cedar, maple and white birch of the lower country had disappeared, leaving only stunted spruce and a tough-barked white birch. The springs were all under six or eight feet of snow, and after an attempt to melt snow in birchbark dishes we were obliged to eat our lunch without water.

A few minutes' walk brought us out of the timber. Far below us we could see the rocky course of the Wissataquork. The Chamberlin and Sourdnakunk lakes lay white and cold a little to the northwest, while below us to the east was Katahdin Lake and the Wissataquork Mountains.

We had come prepared for an Arctic coldness but were much surprised to find it quite warm. There was little wind and the sun shone much warmer than in the more shaded valley. We took off our snowshoes for the snow was hard enough to bear up caribou, as the many tracks attested. The rocks, which were only partly covered by snow, made hard walking for our moccasined feet as we picked our way round the nearly perpendicular walls of the north basin.

We amused ourselves by rolling rocks over the edge of one of the immense snow drifts which encircle the basin and watched them as they bounded down the glistening snow until they disappeared, looking no larger than an egg. Tobogganing sliding may be very exciting but we thought an involuntary slide down one of these drifts was too much of a good thing, and so gave them a wide berth.

As we went down the north peak a caribou lifted his head from the frozen mass and gazed inquisitively at us. He soon decided that we were no friends of his and trotted off followed by seventeen more. They ran round the north peak, and when we came back that night we saw where they had gone down the mountain. Across the level plateau that connects the north and south spurs the walking was easy, but when we began to ascend the south spur we found hard climbing.

The rocks, and they were by no means few and far between, were sharp, and the snow was very slippery. Sometimes we were obliged to use each other as ladders. However, the view from Monument Peak, which is the highest point in the State, amply repaid us for our trouble. It was a little smoky, but still we had a good view.

A long white expanse of snow showed us where Chesencook lay. To the west we could see part of Moosehead and Mt. Kineo, and in the smoky distance could make out what we thought must be the White Mountains.

Over 2,000ft. below us was Basin Pond, and piled over the trees and rocks that carpet the South Basin was over 200ft. of snow. The steeples of Patten could be faintly seen against their dark background of forest, marking one of the chain of settlements that stretched cold and drear under the winter sun, from Bangor to northern Aroostook. The wind blew fresh and strong up there, but still it was not so cold but what we could write a short account of our trip on the back of an old letter, which we carefully placed in a crevice in the monument.

It was then 2 o'clock, and as we were a hard seven miles from camp our faces were turned homeward. We made a very rapid descent of the south peak. I must say, however, that some of us spent the next evening patching the seat of our trousers.

On the sunny side of the north peak we found in the hollows of the rocks a few swallows of water, the first we had tasted since leaving camp. The remaining four miles were soon traveled; and by 4 o'clock we were in camp, having easily made the ascent of Katahdin on the 28th day of February. L.

PATTEN, Maine.

JOHN LYLE KING.

A KNIGHTLY character and a noble sportsman passed away in the death of John Lyle King, yesterday morning, April 16. There was no figure at the Chicago bar known better than this tall, thin, nervous yet dignified one. As a criminal lawyer Mr. King's reputation had for years been great. He might have retired in permanent ease and perpetual respect long years ago in his old age; for he was very old. His vigor kept him on in his chosen work. His legal opponents still feared him, but neither opponent nor friend could help respecting and loving him, for he was always chivalrous and fair. For only about a year had his failing health lessened his efforts in the profession that he loved and honored. His end was quiet and painless.

John Lyle King was born in Indiana, and won early distinction there. He came to Chicago in 1856, and his success here is known. His reputation as a sportsman of a quiet kind was second only to that as a counselor and pleader. For years his name has been on the law committee of the Illinois State Sportsmen's Association. All our older sportsmen knew him, and all the younger ones respected him to the point of awe. In the regard of Western sportsmen, Mr. King stood hand in hand with the Hon. John Dean Caton, the only figure with whom we may compare him. Such men dignify the whole field of sportsmanship.

John Lyle King was very fond of angling, and was skillful in his favorite sport. He was one of the early ones to taste the full glories of the Brulé River. He wrote about that stream, and his book, "Trouting on the Brulé River; or, Summer Wayfaring in the Wilderness," showed him in a new light to his friends, who did not dream this stately man had such a fund of laughter in his heart. This book found a high place in angling literature, and deserved it. About two months ago the writer was talking with Mr. King, seeking something further from his pen for the columns of FOREST AND STREAM. "No, I can't write any more," said he; "I am too old and too busy. I wrote my book at odd times. There are a few copies of it left, which I keep now to give to my friends. Come around to my office some day and I will gladly give you a copy. But I am afraid I shall not write any more." I count it great misfortune that when the call was made at the modest, dingy little room which pleased Mr. King as an office, Mr. King was not found in. I have never seen him since. At that time he was very thin and frail.

Mr. King was never married. He cared nothing for society. A student and an eccentric, he loved only the problems of the law and the mysteries of the forest. He is beside the still waters now. The stock which bore him blossoms too rarely into flower.

E. H.

Natural History.

THE WATER OUSEL.

THE very interesting and instructive letter from the pen of my friend, O. O. Smith, in FOREST AND STREAM of the 7th inst. about "The Ousel in Oregon," has brought to my mind many pleasant recollections of companionship with the "blessed ousel," as Prof. Muir calls it, along the trout streams of Oregon and Washington.

The birds are quite numerous in these States and one is seldom without the entertaining presence of one or more of them for thirty consecutive minutes while fly-fishing. Their twitter is about as much a matter of course as the melodies of the streams themselves. Strange that so little is known of them and their unusual ways. I must confess that, not until brother Smith called my attention to the subject did I ever give it much consideration. But I promised him then, and reiterate now, that during my angling trips the coming summer I will closely observe the bird and send him the result of my observations. Truthfully enough he remarks that, "I find that even here, in its home, there are those who have neither seen it nor heard of it."

A little, nervous, courtesying bird makes its hurried appearance and disappearance without attracting the angler's attention, and, unless he is informed of its peculiar habits so that he may intentionally and attentively observe it, he may never know that he is in the presence of one of the most remarkable feathered wonders of earth—a feathered fish—and yet one of the prettiest and sweetest of birds. It is true that his notes are not musical in the strict sense of the term, but to the lonely angler on the shadowy stream they are melodiously sweet.

To-day, while strolling among the rocks up at Willamette Falls, I saw several. Last May I found two of their nests among these same rocks, and appreciate the force of Mr. Smith's remarks about the apparent disadvantages under which they must labor in bringing forth their broods in a place so damp and cold, for the spray from the falls is almost continually about them.

Last summer while fishing in Washington, well down toward the mouth of the Columbia, on the Elokomon, I was entertained for an hour or more by a pair of ousels that seemed to be giving their brood a first lesson in the mysteries of their amphibious existence. A deep, narrow pool walled in by great rocky bluffs furnished excellent fishing for myself, and a lovely spot for Mr. and Mrs. Ousel to feed and instruct their "wee bairns." My time and attention were so taken up with the 2-pounders of the pool that I paid little attention at first to the abuse the old birds were heaping upon me. They scolded, they beseeched, as parent birds usually do to drive or coax the invader away, but always with a courtesy. Their persistent endeavors and anxious solicitude finally attracted my attention to the little thumb-like sprites on a rock just across the pool. The old birds seemed to have a vast amount of business on hand, of course, but the little fellows simply sat there demurely taking notes and what "grub" the old birds tendered them. I sat down and quietly watched the birds, hoping to see the little fellows imitate the examples set them of disappearing under the water, but was disappointed; probably in consequence of their tender age. However, after resuming my rod I glanced back and discovered that the baby ousels had disappeared; when or how I cannot say, for the rock upon which they had been sitting was entirely surrounded by water, and I am quite sure they could not fly.

Ordinarily the ousel seems to be quite fearless of man and frequently comes very close to the angler. While on the wing they are, to the best of my recollection, always noisy, and I am somewhat surprised that my friend Smith heard their note but once during his observations of the pair in southern Oregon. S. H. GREENE.

PORTLAND, Oregon, April 17.

"LORDLY FEMALE."—*Editor Forest and Stream:* To look at a batch of type one would hardly think that a lot of fun was lurking beneath their sober-looking exteriors; but there is. I remember how, some time ago, one of your correspondents "got up on his ear" and uttered a howling protest against their turning his partridges into cannibals by making them eat apple tree *birds!* At a St. Andrews Society dinner a few years ago, one of the members toasted "the land of the heather," and the frisky little cusses riled the Scots by substituting an n for the r. And now, in my last contribution they talk to your numersome readers about the *lordly* little female hummingbird! Egad!—DIDYMUS.

RECENT ARRIVALS AT THE PHILADELPHIA ZOOLOGICAL GARDENS.—Purchased: One golden-rumped agouti (*Dasyprocta aguti*), one crested barbuset (*Ostinops decumanus*) ♂, two short-tailed parrakeets (*Pionus brachyurus*) ♂ and ♀, two green-winged doves (*Chalcophaps indica*) ♂ and ♀, one crested ground parrakeet (*Calopsitta novæ hollandiæ*), two yellow-headed conures (*Conurus jendaya*), one harlequin snake (*Elaps fulvius*), two blacksnakes (*Bascanium constrictor*), one common hog-nosed snake (*Heterodon platyrhinus*), one pine snake (*Pityophis melanoleucus*), one coachwhip snake (*Bascanium flagelliforme*), three glass snakes (*Ophiosaurus ventralis*), and one tree boa (*Ziphosoma hortulana*). Presented: One gray squirrel (*Sciurus carolinensis*), one blackbird (*Quiscalus versicolor*), two peacocks (*Pavo cristata*), three turtle-doves (*Turtur risorius*), one yellow-throated parrakeet (*Brotogerys tovi*), one banded rattlesnake (*Crotalus horridus*), one common iguana (*Iguana tuberculata*), two alligators (*Alligator mississippiensis*), and one diamond-backed terrapin (*Malaclemmys palustris*). Born: Two hog deer (*Cervus porcinus*).

"GOD bless the mountains," said a great poet, and many a business man as he wets his flies in one of the Pike or Sullivan county streams, and throws dull care away in the boyish joy of freedom, re-echoes the words. God bless the mountains and the clear streams which there take their rise. For the tired dweller in the city there is no medicine like a day spent among the streams and mountains. Lay aside your business. Take a day off and run down to one of the fishing points on the Erie road—there are hundreds of them from Port Jervis to Hancock or Hawley. Almost anywhere you will find fish, more or less of them, of course, depending on the locality and a thousand and one complications of circumstances. But even if your luck is not remarkable and you bring home no two-pound trout, still you will find enough to pay you for your trip. Better health, better appetite, better sleep, a glimpse of nature's book, and a free-hearted enjoyment that is not to be found in the city.—*Adv.*

THE Bridgeport Gun Implement Co. has recently brought out a new and revised price list of their many specialties, which includes improvements in the models of their regular goods, as well as new implements. The company wishes to call especial attention to their handy closers for nitro and black powders, jointed ride rods and Paravaseline, their patented lubricant and rust preventive.—*Adv.*

Camp-Fire Flickerings.

"That reminds me."

ONCE, when deer were more plentiful in New York State than now, some persons were gathered at a store or tavern in an out of the way place, when a deer was observed to run across the road not far from them. Instantly one of the men ran just to see the animal swim the river, which was very narrow, and he arrived at the brink just as the deer was attempting to climb the bank on the opposite side. The man hurled a good-sized stone and broke the deer's hindleg. The deer fell back into the water and curiously enough struck out for the bank on which the man stood. As he came to shore the man seized him, and after a hard struggle killed the deer. He then went to the tavern and told the men what he had done. To their great surprise they beheld the dead deer. "How on earth did you catch him?" they asked. "Oh, I can outrun a deer the best day he ever saw."

WEST VIRGINIA. N. D. ELTING.

Your Camp-Fire Flickerings of April 14 "reminds me." A fishing party of tenderfeet came across an old fisherman, who was placidly allowing a few million mosquitoes to bleed him. One of the party offered him a dollar to strip and let them bite. He accepted and lay face down, the agreement being five minutes. As the fourth minute passed, one of the party who carried a gun, took out the iron ramrod and heating it in the fire, prodded the back of the poor fisherman. He stood it a moment and then howled, "Lordy, boys, I can stand the skeeters, but for gracious sake, pull off that galliniper."

This is a chestnut, but may be new to a few. I was not there. VERITAS.

LEAVENWORTH, Kansas.

A short time ago a few of us were sitting around a large open fire-place spinning yarns, when finally the conversation drifted toward shooting. All but one of the party had told their stories and had had them topped by the next in turn; so by this time they were getting up where they were hard to beat. This, however, did not seem to worry the last, but not least, who lit a fresh cigar and began as follows:

"I never shall forget an experience I had in Colorado in the fall of '84. We were expecting a bunch of cattle up from Texas, so one of my men and myself started out to meet them and look them over before they reached the ranch.

"There had been a good many birds in the country that fall, so I took along the old shotgun, hoping that I might get a crack at some of them. After we had gotten out some distance, I told my man to go ahead and see if he could sight the bunch, while I remained where I was.

"It was a very cold day in November, and as I was rather chilly I staked my horse, and took the old gun on my shoulder and started for a walk.

"I had gone but a little distance when I saw a large flock of ducks coming along over the prairie from the north and right toward me. They kept on coming, settling down all the time, until they finally lit out on the bare ground about 200yds. from me. I saw that there was something the matter with them, so I walked right up to them and let go into the middle of the bunch. Well, you ought to have seen the feathers fly; but feathers were all that did fly, for when the smoke cleared away I saw, to my surprise, the flock still sitting on the ground. I repeated the operation several times with the same result, when finally it struck me what was the matter. You see, it was a cold day and they had been sitting in the water, and when they got up to fly their wings froze and they were rendered helpless. Knowing this, I started back to the house after more shells; but when I returned the sun had come out and thawed their wings out, so they flew away before I could get in range."

"I'll have a cigar," said one of the party. "So will I," shouted all the rest; and the Colorado man paid for them, too. J. M. M.

Game Bag and Gun.

WILD BOARS FOR THE ADIRONDACKS.

Editor Forest and Stream:

Being thoroughly acquainted with this noble game, their habits and mode of hunting them, I may note something of interest to your readers. Our Adirondacks no doubt would make a splendid home for this game, to replace our fast-disappearing deer. There is no danger of exterminating them after they once get a foothold in our laurel thickets, but they cannot be just imported and turned out to root for themselves. In hard winters, with a heavy crust on the snow, no doubt a good many would perish; but this is easily guarded againt in the following manner: A location of a few hundred acres should be chosen which contains running water, wild meadow land and evergreen thickets. This can be found on almost any pond outlet. The upland should be oak. This must be fenced in very strongly, and is generally constructed out of spruce poles, with the bars not over six inches apart. In one corner of this inclosure a few acres are again fenced in, followed by a triangle and a circle, the latter constructed out of palisades and about ten feet high. A narrow run of equal height, containing three trap compartments and a swinging gate, completes the arrangement. This is an excellent device to sort out the surplus every year to turn out in the wilderness and still keep the finest stock for breeding. By simply moving the swinging gate a boar rushing from the trap is either turned back into the park or given his freedom. An entire herd of some 300 can be sorted without danger in a very short time. The boars are decoyed with a line of corn into the trap. It would also be well to feed the wild stock outside the fencing in the beginning, as they have not learned yet to depend entirely upon their own foraging.

They multiply very rapidly and generally have four young in the early spring. These with their long shaggy hair, of a reddish color and white spotted like our fawns, look very cute. They grow very rapidly, however, and in the fall will average about 60lbs., while a full grown boar will weigh 300lbs.

The boars are counted royal game in Europe, and are very wary and well able to take care of themselves. The principal park where the Emperor and invited guests delight to hunt is situated on the Deister Mountains in the Province of Hanover, and here every winter some two hundred fall to their rifles. Many people who have never witnessed a hunt of this description, and very few have, shrug their shoulders and call it no sport, but simply a slaughter in a barn yard. How they would change their opinion if taking part in a hunt. I do not think that the Winchester folks make a rifle whose magazine could contain bullets enough to enable such a novice to hit a single boar. They are from 80 to 100yds. off on a dead run, and dodging round among the timber. A wounded boar is no mean foe, and when he comes for you, mouth wide open, cracking his tusks together, it takes a cool hand to down him, and excellent judgment to impale him on a 6ft. spear. The Pike county wildcat that jumped in my face while looking for the bait in my bear trap did not scare me half so much as my first wounded boar. I followed him into a brier thicket, and not knowing much about their habits I overlooked him. He had crouched down and half buried himself in an old nest, and the color was so near that of the ground that I did not notice him. When I got within 15ft. he jumped for me, mouth wide open, foaming mad. He came so suddenly that it took my breath away. It was shoot or die, but the express bullet that struck him in the eye was steered more by good luck than good aim, I can assure you.

They are generally satisfied with one rush and go on, but if you shout at them they will come again; the word "*Hussuh*" seems to throw them into a rage. Pain is unknown to them. I have seen a full-grown boar pursued by dogs, and going at top speed plunge headlong against a wrought iron grating in a stone wall with a force that would "knock out" a rhinoceros, and go on just as if it was an every-day occurrence.

The dogs used for hunting them are a mixture of bull and shepherd. They become very cunning, and will run along an old boar until they get a chance to grab an ear, at the same time jumping over the boar's back. This prevents him from using his tusks. A second dog immediately fastens on the other ear and jumps over, and the boar's head is thus held as in a vise. The whole pack now jumps in and the boar is dispatched with a knife thrust through the heart.

The meat, especially of the young, is considered a delicacy, and a boar park in this country would not only be a great attraction but would soon be self-supporting. I hope that President Townsend Cox and the Forestry Commission will carry out their splendid idea, and I can probably get him further information direct from the Forestry Department of Prussia.

There is also another article now on the way from Germany, the latest invention of science, which will interest our sportsmen very much, for if it is not game it is something safe to kill it with—the justly celebrated Walsrode smokeless powder. WHIPPOORWILL.

NEW YORK.

Editor Forest and Stream:

In your issue of the 14th Mr. Townsend Cox speaks of introducing the wild boar of the Black Forest of Germany (a designation that applies to the last century better than to the present) into the Adirondacks. Don't do it!

The wild boar of Europe is a dangerous and devastating animal.

As a matter of fact, there are no more *wild* boars at large in Germany. A few herds are kept by crowned heads and rich nobles in strongly-fenced preserves. There is no sport hunting these, for the half-tamed, grain-fed beasts are driven up to well-protected and usually elevated stands and shot down by the noble hunters, who have a forester or two beside them to shoot dead the wounded ones, and a couple of servants to load their guns.

If set loose in the wilds of this country, the creatures would prove vicious and extremely dangerous brutes to hunt. They would multiply so fast that the damage they would do to farmers would be enormous; and after a few years it would be unsafe to enter the woods, for the boar is no coward, but attacks without provocation; and, while I never met a panther, I think I would rather face him than an old boar or a sow with young.

The conditions of this country, and the style of hunting necessitated by these conditions, are so vastly different from those of Europe, that I say again: Let the wild boar die out where it is, no tear need be shed over the last of its race. We have undesirable foreigners enough already in this blessed land of ours. IMMIGRANT.

Editor Forest and Stream:

I notice Forest Commissioner Cox's inquiry about adaptability of the wild boar to the Adirondacks. It appears that the Commission is thinking of putting out these savage creatures on the State lands there. My notion is that the indigenous game of America is good enough for Americans if only duly guarded by Americans. For one I would be troubled in spirit to encounter wild hogs in the North Woods. But what of it! If things go as they are going there will be no jurisdiction left to State officers. Whether or not we shall have Hartz Mountain porkers there will depend altogether upon the proprietors of the Adirondacks. By the time a wild boar introduction scheme could be accomplished there will be no public lands left in the Adirondacks to put them out on. HENRY H. HAWTHORNE.

ONE GROUSE.

I SHOT one grouse last fall, and it happened thus: I wished to see if my spaniel pup had any nose and walked out with him, taking my gun, on a wild, windy day. The dog found no bird, but I heard one start from the ground in heavy covert to the left of the road. I did not see the grouse. I took the dog to the spot where the bird had started and found that he had a nose, sure enough, but couldn't tell where to look for the partridge. I thought that I could and walked twenty rods up a hemlock ridge, when I saw him sitting on one of the top limbs of a tall tree some forty yards off. I shot him before he had time to take wing and went home, thinking that there are lots of fellows who hold up their hands in holy horror at the idea of shooting a sitting grouse, who yet, with the chances that I had, could not have secured that bird. KELPIE.

CENTRAL LAKE, Mich.

THE KENTUCKY CONVENTION.

Editor Forest and Stream:

The first State convention of anglers, hunters and farmers, of Kentucky, ever held in the State convened in Frankfort, Ky., on the 19th inst. It was something of an experiment, a trial, as it were, of the interest felt by those classes as to the objects and purposes for which such a convocation might be had. The call was made by the Louisville Club as a member of the State Association that now numbers between 1,200 and 1,300 members. The Frankfort Club, an enthusiastic body of about 120 members, took charge of arrangements; and if the statements of the public press, members of the Legislature, and others constitute valuable testimony, the convention and its attendant features proved a decided success. The programme, barring the weather, was carried out in every particular.

Heavy rains had marred the picturesque beauty of the famous Elkhorn Creek, swelling it beyond its banks and lowering clouds hid the cheerful face of the sun, but this did not prevent the special excursion train from the city, after the morning session of the convention, from being crowded to its utmost capacity with delegates, members of the Legislature, State officials, and others. Arriving at the Forks of Elkhorn, where the north and south streams unite to form the main creek, and near the old Macklin Dam, an old-fashioned Kentucky burgoo was served in the ancient style—contemporaneous with which trap shooting was indulged in by all who wished—traps, targets and guns being furnished without charge by the Frankfort Gun Club and others.

Several adjacent stables of fine thoroughbred horse stock were also exhibited for the entertainment of the visitors.

At night the regular session of the convention was held in the city, State Senator Boord, of Scott county, being made permanent chairman, and H. C. Murray, of Frankfort, Secretary.

Addresses were made by Attorney General Hendrick, Col. G. W. Craddock, Major J. Fry Lawrence, Rev. J. McC. Blayney and others.

Among other business, a committee was appointed looking toward the formation of a permanent State organization and annual meetings, the objects being to promote fellowship and keep alive mutual interest in the protection, preservation and restoration of fish and game. This committee consists of Samuel R. Smith (of the old Kingfisher Club) as chairman, W. J. Hendrick (Attorney General), Thos. H. Hines (ex Judge Court of Appeals), B. C. Milan (maker of the famous Milan reel) and J. Fry Lawrence (Pres. Ky. Fish and Game Club). All were present and consented to act.

A committee was also constituted to petition the State Legislature for the passage of the fish bill now pending in the Senate. It has already passed the Lower House. It is believed the bill will get the requisite constitutional majority in the Senate as soon as a full attendance of members can be had.

Quite a number of farmers attended the convention and expressed a belief that the securing of good fish and game laws, with the trespass features proposed, would bring sportsmen and farmers together in mutual alliance and for mutual benefit.

The drafting of a suitable game bill was committed to the Louisville and Frankford clubs.

A committee was also appointed looking to a State encampment this fall to hunt and fish. FRANKFORT.

"SYNDICATING THE ADIRONDACKS."

Editor of Forest and Stream:

In response to my communication to you last week in reference to Dr. Webb's railroad, and land purchases, and the general absorption of large tracts of land in the Adirondacks by wealthy men and syndicats, a friend writes me:

"It seems a pity that there is practically no way of preventing the taking of such large areas by men like Dr. Webb for exclusive control. I have thought that one remedy might be found in a law declaring the waters in the Adirondack region public; this including lakes and streams to high water mark. But I suppose it would be absolutely hopeless to undertake the securing of an enactment to such purpose. However, to me it seems that it would effectually thwart universal grabbing by individuals and clubs."

This would be a practical suggestion if the Legislature had any regard for the rights of the people at large in the Adirondacks. A few wealthy men are able to monopolize the grand forest by procuring such legislation as they may desire in the same spirit once manifested by a many-times-a-millionaire man who exclaimed "The people be ———," when his attention was called to his encroachments upon the rights of others. It is impossible to procure the enactment of wholesome laws for the protection of the forest as it is for the protection of fish and game. The sportsmen of the State assembled in convention last winter, and with unanimous voice asked the passage of the "Gould bill," which was exceedingly liberal in its provisions. Has that bill passed the Legislature? No. That bill disappeared from public view a long time ago, under the many "amendments" which were fastened all over it, in obedience to the demands of dealers in game and fish, the wealthy gentry and a few pot-hunters and fishermen. True sportsmen can get no recognition from the Legislature. Is it not time for clubs, associations and conventions of sportsmen to assert their rights? and asserting maintain them? Shall they not see to it that Members of Assembly throughout the State, and particularly in the "rural deestricks," be made aware of the fact that sportsmen have rights which even a Senator and Member of Assembly are bound to respect? Thorough organization is what is needed. A good beginning was made last winter, and that effort should be continued. It will gather strength as the snow-ball gathers snow by rolling it, until it becomes so large that it can be seen of all men.

The State Association in June will do well to set an example for minor organizations throughout the State to follow. With firm and united action, the Legislature can be made to enact some laws for the people and give less welcome to the schemes of men whose selfishness is their chiefest characteristic. D. H. B.

THE PLATTE.—Elgar, Neb., April 21.—Mr. Vandeveer, from an adjoining town, was up on the Platte and in one day made a bag of thirty-two geese, six ducks, one gull and one hawk. We look for fine snipe and doebird shooting in a few days though the weather is still cold and raw.—E. H.

THE "MANTON" OF MEMORY.

"IT stirs the blood of an old man's heart and makes the pulses fly" to read one of Mr. E. Hough's "Chicago and the West" letters, especially if the old fossil aforesaid has been practically cooped up all winter, and is half dead for want of air and exercise. Just think of it, I haven't pointed my gun at a prairie chicken for more than twenty years, though back in the fifties it didn't take me long to kill all I could carry. Then in the sixties they were practically wiped out in that region—not by me, however. And now comes Mr. Hough with his "immortal snaps" and tells how there be a place where the toot of the pinnated grouse still is heard. If I thought I could get there I don't know but I would apply for admission. I possess some of the necessary qualifications, being able to prove that I have read the FOREST AND STREAM for at least six months, and that I indorse its doctrines, and don't get drunk.

I don't know that I should care to bother much with bears, deer and such to any extent, for they are apt to be killed at a distance from camp, and I have vivid recollections of the inconveniences attending the carrying of the carcass of an animal of this sort across the shoulders. The handiest deer hunt I have ever had was when I stood alongside my wood shed, shot the deer, and wheeled it home on a wheelbarrow. Ah, well—that was long ago.

Like "Von W." and "Awahsoose," I have hunted with the flint lock in my boyhood, not to any great extent, however, for there were percussion guns, if one could only get hold of them, and I preferred these. There was a wonderful difference in flintlock guns with respect to the time which elapsed between the pull of the trigger and the explosion. The best lock filers, like Manton, would produce a weapon which, when primed with the best English glass gunpowder would "go" nearly as quick as a percussion, while a common musket with cheap powder would use up (so it sometimes seemed) the best part of a half day in getting rid of its charge. I agree with some of your correspondents that there was never a more elegant weapon framed than the old Manton flintlock double-barrel, and I can't get used to the locks of a hammerless. "Poor old fellow," says the man in the club window. Not so, my boy. I admit the excellence of these weapons, but to me there is too much of a sameness about the outline—nothing to attract the eye. It's like a noseless man, a hornless cow, a Gordon setter with his tail chopped off close up to the handle. KELPIE.

A TRIP TO THE "NATION."

MILWAUKEE, Wis., April 20.—Last week, while transacting some business with Mr. Rockwell, Gen. Roadmaster of the M. K. & T. Ry., at Sedalia, Mo., some one mentioned snipe shooting, at which I, of course, pricked up my ears and was all attention. "Why, do you like snipe shooting?" asked Mr. Rockwell. "Try me just once," said I. "Well, I don't get time to shoot, but my chief clerk, Mr. Scott is a good one and he can go." Mr. Scott came over and we were introduced, and Mr. Rockwell said, "You two are to report at Pryor Creek, Ind. Ter., to-morrow morning, prepared to shoot snipe. You are to go at it in earnest. Scott wipes everybody's eye around here, and if you keep up with him one day your credit will be established among the Sedalia shooters." So 6:15 P. M. found us in the south-bound sleeper, and there were three of us, for Scott had brought along his friend, the Rev. Mr. Stevenson, a most agreeable companion, but not so well versed in field sports as Scott or myself. Stevenson wanted some points on duck shooting, and asked Scott how much he ought to lead a teal flying with a gale of wind, three feet above the water and forty yards away. "In my shooting," said Scott, "it don't make any difference whether I lead one foot, or twenty feet." Stevenson looked surprised and asked why it made no difference. "Because I never kill the teal anyway." Stevenson said this had been his experience and he was glad to find he was not the only man lame on ducks. During the evening, a good many things pertaining to natural history and shooting were discussed, and Scott's conversation showed such accurate knowledge on the subject, that I sized him up as a hard man to beat in the field.

At five o'clock next morning the porter called us up for Pryor's Creek. The weather was cool and cloudy, with some wind and threatening rain. "If the weather stays cloudy and windy, the birds will be wild," said Scott. "Well, let's have breakfast first and birds afterwards," suggested Stevenson. After a pretty solid breakfast, we put on shooting clothes and were ready. The liveryman was on hand with a very good outfit, and in thirty minutes we were on the marsh. Each man took his own course, and found birds fairly plenty, but very wild—very few but what got up forty to sixty yards away. At first I let them all go, thinking to find some soon that would lie better, but as Scott's gun was heard every few minutes and the birds were all wild, something had to be done, and I began to shoot. In less than an hour I had used twenty-five shells and brought ten birds to the wagon. Scott came up at the same time with thirteen birds. 'Pretty even thing," said Scott. "Yes, but a little the most evenness on your side." We didn't stop to talk, but got more shells and went at it again. At noon we came to the wagon with a total count of twenty-six for Scott and twenty-eight for myself, but I did not feel like crowing; the contest was not over yet, and Scott was a hard man to beat. Stevenson came up with ten, and was the happy man of the lot, for he had never shot at a snipe before. Driving to some dry ground we took out the lunch and sent the team to town for more cartridges. After fully satisfying our appetite and taking a rest on the dry grass, the sport was renewed. An hour later Stevenson came to us saying he had shot a fine duck, but got over his boot tops in the water getting it out of the pond. He said he thought it was a muscovy duck, but was not certain. He said it had dark feet, a white beak, and slaty black plumage. "Let me see it," said Scott. He produced it, and Scott said, "That is a mud hen; they're not worth two cents a ton." With a most comical look of disgust, Stevenson dropped the bird, turned his back on us, and hunted snipe.

When we came to the wagon at 3:30 we were tired enough and had birds to quit, but we counted so near even birds that neither of us wanted to stop.

At 3:15 we came to the wagon again, and Scott said, "I've got enough. Let's count birds and quit." As my legs were heavy as lead and every shot felt as if it were jerking my head off, I agreed, and very gladly too. We counted fifty-nine snipe each, and Scott led by one duck. Stevenson counted twenty-three snipe and a rail. One hundred and forty-three in all. Scott used a ten-gauge Parker, loaded with 4½drs. powder, 1¼oz. No. 8. I used a twelve-gauge Lefever, 3drs. powder, 1oz. No. 8 shot. We had put in six solid hours walking at a lively pace over soft ground, with eyes and muscles on the alert all the time.

The cushions on the wagon seat felt very comfortable as we sat down to ride home. So did the smooth road, as we rolled rapidly toward town. Stevenson remarked that he was like an umbrella, because he was used up. Scott asked if an umbrella was more likely to be used up than anything else. Stevenson said of course it was, because it was never used any other way. Considering how tired they were, they were a very good-humored crowd, and as they sat down to the landlady's dish of stewed chicken, Scott remarked that "biled hen" was universally respected, and particularly so on the present occasion.

On the return trip the writer stopped at Fort Scott, Kas., and spent an afternoon with Ed. Penniman and Doc Hutton, two as thorough sportsmen as ever pulled a trigger. The snipe were scarce and the wind very high, so we counted only twenty-seven, but the social qualities of Ed. and Doc. make a trip with them a success regardless of the game bagged. I have recently been through Indiana, Illinois, Missouri, eastern Kansas, and part of Indian Territory, and found sportsmen unanimous in the opinion that there were a great many quail left for seed. Perhaps in my next I may have something to say about duck shooting in eastern Wisconsin, but not very much, as mallard, teal, wood duck and snipe are, in this State, protected from spring shooters. I'm afraid though that a good many of the shooters can't tell the difference between a mallard and a bluebill. O. H. HAMPTON.

MILWAUKEE, April 20.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

CHICAGO, Ill., April 23.—Something more yet about my game pocket of mysterious sort. Mr. W. O. H., of Philadelphia—those aren't the right initials, but will do—was out there last fall and in regard to the sport writes as follows:

"In regard to the game pocket, would say that there is a variety, but for moose and elk I would not recommend it. Mr. F. is a clever fellow and will make sportsmen very welcome, and he furnishes a very excellent table. For chicken shooting I think the place cannot be surpassed. I shall 'give nothing away' in print."

It would appear that when the grand annual drawing for this spot takes place next August somebody will get a capital prize.

The same gentleman above referred to is pursuing his quest for an elk, and has been referred to J. W. Schultz, of Piegan, Mont., and to S. N. Leck, of Jackson's Hole, Wyoming, via Kaintuck, Idaho, as good big-game guides. He and his friends incline to the latter locality. They should bear in mind the Wyoming non-resident law.

The duck season being now closed, the attention of such shooters as care to shoot this season has been turned to the snipe and plover question. We have had heavy, cold rains, and the whole country hereabout remains sodden and half frozen. The cornfields are lakes and the marshes ice ponds. The season is twenty days late at least. Under the circumstances the snipe are scattered far and wide, and a good bag depends upon the mere chance of finding a little pocket of them, which is about as apt to be one place as another. Dr. Swartz and a friend, of Crown Point, Ind., got sixty-five near Fuller's Island, on the Kankakee, one day last week, but many hunters have plodded the same ground in vain. The market shooters tell me that they think the last flight of jacksnipe is now up as high as middle Indiana and Illinois. The flight of golden plover has not yet left Texas in bulk. There has been no plover shooting worth mentioning. Italian Joe, probably the most skillful plover hunter in the world, has been down at Wolcott, Ind., shooting for the market for three weeks, and his highest bag up to the first of this week was seventeen birds in a day. On Monday he bagged twenty-nine. On that day a heavy flight of new birds came in over the country, high and prospecting, but a cold northeaster drove them back. To-day is the first decent day for weeks, and if it stays warm we shall soon have what is left of the snipe and plover flight, which will come with a rush. The best flight of these birds came in the latter part of March.

Two gentlemen of Chicago made the perilous trip down into Indiana this week, to see Italian Joe shoot a de plov? They found that good-natured citizen rather discouraged about the game outlook, and specifically grieved because he had not annihilated a little bunch of birds which had happened to swing in over his decoys that morning. "I make-a de two dam bad-a shot," said Joe. By night time, however, says my informant, Joe's light-hearted nature had asserted itself, and he kept the party at the little farmhouse in a roar.

"I give-a you de imitate de Italian-a op'," said Joe, picking up the house cat, which happened to pass by. Then holding the cat's ears tightly together between his fingers, and keeping clear of her claws, he grasped her tail with the other hand, and turned it rapidly, *à la* hand organ. The result was most astonishing. As he timed the ear-pinching and tail turning well together, the different altitudes of the feline's vocal product appeared to be the result of the revolutions of her tail. It takes an artist to perform in this manner, and I imagine few would care to try it. But Italian Joe is an artist, and to see his plover game during the day, and his "Italian-a op'" at night, is a scale of privilege accorded to but few.

There are at Wolcott, Chalmers and Reynolds, three little Indiana towns near each other, down the Monon road, probably 150 to 200 men who shoot for the market more or less extensively, some of them altogether. Mr. G Beard, of San Pierre, Ind., buys their game for his freezer. The price for plover and jack snipe just now is 11 cents per bird, cash every evening at any one of these towns.

Mr. O. H. Hampton, of the Atlantic Dynamite Co., New York, and a well known correspondent of FOREST AND STREAM, passed through this city hurriedly this week.

I regret to state that as the hunting season falls off the usual signs of increasing dissoluteness in morals comes on apace among our shooters. In short, the lying season has just begun, and remarkable occurrences are so common as not to be remarkable. Mr. E. Bingham lately made a singular shot with a rifle, killing a muskrat, a mallard duck and a prairie chicken at the same shot with a single ball. He shot at the rat, and the rest was accidental. Prof. R. A. Turtle lately hooked a large bass, which sprang bodily from the water, grasped the line about 10ft. up firmly in its iron jaws and bit it off clean, thus escaping. Any one knowing the size of line with which this gentleman fishes will not question the size of the bass. That earnest young sportsman, Mr. Harry Dole, lately shot at seven dead mud turtles which some one had arranged on a log, and killed them all. At a sitting shot Mr. Dole is said to have few equals and no superiors. Wild tales, these from the Kankakee—but, did any one say Kankakee? "Talking about the Kankakee," said Mr. Eddie Price, the oldest inhabitant of Chicago or Illinois, "you fellows don't know anything about the Kankakee. Why, I was here in the early days before the Kankakee River was finished. One day ——." But then, if I should tell that story of Eddie Price's there wouldn't a soul believe it. E. HOUGH.

GUIDES AND GUIDED.

Editor Forest and Stream:

In reply to C. Askins, one of the St. Louis party, it's useless to go over the ground in detail, as Mr. Askins and I can't agree in all details. While he is a fine shot and could no doubt kill a deer at any reasonable distance, were his "tired feelings" not an unsurmountable barrier. Mr. Weaver is no doubt a fine field shot and a tireless hunter, perhaps a good deer hunter in the Ozarks; but he don't know the first rudiments of still-hunting in swamplands, and I would like to see the man who could teach him in his estimation. The party was instructed to hunt for deer between Mingo and Cypress creeks, a triangular piece of ground. From the railroad to the forks of the creeks is five miles, and two miles wide. They were told that the bears had been killed out before they went in, nine having been killed in four miles of camp, and also that the turkey were gone. They also knew the guide was not a resident of that country before they arrived there. The number of "buckshot scared veterans" can be estimated by the following. A party of three two days after the departure of the St. Louis party in one day killed three deer and wounded the fourth so bad that it died on the Mingo at the old salt works, and was found by me a day or two afterward. Two more were killed by their driver a week or so afterward on the same grounds. And another "went hence" under the fire of the "relic" in hands of the writer with a charge of No. 5s. This party was of local sportsmen of course, but it shows that the "vets" were on smaller space than Mr. Askins represented. The hunt was a failure beyond all doubt, but was it caused by the guide's inability to hit a deer with a gun that shot 3ft. to the right, or was it by Weaver's "mad longing" for the cane brake beyond Glaze Creek (which was swimming when they left, and for two weeks afterward)? It is needless to multiply words about the matter. The biggest fish is never caught through no fault of the fisherman. The average sportsman knows that he would have killed the deer if —. The readers can decide between us. HARRY ESSLINGER.

WILLOW SPRINGS, Mo.

SAGINAW GAME PROTECTION SOCIETY.

Editor Forest and Stream:

The Saginaw Game Protection Society is on deck and doing good work. The Board of Supervisors have never paid our deputy warden a salary; in fact, a member of the committee having this in charge is a noted sympathizer of the violators of the game law. This man is always holding office—has been poormaster of this city, alderman and supervisor, and, I believe, is to-day the Deputy Internal Revenue Collector. Yet he openly boasted when our petition requesting that the Board of Supervisors fix a salary for our deputy game warden was in the hands of his committee, that he had shot deer out of season; that he believed that the game laws were a detriment to the people; that he did not propose to live up to them; that he would not do anything to aid to bring violators to justice. By this sort of influence the effort was killed, and our Association has borne the burden of expense in a good many ways. At the present time Deputy Warden Ostrander has nineteen men bound over for trial for violation of the game laws. Saturday he made one arrest for unlawful shooting of quail. He is at it all the time and is a most efficient officer, and it is a shame that in a civilized country the Board of Supervisors, whose duty it is to fix the salary of the State Game Warden, repeatedly have refused to do anything in this direction. W. B. MERSHON.

EAST SAGINAW, Mich., April 21.

PASSAMAQUODDY INDIANS AND DEER.—Portland, Me., April 21.—The law court in the case of State of Maine vs. Peter Newell, an indictment for killing deer in close time, has just been decided that the claim of the Passamaquoddy Indians to the right to kill deer at any season by virtue of an ancient treaty is unfounded. The court says: 1. The Indians resident within this State are not "Indian Tribes" within the treaty making powers of the Federal Government. 2. Nor are they in political life or territory the successors of any of the various "Eastern Tribes of Indians" with whom treaties were made by the crown or the colonies in colonial times, and hence they cannot effectually claim any privileges or exemptions under such treaties. 3. While they have a partial organization for tenure of property and local matters, they have now no separate political organization and are subject as individuals to all the laws of the State.

ARKANSAS TURKEYS.—Little Rock, Ark., April 10.—The recent heavy rains and high water all over this section will prevent any fishing for some time to come. The "sign being right," fine gobbler shooting may be enjoyed during the month of April. I saw a beautiful gobbler yesterday weighing 23lbs., killed in Ferguson Bottom, six miles from this city. We have a great many turkeys in this part of the State, and several of our shooters are getting ready for their annual gobbler hunt.—ARKANSAS.

NEW YORK GAME AND FISH SEASONS.

THE close seasons, as fixed by the new bill now in the Governor's hands for his approval, are as follows:

GAME.

Deer, between Nov. 1 and Aug. 15. No person shall take more than two deer in a season. Protected in Ulster, Greene, Sullivan and Delaware counties for five years. Venison (if killed in open season or out of the State) may be possessed between Aug. 15 and Nov. 15. Hounding deer forbidden between Oct. 31 and Sept. 10. Forbidden at all times in St. Lawrence, Delaware, Greene and Ulster counties, and between Dec. 1 and Oct. 1 in Sullivan county.

Black and gray squirrels, between Jan. 1 and Sept. 1.

Hares and rabbits, not protected.

Wildfowl (except geese and brant), between May 1 and Sept. 1.

Quail, between Jan. 1 and Nov. 1. If lawfully killed or from out the State may be possessed to Feb. 1. Protected for five years in Orleans, Livingston, Monroe, Cayuga, Seneca, Wayne, Tompkins, Tioga, Onondaga, Steuben and Cortland counties.

Woodcock and grouse, between Jan. 1 and Aug. 15. If lawfully killed or from out the State may be possessed to Feb. 1.

Wilson's or English snipe, plover, rail, mudhen, gallinule, grebe, bittern, surf birds, curlew, water chicken, bay snipe, shore birds, between Jan. 1 and Sept. 1. No protection in Onondaga, Wayne, Oneida, Cayuga, Wyoming, Genesee, Niagara, Monroe, Erie, Chautauqua, Cattaraugus and Orleans counties.

Meadow larks between Jan. 1 and Nov. 1. All other wild birds (except English sparrow, crane, hawk, crow, raven, crow blackbird, common blackbird, kingfisher) protected always.

FISH.

Trout between Sept. 1 and April 15. (In Spring Brook Creek, Sept. 1-April 1. In Lake George, Sept. 1-May 1.) Lawful length, 6in.

Salmon trout, land-locked salmon, between Oct. 1 and May 1. Lawful length, 6in.

Black bass, Oswego bass, between Jan. 1 and May 30. (In Lake George, Jan. 1-Aug. 1. Black Lake, Jan. 1-May 5.) Lawful length, 8in.

Muskallonge, between Jan. 1 and May 30.

Salmon, between Aug. 15 and March 1. Lawful length, 18in.

Wall-eyed pike, yellow bass, pike, in Susquehanna River and tributaries, between Nov. 1 and May 30.

LONG ISLAND.

Wildfowl (except geese and brant), May 1-Oct. 1. Plover, etc., Jan. 1-July 1. Woodcock and grouse, Jan. 1-Nov. 1. Trout, Sept. 1-April 1. Salmon trout, land-locked salmon, Oct. 1-April 1. Black bass, Jan. 1-May 30. Hares, rabbits, Jan. 1-Nov. 1. Deer, except from Nov. 10-16 inclusive. Black and gray squirrels, Jan 1-Nov. 1.

SPRING SHOOTING.

Editor Forest and Stream:

There does not seem to be much diminution in the number of snipe in this part of the country, as this spring's shooting has been good. Although I never see many of these birds in the fall, and so could not get much sport were spring shooting forbidden by law, still I could not find it in my heart to advocate the perpetuation of the law now allowing it. However, if their numbers are not seriously decimated I would say, give us spring shooting. Certainly many are left for "seed," for as the "twister" leaves the bog he cries '*scape*, and generally does as he says he will. One day, with spectacles on nose and singlebarrel "Champion," I shot eleven dead in thirteen shots. Don't expect to do that again at my age.

N. D. E.

HUNTINGTON, April 18.

Editor Forest and Stream:

Some ducks have been shot hereabouts this spring, though most were spoonbills. Last week Mr. Overholt had the good fortune to shoot a blackbill swan. He saw it light in the creek, and getting his gun approached by crawling on the ground for a long distance to within range, and killed it. It measured across the wings 6ft. 4in. He is having it mounted. This is the first swan shot in this county, I believe.

From all information I can gather the quail have wintered well, and the promise of another good fall shooting may be expected. These counties lying along Lake Erie on the west are the best quail grounds; in fact, the only shooting grounds in Ontario.

I wish we had some of the energy of American game protection clubs in seeing that the game laws were better observed.

VALLEY VIEW VILLA.

ST. THOMAS, Ontario, April 4.

THE DU PONTS send us a handsome souvenir of their powder works on the Brandywine, with interesting engravings of that stream and their mills. There is also given this note of the almost century old firm: "Eleuthère Irénée Du Pont de Nemours, who came from France to the United States in the fall of 1799, was the founder of the gunpowder works near Wilmington, Del. He had acquired a practical knowledge of the manufacture of gunpowder under the instruction of the celebrated French chemist, Lavoisier, who was superintendent of two government powder mills at Essone, before the French revolution. Some months after Irénée Du Pont's arrival his attention was called to the bad quality of the gunpowder made in America, and he conceived the idea of erecting works for its manufacture. He went back to France early in 1801, returned to the United States with some of the necessary machinery, and selected in 1802 a site on the Brandywine Creek, a few miles from Wilmington, Del., where he at once began the erection of the works. The business has been carried on ever since, without interruption, by the founder, succeeded by members of his family, under the firm name of E. I. Du Pont de Nemours & Co." The souvenir comes from General Agent Arthur Hyndman, New York.

THE GLOBE, Daily, Sunday, Weekly, Boston, March 24.—I want to congratulate the editors of the FOREST AND STREAM on the general high-class style of their paper. I have read it constantly from my boyhood, and think that it stands to-day at the head of the procession.—H. M. H.

FOXES CLIMB TREES.—Norris, Texas, April 5.—Apropos of the discussion as to foxes climbing trees. I do a great deal of hunting and kill a great many foxes, of which at least four-fifths climb trees. They seem able to climb any kind when crowded by the dogs. I have shaken them out of sycamores which measured at least 10ft. to the first limbs.—RIO DIABLO.

THE Wilkes-Barre Gun Co., of Wilkes-Barre, Pa., manufacture a line of fine hammer and hammerless breech-loading shotguns for the trade only. Every gun dealer should send for their price list.—*Adv.*

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

SPEARING ON LAKE ST. CROIX.

IT WAS when the Territory was young that I was inducted into the mysteries of spearing in Minnesota by a fisherman whose "luck" was the envy of fishermen equipped with improved tackle that failed to land anything, when my tutor covered the grass with his catches of rock bass and trout. I was not altogether a novice; I had at least average success in taking a variety of fish from my lines stretched across the Allegheny, had experienced the rage that consumed every fisherman on that stream whose lines were completely stripped by "hellbenders," wasted precious hours "gigging" on the same stream, and thought I knew something of the art of stealing on the finny tribe in the still hours of night until I looked into the pellucid waters forming the lakes in Minnesota.

I was sitting in front of my friend's cabin smoking and lazily noting the sturgeon leaping out of the lake, whirling over, thrashing the water as they fell and disappeared. The display was a novelty to me. They popped up here, there, all over the lake.

"H'm! I dare say, now you can't guess what makes them lubberly fellows flirt twenty times their length out of water that way," said my friend. "There's different ideas, but no matter what others tell you, there's just one reason for it. I've investigated on my own account. They do it to get rid of the leeches. I've caught some of them—they were mortally pestered with leeches."

My companion glanced down the beach at a group of Indians and half-breeds who were pottering about a Chippewa canoe. As my eye followed his he removed his pipe and remarked sententiously, "Them fellows are at a heap of trouble for a night's work." I looked at him inquiringly. "They are going to spear to-night."

"O!" I said, "we call it gigging."

"Same thing as we used to do on the Allegheny and Ohio."

"You surely do not claim to be a better judge of the weather than the Indians?"

My companion inhaled a tremendous mouthful of smoke before he replied, "Just wait till about 'leven or twelve."

Before midnight there were caps on the waves. The wind came up shortly after eleven. The white hunter's judgment, as I had occasion to note afterwards, discounted the Indians in matters pertaining to the watery elements, and in things demonstrating the huntsman's skill.

When the Indians stepped out on the beach, we strode down to them leisurely. The bottom of the canoe was covered with large fish. My surprise was so great that I complimented the Indians who accepted praise quite as a matter of course, holding up the largest fish; now and then one would ask me to estimate the weight. The canoe was very large; the fish filled three tattered and worn two-and-a-half bushel meal sacks that the half-breeds had charge of. As the half-breeds and one of the Indians staggered up the "coolie" under the sacks, my companion said drily:

"If you think that is wonderful I'll show you what spearing is the first good night comes."

The first good night was not long in coming. Three days later Singhose said in a businesslike way, "If you want some fun, get ready. We'll begin about half-past eight." Singhose called our man out, got some water in a can, went to the grindstone back of the cabin, brought out three large knives, and ordered the man to turn the grindstone while he sharpened the knives. At least an hour was expended on the knives. Then while we ate supper the man was sent to the beach to gather pine-knots. I was consuming with curiosity, meantime, which finally found voice when, supper being ended, Singhose produced an instrument the like of which I had never beheld.

"Heavens! What are you going to do with that?" I asked as my companion held up a four-pronged spear six inches in width. The prongs were six inches long, barbed from the base to the point. "Why, it is big enough for a trident for Neptune," I said laughing.

"Never you bother about Neptune," Singhose answered soberly, "if you won't have the fun taken out of you before one o'clock."

Then he went to the beach to examine the batteau. The batteau was in every respect the same as those the loggers employed on the Upper Mississippi and St. Croix and its tributaries. The narrow ends, exactly alike, extended sharp-pointed far out beyond the bottom of the boat. When I reached the beach the servant had tossed about four bushels of pine-knots in the fore part of the batteau, or in front of a cross-piece that had a hole in it. Into this hole Singhose thrust the shaft of the "jack."

The "jack" was as monstrous in my eyes as the spear. It was as large as the eighth of a modern barrel of beer: made of quarter-inch thick bands of iron two inches wide. Singhose's jack loomed up like a section of the skeleton of a boat. There were the keel and ribs at least

"Don't you laugh at my jack—you'll know just what it means before morning," said Singhose meaningly.

The surface of the lake was as placid as a mirror. I was stooping to pick up an oar when Singhose called to me, "Not that. Take the pole. You may as well learn to pole first as last. I don't need to tell you that if you make the least noise they'll hear us."

"But Jake—" I began.

"There's only two can play at this. You and me, Jake 'll have his hands full afore morning. You can go to bed, Jake—we'll wake you when we come in. Now then, push her out."

The translucent water deceived me. My companion lit the pine-knots. As the flames shot up, I strove to gauge the depth of the water. Singhose, in a low voice, counselled me to "keep her just about in a foot and a half to two feet of water," which, to my intense chagrin, was much easier said than done. At the very outset my pole slipped on a stone; Singhose said nothing; his silence was more effective than any rebuke. "Too deep yet," said Singhose quietly,—"you'll gauge it by and by if you'll look at the slant of your pole when you're using it."

An immense catfish swam slowly past me. I could not help asking my companion if he did not want it.

"Nor sturgeon. No shovel-noses for me. You'll see what I'm after."

The words were scarcely uttered when a sound like a whip lash struck my ear; the next instant a large bass lay wriggling from side to side in the batteau. Then several pickerel followed in swift succession. The smallest was at least eight pounds. Some excelled twelve pounds. Then a beautiful lake trout was tossed at my feet. It seemed to be raining fish for a period of ten minutes. My excitement was so great that I permitted the pole to graze one or two stones, whereupon my companion once more reminded me of the necessity of quiet.

From that time on I grasped the pole with more assurance in firmer hands. But conceive the provocation.

There in front of me was the jack sending up tongues of flame four and five feet in length at times. The fire illuminated the beach, the lake, and dispelled the shadows of Rattlesnake Bluff a mile distant on the opposite side of the lake. Stooping, bending half over the side of the batteau, with a hand shading his eyes from the glare of the great "jack," peering into the lake, and almost under the fire stood Singhose with his spear grasped tightly in his right hand. His aim was unerring. Rarely did the barbs cut the water with that hissing, lash-like sound that soon grew familiar to me—it was like music to my ears—without bringing up a struggling fish, captive to the cut of the best spearman I have ever seen behind a "jack" in any water.

More than once did the monstrous spear impale two fish at once. The first time Singhose gratified me by whispering to me to look ahead. I beheld two large pickerel with heads pointed toward the beach, side by side, perfectly motionless. Singhose explained afterward that they were asleep. A swift thrust, a shower of diamonds sparkling in the fire-light, and the twin pickerel in size were in the bottom of the batteau.

The only season of rest, if rest it could be called, was when Singhose stooped to gather pine-knots to replenish the fire. At the end of an hour I became accustomed to my duty. Through meshes of grass; across intervals where the pole sank softly in level sand; over places where boulders and shelving stone lay thick, I guided the batteau, while the figure at the other end of the batteau recalled the things I had read and dreamed of Norsemen compelling the sea to yield them tribute. Picturesque in the highest degree was Singhose as he plied his spear, now in front of him, now on the right, now on the left. A fish roused into activity would dart ahead, or toward the poleman; the spear anticipated it, landing it in the boat; or it would cross the course from right to left, or vice versa. It was all one to the eyes that gleamed like stars under the "jack."

The batteau was a sight for fishermen when Singhose informed me that it was "time to lay off." He volunteered the information that he was "dead tired plunking them," and then I discovered that the pine-knots were almost exhausted.

When we pulled the batteau up on the beach, it was half-past one. And I thought it might be half-past ten! Singhose went to the cabin and returned with Jake and the two half-breeds I had seen spearing early in the week. As the half-breeds looked in the batteau they held their hands up expressing wonder.

"There's enough to fill all the tubs there, Mr. Singhose," said the oldest half-breed. "I don't think so," said Singhose. He glanced at the heap of wriggling fish. "About two tubs full, I should say."

Now I knew what the big knives were for. The half-breeds assisted the servant in carrying the fish from the beach to the log in the rear of the cabin. Singhose picked up a large bass, struck the head off at one blow on the log, scraped the scales off in an inconceivably short interval, cleaned the fish, cut out the back-bone deftly, and laid the result, four large pieces, in the bottom of one of the large wash-tubs standing near.

Then Jake and the half-breeds seized the knives, and as fast as the half-breeds scraped and cleaned the fish, Jake struck the heads off, cut out the back bone, and divided the fish into "stakes," as I termed them. The work occupied them until five o'clock.

Meantime Singhose and his green poleman replenished the inner man bountifully, and after drinking each other's health, retired; the poleman to dream of whales and other monsters of the deep, and cataracts of fire and water.

DAVID LOWRY.

THE CANADIAN SALMON PETITION.

A SPECIAL dispatch to the Boston *Herald*, sent from Ottawa, April 22, reported:

"There is a conflict between the wealthy Americans who own salmon fishing privileges in Canada. It has arisen in regard to the character of the salmon fishing regulations. This afternoon a deputation of New Yorkers, including Mr. J. S. Kennedy, a director of the Canadian Pacific Railway; Dean Sage and A. D. Weekes, representing the famous Restigouche Club, were introduced to Minister Tupper by Sir Donald A. Smith. The visitors urged that the fishing regulations remain unchanged. Their request will likely be granted. The New Yorkers, it is said, will shortly acquire several new fishing privileges in northern New Brunswick."

A representative of FOREST AND STREAM called on Mr. Weekes last Tuesday. While confirming the report that there had been such a meeting with Minister Tupper, Mr. Weekes refused to say anything for publication. It is to be counted as exceedingly unfortunate that there should be any working at cross-purposes in a matter of so great importance. No one who knows Mr. Blanchard can question for a moment that his concern is for the true interests of the Canadian salmon anglers.

BASS FISHING.

THE following instructions are written entirely in the interests of the novice; the writer is an amateur rod-maker and fly-tyer, and a good part of the information given is from his own experience. For general use a heavy three-piece lancewood or bethabara fly-rod is the best. It should weigh at least 10oz., and if a trifle heavier so much the better, 10½ft. is about the right length, and from $6 to $10 about the right price. For bait and fly fishing you will want three tips—the fly tip, about 30in. in length, the next about 14in., the short tip, 6 or 8in. long, will give you a very useful rod for trolling and also for fighting a heavy fish on dangerous ground. This style of rod will give you all the advantages of a combination bait and fly-rod, without the trouble of carrying extra material around with you. You will gain nothing by using a stiffer rod, and lose much. Remember it is the pliancy of the rod that tires the fish. A hollow butt is very useful for holding spare tips. Pay from $2 to $5 for a reel with a sliding click capable of holding 50yds. of hard-braided linen line of the smallest size, or No. 5 silk fly line. Use spring-steel hooks, No. 1 to 3 Sproat or O'Shaughnessy will give you an idea of the right size, and see that they are knobbed, ringed or flatted. A folding landing net with a screw socket is very handy; you can fit a handle while in the woods and throw it away on leaving camp. A short handle is the best for general use. These three and a few brass box swivels, about ¾in. long, for all practical purposes complete the outfit; you can add to the above a folding canvas creel, a few spoons, imitation insects, etc.

Always fasten your bait hooks with half hitches; pass the gut or line over the shank, back of projection, and bring the end around in front of the first strand, pull tight and hold it down with your finger; place another one in the rear of the first, settle it into place by working it sideways; six or seven are enough. Gut should be soaked in warm water at least twenty minutes, to insure secure knots. If you are in haste, soak it in the stream a few minutes—this will answer temporarily. Cut the knot and tie it in the proper manner on your return. Here is a good safe knot for gut, *a la* Thad Norris: Place the two ends together, painting in opposite directions, and pass the long and the short end over and through twice, draw it even and tight, cut close. For a loop throw it in that form and pass the loop end over and through twice, treat the loop for the reel line in the same manner, omitting one turn and finishing off with three half hitches.

To splice a rod, make a neat bevel, then lap the ends together so that they will work over and under; about 1½in. for the tip and 1in. more for the other joints is long enough. Now, put in four half hitches, close up to lower part of splice, always finishing on the inside; carry the waxed thread or cord forward to the other piece and fasten in the same manner, so that when the two parts are laid together there will be a taut connecting piece to prevent the ends from working out; this is a fixture. Now make one turn and hold it down with your finger; now another, close up, and continue until you have reached the termination of all; fasten with five half hitches. To unfasten, pull out each half hitch with your fingernail. A spare tip can be used in this manner; in that case there would be no necessity of boring out the butt piece beyond the termination of the hand hold. For a permanent splice rub shoemaker's wax on the beveled parts. This is the way to mend an ordinary break in your rod between the ferrules. To splice a line, separate the strands of both ends about one inch, rub with shoemaker's wax and lay together; wrap with waxed thread, as in directions given above, only finish close up and inside the other half hitches. If your rod breaks close to the upper ferrule, burn the wood out if you are in haste, otherwise cut it or bore it out. Unless it is overdone one or two burnings will not do much injury to a ferrule. A good brass ferrule costs but a trifle. Hold it with a forked or split stick and gradually bring it near the fire. When the wood catches fire hold the ferrule downward. To make a tenon or dowel, about ¼in. from the end of the rod, make a cut around the joint with your knife, working it like a saw; now split up the wood around the cut from below, shape the projecting wood so that it will fit in the upper part of the tenon hole; now shave the wood away above the cut to receive the ferrule, rub the wood with wax and fit it so it can be forced by the hand nearly to the mark, and send it to its place by a few blows on a piece of wood shifted around the edge. This is only temporary; on your return, slightly warm the ferrule and take it off. Now make a neat fit of the metal tenon and ferrule; finish by filing the wood across the grain. While turning the joint from you rather briskly, use rubber cement instead of wax. A break close to the lower ferrule is repaired in the following manner: Smooth the wood off even; to brace the rim of the hole wrap tightly some fine cord around the upper part of the joint and fasten about ¼in. below; always keep it on while fitting the tenon. Your knife should have at least three blades, about ¼, ⅛ and 1/16in. wide, to work out different sizes of tenon holes. Now place the point of your knife in the center; use moderate force while working the point with a circular movement, while turning the joint slowly toward you.

After making considerable progress place the back of the blade against the opposite rim, to keep the edge of the blade away from the upper part as much as possible, and work out the lower part of the hole, with the edge of the blade near the point; finish the upper part. Toward the last work a piece of blunt wire around the inside of the hole to smooth it out. After trying the tenon, if you find the wood raised on the inside, scrape it down; file the rim occasionally with your file blade. Always place a piece of wood in the opening to prevent the blade closing; ⅛ of an inch for the butt tenon and 1/16 for the upper joint is a deep enough hole to receive the tenon; this will be found to be a good compromise between the tenon and no tenon theory. I have tested this matter thoroughly by using less in actual service, 1/32 of an inch for the upper joint and 1/16 for the other is about the right width of the rim. It is a fit if it supports the upper joint. Provided it is down on the mark, leave a small portion of the tenon outside the hole. Make haste slowly, and be sure your measurements are right; a small stick is good enough for measuring. A portion of the metal tenon can be dispensed with, unless you intend having the joint repaired at the shop on you return. Practice all this on a piece of hard wood before touching your rod.

Now replace the ferrule, and if you have the time make permanent fit. I will warrant a good lasting job if the above directions are closely followed. Fasten a ring top in the same manner as a ferrule. Wrap the keepers for the rings with waxed linen or silk thread. You are but half an angler if you do not know how to repair your tackle. To rig up properly, fasten the reel and shove the click aside until wanted, then join the tip and second joint and bring your hands close together; at the ferrules make a half turn and shove hard together. Always give a half turn in unfastening; if the ferrules stick fast, slightly warm them. Now connect with the butt and pull the line through the rings, loop on the leader and fasten the hook in the bar of the reel. You are now ready to begin operations, provided you have a fair supply of bait.

Trolling, lasting, and still-fishing are the different methods of using the minnows. The live minnow is used in still-fishing, either hooked through the upper and lower lips or the back. I much prefer passing the hook a trifle below the skin and bringing the point out near the back fin, and with this hold the bass will soon work up to the hook, no matter which end of the hook he commences operations on. After drawing off a sufficient quantity of line, grasp the minnow and toss it lightly in the water; use the line as little as possible in lifting the minnow. If bushes and weeds are in front of you it will be necessary to throw it. The minnow sometimes persists in keeping on the surface; in shallow water it does not matter; in deep water try split shot or any weight not too conspicuous, placed about 2ft. from the bait. The bass in taking the minnow almost invariably makes a long or a short run; the long run is when the bass shows no disposition to stop; point the rod in his direction, and let him have the line unchecked by any click. If you think the reel is revolving too fast, press the line lightly against the rod with your finger at the end of ten or a dozen yards. Strike with moderate force by raising the arms with an upward motion; if you miss, let your minnow drop back in the water, and the chances are he will take it again. If the bass runs a few yards only and then stops, be patient even if he jerks the line; wait until he moves off steadily before striking. Always regulate the pressure with your finger more or less, whether you shove the click on or play the fish without it. Keep the top of your rod up and your line taut in playing him. If the pressure is too great ease it by lowering the tip, and always do this when the fish leaps out of the water. Never hurry a fish when there is no occasion for it; be rather easy at the start and apply more pressure as he begins to tire; play him until he is thoroughly used up. Now, sink the landing net a trifle, bring him near it, and net him head first, or quietly use your hand; never haul a good-sized fish ashore with your line unless you want to risk losing him. Practice landing fish by hand, as it is impossible to use a net in some places. Strike if the bass does not make his second run in two or three minutes unless the line gives warning that he is still at the bait.

On playing a good-sized fish, if dangerous obstructions abound, tire him out as soon as possible by putting all the pressure you dare on rod and line; to force him away from an ugly place, shove the end of the butt outward, keeping a pretty stiff pressure with your finger on the line, unless you have a strong click. When it gets to be a question of letting the fish have his way or breaking your rod, choose the former method every time. Now, reel up your line as you approach the place where he has fastened you and feel down the line until you find him; put your forefinger in his gill-cover and your thumb in his mouth and lift him out; you will not always be so fortunate. Kill your fish by striking the back of his head against any hard substance.

Sometimes, when other means fail, if possible, raise the obstruction with a stout stick; you may save some of your tackle if nothing else comes of it.

Avoid fishing in places where it is impossible to bring your fish near enough to reach him. Your bait-rod should be at least 9ft. in length, to give you command of your line in reaching over the tops of bushes and other obstructions; for boa-tfishing and open places the short rod is good enough. Turtles sometimes trouble the minnow; in that case leave the place and return later. Always rig up away from the stream; approach cautiously, as large bass are sometimes seen near the surface. If you see one swimming off alarmed, leave him alone for the present, go to some other place and return later; lack of caution is the great bar to success in shoal water bass fishing. Keep well under cover if the water is from 3 to 5ft. in depth, unless the light is failing or there is a strong ripple on; very shallow water is not likely to harbor large fish; from 4 to 15ft. is the best for most localities.

Casting the minnow from the rod requires special tackle. The minnow is reeled up and cast from the tip of the rod; the multiplying reel gives line rapidly, slightly controlled by the thumb, to prevent backlashing. The angler must judge for himself whether it is worth his while to acquire the art. I have never had any occasion to practice it. Further information can be obtained at the tackle shop.

A method of my own, at least it is new to me, will prove acceptable to most anglers, as a gut leader can be used, which is not the case in the other method. Only ordinary tackle is required. Take a fair-sized dead minnow and pass the hook in at the mouth and out at the gill; fasten it about half way between the back fin and tail, so that the shank of the hook is in a line with the back, the point uppermost. Draw off from the reel enough line and grasp the rod with the thumb and forefinger; dispose of the line in coils on the end of your extended fingers, leaving about two yards over; now grasp the minnow with your right hand and throw it; it will come easy enough after a little practice. Unless the water is shallow, allow the minnow to sink a foot or more below the surface, then draw it along with a jerky movement; this will cause it to revolve in the water; occasionally give it a few slight pulls, this will vary the motion. It will keep its depth, as its curved shape allows it to hold water. When the bass takes the minnow allow him to run a few feet before striking.

To prepare for another throw do not reel in, but reach out and coil the line upon the fingers until it is all in except the short length. If a bass seizes the minnow during the operation, pay out the line through the fingers on the right hand, putting on what pressure is needed. Straighten the minnow when it gets too pronounced a curve. Casting the grasshopper is another effective method. Hook the grasshopper through the lower part of the body, so that he heads up the hook, toss him in a short distance and take extra precaution to keep out of sight as long as he remains on the surface. Increase your cast gradually by drawing off sufficient line from the reel, the slack will be taken up in casting. Now, start the bait from the water, slowly at first, then with increasing momentum, send it to the rear; a short pause before making the forward movement; aim a trifle above the spot, so that your bait will drop quietly in the water. In rough water it does not matter; draw the bait along with a jerky motion. Allow the bass to run a few feet before striking.

Worms and crickets can be cast in the same manner. Use a whole worm of moderate size; hook it so as to leave the two ends free. It is necessary to make a side cast when there are obstacles in your rear. Send the line along the stream, and return it directly in front and beyond.

The above remarks will give the beginner a good idea of fly-casting. Watching a good fly-caster will be of great assistance. ARTIST.

[TO BE CONTINUED.]

BOSTON ANGLERS.

THE ice in the Maine trout lakes is hard and strong, up to the present writing, though reports disagree as to the thickness and the probabilities of its going out. Taking all the reports together, it would scarcely seem possible that it could clear from the Rangeleys before the 10th of May, while from Moosehead it will doubtless go a day or two before it does from the former. I have prepared a list of the dates of the departure of the ice from the Rangeleys, for the past ten years, which is as follows: In 1882, May 12; 1883, May 14; 1884, May 13; 1885, May 15; 1886, May 3; 1887, May 16; 1888, May 21; 1889, April 30; 1890, May 9; 1891, May 10. The above dates are from scrap books, and correspond with the dates of the dispatches to the Boston *Herald* announcing the departure of the ice from the above lakes. The ice has usually gone out of Moosehead a day or two sooner, though not always. Doubtless it will go several days sooner this year, since it is a greater body of water, and is better filled, I understand. In the Rangeleys there is very little water at this time. A letter from J. A. French, who is again to have charge of the camps at the Upper Dam this year, says, under date of April 22, "The lakes are very low, and unless we get lots of rain, will be all the spring. If this is the case, I shall look for better fishing than you have seen for years; for the trout will be where you can find them." In this letter Mr. French has in view the fact of the tremendous flowage that is a feature of the Rangeleys—some 10ft. at Rangeley Lake, 13ft. at Mooselucmaguntic and 21ft. at Richardson—and it has been a theory that the trout are hard to find when the water is high, which has been the case for many years at the time of the spring fishing.

Boston anglers are getting impatient, as they almost always do, and later they wish that they had not. The big trout have never been caught at first. It has always taken days of warm weather to bring them to the bait. Numerous parties are made up, several of which have already been named in the FOREST AND STREAM, others will follow. In the mean time such of these anglers as have leisure and the means to do so are trying other waters. Herbert Lawton, John Priest and H. Priest go to Lake George, New York, in a few days. One at least of these gentleman has visited the Maine lakes several times.

J. L. Harberger, with Bucannan & Layal, the tobacco people, went to Newfound Lake in New Hampshire, on Friday, to try the landlocked salmon and trout. There are reports of several fine landlocked salmon taken at that lake this spring. Dr. George H. Fowler and Mr. C. N. Drake of Bristol, the location of the lake, have landed a handsome one, and they made a present of it to J. F. Merrow, proprietor of the Revere House, Boston, who has a fine country estate bordering on the lake. This salmon is said to have weighed 13lbs. Mr. C. D. Sias and wife also go to Grand Lake Stream this week. Mr. Sias is of the celebrated coffee concern of Chase, Sanborn and Co. W. H. Mills, of Portland, Me., also goes to Grand Lake Stream this week.

L. Dana Chapman, not unknown to the readers of the FOREST AND STREAM, with his friend Mr. Larkin, of Milwaukee, were down to Bourne on a trouting trip last week. George Tufts, of the Standard Clothing Co., has recently returned from some fine trouting sport at his preserve in Connecticut. Mr. John Loring, Elisha Flagg, Augustus Flagg, of Little, Brown & Co., and Edward Dexter go to a private stream on the Cape in a few days. Mr. J. H. Bridge, of Augusta, Me., has recently returned from his first tarpon fishing excursion in Florida. He succeeded in landing two of the silver kings. SPECIAL.

ANGLERS' ASSOCIATION OF ONONDAGA

SYRACUSE, N. Y., April 21.—*Editor Forest and Stream:* We have elected our officers for coming year. You see we made scarcely any change. They all are in it—for protection—and you will see great results. Our Association fully appreciates the many favors they have done us in the past. They are: President, R. W. Jones; Vice-President, John N. Babcock; Secretary, Walter S. MacGregor; Treasurer, Charles H. Mowry; Executive Committee: M. J. French, Wm. Everson, Geo. B. Wood, H. E. Robbins, Amos Padgham.

Secretary MacGregor has prepared the following exhibit of work for the year:

It has been thought desirable to inform the members of the Anglers' Association and the public generally, of the work done by the Association during the past two years of its existence in capturing nets and prosecutidg offenders:

Total Nets captured and destroyed by Agents of the Association in Onondaga Lake, Oneida Lake and Seneca River.	133
Fish Spears captured	17
PROSECUTIONS.	
Actions brought in Supreme Court	11
Judgments recovered after trial of issues	9
Settled before trial	2
Settled after trial	2
Actions brought in Justice Court	22
Judgments after trial	5
Settled before trial	17
Settled after judgment	5

There are no actions now pending.

The Association points with pride to the above record of its work, which is without parallel in the State of New York, and confidently ask a continuance of your support.

WALTER S. MACGREGOR.

State Game Protector Hawn and the Association's special protector are doing excellent work.

HENRY LOFTIE.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

CHICAGO, Ill., April 23.—There being no fishing yet to speak of, it is probably just as well to speak of fish protection a little. The State League mentioned last week seems to have been heard of pretty widely, if letters from all over the State are any evidence. Mr. O. H. Russell, of the Vermont Gun Club, writes Mr. N. W. Duncan, the League treasurer, as follows:

"Vermont, Ill., April 15.—The Vermont Gun Club begs permission to assure you that they are in hearty accord with your league and would like to become members of same. Our club is chartered by the State. We own some fine grounds on the Illinois River and will give the League our support.—O. H. RUSSELL, Sec'y."

This is the kind of comment most pertinent and valuable.

Mr. P. Richards, of Urbana, Ill., writes to Mr. Cole the following, which the latter gentleman refers to me for answer: "Urbana, April 13.—Will you kindly give me a few of the places where you catch black bass? I see by the morning papers that you are president of the Illinois Fish Club League, on the strength of which this liberty is taken. For the past four years it has been my custom to fish at the Thousand Islands and vicinity with considerable success, but would like to make a change this season and do not wish to make a mistake as to locality."

Mr. Richards evidently has faith in the practical workings of the League. Really the best advice to him is to tell him to take a reliable sportsman's paper which makes a good specialty of angling. In that way he will gain opportunity to review many experiences on many waters. The Fox River, from McHenry down to Yorkville, affords good bass fishing in proper season and under proper conditions for the man who understands stream bass fishing. The Kankakee River at Hanna, at Water Valley, at Kouts, at Momence, at Lorenzo, on similar conditions offers fine sport. The whole Fox Lake system is full of good big-mouth fishing, in the rushes. Power's Lake, Delavan Lake, and plenty others in lower Wisconsin, have good bass fishing. Spring Lake, below Pekin, Senachwine Lake, near McHenry, and a dozen other lakes of the Illinois valley, have fine bass fishing. The Illinois itself is a good bass stream. The Rock River, below Ft. Atkinson, is a good bass stream also, and there are plenty of others where the bass fisher who can cast a bait or a fly fairly well can get bass. If one wants to catch so many bass he is ashamed of himself, or ought to be, he would better go further north, to the 'lunge country of Wisconsin. Some of the little-fished lakes of that wilderness are crowded with bass. Bert Louk, a guide of Three Rivers Station, Wis., can show a stranger plenty of these lakes. The whole country up there is full of such chances, though the catching is too easy to be sport. This is outside Illinois. In Illinois we need Mr. Richards and a lot more men interested in bass fishing to take hold of this State League work, so that after a while the inquiry for good fishing will be easily answered, if it need be asked at all.

Mrs. C. A. Baker, writing to the "Illinois Fish League," Springfield, has the following to say: "Along Rock River in the vicinity of Dixon many fish have been taken in seines, and are being taken all the time. Is there any way to prevent this? Are they allowed the privilege of using a seine—if so, what sized mesh? These fish should be protected—how is one to accomplish it?"

Answer was duly made to the above. Cannot anglers see the necessity for the League, and the necessity it has for funds?

Mr. Duncan writes me from La Salle:

"Warden Green made a great seizure of nets on his trip from Peoria to La Salle aboard the Lotus. A couple more trips of the same kind will convince the poachers that there is a fish law in this State that must be obeyed."

Put Warden Green and Warden Buck to work the year through, with fund enough to back them, and they could practically break up illegal netting in the State of Illinois. Their record for this spring is over 200 nets seized. Warden Buck is out on a still-hunt now, but it is not well to say where just yet.

The trout season is delayed. One catch of 120 comes down from a stream near Sparta, Wis., Mr. C. M. Burton is going up there next week.

Mr. Chas. Norris starts next Monday for his trout trip. Mr. Norris has plans for dire vengeance on the big trout of the Brulé.

Mr. Frank Shaw goes to River Falls, Wis., to-night, to join his friend and partner, Mr. J. L. Wilcox, on his preserved stream.

Early trout fishing is no sin, for trout do not spawn till fall, and mosquitoes spawn in May or earlier. Early bass fishing can not rightfully be approved, as these fish are spring spawners. They will spawn unusually late this spring, as the waters are high and cold.

The State of Missouri is overlooked too much by Northern anglers. The Gasconade, the St. Francis, the Current—these are streams whose superior we do not have. Before me I have some of the literature of the Current River Fishing and Hunting Club, a successful organization of 150 membership. It reads thus in part:

The Current River is 350 miles long, rising in the Ozark Mountains in central Missouri, and running almost due south, emptying into the Black River, near Pocahontas, Ark. The waters of this beautiful stream are as clear almost as the atmosphere, and cool enough to use without ice in the warmest weather. The scenery along the river is magnificent. No malaria exists along the banks of this mountain stream, and its waters abound with large and small-mouthed black bass, white perch, pike, blue catfish, croppie, drum, striped bass, black perch and sunfish. There are no mud catfish or bullheads, garfish, grinnell or dogfish, and but few crawfish in its waters, which are too clear and pure for these scavengers and fishermen's pests. Mosquitoes come late in the season and leave early, and can easily be avoided by camping on high ground. The club house is situated in a bend of the mountain ranges, 200 miles long by 75 miles wide, constituting one of the most magnificent natural deer parks in the world.

The hunting and fishing grounds are not so accessible as some may desire; but this is the secret of the excellent sport to be obtained. Fish and game are soon destroyed where easily accessible to the pot-hunter.

Doniphan is 180 miles from Saint Louis. You leave via I. M. R'y at 8:30 P. M., and arrive at Doniphan at 7 A. M. next day. It is 18 miles across the mountains to the club house, which can also be reached by boat up the river.

Trolling with spoon, live bait fishing, casting with fly and bait, are all successfully practiced. Fish caught in this stream are gamey and hard fighters. Records of 75 and 78 black bass to a boat containing two members and a paddler, in five mile run have been made several times, the fish averaging 2½ lbs. weight; but club members do not encourage such destructive catches—these having been made merely as records.

In the hunting season the hills and valleys abound with quail, which are tame and easily found. Wild turkey are plentiful, with some pheasant. Large river bottom rabbits, almost as large as prairie jack rabbits, are plentiful, and furnish fine sport; while for deer shooting this range is probably unequalled by any in the United States, and an occasional panther or bear can be found by adventurous sportsmen by going some distance back in the hills, which hills, at a distance of five miles west of the Current River club house, are as trackless as the wilds of Africa, and can only be traversed by aid of a pocket compass or experienced guide.

That makes a fellow feel pretty good just to read, anyhow, and it sets a fellow thinking about the near use, one place or another, of the compass or the guide.

E. HOUGH.

GREEN RIVER TROUT.

"WELL," said Mel., turning in off the road, "this is the place I have been thinking of to pitch our tent. What do you think of it?" "Kinder nice; but ain't it too near the road?" "Yes, 'tis very close; but, then, hardly any one passes here, and no one around these parts would touch our things, and we will be here only one night you know." "Very well. But I tell you what, throw out the traps and go put the horse in the barn, and I will scout around and see if there is not a better place." So hustling around the things were soon on the ground and Mel drove off; while I went looking for a camping ground to suit me, and, after walking for a few minutes, found the very place; well sheltered from the wind or gaze of the traveling natives, within a rod of the brook, and a nice bed of running, mossy-kind of vines for a carpet.

Mel. soon returned, and heartily approved of my choice, and we soon carried the duffle to the new spot. Then, working like beavers, we quickly put up the square of drilling that answered for a tent, and filled one end with hemlocks to break the wind. As our time was limited we were content with some hay carried from the barn, to answer for bedding in lieu of browse; this, with a blanket spread over it, answered very nicely to us tired mortals.

"Now," said Mel., puffing away on his pipe (which, by the way, is the one thing about camping I cannot indulge in, no doubt to my loss), "you can go up the Moss Hollow Brook to the bridge and fish it down to the river, and I will walk up stream a mile and fish back to camp. We want to get supper before dark; about what time will you be here?" "Well, let's see," pulling out my watch; "'tis now about four; I guess I can make it by six-thirty; let's hustle," and putting on my creel I started off. 'Twas only about a quarter of a mile to that bridge, but so anxious was I to get fishing it seemed over a half mile. Going above the bridge a few rods to a nice hole, I dropped my hook in above it, and it drifted down into the most inviting part—no response. There was another good spot just below the bridge; tried that—no one home. The water was low and very clear, and on both sides of the brook were trodden paths where the fishermen had been up and down, time and again, for the past few weeks, leaving not a very bright outlook for my side. But I fished slowly and patiently down to the main stream, getting only four trout, and by this time it was necessary to start for camp, as Mel. might be there waiting; so I hastened aad got there in time to clean my fish and gather some wood before he appeared over the hill.

"What luck?" said he. "None hardly." "That is a slim-looking supper," pointing to my four fish, "but we will make out," and he opened his basket and showed sixteen nice ones, from half a pound down. Selecting eight to go with my four he set to cleaning them while I made the fire, and soon had coffee boiling and the pork fried out. Rolling the trout in meal, they were soon browned to a turn, and, with the bread, butter and pickles, were rapidly filling up the vast cavities under our vests as Newt Chase, our friend, whose barn the horse was in, appeared to us. "Hello, boys; just eating supper?" "We're most through, Newt; won't you have a bite?" "Guess not; I have not eaten much the last few days. My stomach has gone back on me." "Just try one of these trout," said Mel., "they are cooked fine. Hand him one." I passed over two that were joined together by a nice brown piece of pork, while Mel. gave him a slice of bread and butter. "Have some coffee, won't you, Newt?" "Don't care if I do. You fellows have made me eat more than I have eaten all day, and it tastes good out here in the air," and he cleaned up what we passed him with the air of a man who was enjoying himself, while Mel. lit up his blast furnace and puffed clouds of smoke at imaginary mosquitoes. Rousing up as the fire was getting low, I suggested that it would be seemly and proper to draw on a pile of old rails by the side of the road, called a fence, and Mel. started while I gathered up the dishes and Newt started home, giving us a perfect imitation of an owl's hoot as he disappeared in the shadow caused by the flickering firelight. Mel. threw on a number of rails and let them "nigger-in-two," as we talked of past trips and of the morrow. After a last smoke he was ready for bed, and we turned in.

I woke at three, very cold, as Mel. had taken a grip on the blankets and turned over, leaving me with one side exposed. Not being able to recover my part of the blankets, I called him up. "Come, Mel.! 'tis daylight, and the birds are beginning to sing." He crawled out reluctantly from under the warm blankets, but once out was soon ready for business and went fishing under one dam while I tried the other. Taking six nice ones out of one hole, I fished down stream a short distance with poor success, and then returned for breakfast and found Mel. had eight good ones. On arrival at camp found Newt had been over and made a nest in our hay, depositing therein eight fresh eggs, four of which did breakfast and the others we boiled hard for lunch.

"Now," says Mel., filling his pipe, "we will go up stream three miles and fish down, then have lunch, after which Newt can drive the horse down a few miles and we will fish down to him, and then drive home." This we did, but caught only a few decent trout, Mel. taking one big fellow that weighed 1lb. 6oz.

After lunch I put on a string of flies and could get all the little ones, but so well had the lower part of the stream been fished I had a rise from only two good fish, while Mel. could do nothing with bait. When about half way down we met Newt coming back, so Mel. laid down on the rocks and smoked while Newt tried his hand. "Say, boys," said he, "you ought to have seen the crowd up here Arbor Day; there must have been twenty on that Moss Hollow stream." "No wonder," said I, "that my luck was so poor there." "If you fellows could come up after a warm rain you would get a nice lot of good ones; the water is too low and clear now." "We have done well enough, Newt; had a nice supper out of them and got about fifty to take home; besides, think what a royal good time we have had, and how Mel, has smoked. Why! he brought two pipes, so that one could cool off while he worked the other. Come, Mel., we must be going. Good bye, Newt!' "Good bye, boys." And so we parted, he going home to work in the mill and tend his sick folks, and we to our team and then to Brattleboro.

My fish were cleaned and sent to Albany, to be fondled and washed by three-year-old Sam, who enjoyed eating them hugely, while we all talked of the fun we expect to have at the camp this year, and the fish we hope to catch.

DEXTER.

ALBANY, N. Y.

NORTH SHORE FISHING STATIONS.

I HAD often tried to imagine what it might be like, and during a recent trip which Stephens and I made to the North Shore we had opportunity to not only observe but also experience somewhat of the life. At Chicago Bay there are three fishermen and they have their wives and children with them, remaining at the station the year through. "We have been here three years," was the answer to our inquiry; "came here from Duluth."

All they know of the outside world comes by way of the steamer which stops twice a week during the fishing season, to take the "catch" to the great packing house at Duluth, or an occasional party of fishermen, like Stephens and I, who may chance to stop for a day or so. "There has never been but one party here before you since we have been here," said the boss of the station. "They run in last summer because their tug was disabled, and they only staid long enough for repairs." Everything with steam power is a tug along the North Shore and Isle Royal, or else a "big Canada boat." Why more fishermen do not visit Chicago Bay I do not know, as the stream affords fine fishing, as Stephens and I proved, and we were informed that later in the season the water at the mouth of the creek was "alive with fine trout."

The houses are built of spruce logs in the most primitive fashion. Queer little gardens are found at all the stations, often fenced in with nets. The fence is a necessary protection against dogs, of which there are numbers at each station. Savage, disreputable-looking curs, many of them are too, and we wondered at their numbers until we learned that they were used to draw sledges and as pack animals in the winter. Oh, the long, dreary winter! The largest half of the year is winter. Then the news from the world must come along the Indian trail that winds along the shore from Duluth to Grand Marais and then on to Grand Portage. A faint thing this trail is, a scarcely perceptible path. Stephens and I were across it many times, and always wondered that, with the wear of years, the trail was so faint. At Chicago Bay and Grand Portage Island the fishermen remain through the winter. All they do is try to keep warm and occasionally fish a little through the ice. But this is dangerous, as the lake never freezes solid and the ice shifts and drifts, and the fisherman may find himself and the seemingly solid ice he is on drifting out into the lake. At Grand Portage there are three men—no women or children. Over on Washington Harbor, Isle Royal, there are eight fishermen, of whom only one has his family, and they go to Duluth for the winter. "We staid there last winter," said Mrs. Johns, "but we went to the mine, and many of the fishermen also went there, and worked all winter." This mine is the prospecting diggings of the Wendigo Copper Mining Company, at the head of Washington Harbor, five miles from the station. Occasionally two men will remain together all winter at some of the stations, but words cannot describe the loneliness of such an experience.

A few years ago a man staid alone at one of the stations, but when they reached him in the spring he was dead. "Was took sick, we think," said Peter. "Tried to build a fire and could not; put some grub on a chair by the bed and crawled in, and there we found him dead." One of the tragedies of the Isle. "Two years ago," said Peter, "when the boat made her last trip, the man from Washington Harbor did not come off, and the day before New Year's we started to sail over from Grand Portage to find out what was the matter, and to get him away before ice formed. It was bitter cold, and after we were started gusts of wind came with increasing frequency and hardness, and before the island was reached we were in a terrible gale. It was a chance if we would make port other than the bottom of the lake. The boat was getting heavy with ice and the sails frozen stiff, and we were benumbed with cold. At last we ran into Washington Harbor, and right glad were we, for the gale proved to be one of the worst of the year. We spent New Year's there, then returned to Grand Portage, taking the man with us."

"There are many people coming and going in July and August," said Mrs. Johns, "and it is quite lively on the island. Last summer a party of twenty-four were encamped right where you are now for two weeks. They were five brothers and their families."

The hospitality of these fishermen is worth a long journey to experience, so freehanded and freehearted. What surprised Stephens and I as much as anything was the absence of swearing among the men. We were thrown in quite close association with the men at three stations, and only once did we hear a single oath, and that was so modified that it could scarcely be called such. The queer little settlement at Washington Harbor will long be kept in memory. The little shanties of spruce logs, chinked with moss; their simple, homely interiors; the characteristic surroundings of net-encompassed gardens, net-reels, boats, bay and wooded islands, screaming, chattering gulls, lauging loons, and generous, weather-beaten men, all go to make a picture to be kept on "memory's walls."

MYRON COOLEY.

DETROIT CITY, Minn.

ADIRONDACK WATERS.—A Malone correspondent writes under date of April 25: The prospect looks like anything but an early season for trout fishing, and they can rest secure beneath the ice for many days to come. Frost last night stiffened everything in the way of a bud or blade of grass. Mr. Fuller, of Meacham Lake, informs me that the ice is twelve to fifteen inches thick on the lake, and from Lakes Titus and Long I have similar reports of winter's lingering in the lap of spring. However, we are girding our loins for the early sport, and sportsmen are prophesying an unusually active campaign. —H. E. CANTWELL.

WORLD'S FAIR FISHES.

A FEW days since we had the pleasure of looking over the casts being prepared by the Denton brothers for the U. S. Fish Commission exhibit at the World's Fair. As already noted in this paper Dr. Henshall has made a collection of the beautiful fishes of the Gulf of Mexico at Key West. These fishes have for the most part reached here in very fine condition, both as to preservation of color and flesh, and the artist has had an opportunity not often afforded for the work of reproducing the form and color of these beautiful tropical fishes. This exhibition will be one of the richest treats of the kind that the anglers of America, or the whole world, have ever seen. All the game fishes, as well as those that are remarkable for form, coloration or habit, from the diminutive sea-horse to the giant jewfish and tarpum, are faithfully copied. Fresh from the easel is a beautiful specimen of the tarpum, life-like as can be, the opalescent reflections showing as plainly as when the fish was first taken from its native element. Weight 124lbs., length 6ft. 3in.

Dr. Henshall secured this tarpum in a ground net, and experienced no little difficulty in getting it ashore, the sea being up and the fish hard to keep from slipping overboard; besides, the uncomfortable presence of a large stingray kept the men from lending assistance. On the easels of the artists are now a jewfish of about 75lbs. and a tilefish of 15lbs. The latter is a beautiful fish, its coloration giving rise to the common name. The sudden appearance and disappearance of this fish stand forth among the most remarkable occurrences of recent years. Since its disappearance the vessels of the Fish Commission have searched for it, and fishermen have been on the lookout for tilefish, but they are absent. A red snapper of about 15lbs. weight is also especially good. A species of *scorpæna* (a sculpin-like fish, whose dorsal spines, in tropical waters, inflict painful poisonous wounds), was received from Dr. Henshall, and has been cast by Mr. Denton. The colors of this fish were simply gorgeous—resembling mosaic tiling on the body, while the under parts of the pectoral fins were rich, velvety black and gold.

Salmon from two oceans, trout of America and Europe, besides whitefish, grayling, shad, carp, striped bass, black bass, sunfish, perch, weakfish, kingfish, croaker, channel bass, sheepshead, mackerel and pompano, a very fine specimen of the fishing-frog or angler, the curious batfish, smeltfish, box or trunkfish, besides many kinds of sharks, rays and skates, have all been cast and are now being colored. The whole number of casts made by Messrs. Denton for the Fair up to date is 302; of these 82 are already painted. There are also four figures representing fishermen attending to their work in boats. No effort will be spared to exhibit these subjects in a most attractive manner, and the public can rely on the genial Captain Collins and his corps of able assistants for a most instructive and interesting display of fishery products and appliances.

In handling large numbers of specimens Mr. S. F. Denton observes that fishes kept in cold storage, at a temperature of 18°, retain the colors wonderfully well. Those kept several weeks have as bright a pattern of coloration at the end of that time as when first put in. This is of great value to the artist who would faithfully portray such animals. BON.

NOT ALL OF FISHING TO FISH.—A Danbury youth went trout fishing the other day and ventured to drop a sly line into a posted brook. Soon the approaching figure of the owner loomed up in the distance, and the Danbury youth knew he had been seen. He took incontinently to the bushes, where he spent a very miserable two hours in hiding and caught a cold that kept him two days in bed. Meanwhile the terrible owner, who was not the owner at all, had sought a similar refuge at sight of the original culprit, and not until his teeth chattered like a typewriter did he venture to leave the friendly but damp shelter and slink away from the scene. He was an elderly man, and his share in the day's sport resulted in a four days' rheumatic limp.—*Boston Transcript.*

NEW BERNE, N. C., April 9.—Nine-pound weakfish or sea trout were brought into market to-day from New River Creek, which is brackish water. These fish have been exceedingly abundant outside the beach and in the sounds all winter long since the middle of November, but will soon disappear, going northward. They will strike the New Jersey coast by June first. Just now they are heavy with spawn. Old fishermen say they "spawn in the rivers like shad, herring and striped bass, but as most rivers are of limited capacity, I have always wondered where the millions of fish of sundry kinds which are manifestly barred out of the rivers for want of room, could possibly be served. *Quien sabe?*—CHARLES HALLOCK.

LAKE CHAMPLAIN FISH are protected during their spawning season by the laws of New York and Vermont; but early in the spring some of the spawning fish push their way northward into the portion of the lake lying within the Canadian borders and there they are attacked by dynamite and seines and destroyed by thousands. The people of Vermont are especially, and very naturally indignant over the opportunity thus given to foreigners to destroy valuable fish which they can not lawfully take even for home use. The pike is one of the fish which is ruthlessly destroyed in the Canadian portion of the lake.

PENNSYLVANIA TROUTING.—Scranton, Pa.—Notwithstanding the cold and disagreeable weather on opening day (April 15), the anglers of this place turned out in good force, and succeeded in taking a fair number of trout. There are plenty of fish and some very fine ones were caught, especially in the Roaring Brook. Messrs. Comegys, Keezer, Marsh, Lorenz and others, were among the most fortunate, both as to number and size of fish.—SCALES.

Trout Near New York.

WE have secured, for the private information of the readers of FOREST AND STREAM, knowledge of a number of streams and lakes easily accessible from this city, where we believe that good fishing for trout and black bass may be had. The information, much of which comes from private sources, we are not at liberty to print, but we shall be glad to furnish it without charge to any reader of FOREST AND STREAM who will apply for it, either personally or by letter.

NEW HAMPSHIRE NOTES.—The trout law is "off," and local sportsmen are making the best of their privilege. A number have visited Diamond Pond, and report the success as greater than usual. A crew have commenced on the new buildings at Second Lake, and will erect a 2½-story building, 24x45, with wide piazza full length. There is a quantity of ice in the lakes, but this is rapidly passing out. Fishing will commence there by the twentieth of May.—HALFORD.

HOUSATONIC TROUT.—Falls Village, Conn., April 16.—The black bass have almost entirely deserted the Housatonic and the result that many trout are being caught below the Housatonic Falls. Lock Call, a veteran angler, caught eleven weighing 19¼lbs. in less than two hours. Artist Mundry sent them to a New York friend as the finest catch ever known here.—J. B. B.

WORLD'S FAIR FISHES.—Mr. T. K. Bruner, of the North Carolina State Board of Agriculture and a member of the World's Fair Commission, is visiting Anoca, N. C., and other points, for the purpose of collecting fishes to be included in the State exhibit. These are to be preserved by the Davidson process.

EARLY TAUTOG, New Bedford, Mass.—A fair-sized tautog was caught off the bridge at this place, April 9, which is quite early.—W. NYE.

THE INVENTOR of the minnow bucket described last week, suggests that the eyeholes should be eyeleted.

THE TENT YOU WANT.—If you need a new tent for your camping trip this summer, it will pay you to investigate the "Protean Tent," elsewhere advertised in these columns. It is far better for the purpose than any other tent, and will add much to the pleasure and comfort of your outing.—*Adv.*

Fisheulture.

THE AMERICAN FISHERIES SOCIETY.

THE twenty-first annual meeting of the American Fisheries Society will be held Wednesday and Thursday, May 25 and 26, at the Holland House, Thirtieth street and Fifth avenue, New York city.

The first day's meeting will commence at 10 o'clock. An interesting programme has been arranged and many important matters affecting fisheulture will be discussed.

May 25, a dinner will be given the visiting delegates by the New York Society for the Protection of Game; and on May 26, the members of the Society will enjoy the hospitality of the South Side Club, at their preserves on Long Island.

The following gentlemen, prominent in fishing and game circles, have consented to act as a committee on local entertainment: Hon. Robert B. Roosevelt, Hon. L. D. Huntington, Judge Henry W. Bookstaver, Charles F. Imbrie, Roland Redmond, Wakeman Holberton, Col. Alfred Wagstaff, Charles E. Whitehead, Robert B. Lawrence and Fred Mather. EDWARD P. DOYLE, Sec'y.

COD HATCHING AND PLANTING.—At the Gloucester, Mass., station of the U. S. Fish Commission the hatching season closed with an output of 27 000,000 cod fry and 3,000 000 pollock, an increase of 8,000,000 over any previous season. The experiment of liberating cod fry in Squam Pond, where they will be protected from most of their enemies and placed under conditions favorable to their development, was concluded after 4,700,000 young fish had been liberated.

WHITE PERCH have long been desired by fisheulturists in Germany, and various small lots have been shipped from the United States, but with scant results. Nine fish were forwarded, April 11, from Cold Spring Harbor, New York, in three cans. These colossal movements must be discontinued or the price of white perch stocks will soon rule them out of the market.

LAKE TROUT FRY, about two inches long, were planted in Otsego Lake by the New York Commission. The consignment numbered 100,000, and was sent to Mr. A. W. Thayer, of Cooperstown, April 10.

The Kennel.

FIXTURES.

DOG SHOWS.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

Aug. 31 to Sept. 3.—Second Annual Dog Show of the Blue Grass Kennel Club, at Lexington, Ky. Roger Williams, Sec'y.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

FIELD TRIALS.

Nov. 8.—Second Annual Trials of the New England Field Trials Club, at Assonet, Mass. Geo. E. Stickney, Sec'y.

CORRECT TYPE OF PSOVOIS.

Editor Forest and Stream:

In Mr. Lacy's report of the late Boston show he generously gave considerable space to his comments on the two types of Barzois, or, as they must now be called, Psovois, shown, and rightly, for now is the time, if ever, when it should be settled which is the right type, or rather which is the best for American breeders to import and accept as standard.

As far as can be learned there is absolutely no standard for Psovois in Russia; each breeder has his pack, and as they are kept at their country places far apart from each other, each breeder breeds for his own use solely and to a certain extent has a type of his own; moreover, as there are no large dog shows in Russia as in England and America, the breeders are not brought together. At the last show of sporting dogs held in St. Petersburg, March 18 to 22, only a few Psovois were shown. Such being the case, it is now in the hands of the English and American breeders to establish a standard and type of their own.

Only one thing seems to be certain in regard to the Russian hounds, and that is, that they must be fleet enough to run down a wolf, and a pack of them must be strong and courageous enough to pull him to pieces. Surely if there is a use a dog can be put to, every one must acknowledge that it is best that he should be so made up in body and brain to accomplish the same.

While this breed of dogs may be of only ornamental use in the East, it is in the West that they will find their true place, and it is for the West that we must breed.

In the open class at Boston I was called upon to judge Argoss, Leekhoi and Napoleon; and any novice looking at them would at once see that the former was of entirely different type from the two latter. Argoss is a large, powerfully made, black and tan dog, with a rather short, flat coat, fair head with a trifle sour expression, mouth level and teeth strong, neck rather small, shoulders well muscled and rightly placed, forearms straight, running into strong pasterns and perfect feet. His chest drops well to his elbows and his ribs are not only well sprung but run well back to his coupling; his back is not very much arched, but his coupling is wonderfully strong, so strong in fact that I could rest my entire weight upon him. His hips are well spread, quarters well made up of strong, hard muscle, and his stifles, hocks and feet are perfect.

One is at once impressed when looking at him that he is made not only to run but also for holding, he would be able to exert a tremendous amount of power in shaking or pulling a wolf. He is essentially a workman and shows it in every move.

Leekhoi is by far the most beautiful and aristocratic looking of the two, and his long white coat, set off with light brindle markings, at once demand your attention; he is also a large dog, and in head and expression is much superior to Argoss, neck fairly strong, shoulders set close together, not heavily muscled, forelegs and feet perfect. We now come to his chest and ribs. Most of us have been taught to believe that unless a dog had well-sprung ribs he could not run well and stay; but in place of well-sprung ribs on Leekhoi we find them flat, and, as his chest is deep, he may be what is called fish-sided, even the short ribs next his coupling are flat. Can a dog with this conformation run and keep running, have we been breeding dogs on the wrong idea, and do they breathe up and down rather than across? Surely, if we accept the above conformation, we have been off the right track. Leekhoi's back is very much "sickled" from the withers to the hips, his coupling is very small, so small, in fact, that I could almost inclose it in the span of my two hands, his hips are close together, stifles rather straight, quarters made up of flat long muscles, feet good. As he moves around you are at once attracted by his majestic appearance and lofty mien, but he is all in all a drawing-room dog, not a dog for a long hard run.

You now have the two types. Napoleon is of the Leekhoi type but not so large, while Svodka, Mr. Hanks's winning bitch, is entirely on the Argoss type, straight-backed, arched ribs, strong coupling; which is right, or rather, which shall we make right? Shall we make a breed that can be classed as sporting dogs and have a use, or shall we have a breed that, while they are perhaps the most beautiful of all dogs, have no use in the field. The Argoss type is dangerously near the deerhound type, while the Leekhoi is very distinctive.

I write this as I wish to see the breed started right. I have never owned a Psovoi but may later, but have owned, however, a number of greyhounds, and it is from the study of them that I have become interested in the Psovoi. Let the different breeders write their views on the matter and have the matter settled by the Psovoi, Deerhound and Greyhound clubs.

The first meeting of the Borzoi Club of Great Britain, of which G. R. Krehl is treasurer and the Duke of Newcastle president, was held the other day at the Albemarle Hotel. While they made up no standard, they offered a number of specials to be competed for at the coming Kennel Club show, possibly from them we can obtain some information that would be useful. HARRY W. SMITH.

WORCESTER, Mass, April 22.

PSOVOI NOT BORZOI.

THROUGH the kindness of Messrs. Wade and Huntington we are enabled to publish further proof that Psovoi is the recognized name of the dogs we know as Russian wolfhounds:

National Greyhound Club:

GENTLEMEN—In reference to the name of Borzoi and Psovoi, allow me to say a few words which I can sustain by the authority of the journal called "Imperial Society for the Breeding of Hunting and Trade Animals and of the Regular Hunt," of January and February, 1891.

The word Borzoi is used for any kind of hunting dog—*i. e.*, as a general and not individual name, as page 131 of February number will show, where under that heading are included the English greyhounds, also the "Psovoi." The name of Borzoi in this same journal is many and many times used, but only as a general name for all breeds. The name of "Psovoi," on the contrary, is only used for one certain breed, as the two pictures in January, 1891, will show. Both of them are called "Psovoi," and not "Borzoi," as claimed by certain parties, which means that the name "Psovoi" is not a name given to dogs in general, but to the certain, distinct breed known here as Russian wolfhounds. Also the deliberations of the "Society of the Hunters with Psovoi" show that the name is used to designate a breed which they tried to improve, and which they matched against the English greyhound on coursing grounds especially built for that purpose. They never once speak about the "Borzoi," but always about the "Psovoi," and only use the name of Barzoi as a general name for the Russian's different breeds of hunting dogs, as also for the English.

There were individual purses and prizes—*i. e.*, medals—not for "Borzoi" but for "Psovoi." as the picture of second dog on page 131 of February, 1891, will show, where "Ataman, property of Mr. N. Boldarieff," took the large silver medal. Now, this same dog appears between pages 32 and 33 in the January edition, where, under his picture, are the following words: "Ataman, Psovoi, male dog." Also, there appears on the frontispiece, "Metschka, the Psovoi bitch." The word Borzoi means dog; the word Borzayasabaka means greyhound; Borziatnik means keeper of hunting dogs. Inasmuch as at the meeting of the Imperial Society this breed of dog was called by Mr. Boldarieff, president, Mr. Koroch, secretary, Chleboff, Sorochtin and others not Borzoi but invariably Psovoi, there can be no further question as to the proper name of this breed. Further, the Imperial Society proposed to give prizes to the following breeds: 1. Psovoi. 2. Greyhounds. 3. Sporting dogs. There is also an account on page 150 of the *Imperial Gazette* of matches between English greyhounds and Psovoi.

GEORG VON DER OSTEN SACKEN.

KURLAND, Russia.

BLACK AND TANS AT PITTSBURGH.

Editor Forest and Stream:

Dr. Foote says that Broomfield Madge was shown in better condition than ever before in this country.

Does he mean by that that she was narrower in front? Admitting that she was in poor condition at New York, she is wide in front and has been ever since she came to America. FOREST AND STREAM report of Toronto show, 1890, at which she made her first appearance in America, described her as being heavy and loaded in shoulders and wide in front.

In Mr. Raper's report of New York show, he mentioned several dogs that might have been placed better but for condition. He did not say this of Madge, but said Louie won with "consummate ease," and that Madge had gone wide in front. As he mentions this defect alone, the inference is that this is what beat her. Black and tans of her age do not often grow narrower in front, though we have heard of a fox-terrier that "fined down in skull."

A. W. SMITH.

RETRIEVING AT FIELD TRIALS.

Editor Forest and Stream:

I have read with much interest the recent articles on retrieving, and although I am only an amateur breaker I will give you my ideas gained in the field and at field trials.

My dog breaking began very early with an orange and white setter of the Col. Prince strain, so well known in western Ontario a number of years ago. My father had given him to me with the injunction that I was to leave his dog at home. I fancy I was only partly broken myself then and did the dogs no good. I first started by breaking Snipe to sleigh, and could run away with any of my boy friends except one who had an Irish setter; as the Irishman could thrash any of the others, his owner when he got behind would generally end the race in a fight. Snipe I got to point staunchly, but I could never get the idea out of his head that he should not try and catch the birds once they got up. I next owned a pointer or two and some native setters of uncertain pedigree, and then I saw Dart and her son Paris at the Detroit show in 1875, and engaged a puppy out of Dart's next litter by Leicester. In due course my puppy got home, but he died a few months afterward of distemper. I bought another of the same litter, but it shared the same fate as the first. I was rather discouraged at my bad luck but determined to try it again, so I bought Star, one of the same litter, and my perseverance was rewarded, as she threw to Druid some dogs that have not been surpassed if equalled since, viz.: Dido I., Dido II., Mingo, Kink, Ben, Romp, Mark J., Ginger and others. As retrieving was all the go in America then (no old-fogy English customs for us, etc.), Star was taught to retrieve naturally, as were all my dogs except one; she was forced and was a nice retriever when made to fetch, but she would pass a bird pretending not to know it was there, and could never be got to hunt for dead. I always thought she had the spike collar in her mind, and being a very sensible bitch I suppose she reasoned that if she failed to find the bird there was no danger of the spike.

Some of the puppies I have had I broke to retrieve and some I did not, and I found that those that did not retrieve were good staunch dogs, one and sometimes two seasons before the retrievers were thoroughly staunch. The retrievers, as a rule, always seemed to me to want to get closer to their birds. Of course there were exceptions, some dogs retrieving did not seem to hurt, but others seemed to care for nothing else.

The last puppies I broke were four that I ran in last year's International Derby, and although they were by no means perfect when they ran, by the end of the season they were as staunch and as good bird finders as any of my old dogs. I did not let them touch a dead bird. They would not even move at a winged bird running from under their nose, but would follow it up and point again when it stopped. They would all seek dead well, and I did not lose more than eight or ten birds during the season, and those usually got into log heaps where a retriever would have done no better. Taken all in all, I never had such satisfaction with young dogs before.

We are very apt to imagine English sportsmen old fogies, behind the age, etc., but I think if the truth was known they have found out by experience what we are finding out now, or at least what a great many of us who have given much time and thought to dog training think we have found out, viz., that retrieving hurts a dog's other and more essential qualities. I was reading an article lately in *Land and Water* in which the writer gave a description of the working of the setting spaniel taken from a book nearly two hundred years old. If the description was clothed in modern English it would fit the work of our high-class dogs of to-day. As this was before the day of shotguns, when the dogs were used for netting only, it is not hard to imagine that retrieving may have been tried and found wanting at some time between now and two hundred years ago. And moreover, whoever saw a good retrieving pointer or setter? I am sure I never did, and I have had and seen a lot. Such dogs as we had here some years ago, Irish water spaniels (but not rat tail), now, alas, extinct, would do tricks at marking and retrieving that I am sure a setter would never dream of doing. Going 20 or 30yds. and picking a bird that you could just as easily have picked up yourself may please some, but it is not retrieving. Thos. Johnson, of Winnipeg, had an English retriever, Old Don, that would mark a duck if hit, and no matter how far it went before falling, he would have it back in no time, and he knew just as well as the shooter when the bird was hit. The way he would track a winged prairie chicken across a big stubble field was something to talk about. I doubt whether a setter or pointer could be found with nose enough to do it, and I certainly would not want one of my dogs to keep his nose to the ground so long.

The last two days of the quail shooting I took a water spaniel that has been kicking around our club house at Big Point with no one to put him through his paces except myself; he has not had sufficient work to be good, but he did no harm, and by the end of the two days was doing the fetching, while the setters were dropped, and I rarely had to move out of my tracks to direct him. The most ardent advocates of retrieving seem to be the amateur sportsmen, and to my mind they are the least fitted to work a retriever. I don't think it will be denied that setters and pointers that retrieve must be more thoroughly under control than those that do not. The great majority of amateurs that I have seen in the field are apt to get a bit rank themselves. Let the bird fall, the chances are that they will break shot and let the dog do the same. A dog that is fond of retrieving—and he must be to be any good at it—will very soon be fit for the breaker's hands again if he is allowed such liberty.

My advice to amateur sportsmen is not to have their dogs retrieve. If he is good at seeking dead—and he should be—no birds will be lost. I am glad to see such practical men as Waters and Avent in opposition to retrieving, as from my limited experience I quite agree with them. A number of years ago I had a very pleasant ten-days' quail shooting in Louisiana with the former. He had then a dozen or so dogs in training and they were all forced retrievers. I feel sure if he was not convinced retrieving was injurious he would not be opposed to it now. Those who want their setters and pointers to retrieve can have them, but no more of it for

W. B. WELLS.

CHATHAM, Canada, April 12.

Editor Forest and Stream:

I am in receipt of your note asking for my views *re* prospective changes in field trial rules. It would be folly and a waste of thought to do this in view of the fact that the same judges are appointed every year who have the same idea of field work, and all the rules in the world could not naturally change them. The rules are all right, but it is the application of them that causes the difficulty. If the clubs would appoint judges who they know are in sympathy with their views and rules, the judging would work out correctly. The only changes, however, that to my mind need be made are two First, insist on dogs working to the gun. The fanatical nonsense of a dog having more "bird sense" than a human being who has studied the habits of quail for a life time is simply ridiculous; and even admitting they had, I want the dog for my slave, not having any desire to be a slave of the dog. When I want to shoot in a given direction, that is the direction my dog must work, even if birds are more plentiful in some other locality where his dogship wants to go. The second is: Stop handlers from constantly tooting their whistle. I would not own a courageless brute who required whistling at, to make him "stay out at his work." This handler's chestnut, however, is exploded, and the true inwardness of the habit exposed when it is remembered that a certain handler had whistles of all known tones, and used the one that had a sound similar to his opponent, so he could attract an obedient dog from his work, his own dogs being taught to take no notice of a whistle.

THOS. JOHNSON.

WINNIPEG, Manitoba.

Editor Forest and Stream:

There has been considerable discussion of late upon the requirement of retrieving at field trials, and it is regarded as preferable that a uniform understanding be had upon the subject. Dogs will soon be placed in preparation for the trials and the owners should understand precisely what is expected of them.

The Eastern Field Trial Club, the writer is informed, in their races for 1892, state that retrieving shall not be considered in any stake. Would it not be well for the different field trial organizations to be put in communication upon this subject that a uniform rule may be adopted?

The field trial committee of the Philadelphia Kennel Club will be obliged to the secretaries of the field trial clubs for copies of their rules for 1892 mailed to

F. G. TAYLOR, Secretary.

PHILADELPHIA, Pa.

POINTS AND FLUSHES.

CHICAGO, April 23.—In the report of the meeting of the New England Field Trial Club, published in FOREST AND STREAM of April 7, it is mentioned that the question of wide ranging formed a chief topic of discussion, and that the sentiment of most of the members was that the wide ranging dog of the South was not what was required in the New England country, but that the dog should be trained to work more to the gun. I presume that this was expressing in a general way that the hunting grounds of New England are not of such a character as to make wide ranging successful or desirable. I can not imagine how the question admitted of such discussion. Wide ranging is only useful in a country which is open, or, at least, sufficiently open for the shooter to keep the dog in view enough to know his course, as in the great quail grounds of the South. Even in such grounds the dog must range intelligently and limit his fling according to the character of the grounds. In chicken shooting on the level prairie where there is no cover, still wider ranging is admissable and useful, since the more ground a dog covers, providing he worked intelligently, the more birds he will find, and there is nothing to obstruct the view on the prairie, the shooter can see his dog at all times and observe every act. But what an absurdity would this wide ranging, useful in chicken shooting, be if applied in heavy timber, thickets and rough ground when hunting for ruffed grouse. The dog would be constantly lost, and, while he might find more birds, the finds would be of no profit to the shooter.

In hunting quail in the South, the shooter can ride on horseback and thereby gain several advantages. From the greater height he can see his dog further and better, can mark the flight of birds better, and is saved much exertion and consequent fatigue. If the shooter attempted to hunt ruffed grouse from horseback, it would seem ridiculous; yet it would be no more so than to attempt to work a dog on ruffed grouse or quail in a rough timber country after the same manner practiced in an open country. Ranging is not a fixed arbitrary quantity in field work. It should be conducted to suit the circumstances of birds and locality. A dog can range just as wide in New England as elsewhere in such sections as are open enough to permit it.

An idea seems to prevail that a close-ranging dog is necessarily working better to the gun than a wide-ranging one. The inference is not necessarily correct. A wide ranger may work to the gun to perfection, exercising every effort to the advantage of the shooter. The close ranger may be working for his own gratification and heedless of the interests of the gun. I think the New England Field Trials Club will make a mistake if it insists on close ranging under all circumstances. No matter what section a field trial is held in, the ranging should be applied according to the character of the ground, and if so defined, it covers all requirements.

I read the reply of "S.," in FOREST AND STREAM of last week, and I perceive with regret that we are quite as far apart in our ideas on retrieving at field trials as at first. I have a profound respect for "S.'s" judgment and opinions, but in this instance I think he is in error. I will say that my ideas on the subject were, some years ago, identical with his; but they were changed by observation at field trials. On some points I perceive he misunderstands my meaning entirely. When I said: "Moreover, if the value of retrieving, which is largely educational, is admitted in the scale of points, other educational qualities, such as turning to whistle, remaining at heel, dropping to order, steadiness to shot, etc., should also have a value, since they are all essential in an ordinary day's shooting." Now, I did not mean, nor do I think the statement will bear the construction, that those acquirements should be abolished. They are educational qualities and only bring the dog's natural qualities into an orderly system, and they can then be exhibited in the conventional manner. The benefit of all the education gets its full value in competition in the superior or inferior manner in which the dog performs his work, in addition to his natural capabilities.

No one is more willing to concede the value of a retriever afield than I. There is neither pleasure nor profit in shooting without one. While agreeing fully with "S." on this point, I object to it in a field trial because it is not a competitive quality with finding dogs, because a thorough test at field trials as now conducted is impossible, and, lastly, because it injures the best performance of a finding dog, a point which I mentioned in FOREST AND STREAM of April 7. I will call this matter to "S.'s" earnest consideration, for I think that he will concede that it has some importance. Briefly considered, the points against it are as follows: The best manner for a finding dog in searching for birds is to carry a high nose and draw and locate by the body scent. All dogs can not carry a high nose, but the nearer they can do so, with good performance, the better, as this manner permits of quicker, sharper and more accurate work if the dog can perform well. In most instances it requires care to keep a dog up to this manner, most dogs being prone to get their noses to the ground if at all puzzled on the scent. This low-nose manner may become habitual if not checked. In searching for wounded or dead birds, using a low nose is the best manner; the poorest manner in searching for live birds is the best when searching for wounded or dead. If a high-class dog is used as a retriever and has many birds killed to him, he is almost certain to learn how to follow wounded birds by footscent and rake his ground in searching for dead birds. Let a dog once acquire the habit of hunting by footscent and it is almost impossible to correct it. If "S." will consider that a field trial is not an exhibition of an ordinary day's shooting, that it is not intended to illustrate an ordinary day's shooting, that an argument based on an ordinary day's shooting may have little or no application to a field trial, and that the purposes of a field trial are wholly distinct from those of an ordinary day's shooting, some of the ideas advanced by some of the field trial cranks will not seem so unreasonable.

I will ask "S." to look in the FOREST AND STREAM of Feb. 11, and he will find that the long quotation which he ascribes to me was an extract from a letter written by the well-known field trial handler Mr. A. J. Gleason, of Alma, Kan., and so stated; but this fact was undoubtedly overlooked by "S." I do not mean to imply that the letter contains no good point, on the contrary, it does—but I wish Mr. Gleason to have credit in full for all the merit therein. And, incidentally, my remarks will be relieved of the apparent inconsistency. I note what "S." says about field trials being for to teach the lover of the dog which is the best breed or strain to do the work required. On this we are agreed. "S." modestly underestimates his own ability in writing on the subject. I think he presents his case skilfully and well. It is only by exhaustive discussion that the best lines of procedure can be established and progress made. I believe that every one should have a free and full hearing. In no other way can the demands of sportsmen be known.

I perceive that Mr. N. Wallace, the eminent field trial judge, in the last issue of FOREST AND STREAM, is opposed to retrieving at field trials, and advances very powerful arguments to sustain his views. It should be noted that he admits the value and necessity of retrieving in actual shooting, but he does not consider it part of a field trial competition. It would be gratifying to know the views of other field trial judges on this and related subjects. I believe that Messrs. F. R. Hitchcock, H. B. Duryea, A. Merriman, Washington A. Coster, Major J. M. Taylor and other gentlemen of large practical field trial experience, do not consider retrieving a competitive quality.

* * *

While in Denver last week Mr. W. L. Washington, who had charge of Mr. Hacke's Psovois, informed me that Mr. Hacke contemplated establishing a kennel of his dogs in Colorado, thus affording them every facility for proper training on that most formidable gladiator, the gray wolf. This wolf is said to attain a weight of from 90 to 120lbs., and as this weight represents bone and sinew entirely, a fat wolf being a rarity, some idea of the terrific punishing power of this ugly brute can be formed. Dogs bred and raised in Colorado would have the further advantage of being acclimated and physically fit for the work required of them. I was gratified to find in Denver so many readers of FOREST AND STREAM, and so many who had words of praise for its enterprise, high literary standard and impartiality and justice in all matters. Enterprise and merit are appreciated by the American sportsmen.

* * *

In a letter received here from Mr. J. G. Schaaf, it is mentioned that the Missouri Kennel Club has been organized, with a list of officers as follows: President, Mr. R. Schmidt; Secretary, J. G. Shaaf; Treasurer, W. E. Fields. Application will be made for membership in the A. K. C. The club expects to hold a great show next year.

* * *

Melac, the famous great Dane, has been found, and the misfortune which threatened to leave Imperator without a rival has been averted. His recovery is thus described in a Chicago paper: "Melac, the noted great Dane dog which disappeared from H. L. Goodman's kennels at Auburn Park last Friday, has been found. Sunday afternoon Pinkerton detectives learned that John Logan, a teamster, had offered to produce the dog for $1,000. He was arrested, and in a saloon at 2942 Wentworth avenue, which Logan frequented, it was found that the dog was in possession of John O'Connor, a laborer living on Thirty-seventh court, between Halsted and Laurel streets. Melac was surrendered by O'Connor on payment of $5 for the dog's care. O'Connor said that his little boy had found the animal in the street and brought him home. He said he would have turned the dog loose but for the fact that Logan and his companions were anxious to get him. It is now believed that the dog was lonely and jumped the kennel fence and wandered away.

* * *

Referring to the remarks of Mr. Wm. M. Williams, in the last issue of FOREST AND STREAM, on the effects of retrieving on a dog's scenting powers, he strengthens his argument by illustration, instancing the effects of an interview of a skunk by a dog, and adds: "You wouldn't expect a dog to smell a bird that day—no; he couldn't smell another skunk." I will describe a little incident which occurred at Fairmont, Minn., in 1882, while running the chicken trials. Pink B. came in close quarters with a skunk, with the common unpleasant effects of being loaded with a fragrancy which was boundless. Of course, his chances were considered as being destroyed by the unfortunate happening, but FOREST AND STREAM, of Sept. 21, 1882, in reporting the heat, said: "Pink B. came out of the scrimmage with a most decided change of odor, at least it seemed so to us, but Pink soon convinced us that his smell was all right by handsomely pointing at a long distance a single bird that had remained on the stubble. Scott refused to back and forged ahead and flushed the bird."

B. WATERS.

LOS ANGELES DOG SHOW.

THIS show opened under very favorable auspices April 20. The accommodations are much better than last year, the dogs being well benched in Hazard's Pavilion, instead of being under canvas as in 1891, Mr. Mortimer commenced his work at 2:30 P. M., and judged till 5 P. M., leaving the remainder till the next day. There was double the attendance of last year's first day, and everything points to a success. The awards made the first day were:

MASTIFFS.—*Dogs:* 1st, S. Tyler's Draco; 2d, Mrs. D. Lummis's Amado; 3d, M. E. Bragdon's Bishop. Very high com., E. Templar Allen's Maro. High com., C. D. Willard's Wodan. Com., A. B. Anderson's Richland Commodore. *Bitches.* 1st, M. E. Bragdon's Phyllis; 2d, Mrs J. M. Mitchell's Lomita Hilda.

ST. BERNARDS.—*Dogs:* 1st, J. B. Martin's Republican; 2d, John Hefferman's Grand Chancellor. *Bitches:* 1st and 2d, withheld; 3d, Mrs. N. I. Goucher's Gypsey.

NEWFOUNDLANDS.—*Dogs:* 1st, J. B. Banning's Scott. *Puppies:* 1st, Mott Bunker's Rover.

GREAT DANES.—1st, A. C. Freeman's Inglewood Rhona.

DEERHOUNDS—*Dogs:* 1st, Mrs. H. W. Vail's Trojan; 2d, Chris Krempel's Cervas; 3d, A. C. Freeman's McLoughlin. *Bitches:* 1st, Chris Kempel's Flora; 2d, Osgood and Edmond's Lady of the Lake.

GREYHOUNDS.—*Dogs:* 1st, G. W. Gordon's Leo; 2d, S. Tyler's Lap; 3d, Ned Carr's Handy. Very high com., J. Schieck's Nemo. High com., George Robson's Romeo. Com., J. R. Maclintock's Topsy Fleet and Kenneth and E. Preuss's Jack. *Bitches:* 1st, S. Tyler's Pronto; 2d, J. B. Proctor's Silk; 3d, G. W. Jordan's Deno. Very high com., S. Tyler's Fly. High com., G. W. Gordon's Primrose. High com., E. Watson's Annie. Com., K. E. Preuss's ——.

FOXHOUNDS.—*Dogs:* 1st, Capt. A. B. Anderson's Yoicks; 2d, Thad Lowe's Dixie; 3d, D. H. Burk's Warrior. *Bitches:* 1st and 2d, Thad Lowe's Music and Patty.

POINTERS.—CHALLENGE—*Dogs:* 1st, E. K. Benchley's Kan Koo.—OPEN—*Dogs* (over 55lbs.): 1st, H. M. Tonner's Ah Sing; 2d, A. P. Kerchoff's Jap; 3d, M. M. Conn's Hindoo. *Bitches* (over 50lbs.): 1st, H. M. Tonner's Amarillis. *Dogs* (under 55lbs.): 1st, E. W. Ingall's Ko Ko; 2d, J. H. Keiffer's Instone Bang; 3d, F. J. Garrison's Ray F. Very high com., F. J. Garrison's Don F. *Bitches* (under 50lbs.): 1st, H. Y. Evans, Jr.'s Tippets; 2d, E. K. Benchley's Kioto; 3d, B. D. Standeford's Bessie Jane. High com., F. J. Garrison's Fraulein. Com., W. F. McCann's Herma, H. C. Katz's Nellie. PUPPIES—*Dogs:* 1st, J. W. England's Spot; 2d, E. B. Tuft's Lemon. Very high com., J. H. Keiffer's Quail and Baldy. High com., A. E. Messerley's Point M.. B. D. Standeford's Commodore. *Bitches:* 1st, withheld; 2d, H. E. Green's Dessy.

The rest of the awards and a full report will appear next week.

In "Rambler's" notes in *British Fancier*, Streatham Monarch is credited with the paternity of a young bull-terrier "that looks like making something far above common if he only goes on right." He was seen in Mr. Iddon's kennels. Pursa, sister of Charming Tom, is the dam.

DOG CHAT.

THERE has always been considerable elevating of eyebrows and ill-concealed incredulity when anyone mentioned that the St. Bernard Princess Florence had been in whelp. However the report got abroad, the fact remains that she *has* had pups, and to make assurance doubly sure, she is heavy in whelp now to Refuge II. The result should be a grand litter and will be welcome news to Mr. Reick when he lands in New York next Sunday, having left Liverpool on the Umbria last Saturday. Col. Ruppert stays a couple of weeks longer on the other side. His Altonette was bred last Sunday to Mr. Reick's Marquis of Ripon.

The Pennbrook Hunt Club are building a very handsome kennel for their harriers, close to Mr. Jarrett's Chestnut Hill Kennel which will be finished in about a week, when the hounds will move in and Mr. Jarrett will have entire charge of breeding and of the pack. The two fox-terriers which Mr. C. Steadman Hanks was sending over to his cousin, Lieut. H. T. Allen, St. Petersburg, Russia, left the Chestnut Hill Kennels last Saturday, on their long journey per s. s. Connemaugh.

In a recent issue of the *British Fancier*, Mr. Bowden gives some rather startling information as to the methods of training sheep dogs in the Welsh mountains. We are told that a sheep dog is no good there unless he can stand almost unheard of punishment in the shape of broken ribs, ears chewed off and otherwise left half dead on a mountain side to afterward crawl home and lick his master's hand. One can scarcley believe all this. We spent a couple of years in the mountains bordering on Wales and were brought in contact with shepherds and their dogs, besides owning one of the cleverest bobtails we ever knew of, but we saw no such acts of cruelty, nothing beyond a stray "cuss" word or the flinging of a stick or a cap at a dilatory "tyke."

The special of five guineas that Mr. Wade offered last year for the sheep dog showing the most natural intelligence at sheep dog trials seems to have created a peck of trouble so far. One lawsuit has arisen out of it besides considerable ink slinging. It seems to us that the special could be easily competed for and the matter settled. At some future trial leave out the handler and let the dog bring in his sheep unaided by gesture from his owner after sending him off Though we have heard of nothing further about the sheep-dog trials that are to be held in this country by the Collie Club, we suppose they will take place as intended. Would it not therefore be well to let the collie breeders and others know what has been arranged and what is expected of the dogs so that training can be attended to in good time and the trials be successfully carried out and not be a farce as they have usually been in this country. If wide skulls count for brain power we have lots of them, judging from our bench shows, and that look very intelligent though they are found wanting in standard requirements when the ribbons are given out.

In his report to his own English paper (*British Fancier*) of the Pittsburgh show, Mr. George Raper says about English setters: "Who can wonder at the setter men being all at sixes and sevens? Under one judge, one type was first, another different type second, and so on. The true English type as recognized in this country, is ignored, prizes going to dogs who in England could not win in a £5 selling class. Under Mr. Davidson, the fanciers of Laveracks get a fair chance, and at this show nothing but the approved pattern had a look in."

Those who remember the efforts Mr. Roger Williams put forth to give exhibitors and every one an enjoyable time last fall at the first show of the Blue Grass Kennel Club, will be pleased to hear that the second annual event is to come off Aug. 31 to Sept. 3, at Lexington, Ky. At Chicago Mr. Williams told us that the arrangements for the next show will be a great improvement on its predecessor.

Among the new kennel advertisements this week we notice that J. Winchell offers bloodhounds and mastiff pups; Fred Page, pointer pups; R. H. Kimball, broken English setter dog; Radman, Irish setter pups: Beverwyck Kennels, "thoroughbred" fox-terriers; W. F. Rutter, Jr., two litters of beagles; Frank F. Dole, twenty high class bull-terriers, also a greyhound dog and a Scotch terrier; Chas. D. Roberts, two young pointers; M. W. Reid, black corded poodle puppies. At stud: Frank F. Dole's noted bull-terriers; Henry Brook's noted Scotch terrier Kilroy. W. H. Allsobrook wants a foxhound.

We see no reason to modify our remarks on Mr. McDougall's action in shooting his dog after one of the curtain-raiser farces in the recent wolf-baiting drama. We might have made our reasons, perhaps, a little plainer, that is all. If this owner had, on the impulse of the moment, when filled with chagrin at the conduct of his dog, shot the animal, we could have excused the action in a measure, but to shoot the dog some time after, in cold blood, as it were, is what we deprecated. In whatever light we may view the matter it does not redound to his credit, and the fact that Mr. McDougall is reported to be anything but a cruel man does not in any way mitigate his action, but rather the reverse, as he is quoted as declaring if Alan Breck did no better he would shoot him too.

Discussions as to the proper mode of handling dogs at field trials seem to be general both in England and America at the present time. In *Land and Water* this week we notice that the subject is being argued from the "free-running and well-in-hand" points of view. They think with us that the present time, before the handlers get down to work, is the best for the judges at field trials to give their views as to how the dogs should be handled and what they expect, so that trainers can be prepared with the right kind of dogs. It is too late when the trials are on for the judges to then give their opinions by their decisions. Let there be a consensus of opinion as to what is required, and do not let us remain as hopelessly mixed up as to the proper education of a field trial dog as the English setter standard, for instance, seems to be at bench shows this year.

In our report of the Pittsburgh show awards B. F. Seitner's pointer Trap should have been second, R. Morley's Dick M. third and W. D. Henry's Don McBeth vhc. in dog puppy class instead of as printed.

Mr. C. A. Stone writes us from Toronto: "At a meeting of the Industrial Exhibition Bench Show Committee C. W. Postlewaite was elected chairman and C. A. Stone secretary and superintendent. The premium list will be adopted and the judges selected at the meeting on Monday, the 25th."

Mr. Ritter, of Ravenswood, L. I., sends a photograph of a promising St. Bernard puppy, Ruth Cleveland, by White Chief out of Juno. At eight months old she weighed 155lbs., and stands 30¾in. at shoulders. She shows great bone and a capital head. Her litter sister, Mount Zion Leila, took first in puppy bitches at New York last February.

There are authorities and authorities, and in any discussion as to the correct formation of a greyhound's chest, we prefer to follow "Stonehenge." On page 31 in "Stonehenge on the Dog" we find the following: "A great depth of chest is apt to prevent the dog stooping on rough ground, as he strikes it against high ridges or large stones; but a moderately deep chest is a valuable point, giving plenty of 'bellows room,' as it is popularly called. *This, however, is provided for better by breadth than depth, and the former should be insisted on more than the latter*, provided there is not that round tub-like form of the ribs which interferes with the action of the shoulder-blades, and often accompanies low breeding," The italics are ours.

That Mr. John E. Thayer in losing by death last week his fox-terrier Pitcher, sustains a great loss goes without saying, and not only is Pitcher's death a loss to the Hillside Kennels, but also to the fox-terrier interests of this country. Pitcher was whelped May 30, 1884, and was by Brockenhurst Jim out of Daffodilly. His breeder was Mr. J. J. Pim. In England he had numerous prizes to his credit, including firsts at Warwick in open and puppy classes. When Mr. John A. Logan went to Europe last spring he purchased Pitcher from Mr. T. W. Twyford of Biddulph, Congleton, brother of our Harry Twyford, and such was Pitcher's reputation as a successful sire, though Mr. Logan gave $500 for him, before the dog had been in this country many hours, enough services were engaged by our principal breeders to reimburse his owner for the purchase price. Pitcher's great son Dominie was the first, we believe, to lower the colors of the invincible Result. Dominie in turn is the sire of Mr. Thayer's two crack bitches Dona and Dominica, both of which he purchased from Mr. Logan. Mr. Thayer is a genuine fancier, and his friends will sympathize with him in his loss, and join with us in hoping that Pitcher has left behind another Dominie.

An executive meeting of the National Beagle Club will be held at 266 Washington street, Boston, Mass., April 29, at 7:30 P. M.

Mr. Ed Booth has bought the whole of the Ridgefield St. Bernard Kennels' stock, comprising Kinglimmon, by champion Plinlimmon out of champion Lady Wellington, winner of first novice class New York 1889, besides other prizes. We spoke of his good bone, body and movement at Albany. Lady Challymead, by Marquis of Stafford out of Lady Lowden; Ridgefield Belle, by Kinglimmon out of Mönz (imported); and Dolly S., by champion Beauchamp out of Queen of Scotland, winner of a first at Troy. This is a little "spec" on his own account and we hope Mr. Booth will have luck with them.

We take great pleasure in drawing the attention of our readers to the announcement in our business columns of the Philadelphia Kennel Club's first field trial Derby that is open to the world. The prizes are handsome—first, $400; second, $200; third, $100. There are two forfeits, the first of $10 accompanies the nomination, the second of same amount is due Sept. 15; and then there is the $10 additional to start. Entries close positively May 15, and there should be little danger but that, with easy forfeit terms, an entry that will bear more than favorable comparison with the older clubs will be the result. The All-Age Stakes will be announced later on.

At the Normandy field trials, held at Dieppe, France, several well known English dogs were well placed. Mr. R. J. Lloyd Price's pointer bitch won first, Dr. Wood's English setter Fred second, and Mr. Muland's Earl of Mona third. Mr. Elias Bishop, the well known field trial man, was one of the judges.

At the Barbican, London, a sale of greyhounds took place April 2. Some notable dogs were brought to the hammer. Mr. Thompson's Texture and Threat were bought in for $1,995 and $750 respectively. Texture won three courses in the Waterloo Cup this year, being finally beaten by Fitz Fife, the runner up to Fullerton. A litter sister to Fullerton, To Doit, went a bargain at $410.

It seems the noted—not noble—bulldogs, Pathfinder and Saleni, were originally sold to some Indian Rajah by Mr. Ellis. Mr. Dole was after these dogs when in England last summer and was told they were sold, and Mr. Ellis, thinking that Mr. Dole may feel a little sore over the matter, as they eventually came to the Wheatley Kennels, wishes, through *Stock-Keeper*, to explain that he really did sell them to go to India. But how Messrs. Hobbie & Co. managed to get hold of them is a tale that is left untold.

The relative speed of greyhounds, deerhounds and "borzois" has been much commented on of late, and the accounts of a series of trials that Mr. John Wrigley, Jr., of Formby, has brought off, will be found interesting. Mr. Wrigley writes the English *Stock-Keeper*, under date of April 4: "We have had Mr. Freeman Lloyd's borzoi Whirlwind up here, and as he was desirous of giving him a trial, we had three spins, one with Whirlwind and a greyhound, another with the greyhound and a deerhound of mine, and another with Whirlwind and the deerhound. In the first course they went up neck and neck to the hare, but the borzoi overshot her a good 30yds., and never had another look in, and the greyhound won. In the second, greyhound-deerhound course, the deerhound led up to the first turn, and then she also was not one-third as smart as the little Greentick bitch, and was thoroughly beaten. In the final with Whirlwind and my young deerhound, Deina, a smart puppy, Whirlwind led a good ten lengths to the hare, who turned, and then the deerhound killed as neatly as ever you saw, tossing the hare about six yards up in the air." It will thus be seen that Mr. Lloyd's borzoi is as speedy as this Greentick greyhound bitch, and ten lengths better than a smart deerhound, and that he fails in cleverness to the greyhound, which is just what we expected. However, practice and training will soon improve this.

As bearing on the present dispute as to correct type of the psovoi, the following is interesting for Argoss's side of the case:

Geo. Raper in *British Fancier*, April 8, says: "The Barzoi Argoss was exhibited here (Pittsburgh) and generally admired. He no doubt is a big and noble dog, and but for his neck, which is a trifle short, and his shoulders a bit upright he is well nigh perfect, his development behind the saddle being wonderful."

The Dog Owners' Annual, 1892, page 116, says: "Our foremost Barzois at present are Krilutt, Karatoi, Osslad and Argoss, and it is difficult to foretell how high Argoss may be placed when he meets his old competitors, since acknowledged authorities have declared his (Argoss's) color is not disqualifying. Mr. A. H. Blees received 1st, 2d and 3d prizes with Osslad, Argoss and Keedai, beating Molodyets, Whirlwind and Zeus, presented to Col. North by Grand Duke Nicholas."

POINTER TEMPEST.—Boston, Mass.—*Editor Forest and Stream:* My attention being called to your statement in your report of the recent Pittsburgh show, "that Tempest's ears were in bad condition," etc., I wish to say that such was not the case. Tempest was in my charge at Pittsburgh, and was in very fair condition, his ears being free from canker or sores of any kind.—GEORGE S. THOMAS.

Playing Cards.

You can obtain a pack of best quality playing cards by sending fifteen cents in postage to P. S. EUSTIS, General Passenger Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The writer will have to improve his "spider tracks" or else FOREST AND STREAM must employ a compositor who can decipher Volapuk. I wrote, or intended to write, Mr. H. W Fores, Toronto, you have it "Tools." Again, "T. G. Davey," you transform into "I. S. Darly," and "Supt. W. D. Breed" should be Sergt. W. D. Bruce.

The Canadian Pointer Kennels, of Forest, Ont., are dispersing their kennels. Among the inmates are the noted Molton Banner (E. K. C. S. B. 28,776), by Champ. Saddleback out of Molton Broom; Van Bang (Ch. Bang Bang—Ch. Vanity); Phantom (Planet—Lily Bang), a well-known winner, and others.

The Rideau Kennels, Ottawa, have just received from England their long expected stud fox-terrier. His name and breeding have not yet been made known to me, but I understand he is a frequent winner. He is full of terrier character and smart as a cricket. Head evenly marked black and tan, body white. I understand he is to be placed at stud at once.

The same kennels are having bad luck with their spaniels, having lost ten dog pups and one bitch since Jan. 1. Bitches go off milk a day or two after whelping, caused by being given too much feed and too little exercise before whelping. However, with six bitches now due in season, there should soon be no lack of young stock.

Mr. Keyes tells that after July 1, Obo, Jr., will be withdrawn from the stud, and remarks "they will miss him when he's gone." He is nine years old but as lively as a three-year-old. His last two litters totaled ten dogs and one bitch.

The Toronto Kennel Club are making every effort to have their one-day club show (to be held May 6, not 7, as first announced) a big success. The whole city is being placarded with handsome window hangers, one of which I mail "ye editor." At a special meeting of the club held on the 19th, it was decided that an entrance fee of 25 cents be charged members and 50 cents to non-members. Entries will close May 3, when a brief catalogue will be prepared. Classes will be provided for open dogs, open bitches and in some breeds for puppies. No challenge classes. Messrs. H. B. Donovan and C. A. Stone were appointed a committee to see after all printing.

Mr. Kirk will judge greyhounds, collies, poodles, spaniels all kinds, pugs and Italian greyhounds. Mr. Davey, foxhounds, harriers, pointers, all setters, all terriers, dachshunds and beagles. Mr S. F. Glass has been invited to judge St. Bernards, mastiffs, Newfoundlands, Great Danes and deerhounds. One excellent rule is that no donor of a prize will be permitted to compete for a prize offered by himself. H. B. DONOVAN.

GORDONS ON THE PACIFIC COAST.

Editor Forest and Stream:

In your last number I saw a face that seemed wonderfully familiar. The gentleman referred to rejoices in the very plebian cognomen of "Mike" (I don't like the name for a member of an aristocratic family of blue blood), and he seems to be the property of Judge Greene, of Portland, Ore. I think I was the first to own and breed Gordon setters on the Pacific Coast way back in the 50's. Horace Smith ordered a pair for me from the Duke of Gordon's kennel, and I continued to raise Gordons, with an occasional fresh importation, for many years, giving them away, mostly my Army friends, and I remember sending several to Fort Vancouver. My strain of setters became so popular at the Army posts that they were widely distributed. I never sold a dog in my life: always gave them away, but I finally gave up, the run of custom becoming rather too much of a good thing.

The portrait of "Mike" has such a familiar look that I would like, as a matter of curiosity, to ask Judge Greene if he has the pedigree of Mike, thinking it quite possible that he may be a descendant of my stock, as I sent several to Oregon; and it would be curious if Mike should prove to be one of them and be recognized by the family likeness, as we all know that dogs, like human beings, have the family characteristics of their predecessors. If Mike should so prove, Judge Greene will have the satisfaction of knowing that he has in his dog a descendant of the best breed and bluest blood of the original Gordon kennel.

I have owned a good many dogs in my time and have had a good many biped associates, but I never found one to exceed in gentlemanly characteristics and pleasant companionship that noblest of all dogs, the Gordon setter.

R. L. OGDEN ("Podgers").

KENNEL NOTES.

SALES.

☞ **Prepared Blanks sent free on application.**

Soudan—Gwynnie whelps. English setter bitches, whelped Jan. 29, 1892, by R. H. Alberts, Jr., Hoboken, N. J., a black, white and tan to L. L. Ingram, Jersey City, N. J., and a black, white and ticked to W. E. Briggs, New York city.

Belthus—Gwynnie whelp. Lemon and white English setter bitch, whelped Feb 13, 1892, by R. H. Alberts, Jr., Hoboken, N. J., to R. D. Wilmerding, New York city.

Ben Hur. Silver fawn pug dog, whelped Aug. 30, 1891, by Spokane out of Sara Bernhardt, by Eberhart Pug Kennels, Cincinnati, O., to Mrs. John B. Titus, Middletown, O.

Dick Hunter. White and tan beagle dog, whelped May 30, 1891, by Chimer II out of Music IV., by Silver Spray Kennels, Clay City, Ill., to A. S. Aborn, Wakefield, Mass.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

J. M. C.—Give the puppy gentle exercise, strengthening food, such as mutton broth, etc., and continue the tonic.

G. L., Greenboro, N. C.—I have a very fine setter that is suffering severely with canker in his head. Can you send me a remedy or tell me what to do for him. Ans.

A. B. C., Highland, N. J.—By regular, gentle walking exercise and strengthening food the cowhocks you complain of in your St. Bernard can be straightened to a great extent. That is all you can do for it. Avoid a kencel where the dog has to get on his hind legs to see over the fence. Let the dog have as much liberty as possible.

Mix and pour a little in ears twice a day after washing out with warm water and castile soap, using a very soft towel to dry the ear.

HUNTER.—1. What breed of dogs was employed by the early Spaniards in America for tracking Indians and slaves? 2. Which would be the better man trailer, a cross of pointer and mastiff or three-quarters foxhound and one-quarter mastiff? 3. What books give fullest information regarding man hunting dogs? Ans. 1. The Spanish bloodhound, so called, a dog that resembled a heavy English foxhound, also showing some cross of mastiff. In height 28 to 30in., and 70 to 80lbs. in weight. A description of these dogs was given in FOREST AND STREAM, May 21, 1891. 2. The latter we should say, but an English bloodhound is better than either and a dog of excellent disposition and unapproachable as a man trailer. Mr. Winchell, Fair Haven, Vt., is a breeder of these hounds. 3. We do not know of any.

GLORIANA AND THE HERRESHOFFS.

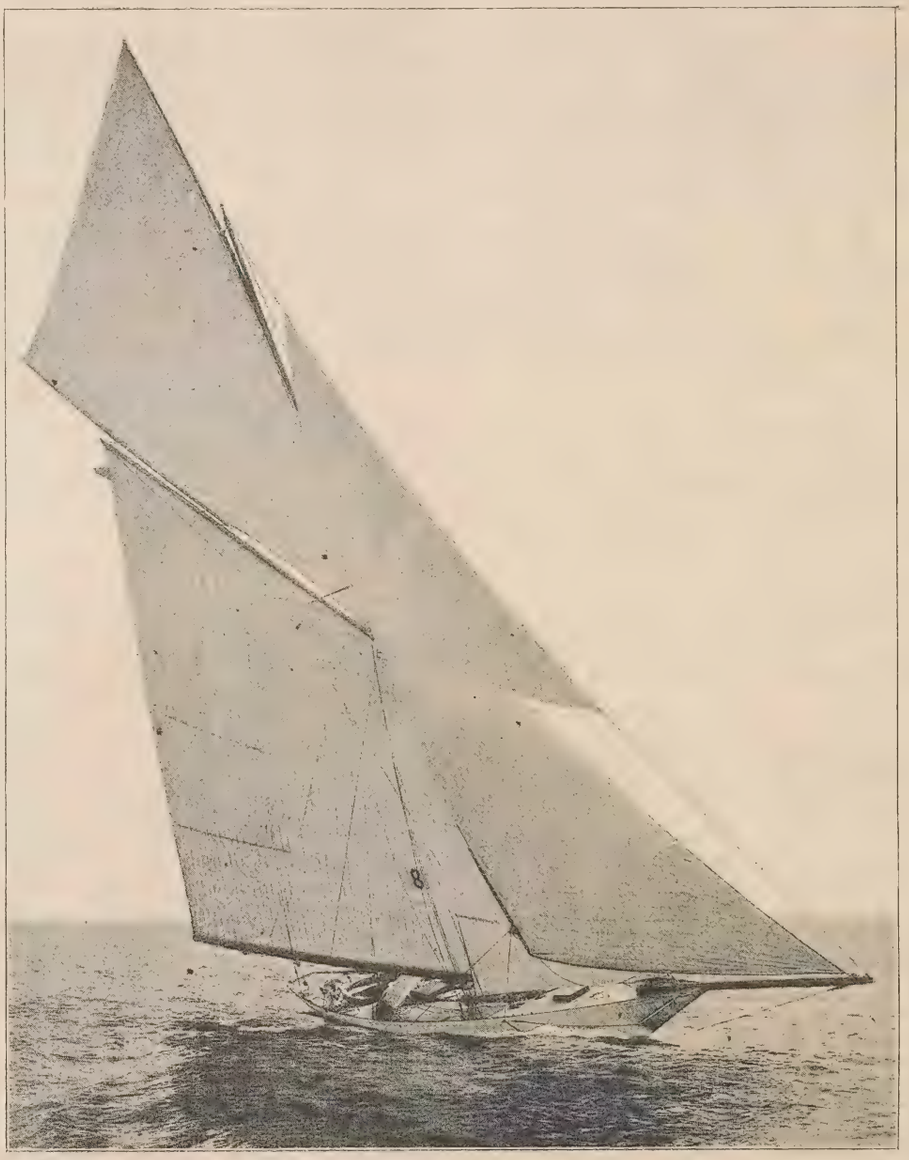
I.

THE history of yachting is much like that of politics; the last page, with its ink still wet, is written over with great names whose fame is to live forever, but as we turn backward toward the earlier pages we find fewer and fewer names than have not been very deservedly forgotten. Each year has its long list of statesmen, heralded by their respective partisans as the most gifted and enlightened ornaments of any age; but a very brief embalming in history will show that not one in a hundred has really risen above the grade of a party politician. In the same way yacht after yacht leaps into fame, the fleets of the past are held up in invidious comparison before her, and she achieves a temporary glory which though brilliant is in all probability even more brief than her life as a racer. The names of those yachts of the past thirty years which have survived the chill embrace of history, or of those yachts of to-day which will be remembered even twenty years hence, would together make but a brief list.

But of this list the greater number will be remembered simply for their long and honorable careers as racers, like Sappho and Shadow, while a very small number will be remembered because, independent of success or failure as racers, they embodied some new principle of design or construction. First of all famous yachts, the old America is interesting to-day, not because she won one race, but because she was the first successful attempt at a radical departure from existing principles. Beside her stands Mosquito, not only sharing the same peculiarities of form, but being still more radical in her iron construction. Of much later date, but still a pioneer in her way in iron construction, comes Mischief, whose fame rests not alone on her many victories, but on her design as distinguished from then existing yachts. Had the question been asked last summer whether Gloriana would hold a permanent place in history beside America, Mosquito, Sappho, Shadow, Madge, Mischief and Puritan, or whether she would be forgotten in a few seasons, not one yachtsman in a dozen would have hesitated in giving an affirmative answer, in which we would agree with them, though probably not for the same reasons.

There is no guarantee of lasting fame in the mere winning of half a dozen or so of races, much less in the column of exuberant bombast that have been showered on Gloriana with even more than the usual liberality, but if we are not mistaken, there is that about her which entitles her to a permanent place among the small number of yachts which will always be remembered and studied with special attention by all interested in the progress of designing.

At this time, when everything connected with the boat, her origin, her record and her special features has undergone a very natural process of exaggeration, it is by no means easy to estimate her real excellence, or to sift out from several novel and striking features the true points of superiority of her design; but in view of the widespread interest which she has awakened throughout the entire yachting world, we propose to describe her as fully as is possible. The many inquiries which have reached us during the winter from all quarters, among them letters from Ceylon and Tasmania, show that in spite of her smaller size and the absence of all international issues in her racing, she is no less widely known than the three great Burgess boats which have successfully defended the America's Cup.



As everyone now knows, Gloriana is one of the nine yachts built last year for the new 46ft. waterline class, designed by N. G. Herreshoff and built at the shops of the Herreshoff Manufacturing Co., in Bristol, Rhode Island; her owner being Vice Commodore E. D. Morgan, of the New York Y. C. In spite of all that has been told and written about her, the really essential facts have been very carefully kept, and even now her exact dimensions and elements are known only to her builders. The following figures have been compiled from the best available sources, and while not official they are approximately correct:

Length, L W L	45ft. 3in
over all	70ft.
Overhang, forward	11ft.
aft	13ft. 9in.
Least freeboard	2ft. 9in.
Beam extreme	13ft.
Draft	10ft. 2in.
Rake of sternpost, degrees	35
Sail area, Seawanhaka rule	4157sq. ft.
Displacement, long tons	34.5
Ballast, lead keel, long tons	21
Ratio of ballast to displacement	60 per cent.

The length over all is very indefinite, probably being by Custom House measurement, which means anything or nothing, so that the total length from fore end of stem head to the after side of taffrail may be from 71 to 73ft. The waterline when in "measuring trim" showed exactly 45ft, under the official steel tape, the yacht probably being slightly above her designed line. In his very interesting article in the *North American Review*, Mr. Lewis Herreshoff gives the waterline as 45ft. 4in., the beam as 13ft. 2in. and the draft as 11ft. 2in., or 1ft. more than she is commonly credited with. The beam is actually a little under 13ft., and while we cannot speak positively as to the draft, it may be set down safely as between 10ft. 2in. and 10ft. 6in.

Gloriana is a keel cutter of the American type so far as the midship section and lateral plane are concerned, and does not differ materially in these respects from the general run of modern keel craft. The lateral plane, which is shown approximately in the accompanying sketches of the interior arrangements, is of the triangular outline used by Burgess, Fife, Gardner and Watson, the rake of the sternpost being about 10 degrees less than the average of the latter three. The midship section has the S curve and strong bilge of the later American keel boats, with the wide keel. The hull is of composite construction, the main keel of oak, as are the stem and sternpost, the frames of angle steel, 1¾×¾×¼, spaced 16in. with a deck beam of the same size on each frame, connected by gusset plates. The frames are strapped diagonally by steel plates from deck to keel.

The sheer strake and garboard are of white oak, the planking of about a third of the bottom, or up to the floor of cabin, is of yellow pine 1⅜in. thick, and above this, as shown in the section, the skin is double, the inner portion being of ⅛in. white cedar and the outer skin ⅞in. yellow pine. The plank fastenings are composition screw bolts, while between the frames brass screws are put through the inner into the outer skin. The seams of the double skin are very close, no caulking being required, thus leaving the hull with a fine surface from the first. The heavy lead keel is fastened with 1½in. bolts, and in addition straps of brass 2in.×⅜in. are let into the lead keel, oak keel and garboards on the outside and through-bolted, about nine straps on each side. The deck is of 1½in. white pine, tongued and grooved and carefully glued together, the whole being

GLORIANA.

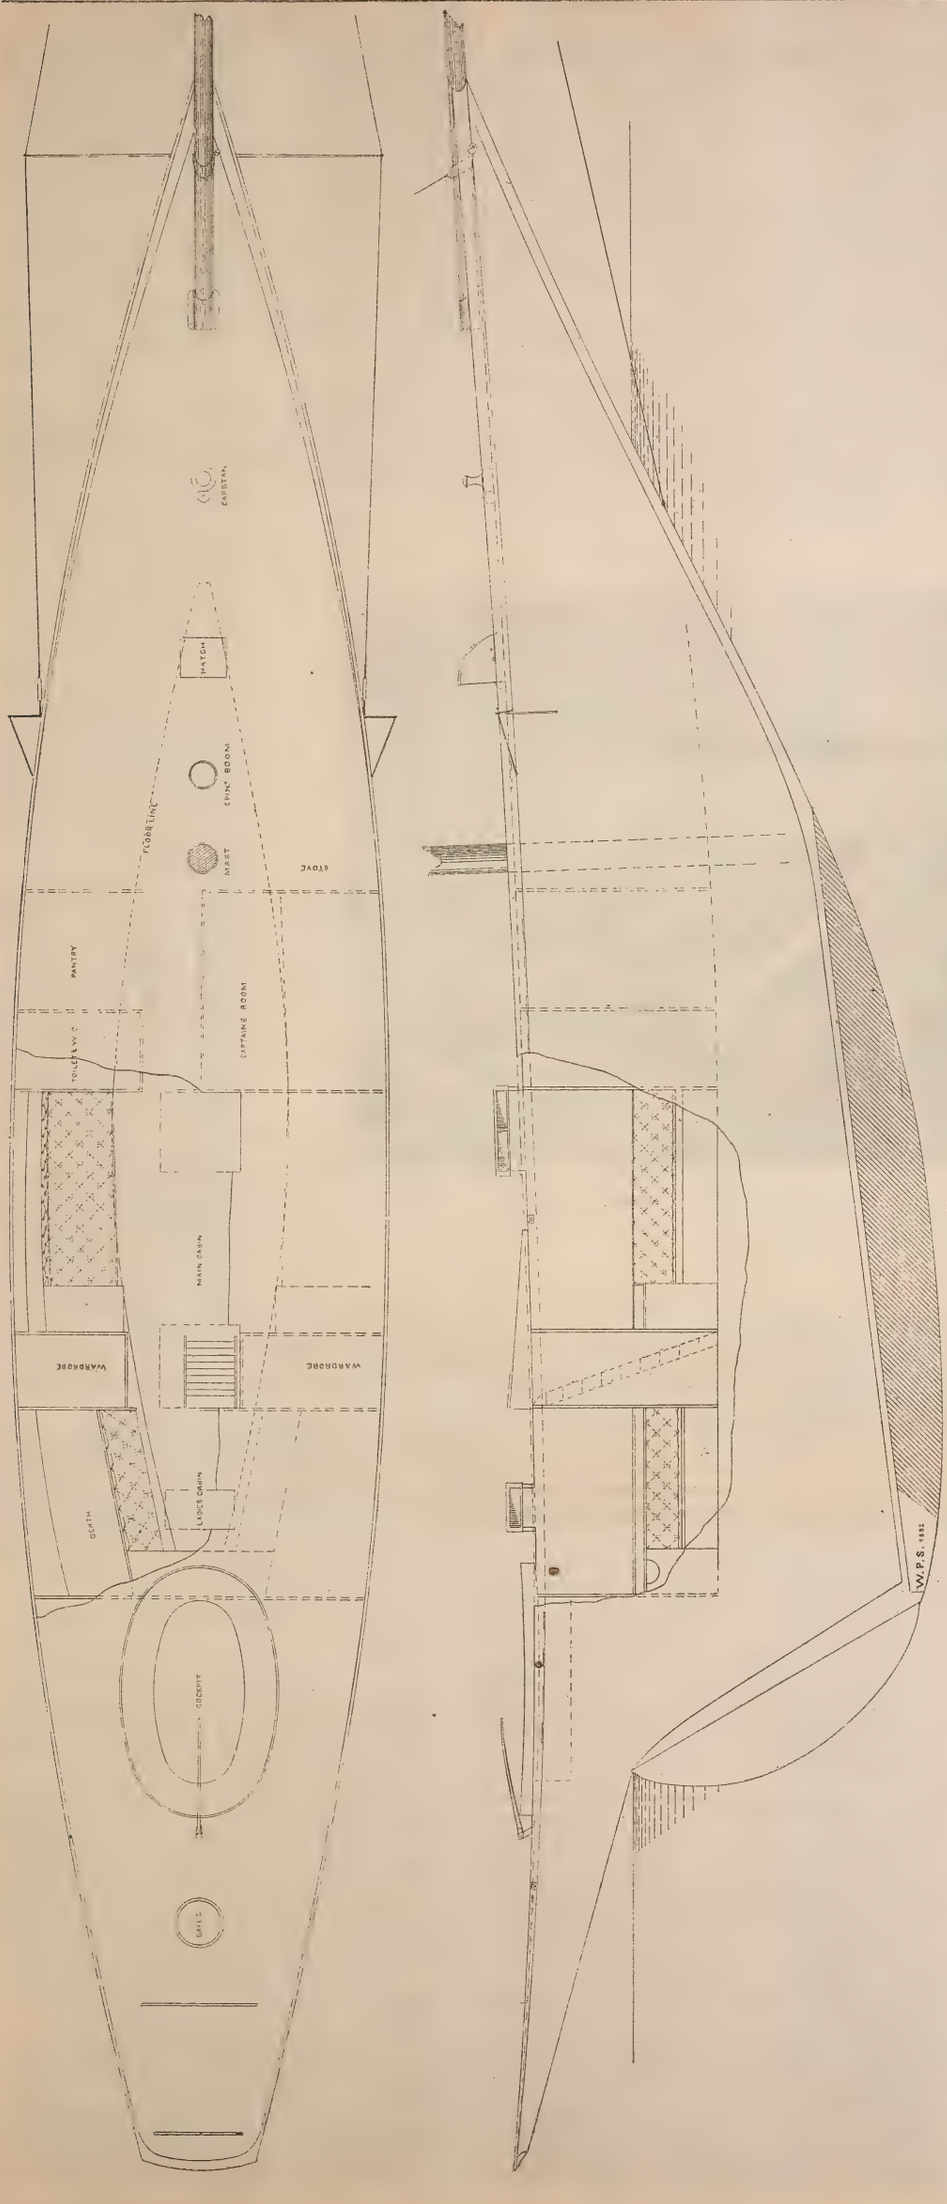
From 'Representative American Yachts."

covered with stout canvas. Beneath the deck, and in addition to the diagonal tieplates about the partners, the spaces between the beams are filled in with diagonal braces of wood, with steel straps 2x⅛in. on their lower side, making a lattice work bracing under the entire deck.

The chainplates, three on each side, are fastened to the frames inside the plank, there being no channels. The planksheer is of oak, the bulwarks being of oak plank 1¼in. thick and about 6in. high forward, tapering into a light rail around the stern. They are very plain, simply rounded on the corners with no cap rail, and they are pierced for a dozen or more of oblong scuppers along the side. On each side the bulwark is pierced for two brass leading chocks, for sheets and warps, one amidship and one abaft the rudderhead. The gammon iron is a heavy forging strongly bolted to the deck, and from it run two braces of round iron, the after end of each forming an eye through which the bowsprit fid passes, relieving the strain on the bowsprit bitts. These are of steel plate, bolted to the deck. Just abaft the bitts is a Herreshoff patent capstan geared for three speeds, the chain leading to a hawsepipe on the starboard side. The deck cleats are of composition, cast hollow, as used on the Herreshoff steam yachts, and the main sheet bitts are timber heads nearly amidship. The rudder stock is of composition, scarfed and bolted into an oak rudder and running up through a brass tube. Above the deck it is finished by a brass cap, to which is pivoted a peculiar socket yoke of brass in which the short locust tiller ships. Just forward of the rudderhead is a brass track on which runs a small slide supporting the tiller.

There are two mainsheet travelers, placed as shown, one very near the taffrail. The fore hatch has a quadrant top, replaced by a flat hatch in racing. Just abaft it is a circular screw plate of brass about 1ft. in diameter for lowering the end of the spinaker boom in shifting under the forestay. Abaft of the mast the deck is pierced by six holes, through which the falls of the halliards are led below and coiled out of the way. The after deck is taken up by an oval cockpit, as shown; the deck forming the seat, inside of a 6in. oak coaming; the floor being about 15in. below the deck. There is a skylight over the main cabin, a wide companion with a flat slide, and a small skylight over the ladies' cabin; all the joiner work being of mahogany.

From the composite construction, the yacht is very roomy below, in fact she offers far superior accommodation to a 65ft. yacht of the shoal centerboard model and old wooden build. The forecastle is large and roomy, with the usual lockers and hammock berths, the stove being on the starboard side, as shown. Abaft the mast on the same side is the captain's room, about 6ft. long and half the width of the ship. Opposite to it is the pantry and also, on the after side of the latter, the toilet room and w. c. The main cabin is a fine room, with good breadth and headroom, its length being about 10ft. 6in. The ladder leads directly to this room, the space on each side at the after end of each locker being taken up by a wardrobe and buffet locker. On the port side of the ladder there is full width for a passage to the after cabin, about 6ft. 6in. long and arranged in the conventional style, a berth on each side with sofa in front, and a washstand across the after end between the berths. The joiner work is all in butternut, plain but tastefully finished; making a very shipshape and comfortable interior without any attempt at over-elaboration. Below the floor is a large space for water tanks, stores and lines.



The very spirited picture of Gloriana under way we reproduce by permission of Mr. H. G. Peabody from his *Representative American Yachts*. The rig is marked by many peculiar features. The after shroud on each side leads to the upper cap on the masthead instead of to the hounds; the peak halliards have but one hauling part, and are of flexible wire rope and manilla spliced together. The outer part is of flexible wire, the end being made fast to the gaff near its end. The wire is long enough to belay on deck when the sail is set, the fall of the halliard being of manilla spliced to the wire. There is no peak purchase, but a special purchase is used, with a clutch which may be clamped on to any of the halliards as required. The mast is a solid stick of Oregon pine, but the other spars are hollow. The main gooseneck is very peculiar; around the mast is fitted a circular band of channel iron, between the two flanges of which revolves a strong composition ring. On the after side of this ring are two lugs for the main boom iron, and on the fore side is the socket for the spinaker boom gooseneck, while on each side are three or four belaying pins. The ring, with the main and spinaker booms attached, as well as some of the halliards, revolves about the mast within the channel iron collar as the sheet is started or hauled in.

The low clew of the jib is fitted with a club, after the fashion of Minerva and the other Scotch boats, and the jib sheets are fast to outriggers projecting from the side. The sheets are trimmed well amidships, through the leading chock in the bulwark, though there are three brass leaders for them just abreast of the outrigger and on the top of the bulwark. The staysail is fitted with the usual small battens, and the mainsail was similarly fitted in the early races, but when Gloriana raced at Newport in August the small battens in the mainsail had been replaced by new ones far longer than have yet been seen on a racing yacht, the lower of the three extending half way across the sail. These battens are so shaped as to be stiff near the leech, but very flexible as they near the forward ends, so as to break as little as possible the draft of the middle of the sail. The arrangement of the main sheet is peculiar, the bight of the sheet leads through a single block on the after traveler, thence the two parts reeve through a double block well out on the boom, thence down to a double block on the inner traveler, thence up and through a double block on the boom, from which they separate, each running down to a single leading block on each side of the deck. The yacht carries two club topsails, a very large one and another of quite moderate size, the latter being carried in the stormy regatta of the New York Y. C. when some of her competitors were under lower sail only and one had housed her topmast. The sails were made by Wilson & Silsby, of Boston, and the rigging by Philip Low, of New York.

There has been a deal of idle discussion in print over the question of Gloriana's design, some claiming that she was originally begun for Mr. Royal Phelps Carroll, owner of Gorilla, Mr. Morgan taking her after Mr. Carroll had countermanded his order. The matter is a trivial one at best, but the facts seem to be that Mr. Carroll ordered a 46 footer from the Herreshoffs in the fall of 1890, and the design was prepared and model made. When Mr. Carroll married he changed his plans and gave up all idea of building from the design, and when Mr. Morgan decided on a Herreshoff 46 footer, he, instead of Mr. Carroll, was the first to profit by the results of the thought, experiment and study which Mr. N. G. Herreshoff had been quietly expending on sailing yachts for some years. Gloriana was built at the Herreshoff shops, directly under the eye of her owner, with every facility for the best of wood and metal work on the premises. Every detail of the hull and rigging was worked out with a care that was more than paid for by her immunity from the mishaps of all sorts which were epidemic in the new 46ft. fleet last year. Her cost was probably about $12,000. She was launched very early in the season and was afloat, with her designer at the stick, and sailing between Bristol and Newport long before the rest of the class had their spars and ironwork in place. In this way she had the benefit of a thorough tuning up long before the racing began, finally coming to the line with everything in her favor against the crude, unfinished and untried fleet of other new yachts.

Though it may lessen in some degree the glory of her first victories, it is in no way to her discredit that she, the most radical experiment of the class, was ready for the racing long before other yachts that were partly completed before her keel was laid; and that she was in as good form in her first race in June as in her last in August, while in nearly every other case it was not until the latter date anything approaching a proper racing form was attained.

The 46ft. class of 1891 was a novelty in yacht racing. Instead of growing up slowly with the addition of two or three new boats in a season as has always been the case in the past, the class was deliberately built to order, as a racing class, all but two out of the eleven yachts which composed it having been ordered after the close of the season of 1890. Composed entirely of racing craft, newly built and

of the most modern designs, the racing could not fail of being exciting and interesting, and from the first this class claimed the entire attention of yachtsmen and the public.

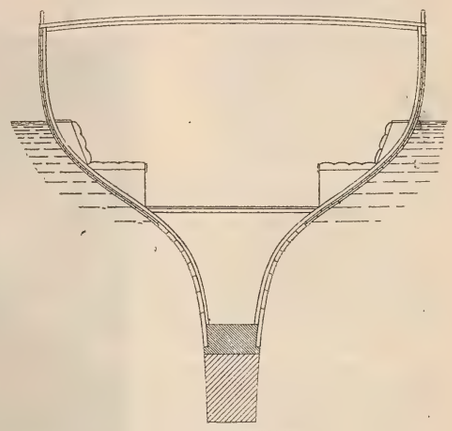
The first race, in spite of the long preparation and the early building, found but four boats at the line, Gloriana, Mineola, Nautilus and Jessica. The occasion was the annual regatta of the Atlantic Y. C., the course on New York Bay, from the Narrows around the two lightships, the day, June 16, clear and hot, with smooth water and light wind. Gloriana led the entire fleet, including Shamrock, Clara, Marguerite and Anaconda, all much larger, and covered the course far in the lead of her class, the elapsed times being:

Gloriana	4 21 10	Nautilus	4 39 51
Mineola	4 29 27	Jessica	4 35 43

Gloriana covered the course by a reach out and in, there being no windward work or running.

Two days later, in the New York Y. C. regatta, the weather was very different, a cold rainy day with a strong N.E. wind and a lumpy sea as far up as the Narrows, with quite a jump over the bar, the course being again out around Sandy Hook Lightship. The same quartette started, Gloriana carrying her small clubtopsail, the others setting jibheaders. Gloriana's work in the rougher water was even better than in smooth, and she had beaten her class long before the rougher water was reached. Here she left them still more rapidly, carrying her clubtopsail and riding the seas easily and lightly. Mineola sprung her mast outside the Hook and was towed home, the final times being:

Gloriana	3 18 03	Nautilus	3 32 21
Jessica	3 29 24		



Two days later the same trio started in the annual regatta of the Seawanhaka Corinthian Y. C., over the same course, but with clear weather, smooth water and a light breeze. The times were:

Gloriana	5 25 30	Jessica	5 43 29
Nautilus	5 31 40		

On June 22 the regatta of the Corinthian Y. C., of New York, was sailed over the same course and in light weather. Again only three of the class started, but Sayonara was in the place of Nautilus. The times were:

Gloriana	3 30 49	Jessica	3 44 46
Sayonara	3 42 50		

Next day was sailed the special race of the Atlantic Y. C., for the

MIDSHIP SECTION.

cup offered by Vice-Com. Banks; the weather being warm and clear, with smooth water and light and fluky winds. This time a fleet of five started, the times being:

Gloriana	5 04 17	Nautilus	5 19 35
Sayonara	5 10 35	Jessica	5 22 43
Mineola	5 16 06		

Immediately after this race Gloriana returned to Newport and was seen in no more races until the Goelet Cup race of Aug. 7. She was sailed a great deal and kept in perfect conditon, her mainsail being improved by the addition of the longer battens already mentioned. She did not join the fleet of the New York Y. C. on the cruise which begun at Glen Cove on Aug. 3, but was at hand off Brenton's Reef Lightship on the morning of Aug. 7, in company with the 70ft. Gracie and Barbara, Sayonara and Oweene of her own class. On the windwark leg of the Block Island course, in a moderate breeze and smooth water, she left the fleet, including Gracie, as easily as she had done in the spring races, finally winning easily. Gracie was disabled in the unfortunate foul with Volunteer, and Barbara and Oweene both broke down, the latter withdrawing. The elapsed times were:

Gloriana	5 44 02	Sayonara	6 07 55
Barbara	5 58 16		

Gloriana took no part in the other races of the cruise, but when the fleet returned to Newport a week later, she started in the special race given by the New York Y. C. for the 46ft. class. The day was fair, with smooth water and a fluky and variable breeze. On the run out Sayonara and Mineola were both ahead of Gloriana in time, and the race home was very close and exciting. Sayonara and Mineola having a private bet of $500 on the match, fought each other hard, but even with this Gloriana had all she could do to win from Sayonara, there being finally but 28s. corrected time between them. The elapsed times were:

Gloriana	3 43 23	Jessica	3 51 06
Sayonara	3 43 51	Uvira	3 53 44
Mineola	3 46 45		

The measurements of Gloriana, Sayonara and Mineola are practically the same, 54ft. sailing length, while Jessica measures 50ft. and Uvira 47ft., their allowances from the larger three being 3m. 49s. and 7m. 5s. respectively.

The final race which Gloriana sailed was the most interesting of the season, from the number of the competitors, the care with which all had been prepared and the equal conditions which prevailed over each of the 8½ mile legs of the triangular course. The race was the annual sweepstakes of the Corinthian Y. C., sailed over the usual course off Newport on Aug. 17, the day being clear and bright, with smooth water and a light to moderate southwest wind, making a beat, a run and a reach. The elapsed time over each of these legs were as follows:

	Beat.	Run.	Reach.		Corrected.
Gloriana	2 03 33	1 04 05	1 00 37	4 08 15	4 05 18
Oweene	2 03 52	1 03 46	1 01 28	4 09 06	4 06 39
Beatrix	2 07 49	1 03 52	1 01 19	4 13 00	4 10 31
Barbara	2 10 17	1 04 39	1 01 42	4 09 06	4 06 39
Sayonara	2 12 02	1 04 36	1 01 14	4 21 49	4 18 54
Mineola	2 16 37	1 03 58	1 01 58	4 16 24	4 13 02
Jessica	2 15 54	1 06 47	1 02 28	4 25 50	4 18 22

Both Sayonara and Oweene made a very close finish with Gloriana, while the centerboard Beatrix, so confidently looked upon by some Eastern yachtsmen as superior to the Herreshoff boat, made a very indifferent showing. This race finished Gloriana's career for the season, but she was in commission until quite late in the fall sailing about Newport, finally laying up afloat at Mr. Morgan's Newport home.

Though Gloriana is the first sailing yacht of any note built by the Herreshoffs in many years, they have long been recognized as builders of fast craft of all kinds. In the ten years between 1865 and '75 they turned out many fast yachts, mainly sloops and catboats; the old Sadie, the famous Shadow, the schooner Triton, and many smallcraft. About 1875 they startled New York yachtsmen with the peculiar form of catamaran devised and patented by them, a refinement of the savage craft of the same name. The speed of these odd craft soon brought them into prominence on both sides of the Atlantic, and they enjoyed a wide popularity for a time, though now seldom seen. The construction was most ingenious and the speed exceeded that of all known sailing craft.

With the invention of the coil boiler bearing their name, in 1875, they turned to steam yachts, producing the Leila, Gleam, Stiletto, Now Then, the torpedo boat Cushing and many very fast launches, with a large fleet of cruising steam yachts. A system of composite construction was worked out and their shops and plant were gradually improved until at the present time they have ample facilities for wood, composite and steel construction as well as for engine, boiler and machine work.

The works are located at Bristol, once a flourishing seaport and whaling headquarters, but now a quiet town on Narragansett Bay, between Providence and Fall River and some 12 miles from Newport. On the water side are the building shops, two large buildings side by side, the south one being shown in our illustration. Down the center of each shop is an inclined slipway, on which the yachts are launched

the floor being removed in sections. The slipway is shown in the cut with the fast steam yacht Vamoose in process of construction. Under her stern is a section of the floor, and further up the slip, on the shore end, is one of the small cruisers with overhanging stem which preceded Gloriana, the fore deck only being visible The view is taken from a high gallery running the length of the shop, from which the decks of the larger boats may be reached. The shop is lighted by rows of windows on each side, warmed by steam, and is always dry and comfortable to work in. Overhead are two traveling cranes, seen in the picture, by which any yacht of 80 feet or so may be lifted and set on one side, leaving the ways clear for another keel.

The other shop is similarly arranged, but is a little larger, containing the rolls, shears and punches for steel shipbuilding. It is also fitted with overhead cranes.

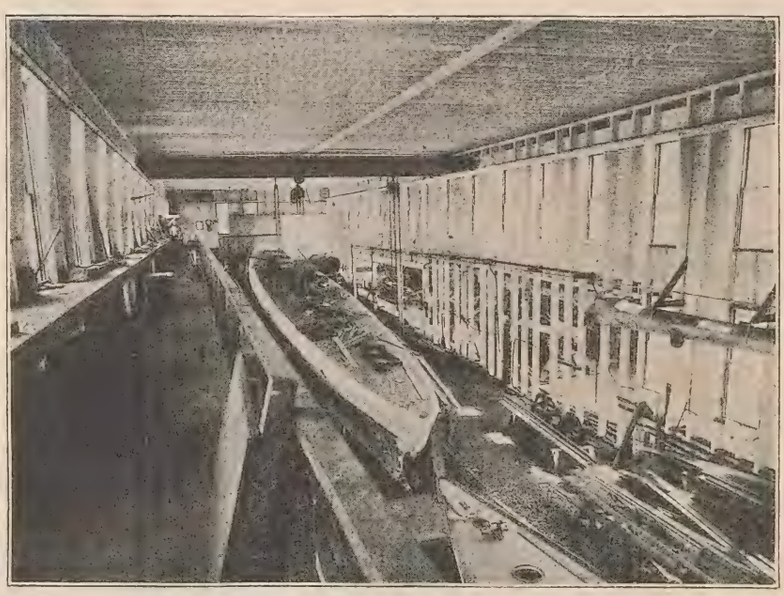
The larger yachts are built in the shop shown, Gloriana and Wasp each in turn occupying the space shown between Vamoose and the little boat. Nearly the whole length of the shop and slipway is now taken up by the new steel steam yacht Truant, now partly plated up. The smaller craft are built in the other shop, recently filled with the new crop or fin-keels. All but the largest sizes are built keel up ward, a special mould being made for each frame, over which two timbers of steamed oak are bent and held in place by dogs. These moulds are set up in position on the floor and the oak keel bent over them, the stem and stern put in place; the timbers are then beveled and the planking laid. The waler are of oak in single thickness, as are the garboards and possibly the next planks, but the greater part of the planking is in two thicknesses, well screwed to each other between the timbers. When the planking is completed the hull is lifted by the traveling cranes and turned right side up, the moulds being then removed and the deck beams put in place. When finished, the yacht is again picked up by the cranes and laid on one side out of the way. Not only the fin keels but steam yachts such as the new cruiser now in the water beside the shops, are built in this way.

On the other side of the street, about 200yds. from the water, are the machine, boiler and pattern shops, offices and drafting rooms, all fitted with improved machinery.

At the head of the street above these shops is the handsome residence of John B Herreshoff, while a short distance down the waterside is the comfortable home of N G. Herreshoff, with its boat house beside it and moorings just off the waterfront, at which in turn he has had the cat yawl Consuelo, the Clara, and Dilemma, his own boats.

The following history of the Herreshoff family we take from the Boston *Globe:*

Charles Frederick Herreshoff, who died three years ago at the age of 79 years, was the father of seven boys.



He was a direct descendant of the famous Chad Brown, the colleague of Roger Williams, who came to Rhode Island in 1638. In the fifth generation of his family appeared the four Brown brothers, who were distinguished in colonial days. John Brown was the grandfather of Charles Frederick Herreshoff. He was famous for many things in his day, but it was the attack on the Gaspé that made him known throughout the colonies.

He owned a great many small vessels, and one of these had been injured by the British ship, the Gaspé. John Brown with his fleet made a cruise of reprisal and burned the Gaspé. This was the first act at arms in the American Revolution. It occurred in 1773.

John Brown was afterward one of the largest shipowners in Rhode Island, and the first American vessel that floated the Stars and Stripes in Chinese waters after the Revolution belonged to him.

He owned about forty vessels, and even in his old age he delighted to go down the bay and meet his incoming ships and pilot them safely into the harbor.

Charles Frederick Herreshoff, the first, came to Rhode Island from Germany in 1790. In 1791 he was at Providence, and was entertained by John Brown, and he met the daughter, Sarah, who afterward became his wife. He was famous as a musician and a linguist, but in his later years he became a farmer. He married Sarah Brown in 1801, and the father of the present family of Herreshoffs was born in 1809.

INTERIOR OF THE HERRESHOFFS SHOPS, BRISTOL, R. I.

At that time the elder Herreshoff lived on the big farm at Point Pleasant, across from Bristol harbor. The farm of 250 acres is still in the Herreshoff family. Young Herreshoff spent his summers on this farm, and the Viking spirit of his grandfather on the maternal side was made manifest at an early age. He delighted in the carving of miniature ships, and when he was 12 years old he had built and sailed a boat of his own. When he was 14 his skill in the management of small boats and his taste in the mechanical line were remarked. He married in 1833 Julia Ann Lewis, of Boston. She was the daughter of a very well-known sea captain, who had made seventy-five successful trips in sailing vessels across the ocean.

Grandfather Herreshoff lived many years in the ancestral home at Point Pleasant, and to the father of the present family were born there nine children. All those nine children are now living.

The eldest is James Brown Herreshoff, who was educated at Brown University and became an expert in chemical engineering. He is recognized as an authority in all matters of mechanics, and it was he who first proposed the idea of coil boiler, which gave to the Herreshoff Manufacturing Company its great start in the construction of steam vessels.

Caroline Herreshoff, the second child, married E. S. Chesebro in 1856. Her husband had gone to the war in '61 and in 1875 he died of diseases contracted on the field. Her son, A. S. Chesebro, is a draughtsman in the designing rooms of the Herreshoff Company.

Charles Frederick Herreshoff, Jr., was born in 1839. He is a farmer and occupies the ancestral acres of Point Pleasant. He is a very large, powerful man and weighs about 275lbs. He spends all the leisure time he can in his cat yawl, the Alice, a boat of more than ordinary speed. In his native village he is a political power and he has been at the head of the government several times. He is a very genial sweet-tempered man and he takes life more easily than any other member of the family, with the exception, perhaps, of Lewis.

John Brown Herreshoff who was born in 1841, is often mistaken for the Charles Frederick Herreshoff, the father, who died three years ago. He is the president of the Herreshoff Manufacturing Company and he is the business head of the concern.

In his boyhood he was as ardent a lover of boats and matters marine as his younger brother, the genius, Nathaniel.

In 1856 the family left Point Pleasant and came to Bristol. In 1860 Charles Frederick Herreshoff built a catboat for John. The boat was called the Spite, and even at this comparatively late day possesses remarkable speed. John went into the actual business of naval construction in 1864, and in 1866 he took D. S. Stone, a famous yachtsman in his day, into partnership.

During the eleven years from 1864 to 1875 many hundred sailing vessels were turned out by the Herreshoff company. The Herreshoffs received their fame as builders by reason of the fact that they built boats that were always extremely fast. All the early boats owned by the Burgess family were built at Bristol.

Lewis Herreshoff was born in 1844 and has lived nearly altogether at home. His taste lies in the direction of literature, and he is a big, strong man with a heavy brown beard. He is the literary counsellor of the family, and his intimate and precise knowledge of family details is frequently drawn on by his brothers.

Sarah Brown Herreshoff is the sixth child. She was born in 1845, and lives in the family mansion at Bristol.

Nathaniel Greene Herreshoff, the designer of the Gloriana, is the seventh child. At nine years old he was an excellent helmsman, and at twelve he sailed the Spite to her first victory and won a prize.

He graduated from the Institute of Technology and took prizes in physics and mathematics. He experimented with the steam engine, and made one of new and unusual form After he left the Institute of Technology, in 1869, he went to the Corliss steam engine works in Providence. He remained there seven years, and perfected himself in the more intricate knowledge of steam engineering. During the seven years he was in the Corliss works he was the designer for the Herreshoff company in Bristol, and modelled most of their sail and steam yachts. He sailed all the yachts also in that time in all the races in which the Herreshoff boats took part. Thus he divided his time equally for seven years between boats and engines.

In 1877 he went to Bristol to give his whole time exclusively to marine engineering. In that year he brought out the famous catamarans, and secured patents on the new features that he had invented and perfected. With his catamarans he made the fastest time that had ever been made by sailing vessels. One of his catamarans sailed twenty one miles in an hour over a measured course.

Since then he has been employed uninterruptedly in the study of the construction of steam vessels, and he made a long series of experiments with different forms of screws for propelling vessels. He went into the study of the speed of yachts of different models, under different conditions of steam and weight. Every engine that was used by the Herreshoff Company after 1875 was built from Nathaniel's designs, and he secured any number of patents for inventions and improvements in engine construction. But in all this time he still retained his interest in the sailing yacht, and he shared his time in the work of experimenting with both kinds of vessels, and built many catboats, and the first catyawl in 1883.

In that year he married Clara Anna De Wolf, of Bristol. They have five children: four are boys that possess all the paternal interest in boats and boat building. Nathaniel looks forward to the time when he can man his own yacht with his own children, and he expects to have as fine a crew as ever hoisted topsail.

Nathaniel is superintendent now of the Herreshoff Manufacturing Company, and holds a quarter interest in a plant worth about $75,000. John Brown Herreshoff owns three-quarters of the stock.

Francis Herreshoff, another brother, is 41 years old. He was educated at Brown University, and distinguished himself there in chemistry. His fame is established on his success in the improvements in the manufacture of sulphuric acid and his unusual ability as a practical chemist. He lives in Brooklyn, and is the only one of the nine children that has left the parental roof. He is also an expert yachtsman, and he indulges his fancy for yachting.

Julian Lewis Herreshoff is the youngest in the family. He is 37 years old and he has become famous as a musician and a linguist. He was educated at the University of Berlin, and is the proprietor of a school of languages and music in Providence.

John Brown Herreshoff has been blind, as have his brothers Julien and Lewis and his sister Sarah, from his earliest years, each of them losing all sight between the ages of ten and fifteen. In spite of his blindness he is noted as a skillful sailor, having sailed continually as a boy with his brother Nathaniel for pilot.

[CONCLUDED NEXT WEEK]

THE EDUCATION OF NAVAL ARCHITECTS.

WE have frequently called attention to the great difficulty experienced by young men in obtaining instruction in all branches of naval architecture and marine engineering in America, and to the lack on the part of our technical institutions of courses of instruction in these branches. While such instruction has long been available to the ambitious student in England and on the continent, this country has offered no better facilities to the student of naval architecture than the very inadequate ones afforded by the handle of a ratchet drill or a chipping hammer. It is with great pleasure that we publish the following particulars of the new Department of Naval Architecture and Marine Engineering recently established at Cornell University, an institution whose standing is a sufficient guarantee of what may be expected from the new school. Of course the work is at the start experimental, but there is every reason to believe that in a short time the new school will fully meet the wants of all students Professor Wm. F. Durand, the principal of the school, is just about to start on a trip to Europe, visiting all the great schools and shipyards, returning before the opening of the next college year. The officers of the School of Naval Architecture and Marine Engineering are:

Charles Kendall Adams, LL. D , President of Cornell University.

Robert Henry Thurston, A.M., LL. D., Doc. Eng., Director of Sibley College.

William Fredrick Durand, Ph. D., Principal of the School and Associate Professor of Marine Engineering.

George Robert McDermott, Assistant Professor of Naval Architecture.

The classes at present are under the direction of Asst. Prof. McDermott, and the indications for next year are that the number of students will be as large as can be accommodated. The course of instruction covers three years, the first year being the regular senior year of the academic course, with special studies in naval architecture, ship design and building, the steam engine and other motors, etc. The courses of the other two years are described below.

The original inception of this School as a Department of Sibley College may be said to date from 1885, when the present Director of the college, Prof. R. H. Thurston, first took charge. The objective point at that time and since has constantly been: 1st. To provide such courses of undergraduate instruction in Mechanical Engineering as shall furnish the proper foundation for any of the special branches of these professions. 2d. To establish, as they may be called for and as the progress of the University may permit, a system of advanced schools of special branches of Mechanical Engineering.

The time seeming ripe for such action, the School of Marine Engineering and Naval Architecture has been organized as the first of such special schools, by order of the Board of Trustees October, 1890.

The vast importance of our maritime interests, lake and river as well as ocean, seems to render it peculiarly proper that there should be readily available to the rising generation of young men in this country, a school especially devoted to instruction in these branches. There can be no doubt as to the specialized character of the considerations and facts bearing on ship and marine engine building. It would seem to follow that a wider knowledge of what has been done by others, as well as a better understanding of the special conditions to be met, and the obstacles to be overcome, cannot fail to be of great value to all interested in maritime construction. Again, the absence of such special schools in this country has rendered it very difficult for ship and marine engine builders to obtain draughtsmen and designers having any special acquaintance with the peculiar problems involved. This school, by furnishing such special training, will, it is hoped, serve to ameliorate this condition. It must not, however, be supposed that a complete acquaintance with everything relating to ship or marine engine design and construction can be learned in any school. Indeed a good measure of practical experience would be found a valuable preparation for the special work of the school. Such experience would render the general grasp of the subject far easier than it otherwise would be. In any case, however, the student must expect to supplement his college course with practical experience before he can consider himself as master of the subject. No college can take the place of the ship-yard and shop. The first business of the former is to give that training and instruction which cannot be gotten in the latter, or cannot be gotten except at the expense of disproportionate effort. After that, as much of the purely practical as is possible may be given, always directing it toward the illustration and fixing of fundamental principles.

The object of the school is, then, to provide courses of instruction and opportunities for research in such special branches of engineering as relate to the design, building, powering and propulsion of vessels of any and all types. Such courses naturally fall under two heads—

(a) Naval Architecture.

(b) Marine Engineering.

These two subdivisions possess a large common ground, and of the courses of study offered many are common to both. Outside of these each branch is specialized in its own direction, the naval architect being, of course, more especially interested with the ship, and the marine engineer with the engine and the application of its power to the propulsion of the ship.

The course in naval architecture is intended as a general introduction to the whole subject of marine construction. It will open with the general examination of a ship as a stationary floating body. Following this, the various methods of approximate integration will be examined, and their application to the computations of naval architecture will be shown. To apply the principles developed, a series of computations will be made, based on the actual lines of some ship, each student in general having a separate set. These computations will include the making of a regular displacement sheet, together with the determination of transverse and longitudinal metacenter, moment for change of trim, and simple determinations of statical and dynamical stability. In connection with these, the usual curves and graphical representations will be laid down. The above constitutes the work for the fall term. Following upon this, in the winter term, a course of lectures will be given on the following topics: Ship resistance; Propulsion and powering; Wave motion and oscillation of ships; Strains to which ships are subject, and the reduction of the ship to its equavalent girder.

In the course in ship building and design which extends through the fall and winter terms, attention will first be given to the best practical construction in actual materials of the ship which, to this point, has been treated rather as a geometrical body. The subject will be treated from a descriptive standpoint, the various general systems of ship building and their peculiar points will be studied. Then, passing to details, the best modern practice in the innumerable details of ship construction and fitting will be covered as completely as possible.

The course will be partly by text book and recitations, partly by lectures, and partly by note book reports of detail drawings representing the best modern practice.

Following this and based upon it there will be a series of drawing room exercises, including, 1st. The design of a set of lines to fulfill given conditions, and of the general plans of arrangement and construction. 2d The design in detail of more important parts, such as double bottoms, water-tight bulkheads and doors, fittings around shaft tubes, boiler saddles, engine seating, hull forgings, stanchions, deck supports, etc

In the fixing of dimensions there will be a general examination of the various systems of scantling in use in the leading maritime countries, supplemented where convenient by reference to the theoretical principles involved.

The course in marine machinery will consist of a series of lectures supplemented by drawing room computation and design.

The various types of marine boilers, including the various forms of tubulous or water tubular boilers, will be examined, and their peculiar characteristics and limitations pointed out. Special note will be taken of corrosive and deteriotating causes, and the best means of prevention. Attention will also be given to piping, the various methods of forced drafts, special fuels, boiler auxiliaries, evaporators, etc , with hints on general boiler care under the conditions of use. The influence of the peculiar conditions of marine boiler practice upon the general principles of boiler design will then be examined, coupled with analyses of the design of boilers representing the best practice, and followed by design of an original character by the student.

In a similar manner a study is made of the peculiar conditions under which the marine engine is obliged to work, and of the advantages and disadvantages of the different types and forms. The proper care of engines under way, the precaution to be taken in getting under way, stopping, starting, etc., are noted, together with some examination of the subject of power trials. The influence of these peculiar conditions on general engine design is then noted, and analyses are made of several designs representing modern practice. These are followed by numerical designs of an original character, supplemented by actual drawings as far as the time will permit.

The various forms and types of marine propellers will in like manner be studied, and the principles of their design developed, followed by the design of a propeller of modern type to fulfill stated conditions. A general acquaintance with valve gears analysis being assumed, attention on this topic will be restricted to such forms and problems as are more especially peculiar to marine practice.

In the third year the course in naval architecture running through the fall and winter terms, is based on the more general course of the preceding year. Several special topics will be taken up and studied in greater detail, the object being the more complete preparation of the student through such advanced work, for the intelligent treatment of the various problems which continually arise in both the science and art of marine construction. The work will consist partly of lecture, partly of directed courses of reading, and partly of personal studies on the part of the student under the direction and aid of the professor in charge.

The course in ship design will consist largely of a directed study of the construction and designing practice of leading builders, with original studies on special points, followed by some complete design on the part of the student.

The course in marine machinery is a continuation of the preceding year, and will consist of an advanced study of various special topics connected with the design, construction and efficient management of marine machinery. Special problems will be assigned for study, and a complete design of some character will be prepared.

The Seminary consists of a weekly meeting, usually in the evening, in which the current technical and professional literature is discussed, with such other special topics as may seem timely. The current literature is assigned far scrutiny among the members of the class. Abstracts of articles and notes of interest being presented to the seminary for their information, and for free discussion. The object is to provide a means for keeping up with the world's progress in professional matters, and an informal meeting for the ready interchange of ideas among those interested in this line of work.

In the course in specifications, contracts and estimates the general subject of the proper statement of specifications, both as to matter and form, will be studied in connection with numerous examples. The subject of contracts will also be taken up, both as to their legal

and engineering sides. On the legal aspects of a contract, a short series of lectures will be given by one of the professors of the School of Law.

The subject of estimates, including material, time and cost, will receive careful attention, and tried methods and forms for the systematic preparation of a set of estimates will be studied.

The course will conclude with the preparation of a set of estimates, schedules, specifications and contract for the construction of some piece of marine construction.

There are a large number of auxiliary appliances and special disconnected topics, a due consideration of which is not found elsewhere. Such ground will be covered by this course as completely as the time will permit.

Among these subjects may be mentioned the various auxiliary engines, pumps, blowers, hoist, and other mechanical contrivances on board ship. The subject of ship ventilation, corrosion and fouling. Some notice of dry docks, building slips, launching and launching ways, shears and cranes. A general study of the machinery for the handling, working and fastening of ship-building materials, etc., etc.

A limited amount of laboratory work bearing on Marine Engineering or Naval Architecture may be furnished those who wish to give additional time to such work. It is hoped in the near future to establish a laboratory for experimental work and research connected with these branches, so that a certain amount of time will regularly be devoted to laboratory work. For the present, however, such work will be elective.

As a part of the regular work required for graduation, a thesis is prepared presenting the results of some original investigation or design. The subject is chosen in consultation with the principal of the school, and must be approved by the Director of Sibley College.

In the arrangement of the subjects and in the division of time for the professional work, it is intended to give sufficient time to theory and general principles to furnish a good general grasp of the subject, such theoretical work being always illustrated and impressed by applications to practice, and supplemented by a large amount of work more purely practical in character.

The objects to be kept in view are considered as two-fold. First, the power to deal intelligently with the actual problems of ship and power design and construction as they present themselves in practice. Second, the fostering and development of that originality of thought which, under proper control and with other gifts, may form the suggestiveness of mind characteristic of those qualified to aid in the continual advancement of engineering and scientific work.

Of special equipment, the School is provided with the following:

Several hundred photographs and drawings, both general and detail, illustrative of marine construction of all forms.

A number of half-breadth models of ships, including some of the more noted Atlantic liners.

A complete set of Copenhagen ship curves, with battens, special drawing-boards, and all appliances for ship drawing.

An Amsler Integrator of the latest type.

Large additions are being made to the books and other professional literature already in the Library, and no pains will be spared to make the Library equipment as complete as possible in every form of literature relating to Marine Engineering and Naval Architecture.

The equipment of the general Mechanical Laboratory, unexcelled in extent by that of any laboratory in the world, is also available for use by the student, and every related department of the University will offer its best facilities for such work as students in the School of Marine Engineering and Naval Architecture may find desirable.

ROCHESTER Y. C.

Editor Forest and Stream:

At a regular meeting of the Rochester Y. C., on April 4, the following programme of club events for the season of 92, was presented by Dr. B. G. Saunders, chairman of the regatta committee, and adopted by the club. Saturday May 28, opening cruise, a cruising handicap to Big Sodus Bay. Thursday June 9, squadron review; Thursday June 16, ladies' day; Thursday June 23, club race; trophies from the commodore; Saturday July 2, cruising handicap to Oak Orchard; Thursday July 21, Lake Yacht Racing Association, annual regatta; Thursday Aug. 11, ladies' day; Thursday Aug. 25, club race, three classes, two prizes in each class; Saturday Sept. 3, cruising handicap to Presque Isle; Thursday Sept. 15, squadron review; ladies' day; ball in evening.

The club is in prosperous shape, and adding new members at every meeting, and has a fleet of thirty-five fine yachts, among the later additions being the two well known Eastern yachts, Choctaw and Cinderella, and the Miller Brothers' new yacht Nox, after Fife designs, which will be ready for the opening cruise. HUTCH.

YACHT NEWS NOTES.

The sloop yacht Mull, owned by Com. B. F. Sutton of the Brooklyn Y. C., was launched at Poillon's on April 23 after being entirely rebuilt. She was originally 36ft. on deck, 33ft. l.w.l., 14ft. beam, with inside ballast, but her new dimensions are, 33ft. 6in. l.w.l., 51ft 6in. on deck, 14ft 6in beam. Her rig has been changed from sloop to cutter, and 2½ tons of lead have been added to her keel. She was originally the Widgeon, built in 1884. Mr. J. J. Driscoll, foreman of Poillon's yard, has had charge of the designing and carrying out the changes.

Mr. Royal Phelps Carroll, former owner of Nokomis and Gorilla, is now on a hunting tour around the world in company with Mrs. Carroll. They have just arrived at Ceylon from Singapore, having been absent for a year from the United States, visiting the northern portions of the Pacific coast and also China.

The Marine and Field Club has already issued the full programme for its annual regatta on June 11, the classes being 54ft. l.w.l., 40ft., 35ft., 30ft., 25ft. (including 25ft. S L. class), and cabin cats. Entries must be made to David Raet Jr., Secy., Bath Beach, N. Y.

Mr. E. S. Jaffray, former owner of Skylark and Stranger, died on April 23, at the age of 76. Mr. Jaffray, who was a prominent New York merchant, was an enthusiastic steam yachtsman, a member of the American Y. C.

The Douglaston Y. C. has decided on the following programme, May 30, opening; July 4, annual open regatta; August 6, ladies' day; Sept. 5, annual open sweepstakes.

Tillie, steam yacht, formerly Polynia, has been sold by W. H. Starbuck to Gen. Jos. T. Torrence, of Chicago, the price stated being $85,000.

Canoeing.

CANOE NEWS NOTES.

Permit me to express my thanks to Mr E. S. Whitaker for his courteous attention to my request in your columns for information respecting the kind of bow-facing oars best suited to canvas boats. His article was of great interest to me. I had thought of constructing my canoe in three sections, but had never learned that this had already been done with canvas canoes.—KELPIE (Central Lake, Mich.).

A. C. A. Membership.—Atlantic Division: Charles B. Carling, Yonkers, N. Y. Northern Division: J. McDonald Mowat, F. C. Ireland, E. C. Mitchell, W. H. Macnee, Cataraqui C. C., Kingston, Ont. Eastern Division: J. Munn Andrews and Wm. D. Warren, Lowell, Mass.

The regatta committee of the Associated Canoe Clubs, of Passaic River, held a meeting, at which they decided to hold the annual meet at the Jersey City C. C. regatta, on Newark Bay, foot of Danforth avenue, Jersey City, on May 30.—ROBERT W. STRACHAN, JR., Sec'y.

At the last meeting of the Hoboken C. C., E. W. Tanner, 28 Broad street, New York, was elected secretary in place of G. V. Strahan, resigned. The club will camp at Egg Beach, on the Hudson, on May 28, 29 and 30, and all canoeists are cordially invited to join.

Subscribers' rage beyond control,
They find that the paper's late;
The editor cutting a fishing pole,
And the devil digging bait.
—*Atlanta Constitution.*

Three citizens of Carson, Nev., conceived the idea of saturating wheat with whisky and feeding wild ducks with it at Washoe Lake, thinking that the birds would become intoxicated and be unable to fly away. The ducks made a feast of the grain, and, although the effect was to make them unusually noisy, they escaped the hunters.—*Evening Post.*

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

PALISADE RIFLE CLUB Jersey City Heights, Captain John C. Reinhardt, Thursday, April 21. The scores made to-night are appended below. The conditions were, 10 shots, off-hand, 25-ring target, possible 250:

A Malz	25	25	25	24	24	24	23	23	23	23—239
F Liell	25	25	25	24	24	24	24	23	22	22—238
J Carragher	25	25	25	24	24	23	23	22	22	22—235
J H Kruse	25	24	24	24	23	23	22	22	22	20—229
Geo W Graf	25	25	24	24	23	23	22	22	20	20—228
Capt Reinhardt	25	25	24	24	24	23	23	20	19	19—226
Chas Burk	25	25	24	23	23	22	22	20	20	20—224
F Kehrwald	25	24	24	23	22	21	20	20	19	19—217
H Rosenthal	25	24	24	24	23	20	20	19	18	18—215
A Rossy	25	25	23	23	23	23	20	19	18	16—215

The members of the club are jubilant over the winning of the Hudson City Schuetzen Corps, handsome king medal, by one of the Palisade members Capt. John C. Reinhardt. By the way, another Palisade man who distinguished himself in the theatrical entertainment of the corps was Herman Rosenthal, the actor who needs no "make-up." He and Capt. Reinhardt divided the honors.

Miller Rifle Club, Hoboken, Captain Richard W. Dewey, Wednesday, April 20. The scores made to-night in the three classes are appended below. The conditions were 10 shots, off-hand, 25-ring target, possible 250:

First Class.

D Miller	25	25	25	24	24	24	23	23	23	22—240
G W Plaisted	25	25	25	24	24	24	24	23	23	23—240
L Vogel	25	25	25	24	24	24	23	23	23	21—237
F Liell	25	25	25	24	24	24	23	23	22	21—236
E Fischer	25	25	24	24	24	23	23	23	23	21—235

F Kammel	25	24	24	23	23	22	22	18	18	15—214

The Excelsior Rifle Club and the Essex Amateurs, of Newark, met in a ten-men team match at the headquarters of the former, 78 Montgomery street, last Monday evening, the 19th inst. A regular five-men team FOREST AND STREAM tournament match was shot first and then five more men of each shot their scores. Coppersmith and Cooper led in the scores of the evening with totals of 244 and 242 respectively. Wm. Weber led the Excelsiors with a total of 238. The Excelsiors with but few exceptions put up poor scores, Varick and Hallowell shooting considerably below their average. The scores of both sides follow. The conditions were 10 shots, off-hand, 25-ring target, possible 250:

Essex Amateur Rifle Club.

Average, 223 1/10 per man.

A return match will shortly be arranged, when the Excelsiors promise to make a better showing.

The Hudson City Schuetzen Company No. 1, Captain Bluemle, and their many friends thronged Bug's Oriental Park, Ogden avenue, Jersey City Heights, last Monday afternoon and evening, on the occasion of that organization's annual spring shoot and festival. Handsome gold medals and fat money prizes were distributed among the marksmen. On the target of honor first prize, a handsome gold medal, was secured by John Reinhardt, the genial captain of the Palisade Rifle Club, who made a score of 23, 22, 25—70 E-xCapt. Lutz took second prize with 23, 24, 22—69. A. Stoll took third with 23, 24, 22—69. F. Freitag secured fourth with 23, 25, 20—68. F. Fuller fifth with 21, 22, 23—66. The money target also produced close competition for the various moneys. August Meyns, of the Miller Rifle Club, took first prize with 24, 24, 25—73; A. Stoll second with 23, 24, 25—72; and John Reinhardt 22, 23, 25—70. After the distribution of prizes the company was presented with a handsome silk flag, 9ft. by 6ft., by ex-Captain Lutz. It is a handsome article, and the happy "gray schuetzens," called so on account of the color of their uniform, which, contrary to that of other companies who employ the blue color in their uniforms, received it with great pleasure. It was received by Captain Bluemle, who thanked the donor in a few well-chosen words. During the evening a clever theatrical performance was given by a number of amateurs. Again Captain John Reinhardt, of the Palisade Rifle Club, distinguished himself. He had the part of the discarded lover, and his acting was well done, considering that this was his first attempt. A reception followed later in the evening.

Excelsior Rifle Club, Jersey City, Tuesday April 19.—The following scores were made to-night in the regular weekly competitions for the several class medals. The conditions were: 10 shots, off-hand, 25-ring target, possible 250:

Wm Weber	25	25	25	24	24	24	24	23	23	23—240
C Bauchle	25	25	25	24	24	23	23	23	22	21—235
W H Hallowell	25	24	24	24	24	23	23	23	22	22—234
C L Pinney	25	24	24	24	24	24	23	23	22	21—234
L P Hansen	25	25	24	24	23	23	23	23	22	21—233
W J Channing	25	24	24	23	23	23	23	22	22	22—231
J Hughes	25	25	24	24	23	23	23	22	20	18—227

The club offered a medal in each of the three classes to be contested for weekly. The winner of these were presented on the day the competitions closed; last Tuesday the 26th inst. Those who won the medals were: First class, William Weber; second class, Chris Bauchle; third class, Colin Boag, they having won it the most times in their respective classes. A medal was also offered in each class for the shooter making the highest average during the medal competition. The winners of the average medals were: First class, Ward J Channing; second class, William H. Robidoux; third class, Colin Boag. The indoor shooting of the club was closed, and will not be resumed until next fall, the members now devoting themselves to outdoor shooting, as the season is nearly upon us.

There is a good prospect of the Miller Rifle Club changing its present headquarters to that of another. The proprietor, Max Krueger, is asking an increase in the rent of only eight dollars a month. He will not get it. The club has its eye upon a neater and better located place and it would be no surprise to see them occupying them by May 1.

Henry Boddey leads in the medal shoot now in progress under the auspices of the Palisade Rifle Club at headquarters on Palisade avenue, Jersey City Heights, with scores 73, 73, 73, total 219, out of a possible 225. Among the second class men Charles Bink leads with scores of 67, 66, 65, total 198. The shoot, which is open for members only, will close in six weeks.

The members of Company A, Second Regiment, Captain Sagendorff, are practicing almost daily for the team shoot open only to companies of the Second Regiment, for the Colonel E. A. Stevens trophy.

The Lady Miller Rifle Club held its weekly shoot last Thursday evening. Large scores are being made weekly and the ladies are showing decided improvement. Ten shots, rest, 25-ring target, possible 250:

Mrs E Petrie	25	25	25	25	24	24	23	23	23	22—239
Mrs H Katencamp	25	25	25	24	24	23	23	23	23	22—237
Mrs D Miller	25	25	25	24	24	24	23	23	22	21—236
Mrs J Vogel	25	25	24	24	24	24	23	23	22	21—235
Miss K Born	25	25	24	24	24	23	23	23	21	21—233
Mrs H Stadler	25	25	25	24	23	22	22	22	20	20—228
Mrs A Cordts	25	25	24	24	24	23	23	22	20	19—228
Miss M Miller	25	25	25	24	23	23	22	22	19	19—228
Miss A Clausen	25	24	23	23	22	20	19	19	18	12—205
Mrs T Meyer	25	24	24	20	20	20	18	18	15	12—196
Mrs M Barrett	25	23	22	20	19	19	19	18	16	14—195

Geo. C. Varick, a charter member of the Excelsior Rifle Club of Jersey City and until recently a member of the Miller Rifle Club, has resigned from the former organization on account of his leaving for the South with his family. He will reside in Richmond and settle there for good.

A club which has been making rapid strides in New Jersey shooting circles is the Herman Rifle Club, Captain Herman Neumann, who lately transferred their headquarters to 354 Palisade avenue, Jersey City Heights. The club is rapidly gaining in membership, as the location of their former headquarters was a drawback as regards increase in membership. The club has completed all arrangements for its annual excursion to the fishing banks on May 21.

The ten men team shoot open to companies of the Second Regiment, in which five companies have entered, companies A, B, C, D and E, for the handsome and costly trophy presented by Colonel E. A. Stevens, opened Tuesday evening at the armory in Hoboken. Three teams shot, leaving two to wind up to-night. A medal has been also offered by the Colonel, to the shooter making the highest score during the shoot. A full and detailed description will be given in next week's FOREST AND STREAM, together with the full scores.

Company A, Capt. Sagendorf, have become interested and weekly they may be seen perusing the FOREST AND STREAM, which publishes their scores.

The first annual ball of the Hoboken Schuetzen Club took place at 223 First street, Hoboken, on the 24th inst. A feature of the evening was the presentation of a handsome gold medal to the most popular schuetzen captain. The costly bit of jewelry brought out many competitors. The winner was Captain Joseph Schauer, of Freischutz Co. No. 53, Germania Schuetzen Bund. The votes cast for the several competitors were: Captain Joseph Schauer, 200; Captain John Reinhardt, Palisade Rifle Club, 145; Captain Albert Moehmking, 46; Captain Wm. Forkel, 45; Captain Henry Wirth, 45; Captain Gurdesdorff, 32. The presentation speech was made by J. H. Kruse, Captain Schauer responding in a few well chosen words. The club cleared a neat little sum on the affair, thanks to the indefatigable efforts of the committee, Frederick Kroeger, John Stein, J. H. Kruse and Captain Henry Wirth. The club has also looked to the preliminary details of a picnic to be held in the early part of July at Berg's Park, Jersey City Heights.

The Excelsior Rifle Club held its regular weekly outdoor shoot at Ambruster's Greenville Schuetzen Park last Friday afternoon. Quite a number of good scores were made, showing that the Excelsior boys are getting back to the old form under the able tuition of L. P. Hansen.

The regular weekly outdoor shoot of the Greenville Rifle Club, Capt. Wm. H. Robidoux, at the Greenville Schuetzen Park, last Saturday afternoon, brought out only a few of the members, the rain keeping many at home. JAY H. KAY.

St. Louis Sharpshooters.

ST. LOUIS, MO., April 17.—*Editor Forest and Stream:* The following scores were made to-day at Creve Coeur Lake, by the St. Louis Sharpshooters, German ring target, 200yds., off hands:

Schweighoefer	17	24	21	23	22	23	17	14	15	23	—199

H Mahlenbrock	238	D Carr	226
J Smith	229	B Stites	223
S Middleton	234—2306	J Hollenberg	223—2260

Lieutenant, A. Braun. Scorer, J. Reynolds. Captain, D. Erskine. Scorer, A. Wright.

The Hudson Rifle Club will shoot return match on May 9 at Newark.

Revolver Shooting in England.

LONDON, Eng., March 24.—*Editor Forest and Stream:* The South London Rifle Club, which has the principal revolver shoots in England as members, has begun its season, having shifted its shooting ground from Nunhead, London, to Runemede. This change of ground admits of long-range rifle shooting, their old ground not having a longer range than 600yds.

Revolver shooting will not commence at the club till May, when there will be two sets of revolver competitions at 20yds; twice a week till the Bisley meeting, and once a week afterward, till Oct. 27, when the season ends.

The new Bisley revolver target will be used (2in. bullseye). The competitions will be: First series, stationary target; second series, disappearing target. The championship of the club to go to the member who makes the five highest scores on five separate club days in either series No. 1 or series No. 2.

Mr. Walter Winans, the present holder of the club championship, intends not to shoot till after the Bisley meeting in July, and then if in England, to try and make his scores for the championship in Series 1—the stationary target.

There may be a 50yds. revolver competition later on in the year.

The record for revolver shooting at the new Bisley 50yds. target has been advanced another point by Mr. Walter Winans.

On April 13, at the Sheepcot Range, Brighton, England, in a drizzling rain and gusty wind from the right, he made within one point of the highest possible on the new Bisley 4in. bullseye at 50yds. (4lbs. trigger pull, English army ammunition) with a Smith & Wesson revolver.

This is one point better than he made on April 5, which was the record up to that date, he using that time a Russian model .44cal. Smith & Wesson.

It has been decided by the council of the English National Rifle Association to have the new 20 d. 2in bullseye of the revolver target count seven points (instead of six as originally suggested). This is to facilitate comparing scores with those made in former years, when there was a 2-in. "carton," counting the same number of points at the same distance. X.

Massachusetts Rifle Association.

BOSTON, April 23.—The regular weekly shoot of the Massachusetts Rifle Association was held at its range to-day. The weather conditions were not favorable for high scores. The following scores were made to-day, 20yds. off-hand, Standard American target, all being re-entry matches:

All-Comers' Rest Match.

*J Francis	110	J French	102
D Winchester	102
S Wilder	110	A Ballard	103
D N Winn	99
A H Ballard	107	M T Day	103
J W French	90
W P Thompson	105	H L Willard	102

*Telescope sight.

All-Comers' Off-Hand Match.

W C Johnson	87	A Maynard	78
O Moore	73
C H Eastman	82	S C Sydney	78
S Gleason	67
F Daniels	80	A Bullard	74
W Charles	69

Pistol Medal Match, 50 ds.

S Paine	96	C B Frank	93
F C Baker	87
F P Crowninshield	94	L H Greene	92
C Frances	63
A Stevens	91	J B Fellows	92
O Moore	94	D N Winn	90

All-Comers' Pistol Match, 50yds.

F B Crowninshield	94	S Paine	92
J B Fellows	90
A G Stevens	93	D N Winn	91
W C Johnston	87
O Moore	92	D Martin	90
L H Greene	86

Heidenreich Rifle Club.

NEW YORK, April 25.—The following scores were made at the weekly shoot of the Heidenreich Rifle Club at our range, 425 W. Fifty-third street. Distance 100ft., open air, 25-ring targets:

Wm. Dalton 241, Val. Horn 238, John Angeldinger 234, Geo. Graf 234, Wm. Steckel 230, Jos. Hippold 228, Carl Diesen 226, Wm. A. Hicks 225, John Kaufman 223, A. Busch 222, Frank Goodman 221, Wm. M. May 219, Gus Reinholt 213, Wm. Müller 210.

Conrad Dalton has done some good shooting for his scores this month, his average for April being 238. This, when you take our range in consideration, is excellent target shooting.

There is a match coming off after our bull's eye shoot between Val. Horn, shooting-master of the Heidenreich Rifle Club, and Capt. Fred Schill, the popular captain of the Blumenthaler Schützen Co. No. 6, the particulars of which we will write you as soon as the arrangements are made. This match will create considerable interest, as both men are well known and good shots.

Rifle Notes from Marion.

THE H. R. C. will on May 1 begin a medal contest for the ensuing year; the club is divided into three teams. The member making the highest score on score night to hold the trophy one week, and the member who shall have won it the greatest number of times during the 52 weeks will be the winner.

There is soon to be a 100-shot match between two members of the North Wards and Hudsons, and a return match to test the grit of the boys.

Mr. E. F. Hunt, a member of Hudson Rifle Club, died very suddenly at his home, 747 Newark avenue, Saturday morning. Mr. Hunt was well liked by all of his associates, and the Hudsons greatly miss his smiling face and genial ways so well known. Although Mr. Hunt was seldom at the club, still his heart was there, and it is only with great regrets that the members herewith tender their sympathies to the bereaved family.

Lischke Rifle Club.

JERSEY CITY, April 20.—The A. Lischke Rifle Club met for the weekly contest Friday evening, Apr 15, at their headquarters, 17 Milton avenue, Jersey City Heights; distance 110ft., 25-ring target:

Lischke	25 25 25 24 24 24 23 21 20—235
Scharli	25 24 23 23 23 23 22 22 22 21—228
Strater	24 24 24 23 23 22 22 22 21 18—223
Steidel	25 25 24 23 22 22 21 21 21 20—223
Dyroff	25 24 22 22 22 22 21 19 19 19 16—209
Schulte	25 24 23 23 22 19 19 18 17 16—206

Medals were won: First, A. Lischke; second, H. Strater; third, H. Dyroff.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, April 19, at George McCune's shooting gallery, 146 South Halsted street, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300:

W J Gibbs	276	M Tadro	256
A McBean	251
Geo McCune	263	Jas Hosie	255
R Taylor	250
W J Myers	266	T Ford	255
F Erickson	249
C A Hankle	259	H S Burley	254

Zettler Rifle Club.

As the season for the closing of the gallery shoot is drawing near, the competition among the members of the Zettler Rifle Club is waxing red hot. At the regular weekly shoot on Tuesday, April 19, the following great scores were made on the 25-ring target, possible 250 points: Dr. J. A. Boyken 249, L. Flach 247, M. Dorrler 246, M. B. Engel 246, C. G. Zettler 246, F. Ross 245, B. Walther 245, H. Holges 243, G. Nowak 243, R. Zettler 242, F. Hecking 235, F. Lindkloster 235, M. Tropp 227, F. Farbarious 227.—GUS. NOWAK, Sec'y.

Cincinnati Rifle Club.

CINCINNATI, O., April 21.—The regular shoot of the Cincinnati Rifle Association was held on its range to-day; the weather conditions were favorable. Conditions, 200 ds., off-hand, at the Standard target. Appended are the scores:

Gindle	83	81	79	Speth	73	73	67
Best	76	79	73	Simon	73	69	69
Louis	72	68	69	Stegner	72	70	69
Weinhe'mer	74	73	69	Drube	86	85	71
Payne	80	79	83	Lewis	26	42	..
Copeland	78	77	76				

Rebhan Outshoots Bird.

MATCH between John Rebhan and C. E. Bird, both of Hudson Rifle Club, shot on Hudson Rifle Club range, Monday, April 25, distance 25yds:

John Rebhan	236	240	236	237	232	245	243	239	244	239—2391
C E Bird	231	231	226	239	233	230	234	230	226	230—2310

Judge, W. Mussehl.

Wurfflein Rifle and Pistol Association.

PHILADELPHIA, April 9.—Three members of the Wurfflein Rifle and Pistol Association tried their hand at 25yds. with pistols on S. A. target with the following result out of possible 100: H. J. Mehard 90, E. Travis 82, J. J. Mountjoy 80.

Scores made at 25yds. with rifles, 1½ in bullseye, ¼in. ring: H. J. Mehard 244, J. J. Mountjoy 242, W. Wurfflein 241, E. Travis 241, A. J. Yerg y 241, E. L. Gardiner 239, Leslie Wood 238, E. C. Goddard 236, J. C. Wurfflein 225.

Trap Shooting.

All ties divided unless otherwise reported.

May 11-12.—Cortland County Gun Club, kingbird tournament, Cortland, N. Y.

May 12.—Unknown Gun Club, at Dexter Park, Long Island.

May 12.—Newark Gun Club, at John Erb's, Bloomfield avenue, Newark, N. J.

May 14.—New Jersey State Trap Shooter's League, at Rutherford, N. J.

May 16.—Paterson Rod and Gun Club, regular shoot, at Paterson, N. J.

May 19.—Essex Gun Club, monthly prize shoot, Jersey City Heights Gun Club grounds, Marion, N. J.

May 19.—Falcon Gun Club monthly shoot, at Dexter Park.

May 16-19.—Capital Gun Club annual tournament, at Washington, D. C. Arthur S. Mattingly, Sec'y.

May 17-18.—Oregon State Sportsmen's Association tournament, Salem, Ore.

May 17-19.—Grand tournament at Indianapolis. For programme, etc., address Chas. Polster, 149 Indiana avenue, Indianapolis.

May 17-20.—Annual tournament of Kansas City State Sportsmen's Association, at Council Grove. G. W. Cleck, Sec'y.

May 20.—Jamette Gun Club, at Dexter Park.

May —.—New Jersey Trap-Shooter's League, fourth team contest, on grounds of Boiling Spring Gun Club, Rutherford, N. J.

May 20.—Parkway Gun Club, Dexter Park, Long Island.

May 20.—Atlantic Rod and Gun Club, at West End, Coney Island.

May 23-25.—Altoona, Pa., first annual tournament, at Wapsonocken Shooting Park. For programme address W. G. Clark.

May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.

May 24-26.—Knoxville Gun Club, annual tournament, at Knoxville, Tenn.

May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.

May 25.—Glenmore Rod and Gun Club, monthly shoot, at Dexter Park, Long Island.

May 26.—Emerald Gun Club, at Dexter Park.

May 26-27.—Harrisburg Shooting Association, third annual spring tournament, at Harrisburg, Pa.

May 27.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.

May 30.—Canajoharie Gun Club, king bird tournament, at Canajoharie, N. Y.

DRIVERS AND TWISTERS.

THE month of May will be a record month for trap-shooters all over the country, and the ammunition and target manufacturers will reap a harvest from the sale of their products. Next week we have the Eastern New York League tournament at Johnstown; Missouri State tournament at Kansas City; Independence, Ia., tournament; Vicksburg, Miss., tournament; Canton, Ill., tournament, and last, but by no means least, the tournament of the Pittsburgh Gun Club, assisted by the Interstate Manufacturers' and Dealers' Association. The following week we find tournaments at Dallas, Tex.; Columbus, O.; Mankato, Minn.; Geneseo, Ill.; Grand Island, Neb., and the great big affair of the Williamsport (Pa.) Rifle and Gun Club. The following week comes Salem, Ore.; Indianapolis, Ind.; Kansas City, Mo., and the Capital City tournament at Washington, D. C. The last week in May our list of fixtures shows Des Moines, Ia.; Knoxville, Tenn.; Harrisburg, Pa., and Windsor, Ont.

* * *

The following letter has been received from Elmer E. Shaner, of Pittsburgh, Pa., anent the great interstate shoot to be held there next week: "The Interstate Manufacturers' and Dealers' Association's trap-shooting tournament, to be given at Pittsburgh May 3, 4 and 5, gives every promise of being the largest ever given by this Association. The Pittsburgh Gun Club is boomers everything at home, and the boys are practicing nearly every day to get in good shape for it, as they want to make a good showing against what they are pleased to call the 'cracks.'"

* * *

FOREST AND STREAM will hold forth at the Hotel Schlosser, Pennsylvania avenue and Sixth street, during the Interstate shoot at Pittsburg. Call and see us!

* * *

The Independent Gun Club announce a tournament to be held at Plainfield, N. J., on July 21 and 22, when bluerock targets will be thrown from five expert traps. The events will be open to all and no handicaps will be imposed. The grounds of this club are beautifully located for a summer shoot and a pleasant time is assured.

* * *

The Boiling Springs Fish and Gun Club of Rutherford announce an all-day tournament, in connection with the fourth monthly team contest, of the New Jersey Trap Shooters League. Shooting will begin at 8:30 A. M., and continue until dark. I am pleased to state that the club will use two sets of five traps each, instead of one set of ten as at the previous contests. This will enable sweepstake shooting to continue all day on one set of traps while the other is being used for the team contest. Bluerock targets will be used and the traps will be spring, by means of Paul North's electric pull.

At the tournament of the Knoxville (Tenn.) Gun Club on May 24 25 and 26, the club will add $500 to the purses and will also offer a number of valuable merchandise prizes. This is a big improvement over the old plan of offering guaranteed purses.

* * *

Considerable discussion has been indulged in among the managers of the annual tournament of the New York State Sportsmen's Association, to be held at Maple Bay, Syracuse, on June 13 to 19 inclusive, as to the advisability of throwing any of the sweepstake events open to non-residents of the State. During the bluerock tournament at Syracuse last week the writer, in a conversation with Al Spangler and Charley Mowry, suggested that all the programme events be "closed," but that in order to give non-resident visitors an opportunity to enjoy themselves an extra set of traps be provided for their use. The suggestion was favorably received and the above gentlemen stated that they would use all their influence to have provision made for the non-resident shooters. At this point Paul North offered to come to Syracuse with a set of expert traps, electric pulls and a load of bluerock targets for the use of the "non-residents," and further guaranteed to assume all the duties of running the "non-resident" events. This offer was also favorably received, and I am confident that in the near future we will be able to announce that a series of "non-resident events" will be included in the regular programme.

* * *

J. Harvard Brouse, one of the best known sportsmen in Philadelphia, a rattling good target and live bird shot and a genial companion withal, has assumed full control of the Atlantic City Gun Club house and grounds, at the Inlet, Atlantic City, N. J. Mr. Brouse will be pleased at all times to see any of his friends at this popular resort, and will always be ready for a friendly shoot.

* * *

In the recent performance of Rollo Heikes—breaking 509 targets in 40m. 40s.—he was to have used three L. C Smith guns, but as one of those furnished had too much drop, he did the most of his work with two guns. This speaks well for the "lasting qualities" of this arm.

* * *

The Johnstown (N. Y.) Gun Club has issued an attractive programme for their tournament to be held in conjunction with the team contests of the Eastern New York Trap Shooters' League on May 4. Kingbird targets will be used and a great day's sport is promised.

* * *

A pleasant letter from E. C Rudge, Secretary of the Cortland County (N. Y.) Gun Club informs us that a kingbird tournament will be held by that lively organization on May 11 and 12, when the new club house will be formally opened. On the first day the entries will not exceed fifty cents per sweep, and shooters may shoot for birds only if they wish.

* * *

Syracuse is to have a new gun club and FOREST AND STREAM is first to proclaim the fact. The new organization, which will be known as the Syracuse Gun Club, will be to the Central City what the Riverton Gun Club is to Philadelphia, excepting that it will be a little less exclusive. The prime movers in the formation of the new club are Al Spangler, Harvey McMurchy, W. E. Hookway, Geo. W. Hollaway, A. C Ginty, Monroe Smith, Charles L. Becker, W. H. Holden, D. E. Pettitt, Geo. Mosher, Horace White, Bert Smith, Henry M. Chase, Geo. Larned, Harry G. Durand, F. C. Eddy, H. R. Frazier, John E. Harwood, Dr. Geo. Nearing, Wm. Nottingham, Alfred Wilkinson, W. S. Andrews and Charles Andrews, all of whom are respected business men of the city, and enthusiastic sportsmen as well. The club has procured grounds near the Syracuse University, the electric cars passing directly by them. At present the work will be confined to target shooting, although live-bird shooting will be inaugurated in the near future. The club has purchased ten expert traps with electric pulls, and will throw bluerock targets exclusively. The price per target to be paid by members will be just enough above the cost of the target to clear the running expenses.

* * *

Harry R. Becker, formerly with Kendrick & Prettie, has got into the shell-loading business, at 124 S. Salina street, Syracuse.

* * *

The shooters up in the State of Washington are making great preparations for the Pacific Northwest tournament, to be held in Seattle on June 17, 18 and 19. W. A. Hardy and H. H. Lewis, from the Seattle Rod and Gun Club; Frank Pontius and G. G. White, from the Queen City Rod and Gun Club, have been appointed a committee to decide upon grounds, and the chances are that those at West Seattle will be decided upon.

* * *

We have received from Montgomery Ward & Co., of Chicago, one of their handy gun club score books, which commends itself at first sight. The book, which is bound in flexible cloth, contains 100 scores sheets, each 7½x11in., ruled for 25 scores of 25 shots each. Every alternate leaf is perforated, so that by the use of a sheet of carbon each score may be duplicated and the duplicate copy removed from the book and sent to FOREST AND STREAM. Each page also gives space for the recording of the scores. The book is very handy and a copy should be owned by every gun club. It is sold at $1 a copy.

* * *

Another convenient little book published by this firm at 10 cents per copy gives all the modern rules governing live bird and target shooting, as well as many useful hints for loading and handling ammunition. The book is a convenient size for the vest pocket. C. H. TOWNSEND.

Vermont Sharpshooters.

PUTNEY, Vt., April 15.—The Putney Rod and Gun Club held their first regular shoot on their grounds this afternoon. The day was raw and chilly and a flawy northwest wind prevailing made clean scores impossible. The club has recently enlarged and improved its grounds, and with a steadily increasing membership the outlook for the coming season is most promising. The contest for the gold medals was opened to-day with Crosby winner in class A and Wing winner in class B, with the following scores:

Class A.

Willard	0100010100—3	Bailey	1110000001—4
Crosby	1100 00111—6		

Class B.

Ayer	0001010001—3	Wing	0110001101—5
Marcy	0010001110—4	Smith	0 0101000—2
Pember	0100031011—4	Stowell	1100100000—3
Robertson	0000010010—2		

Below are given the scores of April 20.

No. 1, gold medal contest, 10 birds, unknown angles:

Wing	1110011100—6	Ayer	1110011101—7
Murphy	0001000100—2	Willard	0001110111—6
Crosby	0001110101—4	Robertson	1100110100—6
Davenport	0000100011—3	Marcy	0111111111—9
Pember	0011100001—4		

Shooter, Gun, Shells.

Editor Forest and Stream:

To keep up with the times I will say: "Funny isn't it?" when a man makes a good score he wants everybody to know it, and to make the story sound, shooters (as a rule) say it was the gun or the shells or powder or some other thing; not the man. In this case as I have nothing to say about the gun I used, only just to admit that I used a gun to shoot with, so I am going to lay it on to the shells I used, which were U. M. C. (Dual) machine loaded shells. At a public tournament at Moodus, Conn., April 15, I shot at 150 single targets and missed 15. On my first 100 birds shot at, (with 8 pair of doubles included), I broke 94. I used the A load black powder and bought my shells on the grounds.

HARTFORD, Conn. C. H. BURBIDGE.

Trap at Watson's Park.

BURNSIDE, Ill., April 19.—Scores made here to-day by the Chicago Shooting Club for the club medal, 20 live pigeons each, Illinois State rules:

Wadsw'th	22202121211112110022—17	J Watson	11022121212122112012O—17
Hamline	22012021021122202122—17	B Rock	12212021211122121212—19

Hamline has a handicap of 3 birds and Rock 1 and are tied for the medal. They will decide it next shoot.

Same day, target medal, 25 bluerocks each: B. Rock 19, L. M. Hamline 12.

Score of the Audubon Club, April 20, for club medal, 20 live pigeons each, rise (prepared) Illinois State rules:

Felton	11102012222320220212—15	C Morris	10120122000020100220— 9

* Guest. RAVELRIGG.

The Royersford Tournament.

THE following scores were made at the tournament of the Elk Park Shooting Association, held at Royersford, Pa., on April 19, 20 and 21:

The First Day.

No. 1, 10 singles, $1 entry: Landis 9, Trego 7. Fort 6, Shaaber 4, Maiz 3. Buckwalter 10, Weinert 10 Thurman 8, Johnson 7.

No. 2, 15 singles, $1.50 entry: Landis 13, Trego 12, Shaaber 8, Fort 10, Maiz 5, Buckwalter 12, Weinert 12, Thurman 15.

No. 3, 10 birds, entrance $1: Matz 6, Trego 9, Shaaber 6, Thomas 6, Fort 7, Weinert 8, Thurman 7, Johnson 9, Landis 8, Buckwalter 9.

No. 4, 15 birds, entrance $1.50: Landis 11, Thurman 12 Buckwalter 14, Miller 14, Shaaber 9, Fort 11, Trego 12, Weinert 13, Johnson 12.

No. 5, 20 birds, entrance $2: Landis 12, Thurman 15, Miller 19, Fort 8 Buckwalter 16, Shaaber 16.

No. 6, 10 birds, $1 entry: Miller 8 Landis 9, Thurman 7, Johnson 8, Fort 7, Crothers 5, Shaaber 8 Buckwalter 7, Leidy 3, Trego 8.

No. 7, 10 birds: Landis 9, Miller 10, Fort 7, Crothers 5, Shaaber 8, Trego 9, Buckwalter 8, Thurman 8, Johnson 10.

No. 8, 15 birds: Thurman 15, Miller 12, Fort 11, Shaaber 11, Johnson 8.

No. 9, 10 birds: Thurman 8, Fort 7, Weinert 8, Shaaber 8, Miller 7, Johnson 9.

The Second Day.

No. 1, 10 birds, $1: Miller 4, Quimby 8, Shaaber 5, Buckwalter 9, Thurman 10, David 8.

No. 2, 15 birds: Miller 13, Buckwalter 12, Thurman 13, Shaaber 7, David 15. Quimby 11.

No. 3, 10 birds: Miller 8, Quimby 5, Shaaber 5, Johnson 9, Buckwalter 8 David 8, Thurman 8.

No. 4 15 birds: Miller 14, Quimby 11, Shaaber 7, Buckwalter 13, David 11. Thurman 12.

No. 5, 10 birds: Miller 5 Quimby 5, Hines 7, Buckwalter 9, David 8, Shaaber 2, Johnson 9, Thurman 7.

No. 6, 15 birds: Miller 14, Quimby 9, Johnson 12. Thurman 13, Shaaber 7, David 10, Buckwalter 14, Clayton 11.

No. 7, 15 birds, $1.50: Miller 13 Quimby 9, Thurman 12, David 10, Shaaber 6 Johnson 11, Clayton 10, Buckwalter 15, Sneck 5.

No. 8, 15 birds, $1.50: Miller 15, Thurman 12 David 13, Shaaber 8, Clayton 8, Evans 13, Smeck 4, Buckwalter 15, Quimby 7.

No. 9 10 birds, $1: Miller 10 Quimby 3, Thurman 7, David 8, Clayton 8, Shaaber 4, Hines 5, Johnson 7, Buckwalter 9, Smick 3, Sheetz 4, Evans 8, Yost 9, Cassell 8.

No. 10 10 birds, $1: Miller 8, Thurman 9, David 10, Smick 5, Evans 8, Clayton 8, Buckwalter 9, Yost 9, Shaaber 7, Scheetz 7, Cassell 8.

The Third Day.

No. 1, 5 live birds, $4 entry:

The Columbus Gun Club.

COLUMBUS, O., April 11.—*Editor Forest and Stream:* At the annual meeting of the Columbus Gun Club these officers were elected: President, Henry S. Hallwood; Vice-President, Frank Wells; Secretary, Harry Irvin; Treasurer, John Field; Quartermaster, R. H. Babb; Executive Board—Dr. F. F. Lawrence, W. S. Ide, H. C. Park; Captain, Dr. G. M. Waters.

This is only the second year of the club, which was organized by Dr. Lawrence. Though young, it is an organization for the successful completing of which its authors may justly feel some pride, as its membership consists of some of our best citizens and represents some of the strongest and most reliable business interests of the city. Mr. Hallwood is the patentee of the popular Hallwood paving block; Mr. Wells is of the Tracy Wells Co., wholesale dealers in notions, sporting goods and blank books; Mr. Irvin, of Park & Irvin, wholesale and retail dealers in sporting goods; Mr. Field, teller Merchants' & Manufacturers' Bank; Mr. Babb, groceries and provisions; Mr. Ide and Mr. Park, both leading bankers; Drs. Waters and Lawrence, practising physicians who enjoy the confidence of all who know them, and who can use the scalpel as effectively as they can the hammerless; Mr. Simons, one of our most successful real estate dealers; Mr. Kerrins, of S. H. Kerrins & Co., and Mr. Russell, of the National Gaslight Co. These comprise a partial list of the active membership. The opening shoot will be held Wednesday, the 13th, and by the next week a new club house (donated by Mr. Hallwood), bluerock expert traps, North electric pull and plenty of birds will be the programme.

The latch string is out; come and visit the club and enjoy an afternoon of the manliest of outdoor sports. X.

A Promising Boy Shot.

WHILE at Utica on March 29, attending the kingbird tournament of the Oneida County Sportsmen's Association, and again at Syracuse on April 20 and 21, the writer was impressed by the good work done by young Martin Cavana, the fourteen-year-old son of Dr. Martin Cavana, of Oneida, secretary of the New York State Association of Railway Surgeons. On the former occasion the youngster shot at 35 kingbirds, breaking 33. This is a good

MARTIN CAVANA.

pace for a lad of his years. His weight is 90lbs. and he is inclined to a stocky build, with a good-natured face, determined chin and a piercing pair of gray eyes. By permission of his father he readers of FOREST AND STREAM are to-day presented with an excellent picture of the Oneida "Boy Wonder."

Young Cavana's first lessons in shooting were with a toy air rifle, with which he used to shoot sparrows. His first experience with the shotgun was at Sylvan Beach in 1891, when he bagged 280 plover during the season. He has a record of better than 93 per cent. at kingbird targets.

Great Shooting in Oregon.

PORTLAND, Ore., April 15.—We have had a memorial day for all shooters in this city. The weather was wet and disagreeable, but nevertheless quite a number of sportsmen went out to the shooting grounds either as spectators or as participants in the match for the Willamette Rod and Gun Club's gold medal for the champion 100 bird shooter of Oregon. This medal was gotten up for the purpose of showing the community at large that we have got some "real" shooters in Portland, and the result was as predicted, viz., that we have some of as good shots as there are on the coast, and in fact, as good as a great many of our Eastern cities can boast of, the only thing required being a little encouragement and which in the past number of years has been very limited. The first shoot during the day was for the much-talked-of and coveted Dudley diamond medal. The participants in this match were W. J. Riley, C. E. Hughes and L. A. Wheeler, who tied for this medal one week ago. The three decided to prove ownership and superiority by shooting off the tie on five single and two pairs of double bluerock targets. The first shoot resulted in a tie between Wheeler and Hughes, Riley falling out. The second shoot resulted in a victory for Wheeler, he killing 8 to Hughes's 7. Much enthusiasm was shown by all present throughout this match and when the winning bird was killed Wheeler was overwhelmed with congratulations.

The next shoot was for the championship gold medal at 100 single bluerock targets, entrance $5. There were not as many entries in this match as there would have been provided the weather had been more encouraging, but judging from the scores made it would be a good idea to have all shoots take place in the rain.

Following are the scores of the great event:

Hughes	1111111111101111111101111011111111111

Bluerocks at the Central City.

If the reader chances to be in the vicinity of Syracuse, N. Y., at any time during the trap shooting season he can do no better than to stretch a point and spend a few days in that town. Upon arrival he should stroll around to 118 West Railroad street, to the gun store of Wm. Prettie & Co., or to George C. Luther's restaurant, 25 West Fayette street, in one or the other of which places he will surely run across A. G. Courtney, Chas. H. Mowry, W. E. Hookway, G. W. Holloway, "Uncle Dan" Lefever, Al Spangler or some other members of the galaxy of enthusiastic sportsmen of the Central City who are always ready to ex end the right hand of fellowship and assure a good time to the visitor. If it happens to be a "shooting day" you will be taken out via the D. L. & W. railroad to the Maple Bay grounds of the Onondaga County Sportsmen's Club and initiated into the mysteries of target smashing. And here let me warn you that when you attempt to pit your skill against any of the parties mentioned above you will soon be convinced that you are at "a shooting match," whether you are introduced to kingbirds, bluerocks or Keystones. If the party uses the former 95 per cent. "may" give you a rating at the end of the day, and if either of the two latter targets are used, you will need to crowd very close to 90 per cent. in order to make your presence felt. Whether you shoot well or not, however, you will have a jolly time and will never regret your visit.

Maple Bay, where the above club holds forth, is about eight miles by railroad from the city of Syracuse and has a long-standing reputation as a popular summer resort. Onondaga Lake, on the shore of which Maple Bay is situated, is a beautiful sheet of water six miles in length and averaging one mile in wid'h. One curious feature of this lake is that while its water is perfectly fresh it is surrounded by salt wells, varying in depth from two hundred to three hundred feet. The reservoirs for the solar salt evaporation cover at least a thousand acres. This lake abounds with game fish, beside affording fine boating. It is here that the contests of the New York Anglers' Association will be held in June. A small steamer plies between Maple Bay and the "Iron Pier," in Syracuse, during the excursion season. Maple Bay has a commodious and finely equipped hotel, connected with which are spacious picnic grounds, a well stocked menagerie, aviary, natorium and other attractions. The shooting grounds are about a thousand yards from the hotel, the line of traps running southeast and northwest. The surroundings are such as to give a good light at all times. Connected with this article is an excellent cut of the new club house of the Onondaga County Sportsmen's Club, which is to be repainted and embellished in time for the State shoot to be held June 13 to 18 inclusive. At that time the grounds will all be leveled down and put in picnic order. It is likely that a large number of visitors will put up at the Maple Bay Hotel during the above shoot, as this will enable them to enjoy sailing, rowing or fishing during their off hors.

On April 20, the day after the Albany tournament, the writer, accompanied by Wm. R. Hobart, the bustling shooting salesman of Von Lengerke & Detmold, went to Maple Bay to attend the two days' tournament of the Onondaga County Sportsmen's Association, under the management of Paul North, the object being not only to give the shooters a chance to enjoy a couple of days' sport but to give the bronzed lad from Cleveland an opportunity to show the workings of his handicap system, electric pull, expert traps and bluerock targets. The weather of the opening day was delightful, and overcoats were discarded for the best part of the day. Over a score of shooters took part in the opening events, among them being W. R. Hobart, of New York; H. L. Gates and Gustavus Dexter, of the Oneida County Sportsmen's Association, of Utica; Harry B. Whitney, the old-time "boy wonder," of Phelps, N. Y.; George C. Mosher, the genial blonde who represents the Hunter Arms Co., of Fulton, N. Y.; Max B. Richardson, of Oswego; H. M. Livingston, Dr. W. H. Gibbs and James Bockus, of the Saratoga Gun Club; O. M. Paddock, of Watertown; Chas. W. Tuttle and G. W. Whyte, of the Auburn Gun Club, these comprising the out-of-town visitors.

The local club was ably represented by the genial Charles H. Mowry, who says the *Sporting Goods Gazette* is "a bonanza;" portly A. G. Courtney, who for so many years hustled on the road for the Lefever gun; fat, fair and more than forty "Uncle Dan" Lefever, who says the new trap score type of FOREST AND STREAM beats the world, as does the paper itself; six-foot and over A. C. Ginty, who is a master hand at trap work; Druggist Geo. W. Halloway, who is as expert in shooting as he is in compounding medicines; Wm. Prettie, leading sporting goods dealer of the city; W. E. Hookway, who owns the finest partridge dog in the State; George C. Luther, a young man in years but a veteran at live bird or target work; Ed Hudson, another of the old-timers; Jim Montgomery, who busied himself with the financial business, and several others whose names I cannot recall at this writing. The club members were untiring in their efforts to entertain the visitors, and the writer is indebted to them for many courtesies.

All of the events filled well, and the scores made were highly satisfactory.

At 2 P. M. about fifteen shooters boarded a D. L. & W. train at Syracuse with the intention of having some sport at the Bay. Instead of reaching the ground at 2:15, however, they got there at 5 o'clock, being detained in the meantime by a wreck at Pleasant Beach, about midway between Syracuse and the grounds. The wreck was caused by the carelessness of a gang of laborers who were repairing the track, and who, after removing a section of rail, neglected to signal a down freight train, the result being that the engine and one car were overturned. Fortunately no one was injured.

The day was a very pleasant one throughout, and the entire party was immensely pleased at the workings of the targets and traps, both of which were new on these grounds. The shooters were unanimous in their approval of the North system of handicapping which they declared was the most satisfactory of any they had ever tried. In fact this is the opinion of all who have shot under the system. The leaders in average were as follows: C. H. Mowry and Geo. C. Luther $90^{8}/_{10}$ each, H. B. Whitney $89^{3}/_{5}$, W. H. Hobart $88^{7}/_{10}$, Paul North $84^{2}/_{10}$, C. W. Tuttle and A. C. Ginty $83^{3}/_{10}$ each, A. G. Courtney $82^{8}/_{10}$. At noon the party was served with a fine dinner by W. S. Barnum, the meal being served in the spacious room on the second floor of the club house. In the evening a number of the visiting and local sportsmen assembled in Prettie's gun store, while others gathered in George Luther's homelike place and fought the battles over again, making higher scores than at the traps, as a matter of course. When the parties dispersed it was with the distinct understanding that on the morrow everybody was to make big scores.

Below will be found in detail the result of the day's work:

No. 1, entrance $1:

The Second Day's Work.

Thursday opened with a heavy rain and heavy clouds through which could be seen no promise of clearing. This did not affect the shooters however, and when the fun began, at ten A. M., about a quarter of a hundred enthusiasts were on hand. Besides those mentioned as being contestants on the opening day there were Dr. M. Cavana and his thirteen year old son, of Oneida; M. L. Forsyth, W. S. Gavitt, Henry Killick and Dr. J. W. Putnam of the Spencer Sportsmen's Club of Lyons, N. Y.; N. H. Lansing of Fayetteville; J. Vanderloo of Auburn and H. Kallies of Utica. The rain came down in torrents until near noon, but despite this drawback the sport went along as merrily as if the sun had been shining brightly. At noon some few of the shooters left for home but others arrived in time to keep the events well filled. After dinner the rain slacked up, but at three o'clock it took a fresh start and kept at its work until dark. The shooting, notwithstanding, was continued until train time, and everybody declared the day an enjoyable one despite the moisture.

A feature of the day was the single target shoot for the benefit of the Al Bandle Memorial Fund which netted $35.75. The list of subscribers were as follows: C. H. Townsend, A. G. Courtney, C. Waller, W. E. Hookway, A. S. Hunter, M. Cavana, H. B. Whitney, W. Whyte, C. W. Tuttle, G. C. Luther, H. McMurchy, M. Smith, H. Kallies, N. W. Duguid, W. S. Gavitt, W. H. Peters, G. C. Mosher, A. C. Ginty, F. C. Percival, O. M. Paddock, D. M. Lefever, Ed Hudson, P. North, N. Ayres, S. W. Holloway, H. M. Livingston, H. Hylney, W. Prettie, D. Walters, A. E. Spangler, H. H. Lansing, Geo. McMaster, F. G. Strange, H. L. Gates, W. S. Barnum, W. R. Hobart, J. Vanderloo, C. H. Mowry.

Each of the subscribers to this fund were presented with a loaded 12-gauge U. M. C Co.'s green "trap" shell, each of which bore the following inscription: "In memoriam of Al. Bandle. One of the last shells he loaded." The shells were loaded with 2¾ drs. of American wood powder and 1¼oz. of chilled shot, and connected with them is a brief story. When Al. Bandle arrived in Syracuse, it will be remembered, he was suffering from a severe cold. On Jan. 20, in company with members of the Onondaga County Sportsmen's Club, he took part in some kingbird contests at Maple Bay. On that day he defeated Al. Spanger by breaking 47 kingbirds in a 50-target race. Before leaving the grounds Bandle and Spangler, the two "Cincinnati Als," arranged to shoot a team match the following week against "Uncle Dan" Lefever and Charley Mowry, each man to shoot at 50 kingbirds. On the same evening Bandle and Spangler, at the latter's residence loaded shells to be used in the team match which was never shot, as Bandle was taken sick the next day and did not again leave his room alive. The shells given to the subscribers at the memorial shoot were the ones loaded at Spangler's house.

During the day the averages did not range quite as high as on Wednesday, owing to the bad weather conditions, but they were highly satisfactory. The handicap system made many warm friends and was recommended on all sides. The leaders in averages were: W. R. Hobart $88^{4}/_{10}$, H. B. Whitney 86, Paul North $83^{3}/_{10}$, A. G. Courtney $82^{8}/_{10}$, C. H. Mowry $82^{1}/_{10}$, G. C. Luther $81^{6}/_{10}$. Hobart shot in ten events and Whitney in nine, while each of the others shot in eleven. Below is the result of the day's shooting:

No. 1, 10 birds:

H C Gates	0111011111—8	Mowry	0111101101—7

The Trap at Richfield Springs.

RICHFIELD SPRINGS, April 23.—The newly organized Richfield Gun Club held a match shoot yesterday afternoon, the losers to entertain the winners with a supper. Some of the contestants who have a low score are new members of the club. Below will be found the record of the afternoon's contest:

Chamberlin's Side.		White's Side.	
Cham-		White	0110110000100100111—10

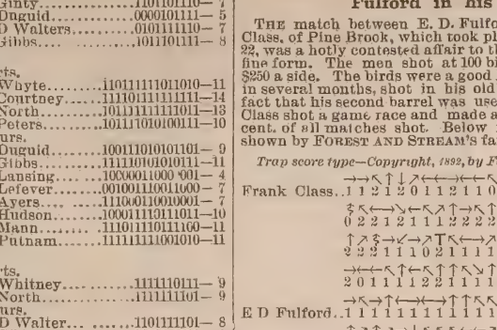
Forest and Stream's Trap Score Type.

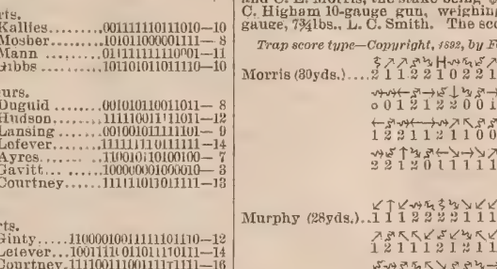


THE FOREST AND STREAM has devised and had copyrighted a font of graphic trap score type, by which they show the flight of live birds without using the initials R Q D for right quartering driver, etc. They used it in their report of the recent Haggerty-Mussey match. It looks very pretty, is a great space saver and is convenient for the reader. This popular journal has lately been enlarged to thirty-two pages and improved in many ways.—*Altoona Gazette.*

In this issue we use T for a towerer and H for a hoverer.

Fulford in his Old Form.

THE match between E. D. Fulford, of Harrisburg, and Frank Class, of Pine Brook, which took place at Marion, N. J., on April 22, was a hotly contested affair to the finish, both men shooting in fine form. The men shot at 100 birds each for a stake said to be $250 a side. The birds were a good lot. Fulford, for the first time in several months, shot in his old time form, as is shown by the fact that his second barrel was used only eighteen times to kill. Class shot a game race and made a score which would win 90 per cent. of all matches shot. Below is the full score of the match, shown by FOREST AND STREAM'S famous trap score type:



Trap score type—Copyright, 1892, by Forest and Stream Publishing Co.

Murphy Outshoots Morris.

AN interesting match at 100 live birds each took place at the West End grounds, Coney Island, on April 21, between C. Murphy and C. E. Morris, the stake being $100 a side. Murphy used an E. C. Higham 10-gauge gun, weighing 9lbs., while Morris used a 12-gauge, 7¾lbs., L. C. Smith. The score of the match follows:

Trap score type—Copyright, 1892, by Forest and Stream Publishing Co.

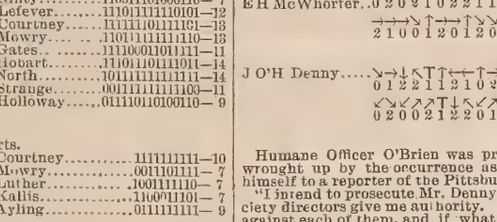
Humane Officer O'Brien was present and his feelings were so wrought up by the occurrence as to impel him to thus express himself to a reporter of the Pittsburgh *Leader:*

"I intend to prosecute Mr. Denny and Mr. McWhorter if the society directors give me authority. I have the facts for a good case against each of them, and if what I witnessed is not cruel under the law then there is no cruelty. It consists of this: When a bird fell inside the 60-yard boundary three minutes are allotted for it to rise again or flutter across the limiting line. In that time the gunner is not permitted to use his second barrel if the pigeon remains on the ground. At the end of three minutes a dog is sent after the bird, which may then flutter over the boundary, in which case it is accounted as lost and no account is taken of it no matter what its condition may be. At yesterday's match fully 30 per cent. of the pigeons used escaped in a more or less crippled state, but all were able to get beyond my reach except two that were captured by two boys whom I engaged for the work. If the wounded birds were killed as quickly as possible there would be no cause for complaint, but absolutely no attention was paid to those pigeons that cleared the boundary.

"The gun clubs are presuming on the recent decision of Mr. Justice Paxson in an appeal on a live-bird shoot, but I think they will find that they are making a mistake. Or, if I am mistaken and not they, and Justice Paxson's decision means that what I witnessed yesterday, and what may be seen at all similar shoots, is not cruelty, then dog and chicken fighting should be legalized. Chicken fighting is a thousand times more humane than pigeon shooting, and should be permitted if live birds are to be mangled as is the case. However, I intend to see if that decision covers the case I obtained at the Denny-McWhorter shoot. I cannot believe that it does, and will try to have a test made of it. If that is not cruelty under the law then nothing in the dumb animal line ought to be called inhuman. Dog and chicken fighting is refined in comparison. I cannot prosecute in the Exposition Park case because I could not connect the gunners with the escaped wounded birds, but in this case I am absolutely certain of all these facts."

Mr. Denny, in an interview with the Pittsburgh *Gazette* man says:



"Agent O'Brien's interview is misleading and places Mr. McWhorter and myself in a false light. In the first place, let me say, no true sportsman will wilfully, maliciously or cruelly harm any bird or animal, no matter how insignificant. We both claim to be sportsmen. I can answer for myself, and I think for Mr. McWhorter, that we tried, indeed, were very anxious, to kill every bird, instantly, upon being liberated. Under the act of 1879 wilful, malicious and wanton cruelty has to be proven. It would, I think, be a very difficult matter to prove this against either McWhorter or myself in the light of the recent decision of the Supreme Court."

If Humane Officer O'Brien feels anxious for a test case the Pittsburgh people will probably spend a few dollars to open his eyes to the error of his ways.

Denny Defeats McWhorter.

PITTSBURGH, Pa., April 22.—The long-talked-of match at 50 live pigeons each for $100 a side between J. O'H. Denny and E. H. McWhorter took place on the private grounds of the King estate in East Liberty, yesterday, a large crowd of sportsmen being present. The weather conditions were unfavorable for good work. The result of the match is appended:

The Tournament at Eagle Grove.

EAGLE GROVE, Iowa, April 20.—The tournament of the Eagle Grove Gun Club, held in this city April 19 and 20, was not largely attended, owing to the beastly weather. The first day the wind blew a strong gale from right to left across the traps, making the shooting very uncertain and good scores impossible. The second day it snowed, hailed, rained and a strong wind still came from the same direction. I think this the most disagreeable day I ever saw. The Gun Club gave the visiting sportsmen a banquet the evening of the first day, which was greatly enjoyed by all present. The Eagle Grove boys are royal entertainers, and made everyone happy in spite of the bad weather. Among the visiting sportsmen were Hon. J. G. Smith, S. S. Sessions and Dr. Banks, of Algona; Steinburg and Sundstrum, Bancroft; George Hughes, Fonda; G. P. Christianson and Boyd, Randall; Georgeson, Story City; C. M. Grimm, Clear Lake; Buthlops, Iowa Falls. Inclosed please find scores of events shot:

Fifteen singles, entrance $1.50: Budd 9, Sundstrom 9, Wood 9, Hughes 11, Wyman 11, Lum 8, Grimm 14, Georgeson 12, Smith 10.

Six singles and 3 pair, entrance $2: Grimm 10, Wyman 7, Lum 4, Hughes 11, Budd 8, Georgeson 12, Buthulph 6, Christianson 10, Wood 8.

Fifteen singles, entrance $2.50: Grimm 10, Hughes 8, Budd 11, Wyman 12, Georgeson 14, Buthulph 9, Moats 10, Boyd 2.

Fifteen singles, entrance 1 50:

Hughes	111111111110111—14	Grimm	011111111111111—14

CHICAGO AND WESTERN TRAPS.

CHICAGO, Ill., April 23.—Mr. J. G. Schaaf, of St. Louis, has the following libelous comment to make upon the quality of the Chicago pigeon game:

"St. Louis, April 19.—I was very sorry that I could not come up to your city with Haggerty and Dr. Starakloff, but was rather glad that I did not when I saw and heard them talk when they came back. What is the matter with all those winter pigeon shooters in Chicago? Were they afraid of the St. Louis summer shooters? as they call them. Any time any of your boys want a race down here tell them to give us six hours' notice and we will have birds and man ready. Good birds, too, and it won't take fire department traps to start them either."

Wait till we catch St. Louis out alone some night, and we'll see about this.

An interesting but mysterious telegram was received from the East here last night, which read as follows:

"Billy Mussey's Madison St. Billiard Hall, Chicago, Ill.—Fulford nine ninety-six. Class ninety, three good birds.—C. TILLOTSON."

At least the above is the construction put on the telegram. If Mr. Fulford and Mr. Class had only 3 good birds in the lot they were in hard luck.

I'm afraid we'll get tangled up again in the old question of Eastern and Western birds. To-day Mr. Frank Lawrence, of New York, was in my office. Mr. Lawrence was raised at Geneseo, Illinois. When a boy he used to trap for the shooters in the State tournaments when they were held at Geneseo, in the days of plunge traps, and has since pursued the sport of pigeon shooting through higher degrees than this humble one, and is, I take it, known about New York shooterdom. Well, Mr Lawrence told me that he had a talk with Mr. Fulford just before he left New York, and that in a general conversation Mr. Fulford remarked that an 85 gait was a good one on the Chicago grounds, on account of the wind. And yet, methinks, it was but yesterday or so that Mr. Fulford gave it out that the birds in the Woodlawn Park match were 20 per cent. harder than the birds in Chicago. In the words of the German politician, "Vy vas der r-r reason for dose?" There is about a 40 to 60 per. cent. gap to be filled by Mr. Fulford's temporary going off form. He must be worse out of shape than a last year's baseball.

By his score of 96 we may suppose one of two things: Either that Mr. Fulford is getting back to his form, or getting back to the place where he can make better scores.

According to the above Mr. Fulford ought to just about shoot the vermiform appendix out of every bird that gets up in his race with Mr. Elliott, and also some more. I can't figure it out any other way. If he does not he will have to apologize, as the leader of the influence committee did to the widow, when they found they had hung the wrong man. "Excuse us, ma'm, but the fact is, you've got the laugh on us this time."

If Mr. Fulford can retain his grip on his 96 form, and carry it West, where the birds are 20 per cent. easier, he stands a show to win against Mr. Elliott. If his form proves but temporary, like the poet's "snowfall on the river,"

"Or like the rainbow's fleeting form,
Evanishing amid the storm,"

and if Mr. Fulford shoots at Kansas City as he did here, then I fear we shall have to pronounce upon him a verdict like that of the native coroner's jury in India, who sat upon the remains of a victim of misplaced confidence. "Panzo died of being eat by a tiger. There was nothing left of him but a few fingers, which probably belonged to the right or left hands."

But we can't tell about that, because we can't tell anything about the actual quality of Eastern and Western birds as compared with each other. As near as I can get at it, there are 5 different sorts of pigeons—1st, the trained Eastern bird; 2d, the Kansas City driver; 3d, the plain cooking pigeon; 4th, the J. Watson bird (none genuine without the signature); 5th, the sort of bird a fellow talks about when he isn't there.

It occurs to me that possibly the Eastern reference to good birds may be meant as applying to the moral character of the bird. Thus, a bird might not be pretty, but good. This brings additional difficulty into the problem. I regret to say that many of our Western birds are of very dissolute habits, and must really decline to press the comparison further. I can readily see, however, how this theory would explain Mr. Fulford's position in regard to the matter. Shall we infer that there were some Sunday-school birds in the Fulford-Class match, and in the matches at Woodlawn Park?

A pleasant feature of the Iowa State Sportsmen's Association annual meeting at DesMoines, May 22-26, will be a banquet to visiting sportsmen, given by the Highland Gun Club on the evening of the 25th. These banquets appeal to the finer side of the shooters' nature. They should be more common at our large meetings. The shooter should not be taught merely to burn powder and count his winnings at a shoot. The banquet, in due form and dignity, though not coldly formal, should be there for the shooters to attend and to remember. Trap shooting is going upward in all ways. Let the shooter have the banquet. It helps up. It brings shooters together. It makes them think more of themselves and of each other.

Mr. Geo. W. Rexroat, of Virginia, Ill., the plucky young shooter who divided the honors with Capt. Bogardus in the two earlier matches, writes me as follows of the last match, which was shot last week at Virginia:

"The day was rather favorable, but in the latter part of match it began raining. The birds were, with very few exceptions, first class, nearly all being straightaway drivers and twisters. There were about 175 or 200 spectators, and all seemed to enjoy the race very much, as it was something novel. The conditions of the race were as follows: 50 live birds each, for a purse of $100 and gate receipts; 15yds. rise, H. & T. traps, with a 10yds. circle drawn around the trap, any bird falling inside the circle to be lost; then 80yds. boundary; gun held below elbow until bird is on wing, use of one barrel only. Score, Bogardus 44 and one dead outside. Rexroat 41, with one dead inside circle and one out of bounds.—G. W. REXROAT."

This leaves the old Captain winner of 2 out of the 3 matches, but Mr. Rexroat is certainly much to be complimented on his close running. This last race was pretty nearly the Captain's old game, H. & T. traps, one barrel, gun below elbow. With the 10yds. circle clause, and one-barrel shooting, it seems to me that the shooting was extraordinarily good for both men. There are plenty who do not beat it with both barrels. E. HOUGH.

The Newark Gun Club.

THE Newark Gun Club held an outing at John Erb's on April 14, half a dozen members comprising the party. The birds were scarce and the regular club contest was declared off until May. The event of the day was a match at 21 birds each for $25 a side, between Frank Lawrence of New York and Allen Willey of Hartford, Conn. The match resulted in a tie, which was shot off at 5 birds each with the following result:

Lawrence	121200112120220111200221—19	00211—3		
Willey	2x111011112101100101210—19	11102—2		

The following were also shot, the first being at 10 birds, $2 50 entry, the other at 4 birds each, $3 entry:

Collins	1111111110— 9	2211	2111	2112
Hollis	0111111101— 8	2221	1111	1111
Erb	1111111011— 9	....	....	....
Riggott	1111111111—10	1212	1121	2111
Willey	1111111101— 9	1211	1222	1011
Lawrence	1110111110— 8	2011	1210	0112

North's System Capture's Albany.

PAUL NORTH, the ruddy-faced lad from Cleveland, Ohio, inventor of the celebrated electric pull, visited Albany on April 19, put up a set of expert traps, adjusted the above-mentioned electric appliance, threw 2,770 bluerock targets, enforced his new system of handicapping and captured the hearts of the Albanians as well as of the visitors who were present. The day was a delightful one, the air being soft and balmy and the wind, from the left-quarter, just strong enough to keep the shooters guessing as to where to hold in order to powder the "aucers." The shoot was held on the new grounds of the West End Trap Shooting Association, at West Albany. These grounds have recently been acquired by the Association and are admirably situated, being about half an hour's ride from the railway depot. A few weeks ago a big sand knoll marked the center of the grounds, but energetic use of the shovel has caused this to disappear, the sand being used to form a barrier between the shooters and the traps. The traps, five in number, are set on the edge of a pit which is of sufficient depth and width to allow the trappers to do their work without assuming a cramped attitude. Back of the pit is a heavy timber shield, 4ft. high, and the sand barrier mentioned above slopes from the top edge of this shield to a point about four yards in front of the firing points. This is a novelty in the way of a barrier, and is on absolute guarantee of safety for the trappers. The surface has been sodded down and will look fresh and inviting in a short time. The club has erected a neat shooting house, about 30x20, one story high. The Association is in a very prosperous condition, with a fat treasury and about seventy-five members. Geo. W. Dorn, its president, is an enthusiastic veteran sportsman and one who is able to hold up his end either at field or trap shooting, and is always on hand when shooting is going on.

The attendance was rather light in the morning, but after dinners the events had good, fat entry lists. Among the visitors was the jolly Washington (D. C.) expert "Billy" Wagner, who shot in good form despite the fact that he was obliged to change spectacles; Wm. R. Hobart, Von Lengerke & Detmold's expert representative, who made an average during the day; Frank Northrop and J. C. Kennedy, both rattling good shots and jolly companions from Johnstown, N. Y.; the veteran "Uncle Sammy" Goggin, from Troy, who makes a hot pace for the younger boys; M. E. Roberts, the Green Mountain boy, who came all the way from Rupert, Vermont, to see his Albany friends and incidentally break a few targets. Horace B. Derby, editor of the "Rifle, Rod and Gun" department of the Albany *Argus*, one of the best known sporting writers in the country, acted as official scorer. This same bustling Derby, by the way, is a walking encyclopedia in the matter of records of New York shooters, having them all at his tongue's end, and woe betide the one who tries to get into a grade below his class when Horace has his eye around. Not only in records, however, is the well posted, but in all matters pertaining to land and water sports with the rod and gun he is a recognized authority, and his department in the *Argus* is "sworn by" throughout the State. President Dorn, Secretary "Adams," and other members of the association exerted themselves to entertain the party and keep things running smoothly, and they succeeded admirably. At noon the party discussed a substantial dinner at Schafer's Hotel.

It is worthy of note that Paul North was out of form for one or two events after dinner, although he had previously been shooting strong. Whether it was the amount of goodies consumed or the smiles of the winsome damsels in the dining-room that affected Paul deponent sayeth not. Billy Hobart and the Washington lad shot a stiff pace throughout. In the seventh event Billy Wagner scored 15 straight under the expert handicap. This was the first experience of any of the shooters under these rules, and I am safe in saying that every man was favorably impressed with its workings.

The table shown below gives a clear idea of how positions are likely to be changed in shooting under this equable system. The first line of figures gives the number of the events and the figures below show the positions held in each event by the four men who led the averages for the day, it being understood that where a shooter was first or second in any event, he shot as an expert in the event next following:

	1st.	2d.	3d.	4th.	5th.	6th.	7th.	8th.	9th.	10th.
Hobart	*1	*3	†1	*2	*1	*4	†2	*2	*4	†2
North	†3	†1	*1	†2	*2	*3	†1	*5	†5	†2
Wagner	†1	*2	*5	†1	*4	†2	*1	†4	†2	*3
Northrop	†2	*3	†5	†3	†2	*5	†3	†3	†2	*3

* Expert. † Amateur.

In speaking of the new system, Horace B. Derby thus expressed himself in the Albany *Argus* on the day following the above shoot:

"The new and peculiar conditions that governed the contests brought the excitement up to an unusual tension, and when a winner was 'dumped' by being handicapped under expert rules in the succeeding event, his demolition was received with shouts of delight from his brother shooters. On the other hand, praise and applause were not withheld from those who possessed the nerve and skill to shoot their way into the winning classes, a feat of more than ordinary moment with the new birds, traps and handicap system. To the gallant Cleveland boy who graced our tournament with his presence the credit is due to inaugurating a new era in trap shooting that will lift the sport from the somewhat beaten rut into which it had fallen, and no better wish could be expressed for his welfare than that he may make the good impression and meet with the same measure of success elsewhere that he gained at the Albany tournament."

Below will be found detailed scores of the day's work:

No. 1, 10 singles, $1 entry:

Sanders	0111111111 – 9	Wagner	1111111111 – 10
George	0101001010 – 4	Rineck	0110010011 – 5

Extra No. 2, 10 bluerocks, $1: North 10, Leon 6, Taylor 8, Goggin 6, Rockworth 9, St. Charles 8, Sydney 6, Wil is 5, George 5, Greer 6, Spinks 7, Hobart 10, Keays 5, Thorn 3, Saunders 10, Helm 3, Betts 6, Farnham 8.

Extra No. 3, 10 bluerocks, $1: North 8, Hobart 6, Sanders 8, Rockworth 7, Keays 5, Taylor 4, St. Charles 9 Spinks 8, Sydney 6, Leon 3, Willis 4, Richards 5, Caryle 5, George 8, Langley 2, Stone 6.

Pacific Slope Shots.

SAN FRANCISCO, April 17.—The Lincoln Gun Club held its monthly medal shoot to-day at the range on the Alameda shore. In laying out these grounds the club was long-headed enough to arrange them so that the shots would always be in harmony with the prevailing winds, otherwise to-day's must have been a complete failure. Under the circumstances, however, the event passed off to the satisfaction of all concerned. The following scores speak for themselves:

First class, 21 bluerocks.

Daniels	100111111111111111111 – 18	Wenzel	101111110101011111 – 16
Mellish	101110111111011011111 – 17	Quinton	011110111110010111 – 16
Forster	011111101111111111100 – 17	Cate	111101111011111100 11 – 15
Kainey	111101010110111111111 – 17	Whitney	111110100011110110 – 15
Burns	100011100111111111111 – 17	Porter	011111110111001001101 – 14
Cook	101111000111111101111 – 16	Fisher	110111001110111010000 – 12
Allen	111111111110101011001 – 16	Venker	011010000101001101111 – 12
Bolander	111011111000011111111 – 16		

Second class.

Franzer	111101010101111011111 – 16	Elliott	010100111101110001111 – 13
Olsen	111111010100011101101 – 14	Ostran'r	101000011101001011111 – 12
Coben	110011000101011111110 – 13	Gregory	011 0010000010000000 – 5

Second match, 12 singles: Whitney 11, Kainey 10, Franzen 10, Daniels 9, Allen 9 Cook 9, Ostrander 9, Brunes 3, Melntch 8, Venkner 7, Foster 7, Elliott 6, Cohen 6, Gregory 8, Bolander 6, Cate 6, Fisher 4 Carter 6.

Third match, 6 singles and three pairs: Franzen 10, Brunes 10, Cohen 7, Cook 7, Whitney 7, Cate 7, Daniels 7, Quinton 6, Anson 6, Karney 5, Ostrander 5.

Fourth match, 12 singles: Franzen 10, Karney 10, Cate 9, Cohen 7, Quinton 6, Anson 5.

Fifth match, 12 singles: Quinton 12, Cohen 9, Cate 9, Franzen 8, Karney 4, Anson 3.

April 17.—The California Wing Shot Club held its second regular match for this season at the Oakland racetrack to-day. A splendid lot of birds had been provided for the sport by "Uncle" Rice, who had also on hand a new retriever that did excellent work bringing in the dead and wounded pigeons.

The day was perfect for bird-shooting, the traps worked well, the attendance was large and altogether the meeting was the most enjoyable yet held for the present season.

The regular 12-bird contest was, of course, the principal feature of the day, and it proved to be the closest match ever shot off at the Oakland Track.

The full score was as follows:

Robinson	211111212200–10	Hunt	112022020201 – 8
Slade	220202201001 – 8	Kyle	211100110011 – 8
Haas	222020012222 – 9	Slack	1200100112l – 7
Barney	212011010 1 – 9	Dall	101011100111 – 8
Golcher	211002112001 – 8	Schroder	220200202001 – 6
Dudle	101110013002 – 6	Fay	220220l2 020 – 8
Cracknell	110112101021 – 9	Taylor	1200 0 0100 – 6

VICTORIA, B. C., April 19.—Members of the Gun Club held their first shoot of the season at Peoria blackbirds to-day. The scores at 25 birds were as follows: O. Weller 22, W. White 20, J. Switzer 17, W. Bickford 16. H. N. Suort 16, W. H. Adams 15, E. Gregg 15 Five shots each were fired on the rapid firing system, resulting in the following scores: Short 5, Adams 4, White 3, Weller 5, Bickford 3.

SEATTLE, April 16.—The Seattle Rod and Gun Club held its regular shoot this afternoon at its grounds in West Seattle. The best work of the day was done by J. N. Hardy, Lewis and Churchill.

First class.

Collins	0111101111100111110 – 15	10 11 11–5–20
Ewing	0111001111110100100 – 12	01 10 11–4–16
J N Hardy	1111110111111111111 – 19	11 11 11–6–25
Linder	1000100111111100100 – 11	11 10 11–4–15
W A Hardy	1110101111101111111 – 17	10 00 10–2–19
West	1011111010100101101 – 14	01 10 10–3–17
Churchill	1110111111111111110 – 19	10 11 11–5–24
Lewis	1111111111111111111 – 20	11 10 10–4–24

Second class.

Downing	1111100111101100101 – 14	10 00 10–2–16
Webber	1111110111111101010 – 16	00 11 10–3–19
Atkins	1010110110111110101 – 14	11 00 11–4–18

Third class.

Hoisington	0100100101010110101 – 9	01 10 10–3–12
Bean	1000101111010110011 – 12	00 10 10–2–14

Oneida County is Wide Awake.

UTICA, N. Y., April 16.—Since the tournament held here March 29 there has been blood on the local shooting moon and the end is not yet. Several shooters whose bumps have grown to an abnormal size have been doing some talking, and the result was that Messrs. H. L. Gates and A. H. Kallies measured their strength on Friday, April 8, at 30 singles and 10 pairs of kingbirds for the birds. This resulted in the following score:

H L Gates	11 10 11 01 10 11 10 11 11 10 11–15 111111111010111111111010111111–28–41
A H Kallies	10 00 11 11 10 11 11 11 11 10 11–15 101101110101111111111010111111–25–40

Then Gates and Kallies issued a manifesto to shoot any two members of the Oneida County Sportsmen's Association a match under the same conditions. This was promptly accepted by W. C. Harris, who selected Dr. Booth as his partner. It is understood that something more substantial than Crittenden's forfeit money for his match with Prettie went on this match. The match was shot yesterday and the result showed that Gates and Kallies had not overestimated themselves, as they won by four birds. Appended is the score:

Team shoot between Gates and Kallies and Harris and Booth at 30 singles and 10 pairs kingbirds:

H L Gates	10 01 11 11 11 11 11 11 10 10–15 10101011111111101110111111–26–41
A H Kallies	11 11 0 11 10 11 11 11 11 11 11–17 11110011010111101111111111–25–42–83
W C Harris	10 01 10 10 11 10 01 11 11 01–13 11100111111101010111111111–23–36
W H Booth	10 10 11 11 11 11 10 01 11 01–14 11111011111111111111111111–23–43–79

At the annual meeting the following officers were elected for the ensuing year: Dr. W. H. Booth, President; A. S. Hunter, Vice-President; Chas. R. Mizner, Secretary; O. A. Wheeler, Treasurer; H. L. Gates, R. M. Smith and Gustavus Dexter, Directors.

The association is in a very flourishing condition, having $1,100 in cash property.

We propose to buy new grounds near the West Shore depot and fit them up in fine shape. Upwards of $100 was donated in prizes to be shot for this season for average prizes, and the diamond badge will be shot for each week until Nov. 21, at twenty-five singles, the person winning it the greatest number of times to become the owner. Hereafter the O. C. S. A. will be represented at every tournament held in Central New York, and that they will get their share is the prediction of G.

Springfield Scores.

SPRINGFIELD, O., April 14.—*Editor Forest and Stream:* The following are the scores of the shoot held at Springfield, O., April 8 and 9. The U. S. Pigeons, which were used exclusively, made many friends by their excellent breaking quality when hit with shot:

No. 1, 10 singles, U. S. pigeons:

Sanford	1111101111 – 9	Hamilton	1111111111 – 10
Wright	1111011111 – 9	N Y	1111011111 – 8
Du Bray	0010010011 – 4	Sharp	1011101101 – 7
Pena	1111011111 – 9	Snorty	1111011111 – 9
Damm	1111011011 – 8	Dick W	1011110111 – 8

No. 2, 10 singles, U. S. pigeons:

Du Bray	1111111111 – 10	N Y	1110111011 – 8
Damm	1110 11010 – 7	Sherty	1101101111 – 8
Pany	1111111 1 – 10	Sharp	1110101111 – 8
Hamilton	1111011111 – 9	Young	1111111110 – 10
Wright	1111111110 – 10	Alpice	1111 01111 – 9
Sanford	1111111111 – 10	Penn	1111111111 – 10

No. 3, 15 singles, unknown angles, U. S. pigeons:

Wright	111111101111111 – 14	Walters	111111111111111 – 15
Sanford	111111111111111 – 15	Word	101111111101111 – 13
Perry	110111011111101 – 12	Robins	101010100100010 – 8
Hamilton	111011101101011 – 11	W Y	1100111010101 – 9
Penn	111111110 1111 – 14	Snorty	111101111111011 – 13

Young, of Springfield, and Rike, of Dayton, shot with the above, to fill squad; Young breaking 91 and Rike 84.

C. H. YOUNG, Sec'y.

Bluerocks and Live Birds at Hackettstown.

THE beautiful weather of April 20 drew a goodly number of shooters to Hackettstown, N. J., to attend the bluerock target and live bird tournament arranged by James L. Smith. Among the shooters were Wm. L. Canon, of Newark, and Ed. Collins, of West Hoboken. The targets were thrown in good shape and the live birds were a good lot of flyers. The results follow:

	No. 1, 10 targets, $1:	No. 2, same.	No. 3, same.	No. 4, same.
T Young	1011110011 – 7			
Rubino	0110110011 – 6	1110111000 – 6	1111111001 – 7	0110101010 – 5

Nos. 4 and 5 were miss and out events, $2 entry.

Rochester Rod and Gun Club.

ROCHESTER, N. Y., April 25.—The Rochester Rod and Gun Club held an open tournament on last Saturday, and to say that it was a success is but to echo the sentiment of every shooter present.

For some time we have been considering the advisability of changing our targets, which for the past winter have been Peoria blackbirds. Of late they have not given good satisfaction, owing to the breakage in transportation and in the traps. On Saturday bluerocks were used, together with expert traps and electric pulls, the whole being under the personal supervision of Paul North, of the Cleveland Target Co., and worked like clock work. Out of a shipment of 5,000 targets not one was broken in transit, and but very few in the traps.

The shooting was under American Association rules, rapid-firing system, five traps, with Paul North's system of handicap, which provides that when a shooter takes first or second money he shall be required to shoot in the expert class, so long as he shoots himself into first or second place.

Among the visitors from out of town we were pleased to note Messrs. Mowry and Courtney, of Syracuse; Tuttle and Carr, of Auburn; Stacey and Loomis, of Ithaca, and Hobart, of New York.

Shooting at Williamsport.

WILLIAMSPORT, Pa., April 23.—I herewith inclose scores made by members of the Williamsport Rifle and Gun Club on Friday last, our regular shooting day. The weather looked quite disappointing in the morning, and undoubtedly kept quite a number away, but six of the old reliables were on hand and did themselves proud. The light was perfect for trap shooting and the result was good scores all around. Hughes and Talman could not wait for the crowd and commenced banging away. Keystone targets were used, thrown from bluerock traps and electric pulls. To say they worked well is putting it mild. Out of 1,000 trapped only three or four were broken in trapping, and how they did go was a caution to the scores.

No. 1, 10 singles: Hughes 10, Talman 4.
No. 2, same: Hughes 10, Talman 4, Smith 9, Millspaugh 8.
No. 3 same: Hughes 9 Talman 7, Smith 10, Millspaugh 8, Runk 5.
No. 4, 15 singles: Hughes 14, Talman 9, Smith 14, Millspaugh 12, Runk 15.
No. 5, same as previous: Hughes 13, Talman 8, Smith 15, Millspaugh 14, Runk 12, J. Fulford 14.
No. 6, 10 singles: Hughes 9, Talman 8, Smith 9, Millspaugh 10, Runk 8, Fulford 10.
No. 7, 15 singles: Hughes 14, Talman 10, Smith 14, Millspaugh 14, Runk 8, Fulford 14.
No. 8, 20 singles:

Hughes	11111111111111111111—20	Smith	11111111111111111101—19

BESSIMER.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

F. D. B., Carlisle, Pa.—What trout flies should I use during the months of April, May and June in Central and Southern Pennsylvania? Ans. Grizzly king, queen of the water, professor, coachman, cowdung, Montreal, white miller, May-fly, black gnat, small, dark midge-flies, brown and gray hackles, black June, and a host of others, to be had from any good dealer. For brook-fishing tie them on No. 12 sproat hooks; for lakes and rivers No. 6 hooks are recommended.

W. H. R., Potsdam, N. Y.—Will you please inform me what lands constitute the Forest Preserve in St. Lawrence county? Our town clerk asserts that even the lands (and forest streams situate therein) lying around Potsdam and some miles from the forest lands or Adirondack region proper, are included in the Forest Preserve, and that trout fishing is not allowable here until May 1, but is open until Sept. 15. Ans. The season is May 1 to Sept. 15 "in the counties included in the Forest Preserve." This applies to St. Lawrence and includes the entire county.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

FOREST AND STREAM PUBLISHING CO.,
No. 318 Broadway, N York City

THE SPRING SHOOT.

When you get a bird or beast from Florida or Hudson's Bay, the Chesapeake or Puget Sound, and want it mounted true to life, send it either skinned or in the flesh well salted, to

Ward's Natural Science Establishm't
ROCHESTER, N. Y.

Also all kinds of fish handsomely and correctly mounted. Write for booklet "Heads and Horns."

THE SALMON FISHER,

BY
CHARLES HALLOCK.

CONTENTS: Distribution of the Salmon. Life History of the Salmon. Technology of Salmon Fishing. Salmon Fishing in the Abstract. Luxury of Salmon Waters. Itinerary of the Salmon Rivers.

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 125 pages. Price $1.00.
FOREST AND STREAM PUBLISHING CO., 318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

QUINCY, Ill., Jan. 19, 1892.

Hon. John S. Cochennour, Olney, Ill.:

DEAR SIR—After two years' use of your "Little Daisy Minnow Trap" I find that it does its work well and satisfactorily. It is a source of great gratification to me to have fresh, lively minnows when I want them, and these your trap furnishes me. I can cheerfully recommend it to anglers as a valuable addition to their outfit.

Yours respectfully, S. P. BARTLETT,
Sec'y Ill. State Fish Com.

Chas. Daly Hammerless Guns

We are constantly receiving unsolicited testimonials from gentlemen throughout the United States expressing pleasure in having a gun of this make. We mention a few here:

PORTLAND, Ore., April 6, 1892.

Messrs. Schoverling, Daly & Gales:

GENTLEMEN—The Diamond Daly I have been using about a year is in my opinion the finest gun made. I have shot over 30,000 rounds of shells loaded with nitro powders, and there is not the least wear. As to hard and close shooting it will hold its place with any make. I have tested it with Holland & Holland, Purdy and Greener's best guns, and have never had occasion to take a back seat from any of them. Cannot say too much in praise of the gun. I wish to get a very light gun, 12 bore, exactly same finish as mine. Can you make it and how long will it take? Very truly,

H. J. BURRELL.

NEW YORK, April 2, 1892.

Messrs. Schoverling, Daly & Gales:

The new gun is a daisy; shot my first match to-day, my score 18 out of 20, and the two fell dead out of bounds. I cannot say too much in favor of the gun, and everybody admires it very much. Very truly,

JOHN MEHL, JR.

RANGE VALLEY RANCH, Utah, Feb. 11, 1892.

Chas. Daly, Esq., New York:

DEAR SIR—I bought one of your three-barrel guns of Dr. Dart, of Salt Lake City. He was down here and had that gun. I wanted it so bad that he finally let me have it. I can assure you it does most excellent work, and is the best bear gun I have any knowledge of. Killed fourteen bear last fall with it. Very respectfully,

C. A. WING.

The above and many other testimonials are received almost daily by us from gentlemen who buy the

BEAUTIFUL BIRD PICTURES.
I have several plates of Audubon's Birds which I will sell cheap. These are the edition of 1856, on heavy paper, and give the birds the size of life and in their natural colors. Among the species represented are: White-headed eagle, price $12; duckhawk, $10; pine grosbeak, $7; kingbird, $4; wood wren, $4; black duck, $12; and some others. These when framed would make superb ornaments for a sportsman's dining room. Address J. J. A., FOREST AND STREAM office.

WANTED.—FISHERMEN DURING THE open season. Fine trout and black bass fishing in the streams and lakes of Sullivan Co., New York. For particulars address the advertiser, W. E. ELDRIDGE, Fallsburgh, Sull. Co., N. Y.

WANTED.—A SECOND-HAND CANOE, completely equipped, accommodating two people; must be in good order. Address, giving full particulars and lowest cash price, J. M. TOWNLEY, 2 Wall st., New York.

SENATOR LINDSAY'S TREACHERY.

FOR some months a strong effort has been made by the friends of fish protection and propagation in Kentucky to secure from the Kentucky Legislature the passage of a law to prevent dynamiting and seining, and to restock the depleted State waters. Early in the present session of the Kentucky Legislature a bill known as the Spalding Fish Bill, was introduced into the Lower House. This bill provided penalties against seining, brush drags and dynamiting, provided for fishways, and otherwise aided in suppressing the wholesale methods of fish destruction so much in vogue in Kentucky. At the same time the U. S. Fish Commission began to supply young fry, spawning fish and eggs for hatching to the State, under the inducements of the Kentucky Fish and Game Club.

Fish and game clubs began rapidly to form throughout the State. New interest was aroused, and everywhere was awakened co-operative action between the farmer and the genuine angler and sportsman.

After discussion the Spalding Fish Bill passed the Lower House of the Legislature by a vote of two to one. When the bill reached the Senate strong opposition was developed. Among those who were hostile to its passage was Senator Wm. Lindsay—Commissioner from Kentucky to the World's Fair at Chicago. He denounced the bill as calculated to produce idlers and drunkards. This idiotic aspersion upon anglers was keenly felt by the local club and by those who indulge in the innocent pastime as a recreation from harassing business cares, but few felt like risking the loss of the bill by taking up Commissioner Lindsay's gauntlet. His aspersion was ignored. As preferable, a petition was circulated by the Frankfort Fish and Game Club, asking Commissioner (Senator) Lindsay to vote for the Spalding Bill in the interest of his constituents. This petition was numerously signed by the leading citizens of the county, and a committee of prominent citizens presented it to him at the State House. Recognizing the fact that his constituents were earnestly for the bill he agreed then and there to give it his support.

Last Thursday the friends of the bill felt the situation was ripe for its passage. It was reported from a friendly committee. The session was extended, absent Senators sent for, amendments designed to cripple the bill were being voted down, when suddenly, to the surprise of every one, Commissioner Lindsay lent his influence and vote to the adoption of amendments recognized as fatal to the measure, and that would take it back again to the House, where new opposition had organized to assail its passage. So disgusted were his brother Senators at the flagrant breach of faith, and the unexpected turn of affairs, that they left the chamber and broke the quorum. Throughout the city that night, in the hotels, in the stores, shops and on the streets, the action of World's Fair Commissioner Lindsay was bitterly discussed and denounced. Then the farmers joined in the condemnation. The daily papers followed with a reflection of popular feeling. There seems but one side to public sentiment.

Friday the bill came up again in the Senate, and was lost by a vote of 14 to 13. A motion to reconsider was entered, but the effect of Commissioner Lindsay's action has been such as to demoralize and dishearten the friends of the bill, and its defeat is anticipated.

Senator Lindsay's treachery is not inexplicable. His motive is well understood. He was not governed by the silly belief that to conserve the food fish supply would be to produce idlers and drunkards. He was actuated by purely personal and wholly ignoble motives. He was against the bill because of some who were for it; in opposing it he saw a way to gratify personal spite; he broke his promise of support and betrayed the interests of his constituents and of his State for a private grudge.

The result is deplorable, for dynamiters and fish hogs will be encouraged to continue boldly their work of destruction. Aid from the Government in re-stocking the depleted streams is likely to cease.

It is seldom that the action of any one man has been so disastrous to a promising and valuable cause as the action of Senator Lindsay—Commissioner to the World's Fair at Chicago. But for him Kentucky would have taken a great step forward, in line with other States, in protecting and preserving the denizens of the woods and waters from the clandestine assaults of the poacher and the assassin by night.

We can imagine the fraternal greeting that will be exchanged between Commissioner Lindsay, of Kentucky, and Commissioner Jas. A. Henshall when they shall meet upon the floor of the Fisheries Exhibit at Chicago, to admire the results of fish protection, fishculture and propagation. Both from the same State—the one the Brutus of the Kentucky Fish Bill, the other the exponent of the higher civilization.

The legislative session will be a long one, and the friends of fish and game protection can only hope that the people's representatives will realize, before they finally adjourn, something of the popular sentiment, and something of the value of laws of protection and conservation before every vestige of both fish and game have been swept away.

HUNTING WITH A CAMERA.

THE charms of "hunting without a gun" have been dilated on in FOREST AND STREAM by one of the most graceful of American writers. That there is a keen delight in it admits of no question. The scenes among which one wanders not only charm at the moment, but deep graven on the memory, they remain long afterward sources of pleasure. Besides this there is a great satisfaction in the friendly attitude one takes toward all nature. The birds, the beasts and the flowers no longer appear to regard one as an enemy; one seems to become a part of the life of the woodland or the plain as soon as his hostile intentions cease.

Yet, after all, for the average man, there is something lacking in hunting without a gun. Most of us are formed of very common clay, and we want to bring back from our excursions something tangible, something that others can see, and touch, and talk about. So it is that hunting without a gun appeals chiefly to those whose minds are cast in a mould of great refinement, to whom the spoils of the chase do not constitute the most important part of their outing. It is not likely to become popular with the average sportsman. Something is needed which shall give more tangible results than hunting without a gun, and yet which shall preserve all its delightful features. If we substitute for the gun the camera these conditions are fulfilled.

Every sportsman, every outer, should carry with him a notebook in which to record the passing history of each day spent afield. This should be as much a part of his equipment as his hat or his shoes. Memory fades quickly, but to read over again the notes of adventures of past days calls to life again a host of buried recollections. But besides the notebooks, the sportsman should carry also a camera, for no description, however well it may be written, can ever convey one-half the story told by a picture. The work of photography calls forth all the best qualities of the hunter. Is it difficult to creep within shot of the shy mountain sheep? It is still harder to approach within focussing distance. In working up to large game with a gun the hunter must see that the wind is right; when hunting with a camera the sun as well as the wind must be regarded.

But if successful in making the approach, how much more satisfaction one receives for his labor. If with infinite care and patience he has crept up to a band of elk, or a flock of birds, and has arranged his camera, he can take one exposure after another, catching his objects in different positions and different groupings, securing views of them which perhaps have never before been had, and getting them in all those curious attitudes which to the inexperienced eye seem awkward and ungraceful, but which the old hunter will at a glance recognize as being the very truth of nature.

The photographing of these wild creatures offers especial attraction because of its difficulty, but the beauties of scenery must not be overlooked, the rare and curious sights which come only to the man who is much out of doors. We have seen recently two interesting photographs which were taken in fun in a cavern in the northern Rocky Mountains, a deep cave worn out under a glacier.

Hunting with a camera is hard work, and like hunting with a gun, it has its disappointments. But the man or woman who carries a camera into the wilds will surely receive an abundant reward in the satisfaction felt in again and again going over the views brought home from the trips made in past years.

MILITARY PRACTICE AT CREEDMOOR.

THERE is danger just now that ill advised counsel may do injury to military practice at Creedmoor. There was a modest bill asking for $10,000 from the State to place the range in proper condition after nearly twenty years of use, but Gov. Flower saw fit to veto it. That is past and the shooting will go on with some inconvenience and a diminished factor of safety, for which Gov. Flower alone is responsible.

But apart from this mishap there is some talk now that the new Inspector of Rifle Practice for the State, Inspector Whitlock, is thinking of refusing to recognize the scores made in the N. R. A. matches for record in the State shooting requirements. It has been the practice for some years for the N. R. A. to supplement the regular outings of the regiment for formal practice by matches placed at convenient dates all through the season, in which all comers were free to enter, but at which scores made by National Guardsmen were, under proper precautions, credited to them for the marksman's badge decoration distributed by the State. In this way men who failed to qualify at other times were enabled to catch dates at their convenience, go down and help the regimental record by scoring up at their extra shoots. There was an entry fee which went to the Association, and the men paid their own fares to and from the range. All this they were willing to do either from love of rifle shooting or to assist their regiment to a high place on the roll of shooting honor. The 7th and the 23d regiments particularly took advantage of these extra days to such an extent that the members of those two commands are marksmen from the colonel down.

The protest not outspoken but urged indirectly, comes from the members of the inferior commands, that inasmuch as they, the protestors, are either unable or unwilling to go out and qualify that the privilege should be taken from those who are willing. It is a clean cut exhibition of the dog in the manger spirit, entirely unworthy of a soldier, and the utterance of it is a disgrace to the uniform they wear. Instead of taking the capital work performed by the crack regiments as marks for their own endeavors, these levelers downward wish to crush out the shooting spirit whenever it leads to work above their own dull inferiority. It is by the gain made in these matches that a margin of funds is left in the hands of the N. R. A. to make up in part the deficiency which seems to come with every fall meeting. Then again, the protestors forget that even on the formal practice days each year when each command visits the range in uniform and goes through a schedule of scoring that the men who have been persistent armory shots will make the better showing, and that those who have not will still occupy the same position of inferiority on the comparative exhibit in the Adjutant-General's report.

It is not at all creditable that jealousy should go to the extent of even an indirect protest, and it is surprising that Gen. Whitlock should for a moment think of heeding a suggestion of such a retrograde step as throwing away the advantage which the N. R. A. matches bring to those who shoot in them and to the State at large.

The Sportsman Tourist.

BASS FISHING IN THE SAN ANTONIO.

DID any brother angler ever visit San Antonio, Texas? Of course many of them have, but I wonder how many, when they stood on one of the numerous bridges and looked down into the uninviting waters of the creek which flows through the heart of the town, were aware of the glorious sport these waters had in store for them. The little river does not look very inspiring, washing as it does with its flood the back yards and walls of houses and of factories, but don't mind that. Its swift current will soon carry you beyond the town, through blooming fields, past towering rocks, and under arching boughs fragrant with leaves and flowers. Its foaming rapids and its deep, dark pools are the home of many a broad-shouldered, silver-sided and generally hungry black bass, ready to bite, and as gamy as any quarry that ever sent a thrill through hand and heart of an eager sportsman. Try the stream if you can. A trip down its rushing waters (for the other way it is out of the question) will send your blood tingling through the veins, and will take your mind off your business troubles. I warrant you it is "big medicine" for "that tired feeling." I know it for I was there and tried it.

Some time ago I had read in FOREST AND STREAM that the San Antonio was teeming with black bass; and knowing that my professional tour would take me that way I determined at once to try that stream. In Houston I met a gentleman who is also fond of the sport and he kindly gave me an introduction to a friend in San Antonio. This friend, Mr. Guessay, the editor of the Texas *Field*, I met surrounded by difficulties. He had just been burned out and was in the work of putting up his new machinery and trying to get into shape for the next publication of his journal. So a fishing trip in his company was out of the question; but he in turn introduced me to a friend of his, Mr. A. Thiele, a dealer in guns and tackle and a sportsman. I found him a splendid companion and a gentleman, quite ready to do all in his power to give me a good day's sport. To his kindness and endeavors I am indebted for the pleasures of our trip. He proposed at once to bring his boats down, and we arranged to meet in the morning at 6 o'clock for a trip down the river, which passes about a block from his house. I had two companions, Nat H. and Charles P., whom we asked to accompany us, and who eagerly grasped the opportunity. Nat wanted to fish and Charles went for the sake of good fellowship.

In the afternoon Nat and I tried the creek right in the heart of the town and we caught six bass, ranging from half-pound to a pound. This of course only whetted our appetite for more, especially Nat's, whose first experience in fishing this was. So in the morning Nat, Charley and myself got up before daybreak and went down to the store, where we found Mr. Thiele employed in putting up his canvas boat. Through our united efforts the boat was ready in a short time, and after a hasty breakfast at the market we shouldered the canoe and reached the river just as the sun sent its first rays over the house tops of San Antonio. Mr. Thiele and I took the canvas boat, while Charles and Nat had a wooden one The plan was to fish down the river as far as the grounds of the Riverside Gun Club, which we thought we would reach at about two o'clock and then have some trap shooting there.

Down the river we started, Nat and Charley ahead, until we reached a dam below the city, where we hauled our boats out and carried them down; and now we began to fish. We had not been able to procure any live bait, so we used phantom minnows. They hardly seemed very sportsmanlike to me with their nine hooks. But it was either phantom or no fish. So I decided for the phantom by a very large majority and did not regret it, for they proved a splendid lure indeed.

The river was steaming in the crisp morning air, and small clouds of mist arose from the swift current of its waters. We went down as slowly as the rapid flow would allow us to, and cast out to the right and left. For about half an hour or so there was no response from the deep. Finally we reached a place where the river widens out a little, and seeing the other boat ahead we inquired after their luck. Nat had caught one half-pounder. This did not seem very encouraging. I cast out toward the bushes on the left bank and reeling in my line, felt a strike; I had no sooner begun playing my fish than Mr. Thiele cried out: "I've got one," and after a few seconds each lifted out a bass of three-quarters. We left the boat drift now, and carefully fishing each nook and corner, especially the eddies near the banks, landed several bass of the same size and a little under. Seeing a bass break water about 30ft. from our canoe, I cast out and hooked and landed a fellow of about 1½lbs. Almost at the same time my companion caught one of the same size; and soon after that I landed a third one. Those three fish were as much alike as anything one can find in creation.

Down the stream we went again, alternately casting and trolling, and soon had a dozen fish from a half-pound to a pound, the three mentioned being the largest. All the smaller fish, of which we caught quite a number, we returned. The other boys also had good luck. Oh, what a glorious river the San Antonio is, to be sure. The water is as clear as crystal; and it is as swift as a mill race in some places, alternating with deep quiet pools. The trees were just beginning to put on their summer dress, and our light boats were carried beneath their fragrant arches, leaping and dancing upon the foaming waters. After a little while we reached a sort of pond above the dam of an ice factory and here we let our boats drift again, and fished carefully.

I had landed a small bass, which I returned, and was just putting my line in order, which had become somewhat snarled, when Mr. Thiele, who had observed a rise down the river, rose and proceeded to cast that way. It seemed too far away to attempt the cast, but T. is an expert, and after a splendid cast of seventy-five feet or more he began to reel in. The fish struck almost instantly, and now you ought to have seen the fun. The bass never showed above the water, but from the way he fought and the strain he put upon the rod we concluded that he was a whopper. We had all stopped fishing and watched the struggle. First he tried to run, but Thiele soon turned him, and now he rushed toward the boat. He did not succeed, however, in getting any slack; the hand at the other end of the line was too quick for that. But he was an intelligent fish and quite a strategist. Around the boat he circled and then dashed right under it; the rod passed over to the other side as quickly, and now he made for the weeds at the bottom, causing the little rod to tremble at his rush. This time he was more successful, for suddenly Mr. Thiele cried out, "He has me," and sure enough the line was fast. I paddled the boat slowly toward the spot, and with a few careful jerks he managed to free his line. The fish made a last struggle for liberty, but his force was spent, and after a few seconds he turned on his side and was lifted into the boat, a conquered hero, for he was one of the sturdiest fighters that ever sculled the limpid water of the San Antonio. What a beauty he proved; a three-pounder if he weighed an ounce.

Now the boats were hauled out above the dam and carried below, and after a lunch we rested by the side of the rushing falls, fanned by the soft southern breeze, and watched the smoke of our pipes circle and rise toward the clear blue sky. We had procured a block of ice from the factory, and on it we laid our catch. Outside of the large one there were twenty-three bass, four of them weighing 1½lbs each, several of a pound and the rest under, but none less than a half pound.

We now proceeded down the river, but soon concluded that it would be useless to try any more fishing. The water had become so rapid that we had difficulty in managing our boats. Besides, our rods and lines got caught by the overhanging branches which were becoming more frequent, and which we could not always avoid owing to the swiftness of the current. Moreover, it was 2 o'clock, and if we wanted any shooting at the club we had to make haste. So we unjointed the rods and the last act of the drama was began. Oh, how jolly we were, proud of our catch, and our boats went shooting down the winding rapids like two race horses. The air was warm and balmy, the trees radiant with the first bloom of the Southern spring, the stream leaping and foaming underneath, and the red cardinal birds sang and flitted through the branches overhead. We plied our paddles vigorously and soon found that our canoes needed all our attention, for the stream had become almost a torrent at this point, and its many windings, hidden rocks, and most of all the trees hanging down to the water's edge in many places, made their management a very difficult matter indeed. For a while every thing went smoothly. We were carried down as if by magic, and if there is a sport more exhilarating than fishing, it is being carried down a rapid, foaming river with nothing between you and the water below but the frail bottom of your canoe, your eye looking constantly for the difficulties ahead, every nerve and muscle strained and ready to meet instantly with the blade of your paddle the varying forces of the waves. Charley and Nat were ahead, and whenever we saw them rounding a curve or shooting a rapid, a shout went up, and on we dashed through the sparkling swirl. But Waterloo was ahead. Shooting around a projecting point with the current of the stream, I saw about fifty yards ahead of us a tangled mass of boughs and brush hanging down to the water's edge and below it, on the right of the stream. To the left there was a deep channel, not wider than a couple of yards, through which we would have to go.

The other boat shot ahead, hit the channel and passed safely. We also strained our paddles to bring our craft to the left, but without avail; the boat hit the obstruction broadside on. For a moment it seemed as if we would be able to break through the boughs, but for a moment only, the force of the water was too strong, it leaped up on our left and began pouring in and in another moment we were both struggling in the surging flood. Mr. Thiele caught bottom and held the boat, while I, who had struck the deeper water, reached the shore on the right and pulled myself up the steep bank on some branches convenient to earth. Thiele managed to right the boat and jumped in, but did not get far before the boat capsized again. Well, he did not mind it so much this time, but made another attempt which was more successful; and there we were, standing on the shore, minus an oar, a paddle and our rods; wet from head to foot, two knights of the rueful visage. We now shouted for our companions, and soon I beheld Nat's white shirt sleeves through the trees. "What is the matter?" he shouted. "We upset," was the short but expressive answer. "Hurrah!" he exclaimed; and a moment later there came Charley's cry from the river, "Thank God!" Well, we were shocked at this want of sympathy, but soon found out the cause. They had met the same fate as we, and now came up dripping and limping, Charley without his hat, which was taking a swim on its own account. Their boat had met a worse fate than ours, for it was useless for that day at least. We proceeded to rescue our fish; the larger part was lost, but when we saw that our biggest bass was saved we gave three cheers and forgot our other losses, which were quite heavy. The only one who had no loss to deplore was Nat, he got away with a wetting.

We set out, Nat and Thiele in the remaining boat, Charley and I afoot. On our way to the club Charley and I met a gentleman in a carriage whom we asked for directions. He proved to be one of the members and kindly gave us seats in his trap, and we reached the grounds without any further mishaps. Thiele and Nat got there half an hour later than we, and a sorry looking lot we were. Charley had bought a hat from a little negro boy in which he was a sight, indeed, but I suppose the rest of us did not look very handsome either, at least Charley said so, and I believe him.

The members of the club received us like true sportsmen and gentlemen, the large bass was duly admired; our adventure, of course, was the source of much hilarity, in which we were only too ready to join, and after an hour or so of shooting at the trap we drove away toward home and dry clothes. Taking it altogether the day was one of those that we do not easily forget, and barring the loss of my split bamboo it was a day of the most enjoyable sport I ever had. The little unpleasantness only gave zest to the pleasure. My only regret was that we had lost half of the fish.

Brother angler, if you visit San Antonio try the creek. You will find royal good fellows to keep you company and from whom you will part with regret. The bass are there in the pools, in the rapids, among the rushes, everywhere I have found them. So go and do likewise, and give my greetings to the fellow sportsmen in the sunny South.

ALBERT BRUNING.

THE PLAYERS', New York.

CAMP CRANKS.

WE have all read of the necessity of having congenial fellows in the party when going a-hunting. Fellows who will be cheerful under all circumstances and lend a helping hand on every occasion; and most heartily we indorse it all, but there is one side of the question that seems to me has not received its proper share of attention.

We will take it for granted that your party has been properly selected, and that your first camp has been made. The hour arrives for turning in, and soon the fire is burning and snapping by itself; no poking or rearranging of its glowing embers is going on; the boys are under the blankets, and only the noises of nature hold the attention of the listening woods.

As I sit here contentedly pulling away at my pipe one of the boys tunes up his instrument and starts a "snore." As the resonant tones float out on the still air, at regular intervals, I muse, and my musings result in a determination to place the matter before your readers in a series of questions, and right glad I should be to hear their ideas on the subject. Some wise fellow has said we are all more or less "cranks." So be it. Now, what shall we do with the "camp cranks?"

What shall we do with the "gun-cleaning crank" who always forgets to bring his oil, rags, etc.?

What shall we do with the crank who don't see why he missed that bird, and lays the blame on gun, cartridge or anything but himself?

What with the crank who tells you just why and how *you* missed such and such shots?

With the man who tucks his edge of the blanket under him, and presently turns over, hauling the rest of it with him?

The fellow that rouses all hands at midnight to eat watermelon? If a good melon better help him?

What with the practical joker? Kill him!

With the man who snores, or the awful man who grinds his teeth and utters horrible groans in his sleep?

But after all these are the spices which add so much to the fun and flavor of camp life. If you cannot accustom yourself to them, stay at home or do as the boys did in the North Woods one time—say nothing.

The tale runs in this wise: "Pea soup had formed the foundation and capstone of so many meals during their stay that a mild suggestion was offered the attendant that a change would be acceptable. This being repeated to the proprietor of the hostelry, much incensed that individual, who took the first opportunity, when they were all at table, to thrust his bullet head in at the door and say in a very decided and deliberate manner, 'Anybody don't like pea soup 's a liar.'" So if you don't like these little incidents to camp life you are at liberty to stay at home.

W. TOWNSEND.

WOODS LIFE.

IN CAMP, Aroostook County, Me., April 10.—From my earliest recollection I was interested in what was going on about me in the woods, and a close observance of the nature and habits of animals has helped me as a hunter and trapper. I have found some discrepancies between the things seen and those read of, written by men of erudition, and think it safe to say—though it smacks of vanity—that one who is brought in actual and frequent contact with the denizens of the woods gets nearer the truth than the learned writers, who are often theorists.

I left my hunting camp several weeks ago, where I passed six months in comparative happiness. My supplies were exhausted and I had no means of getting a recruit without too much hard labor. But a return to the settlement has its compensations. I was enabled to "spruce up" somewhat in my habilaments and to indulge a taste for the good things in the way of gastronomy; and more and better than all, to receive the greetings of my many kind friends. But after a little I again grew uneasy in my surroundings and I sighed for the woods life. For many years until the last I have put in my summers on the Allagash and other tributaries of the St. John, of which I never tired; but the infirmities of old age make it too tiresome to sit in a dugout; and as I was not brought up in one it is unsafe to use the setting pole for a rest, especially as I am very weak in the legs. Last summer, for a change, I watched a depot lumber camp at the head of Fish River, where the incident referred to above came under my observation. This year I am not so far from a settlement, although practically it amounts to the same. I came in three weeks ago; a few hands were and still are here putting the driving tools in order, and in the course of a few days about a hundred men will be here to start the logs as soon as the pitch is favorable. It will be unpleasant for a week or two with their presence, not only because they will be a rough lot, but the camp will be crowded to suffocation. I shall avoid them by night by spreading my quilts in one of the hovels. After they leave, my pard (an old man and hunter) and myself will begin a life for the summer which I anticipate will be one of enjoyment. We will spade up plots here and there about the camp and put in seeds of summer vegetables, set a few bear traps and occasionally take a mess of brook trout from a stream that is but a few rods from the camp. Our duties are to keep an eye out for tramps lest they steal supplies, guard against their fires, and keep pickle in the pork, and turn over the salt fish and oats occasionally.

My pard, who is fairly strong on his pegs, will occasionally go to the nearest settlement, ten or a dozen miles, to get my mail and such articles in the line of supplies as are desired to vary the monotony of pork, beans and codfish. Most of all will I appreciate my mail, among which is always dear old FOREST AND STREAM.

Now, the cook has been joggling the table preparatory for dinner and needs space for serving the same, else perhaps I might bore you much longer.

PINE TREE.

WILD PIGEONS.—Grand Forks, N. D., April 14.—On March 26 a large flock of wild pigeons made their appearance at Larimore, on the same spot where on April 22 last year a flock of 500 or more stopped to feed, they were the first ever noted in this country. I would like to know if any one else saw any others on their way North. These were the first I have seen since a boy in Sullivan county, N. Y. Then it was fine sport hunting them. I would like to know if they are on the increase, or are becoming more rare, as so many other things that have contributed to mankind.—TAXI.

Natural History.

THE MONTEREY BUFFALO.

U. S. F. C. STEAMER ALBATROSS, March 26.—*Editor Forest and Stream:* I inclose a photograph of a buffalo bull owned by Mr. B. C. Winston, of Monterey, Cal., whose herd of buffaloes I visited recently. This fine animal was captured when a calf only a few hours old, by Mr. Winston, in June, 1886, about seventy-five miles southwest of Jamestown, Dakota. On that occasion five adults were discovered, two of which were shot. Mr. Winston says the calf is the last buffalo captured east of the Missouri. The cow buffalo at Monterey was purchased by Mr. Winston thirty-five miles south of Fort Pierre, on the Missouri, from Redbreast, one of Sitting Bull's old warriors. From these two have been raised two calves, the Duke of Portland, born in Portland, Oregon, in October, 1890, and the Duchess of Del Monte, born at Monterey, in May, 1891, the first buffaloes born on the Pacific coast.

For a long time Mr. Winston's buffaloes would not associate with domestic cattle; but at present no difficulty is found in crossing the species, and a number of half breeds are expected soon.

The climate agrees with these buffaloes and their coats are fine and dark. There is every reason to think that the breeding of full-blooded and half-breed buffaloes will be a success in California. C. H. TOWNSEND.

SOUTH AFRICAN REPTILES AT HOME.

I.

HOWEVER well informed in natural science we may suppose ourselves to be from the study of books, whether our hobbies be zoölogy, botany, ethnology, or what not, there is always so much that is new to us when we come face to face with each country and its inhabitants, that we find a good deal to unlearn after all. Regarding the fauna, and more especially the reptilia, even our zoölogical collections in the temperate zones, though artificially warmed, convey no adequate idea of their habits and movements in their native tropics. Just now chameleons and tortoises chiefly occur to me, these having fallen a good deal under my notice of late. From observations of these when brought to northern latitudes we should class both among the slowest and stupidest of reptiles. Each takes on an average about half a minute to consider which limb and where next to move it, but at home they are far from the dull and senseless creatures we are accustomed to think them.

The first of many queer pets presented to me on my arrival in Cape Colony was a young tortoise (*Testudo angularis*), the specific name given from its sharply defined angular plates. It is supposed to be about five years old and measures 2¼in. in length, rather less than 2in. across and 1in. in height, that is from the floor to the higher part of its arched shell. From the first moment of holding this small creature in my hand it gave evidence of self will and a persistency of action which surprised me. That was early in October, a spring month of the southern hemisphere, and steadily as the hotter season advanced, so did this little animal's character develop itself. The persevering efforts it made to go exactly where it was told not to go (the "telling" being to lift it back repeatedly to the starting point) would lead one to think that a spirit of intelligent inquiry only could prompt it, so purposeful were its movements. Allowed the run of a table, if it went toward the edge where a fall was inevitable and was lifted back, he turned and ran, actually ran, with business-like eagerness, to make for the exact spot of his arrested fall, and this over and over again; scrambling over books, inkstand, pen tray, whatever impediment lay in the line of progress, and when an obstacle presented a hard and polished surface on which he could not easily obtain a foothold, his frantic efforts and the rapid but ineffectual clutchings of his little claws were extremely comical. At length over he scrambled somehow, often tumbling headlong, but righting himself and reaching the spot as if his very life depended on it. If not again stopped off the table he fell, thus learning a practical lesson. After two or three falls he cautiously surveys the surroundings on reaching the edge, still with a businesslike air, and not knowing what next to do, generally creeps under a paper or other shelter and goes to sleep after so much exertion. His memory for locality is very remarkable. If he has decided on a place for his nap, move him where you will he will find his way back to it with the same pertinacity. As this small pet gives no trouble, and when on a journey conveniently sleeps in a tiny basket, he accompanies me in my wanderings. When stationary there is generally a broad window-sill on which he can ramble at will. Wherever he may be he soon selects a favorite corner and makes for it exactly in the same way that he returned to a certain spot on the table.

Tortoises are so abundant in this country that they are brought home continually by the children of a family. Some children of my acquaintance had as many as thirty at a time in their "compound," as the inclosure is called. Those that were big enough to climb went up stairs at will and were found in all sorts of odd places. Their perseverance displays itself in climbing as in other actions. The children taught them to draw a small cart, "inspanning" (or harnessing) their tortoises in twos till they had a team of sixteen or twenty, like the South African bullock teams. A hole is bored in the shell on each side at the back and a string passed through for harness, the dozen or more tortoises then forming a tractable team. Intelligent and kindly disposed children teach their tortoises many curious tricks. Tortoises, like most other reptiles, possess a keen ear for sound. "A love of music" is frequently attributed to reptiles, and as is well known, to snakes particularly, who from the earliest periods have been supposed to be "charmed" by music. Observation has convinced me that it is music as noise, and not music as harmony which arrests the attention of reptiles, as do most other sudden sounds. An unexpected rattling of paper or knocking on the table will cause "Wally," my little tortoise, to look up, and he now generally turns at the sound of my voice; that is, when I exclaim to him in a certain tone. He also rouses himself at the sound of his name when uttered sharply. I do not venture to affirm that he pays prompt attention to such summons; but it is certainly a recognition of sound. On one occasion, when he was asleep at the time when his daily meal was ready, and I called sharply "Wally, Wally, wake up!" he distinctly protruded his head and looked round. This I thought a great advance. Another sound which he now regularly and undoubtedly recognizes is a tapping or light knocking upon the table. He was assisted in learning this sound by a sense of smell, and it came about when cucumbers were in season and he had chopped cucumbers for dinner. Lettuce leaves had been his diet for some time, and when these were out of season I tried various green things which day after day he rejected, comforting himself by sleeping instead of eating. A slice of cucumber chopped finely at last tempted him, and the next day he evidently recognized the appetizing fragrance of cucumber and came quickly to where it was being chopped up for him.

By degrees he recognized the sound of the knife on the board, and the sound has now become a regular dinner bell, no matter what the proffered meal may be. Once a day only he takes food, though it is always ready for him. Lettuce or other leaves he tears off and swallows bit by bit, not using his feet except for grasping. Chopped food he also selects bit by bit and swallows without mastication; turning his head in bird-like fashion to daintily select a morsel, using his front paws, as frogs do, to brush his lips and get it into position if it is too broad or of an inconvenient shape. Wally's voice thus far consists only of a very feeble squeak, but in some tortoises I have heard a slight sound more approaching a hiss. Twice Wally has squeaked a sort of protest. On each occasion he had grasped a large and unmanageable portion of food, and after trying for some time with his habitual perseverance to adjust it with his front paws, I relieved him of it by quickly snatching it away. At the same instant he drew in his head, uttering that faint squeak. His offended dignity will not permit him to take more food for a long while when thus frustrated, perhaps not again that day; but he is fast learning who is his friend, and now when particularly hungry he comes to take his meal at the sound of the knife, and even from my fingers. Thus is his education steadily proceeding, though with interruptions. As a sign of hunger, when the food is not ready, he looks at me and opens his mouth two or three times; this also my lizards and other reptile pets would do, showing that they recognized their commissary.

THE MONTEREY BUFFALO.

Regarding their memory for locality, a friend related a remarkable incident. He had from time to time brought home so many tortoises that his garden began to suffer; and when, one day, he found that a number of young plants had been eaten off close to the ground he decided that the tortoises must go. He gathered them up—as many as he could carry—and bore them away to a considerable distance, then throwing each one hither and thither among the bushes, carrying another armful in another direction, and so on till all were dispersed over new and wild feeding grounds. On visiting his garden next morning to his surprise and dismay every tortoise had found its way back again.

The same gentleman, an ardent sportsman, described a fight which he witnessed between two rather large tortoises, and the power with which they run and butt each other. The aim would seem to be to overturn the enemy; thus each endeavors to get his head under the shell of the adversary, a movement which is watched and anticipated with the adroitness of professional boxers. On the present occasion my friend arrived on the scene of action just in time to see the smaller of the two tortoises overturn the other, having succeeded in working himself under its shell. This is the moment of triumph. The enemy lies helplessly on its back kicking, while the conqueror looks on and "crows" over his victim, uttering a sound which our sportsman facetiously described as laughing. "He was chuckling with delight." No doubt he watched his victim with some exultation, but what the "laugh" was like I am unable to say. When the tortoise is overturned on a perfectly flat surface it has some difficulty in righting itself. Under such circumstance "Wally" will lie for hours, and even go to sleep so. When there is any object close enough to obtain any sort of purchase, or to push himself against, he rights himself without much difficulty. CATHERINE C. HOPLEY.

A STRING OF TROUT AND A FOX.

DYBERRY, Wayne Co., Pa., April 24.—The trout season opened April 15 with a cold, raw morning and a little snow on the ground, which melted about the middle of the forenoon. A few fishermen went out and reported fair luck. One party of two from here caught 75 or 80 brook trout on the upper Dyberry; two others 65 trout at headwaters of East Branch. These trout were 6 to 9in. in length. Large fish are scarce. Two boys caught 3 trout that weighed together 2½lbs., and a day or two later 1 weighing 1lb. 5oz. (dressed with head on) was taken. Last year I caught one (April 15) 16in. long, including tail, weight 1lb. 9oz; and several weighing from ¾ to 1¼lbs. were taken in the Dyberry river.

Monday, 18th inst., I was out in Mt. Pleasant collecting fur, and tried the trout for the first time, catching 32 in upper Dyberry and a small branch stream. I saw a few ruffed grouse and heard more drumming; also a crane, hawk and tracks of a coon and an otter. The day was bright; fish bit rather slow and I quit early. As I drew in my last trout and put it on the forked branch that held the string of fish, I saw a queer little animal on the bank looking at me with half shut eyes. Putting a mitten on one hand, and walking up carefully, I put my hand on the little fellow, and after biting my fingers some, he gave up and I captured him, and brought him home under my arm, carrying fish and rod and a sack of fur as best I could four miles. It proved to be a young fox, and has attracted a good deal of attention. I have kept him in a small box 8x12x20in., but to-day put him in one larger. He is quite tame, and we let him out in the sitting room every day for an hour or more at a time, being careful to close the doors first. His sharp barking has almost driven away our three cats, but one stays in the room now and then, until the fox comes up and barks in its face, then spits at it and runs off. The fox wants to get acquainted but don't know how yet. To-day he had a mouse given him and ate it up in a hurry.

Billy B. (as we call him—short for Bildad), is a philosopher. Scarcely a month old and a prisoner in a small box, a bounty of one dollar on his ears and head, he is making the best of it; laps his milk from a saucer, likes a bit of cheese and a romp on the carpet, sleeps often, and barks when hungry—night or day alike to him. What he thinks about us we can't tell, but he evidently knows something; has smelt of everything he finds in the house; knows where the doors open to; has tried the lounge, table, chairs, tumbled into a pail and bumped his head a good many times, but is always ready to try again. I should call him a foot long and weight a pound more or less. When tired he curls up in a little ball, and puts his cold nose in my hand, if near me, and goes to sleep in a few seconds. His first name, Bildad, will probably give out soon, and so we call him Billy B.

An otter was captured April 16 at West Dyberry by a young farmer (E. Ross) in a novel way. The otter's track crossed the road near a barn, in fact went under an old shed and down a spring run into a swamp. The next day Mr. Ross saw the otter come up on his back track, through the fields, and ran out to meet it, while a dog tackled it about the same time, and he managed to jump on its neck and held it under his boots until it choked to death. It proved to be a fine, large otter, and in skinning it several No. 4 shot were found lodged under the skin near the nose. I sold it last week in New York for a good price. VETERAN.

CINNAMON TEAL.

DALLAS, Texas, April 18.—*Editor Forest and Stream:* Three ducks have been killed in this part of Texas within the last six months, which I cannot locate, and I thought I was pretty well posted on the subject. The bird seemed at first sight to be a hybrid—a cross between the blue and green-winged teal—but that can hardly be the case, because it is, if anything, a little larger than the bluewing and has a great deal more red than the male of the greenwing. From the shape of its head, bill and general conformation it is evidently a teal, a trifle larger than the bluewing, but with the blue markings on the wing, with the head, neck, breast and a part of the belly a dark brownish red. I have killed a great many teal, blue and greenwing in the North, and in Texas, but have never seen anything like the bird. A. H. S.

[Your bird is no doubt the cinnamon teal (*Anas cyanoptera*), a bird of western and southern distribution. It is a common Pacific Coast species, and is found in South America as far south as the Argentine Republic. We have seen them in considerable numbers in Wyoming and they occur casually as far east as the Mississippi Valley—Louisiana and Illinois. The male in its highest plumage is richly colored. Hybrids are not very unusual among the ducks, but there is no reason for believing that the birds you describe were such.]

Game Bag and Gun.

WHAT I FOUND IN THE HUNTING COAT POCKET

IN my house there's a half hidden closet
Just under the stairs to the loft,
And cobwebs are safe in its corners,
For none of the hands that are soft
Ever dare touch the latch that will open
To cartridge belts, shotguns and dangers.
But old Don and I have a feeling
Of pity for all the poor strangers
To things that are hung on those walls.

There's a pair of big boots in one corner,
And snipe decoys, rods and a float:
But dearest of all the odd things there,
To me, is the soiled canvas coat.
And to-day in the hunting coat pocket
I find a dry, shrivelled up leaf.
Here's a feather that once was a woodcock's,
And one little twig, come to grief.
There's some rabbit hair, too, and loose grass seed.

How quickly for alders of autumn
My mind leaves, this hot summer day,
For frost covered corn shocks and stubble,
And windrows of brown leaves—and gay,
That are rustled by partridge and hunter.
The black duck springs quacking from rushes
That shelter the muskrat and mink,
And visions of rough, craggy ledges
Are all to be seen from my closet.

The freedom that makes a man noble
And draws him from sordid desires
Has come to me here for a moment.
And now a woods spirit inquires
If the seeker for fame and a fortune
Who wrecks both his body and mind,
Ever gains at the end of the struggle
A treasure as rich as I find
In the twig, and the leaf and the feather.

ROBERT T. MORRIS.

THE NATIONAL PARK FOR THE PEOPLE.

Editor Forest and Stream:

The vigorous protest of Secretary Noble against granting extraordinary privileges in the Yellowstone National Park to a corporation of Eastern capitalists reminds those of us who happen to have been acquainted with the Park and its surrounding country from the time Congress first set it aside for a free pleasure ground for the American people, that it has required constant vigilance on the part of the true friends of the Park to prevent its becoming the exclusive property of rapacious corporations, whose motto is best expressed in the words of a late eminent railroad man, "The public be d——d."

I do believe that if it had not been for your help and the unremitting efforts of a few men, in and out of Congress, the "common people" would not have been permitted to view the curiosities of wonderland without paying tribute to some corporation for the privilege. In truth it is hard to do this even now, as but little competition in the way of transportation and entertainment is possible under present regulations.

Great corporations have grasped nearly all the public domain and many valuable franchises in our land, and they now turn their attention to the Park again and attack it with renewed vigor. Why is it that hotel and other privileges can not be let to individuals instead of one company, so that there might be competition to benefit the public and prevent extortion? Why is it that every thing must be done by corporations, unless it is that as a corporate body people can do that which conscience would not permit them to do as individuals?

Of late years nearly every attack on the National Park has been made in the interest of the Northern Pacific Railroad, which has a branch line to the border of the Park, and which railroad practically controls all tourist travel, and now under pretense of building a railroad to Cooke City wants the privilege of going through the Park, or in case Congress refuses to do that, as no doubt it will, said railroad asks to have a slice cut off the Park for their accommodation.

Now, of course, none of these bills are asked in the name of the Northern Pacific Railroad. They are aware that the general public has perhaps become somewhat prejudiced against that great corporation, as against the Union Pacific and other railroads, which now owe our Government millions of dollars and have received the gift of an empire from the American people. So that the passage of any bill affecting the Park would really benefit the Northern Pacific Railroad, as that corporation really runs and controls all branch-line railroads in Montana which are connecting lines, no matter under what name they have been built.

I have no doubt it is represented to Congress that there is no other route by which a railroad can be built to Cooke City, and should Congress have at heart to ascertain whether these statements are truths (as they are not), it will find that no known survey has ever been made through the proposed route to Cooke City, and that practicable routes, that would be of much greater benefit to the country generally, have been found to Cooke City, which are pronounced by competent engineers to not only be as practicable, but better than any proposed route through the Park. Two of these routes are the Clark's Forks of the Yellowstone, which was surveyed some years ago and pronounced a practicable route, and the route up the Stillwater River.

These routes may not be of such value to the Northern Pacific Railroad as one through the Park, but why should Congress give away the Nation's playground and the last refuge for our elk, deer and buffalo, when practicable railway routes do exist, have been surveyed and are known by any man living in Montana. Ask either of the following honorable gentlemen, Senators Sanders and Power, or Congressman Dixon, whether the above facts are not true. Let Congress before submitting to this robbery of the Park look over the Yellowstone Park map and acquaint itself with the lay of the land, and then pause when it considers the amount of land these dangerous bills would take away from our game and the people.

Why, Mr Editor, these bills seem to me more rapacious than any bill to-day before the Fifty-second Congress. Other railroads are approaching the confines of the Park as rapidly as they can be built, and no doubt one of them will go to Cooke City via the Clark's Forks route, which is known to be practicable; the Northern Pacific, if these nefarious bills fail to pass, no doubt would build up the Stillwater River to Cooke City from Stillwater, which in distance, considering about thirty-five miles of said route which is as level as the floor in the halls of Congress, would be but a few miles greater than the proposed route through the Park.

It is admitted that the miners of Cooke City should have a railroad for they have waited for years, but even if there were no other route than through the Park, it would seem that the interests and rights of sixty million people should outweigh the interests of six hundred, and it would seem wiser for our government to compensate the miners than to permit any corporation to gain additional foothold in the National Park, for if one company is granted such privilege it would not be consistent to say that no other company should have equal rights, unless our government having only granted one-half of the country to that "one corporation" wishes to remedy the matter by giving them the other one-half.

A large extent of Montana and Wyoming country has recently been added to the Park, and it looks inconsistent to add country that tourists never visit, and which is only valuable for the minerals it may contain, to cut off the other side at the dictation of a corporation, a strip of country which would virtually destroy the only refuge for game in the winter, as the portion which is asked to be segregated is the least elevated in the Park.

Now it is a fact not generally known outside of the old timers in this country, that before any move was made by the United States Congress to set aside and create the National Park, individuals had in good faith located claims at the Mammoth Springs and other places, intending to accommodate, and had to some extent prepared to entertain, the tourist travel which was certain to come when the wonders of that region became generally known. No hesitation was then shown in enjoining their rights and throwing them out of the Park, and to install strangers in their places. Why was this done? The answer is, the original claimants were not incorporated; their successors were.

MONTANA.

HOW I LOST AND FOUND THE BIG HORN

HOW is it that all of our older and many modern writers claim that mountain sheep when jumping off a cliff light on their heads? This was always a puzzle to me from boyhood up; and since hunting them in the Elk Mountains of Colorado, and watching them bound from rock to rock (and they can do some tall jumping), I have come to the conclusion that some hunter in an early day had seen one accidentally fall and light on its head.

I wonder if any of your writers ever hunted in the Gunnison district of Colorado. Of all my wanderings in the West and North with gun and rifle, I found that the finest country for sport I ever saw. Our ranch was situated near the Gunnison River, about eight miles from Gunnison City, though at that time (1880 81) there was very little city to it and no railroad. There was scarcely a day in summer or fall when we could not see antelope in the foot hills; and there might be a plenty there yet but for the cruel and wanton destruction by the ranchmen and pot-hunters.

The first deep snow of winter was the signal for a grand hunt by the men who hunt for meat and not for sport. Their method was to find a large bunch of antelope, then mount horses and give chase. When crowded in the deep snow antelope form a sort of wedge, with the hind ones crowding on those ahead, making it an easy matter for men on horseback to overtake them; and then revolver and clubs did the business for the poor frightened animals. One man always used a long cavalry saber. Every one to their liking; but as for me, I would rather creep through the sage brush on my hands and knees for a mile and shoot one than slaughter a dozen with a club.

I never was a successful fisherman. I can sit all day in the wind and rain waiting for an occasional duck to come along; but I never could wait patiently five minutes for a trout to bite. But at that time a man needed neither patience nor skill to keep the table supplied with fresh mountain trout. By following up this creek twenty miles, as fine a game country could be reached as hunter could desire. Elk, black-tailed deer, mountain sheep and an occasional silver-tip were all found in this locality.

I well remember one hunt Bob and I had in this country. Some prospector in crossing the range had seen forest mountain sheep sign, and on his way to town he stopped in at the ranch and told us about it. That evening preparations were made for a few days' hunt and roughing it—and any one who ever killed a mountain sheep had to rough it at some stage of the proceedings, besides taking the chances of broken limbs and other accidents.

The next morning bright and early saw us on the march, with bedding, 25lbs. flour, 10lbs. bacon, a few cans of Boston beans, a can of maple sugar for the flapjacks, the long-handled frying pan, tin plates, etc., all securely packed on Jack, our pack mule.

Here let me pay a tribute to the memory of this same old burro. We had rescued him the winter before from a life of drudgery in packing ore over the red mountain trail into Leadville. He was small even for a burro, would not weigh over 400lbs.; but he would cheerfully carry our entire outfit and provisions for a month's hunt or prospecting. The load on starting out weighed 300lbs.; he had none of the "cussedness" generally ascribed to the mule race, but was kind and gentle. No mountain so steep he would not try to climb it, and no river so wide or swift but he would try to cross. Poor fellow! he was cut off in his prime and his musical voice stilled forever by falling on his back in a narrow but deep irrigating ditch. No one was near to succor him, and a faithful though humble friend joined the silent majority.

But to return to the hunt. A day of hard climbing brought us to our destination. We threw together some logs in the form of a shanty, and the rest that only a long tramp and a bed of pine boughs can give was ours that night. The following morning saw us up at daybreak, and after eating a hasty meal of pancakes and coffee we made our plans for the day's campaign. It was decided that as I was a little the better at a running shot I should follow up the timbered ravine, where our camp was located, until I reached a cross ravine filled with quaking asps. This ravine would take me under cover to the top of the range of cliffs, where we expected to find our game. Bob was to go down the ravine, and by making a circuit of five or six miles strike the lower end of the range in a place where he could work up through the timber. We had learned from a former experience that an animal like the mountain sheep, bred and raised in the heights, looks for danger below; and while it is comparatively easy to approach them from above, it is the next thing to impossible to reach their country from below without being seen. Along toward noon I reached a point on the bluffs, where I expected them to pass me, providing there were any below; and a few moments later I heard the welcome sound of Bob's Winchester. He fired three shots, and in an incredibly short time I saw a monster buck and two ewes approaching at a speed that would shame a racehorse. I saw at a glance that my position was not all that could be desired, since they were heading for a point at least 100yds. to one side. But bracing myself for a steady shot I registered a vow that those horns should be mine. As they passed I fired at the buck. The only effect of the shot was to make him lower his head and shake it. My next shot made him beund into the air, but he landed on his feet and was out of sight before I could fire again. I judged he was hit through the body too far back for any immediate results; and my chagrin can be imagined as I saw the big fellow go out of sight. On striking the trail we found blood in plenty, and but for the short winter day and a snowstorm approaching we would have got him. Bob had been more fortunate, getting above the bunch; he approached within 40yds. of them and succeeded in shooting two fine ewes.

That night a big snowstorm came, and packing what we could of the meat on old Jack we started for home. I was partly rewarded the following fall by finding the remains of the big buck, and I then learned what made him shake his head at my first shot. The bullet had struck one of his immense horns and about half the bullet was still imbedded in the horn. They were the largest and finest pair I ever saw, being at least six inches through at the base. I could not very well take them at that time, and leaving the country soon after this I have never been able to get them. I have written my old partner a close description of the country where they are and he has promised to devote a week, if necessary, looking for them.

WANDERER.

THE GAME OF THE DISMAL SWAMP.

EVERY reader of English poetry is familiar with the name of the Dismal Swamp, but that it bears an enviable reputation among sportsmen as a place where bear and deer hide is not so generally known.

The Dismal Swamp, near Norfolk, Virginia, contains over one hundred thousand acres. It is for the most part covered with a dense growth of cypress, juniper, gum, cedar, beech and oak. Several small streams flow through it, and Lake Drummond, a body of water, containing about twenty square miles, is in the center. There are several prosperous farms in the clearings, and a Norfolk timberman, who owns five hundred acres near the lake, contemplates building a shooting station, forming a club, or some other scheme of the kind.

Little do the denizens of the crowded cities dream of the paradise for the lover of sport in the vast Dismal Swamp, of the numberless resorts for deer and bear, of the enormous lake abounding with fish. The encroachment of civilization has had no effect upon the coons and opossums of the Virginia morass. The multiplication of steam vessels in Norfolk's harbor does not prevent the robins and the blackbirds of the North from wintering on the banks of the Jericho canal, while the tempting clearings, the red-berried gum trees, the green masses of reeds, tend to offer inducements to the partridge, woodcock, squirrel, rabbit and other small game. The Dismal Swamp is a sportsman's paradise which should be the resort of hundreds.

The bear has a prominent place in the Dismal Swamp, from its greater abundance and the quality of its flesh. Dismal Swamp bear is the universal favorite at Delmonico's table, and is more easily found than all others combined. The deer of the Swamp, too, afford a wider field for genuine sport than other localities. The opossum and coon afford attractions for the lovers of fun, and there are many who can recapitulate volumes of exploits among the birds.

Those who have found their conception of bear exclusively from works of fiction have no adequate idea of the lord of the Dismal Swamp. Like all nature's products he is lionized by contact with novelists. The bear is not brave. He is cowardly, weak, dirty, and a prey to an inordinate appetite for farmers' pig. At very few periods can he be honestly called handsome or courageous when in the presence of man, but in strength he is enormous, and in speed he will sometimes rival an Arabian horse. The swiftness and power with which he uses his claws while capturing a "cattle-beast," a pig or beehive, is incredible. A hunting dog is frequently cut in two by a single stroke of a bear's paw. But for real, genuine bravery, where, becoming tired of being hunted, he tries to infuse variety into the affair by hunting his enemies, the bear does not possess it. The bear usually confines himself to the dense growths of reeds by day, sallying forth by night to the farmers' beehives, or to the haunts of the "razor-back." Occasionally he will spring on the back of a "cattle-beast," burying his teeth in the frightened animal's neck, and using his claws to catch at the trees and brush through which his victim dashes. Usually he kills his prey, but woe be to him if he is carried into the "open," for there he is set upon by the steers' companions and driven off.

For bear shooting in the Dismal Swamp there are two requisites in addition to the bear—men with guns and a man on a horse. The first named halt on the border of a jungle where a bear is supposed to be hid, while the other drives the inhabitants of the jungle toward them. The master of the hunt posts the sportsmen here and there in pairs, so that each hunter has an especial rival, against whom he is pitted, and whom he must, if possible, forestall in shooting the bear. When the hunters are posted the horseman advances into the jungle and with loud shouts starts the game. A little later and the bear shambles out directly into the arms of his enemies. Another method of shooting the bear is to tie a pig by the leg to a tree in the open, and in the evening the hunter takes a position near by, employing a negro boy to keep the pig awake. Four drams of good powder, an ounce and a half of buckshot, and a little attention to business, will usually settle the bear question. Bear are very

plentiful this year, and their familiarity with the farmers' possessions so great, large numbers of spring guns are set throughout the Swamp.

Lake Drummond is, and has been for years, a favorite spot for deer. They are only hunted with dogs, a still-hunter being an object of aversion to the natives, and he is lucky if he escapes without having the tails of his shirt nailed to a tree as a warning to the next tenderfoot who imagines that still-hunting is the only way to shoot deer.

The "cattle-beast" is the local name given to the sturdy wild cattle which roam about through the fastnesses of the Swamp. They are small, undersized animals, and as swift and as shy as a deer. When the farmer wishes a fresh beef, he takes gis gun and he takes his dogs and runs the animal to a standstill. The "cattle-beast" is favorite meat for bear, and oftentimes carries the marks of severe encounters.

It is the height of fun, if not exactly true sport, to attend a coon or opossum hunt in the Dismal. Both are universal favorites for the table, and nowhere can be found a fit companion to the possum (unless it is a young pig, which, after fattening on milk, emerges a "perfect roll of butter"), and in point of flavor and delicacy cannot be surpassed. Both of the animals are rich in fighting qualities. A high-spirited coon will lie on his back and whip almost anything that comes along; but in the branches of the persimmon the possum is king. He is subject to nothing but a "nigger." His throne is the branch from which he hangs by the tail, and from it he swings and reigns.

For coon and possum hunting, provide yourself with plenty of "niggers" and coon dogs, and start into the Swamp immediately after dark. It will not be long before the dogs will have a coon treed. Then comes the fun. The coon is in the tree, the dogs are at its foot. The great moon silvers the green branches. Muscular negroes attack the tree with sharp steel or mount into its branches. Torches of lightwood blare brightly. The hunters gather about. The tree falls or the coon is shaken from the branches. In either case there is a conglomerate mass of negro, dog and coon. Thump! The dog has him, and a tussle occurs, but the dog wins. Thump again! A negro has smitten a brother in his anxiety to strike the coon. Yah! A negro has caught a possum, and inserting the beast's tail in the clevis of a hickory stick, starts for home, the envy of his sable companions. The light of the full moon, the flare of the pine knots shining upon the black countenances form pictures never to be forgotten. Off start the dogs through the fields of corn or reedy marshes, and on a good coon night within fifteen minutes the scene will be repeated.

Before the war "fox-running" was very popular sport for the planters who lived about the Dismal Swamp, but of late years has sunk into an almost innocuous desuetude." In the ante-bellum days "any one who was any one" kept a pack of hounds, and could furnish a day's sport equal to that presented by an English lord. But at present there is very little "fox-running," and I should entirely have forgotten the existence of many packs of hounds but for the recent action of a Philadelphia drummer, who rejoices in the sobriquet of "Tombstones," who, in a fit induced by looking upon whisky cocktails with "cherries in 'em," drove into Norfolk from Ocean View tooting incessantly upon a huntsman's horn and followed by about a hundred and fifty baying hounds, which it took the owners a week to recover.

I suppose that about every section of tidewater Virginia and eastern North Carolina affords good bird and squirrel shooting. I have driven hundreds of miles in both sections but have found nothing better than in the Dismal Swamp. It is the winter home of the blackbird and robin, and a blackbird pie, stuffed with Lynnhaven oysters, is a dish for the gods. The Swamp is the scene of the revelries of the squirrel and rabbit. Then, too, it has the enchantment of silence, the glistening of trees and reeds and grasses; deep, soft moonlight and starlight; and, best of all, the heavens of sentiment and tenderness opening to you, as somehow they do not, or cannot, anywhere else. FRANK A. HEYWOOD.

HOW IS THIS THUS?

WE had been paddling leisurely along the south shore of Pend d'Oreille Lake, and having stopped for lunch, I picked up a shotgun loaded with 7s and walked along the shore with a view of shooting a ruffed grouse for dinner and looking up a location for camp. I had not gone half a mile when I heard a noise in an inclosure, which seemed to have served as shelter for lumbermen's stock. Moving in that direction I jumped a large black bear. I pricked his ears with a charge of No. 7, at about 20yds., and he stopped to consider or to scratch himself, giving me time to draw my revolver, which failed to cock on account of being rusty. On no previous occasion on that trip did I take a shotgun when reconnoitering.

Two days later, after having located a camp, I went to look for a large cedar log, and during my two hours' walk flushed eight dusky grouse and I do not remember how many ruffed grouse. On that occasion I carried a .45cal. rifle. The next morning I took my pointer and 10-gauge over the same ground and bagged two dusky grouse and four ruffed grouse—all we could flush. On my way to camp, and not over 400yds. from it, I jumped one of the largest whitetail bucks I have seen in this vicinity; he gave me a standing shot at about 150yds., but then he knew I had the scatterbore with me.

We have all had the same experiences over and over; and the more we have hunted the more incidents we can remember. I mention them to explain why I have spent many leisure hours gazing wistfully at a Winchester repeating rifle—good weapon; but it would be a more suitable hunting gun, in my estimation, if the magazine tube could be changed into a shot barrel. I have given the problem up, my head being either too thick or not thick enough to think out the required alterations; but the enterprising company manufacturing the repeating rifle could, it strikes me, place a gun on the market with rifle barrel either .40 or .45 and shot barrel 12 or 10-gauge, over and under or side by side. Such a gun would be appreciated by many. Rifle and shot combined now in the market are either chambered for a charge not suitable for a hunting rifle or complicated on account of the three-barrel system. My main objection to them, however, is the "tip-up action," which cannot be made to stand rough handling and hard use without getting shaky.

MUX.

A SLEEPING BAG.

Editor Forest and Stream:

Noticing a recent request for information in regard to sleeping bags, and having had some practical experience, which has taugbt me the great comfort and convenience of those useful articles, I give the benefit of what little I know.

In the first place a sleeping bag to fill thoroughly the requirements of the article, should, I claim, have but one opening, and that the mouth or at the top. The idea of a sleeping bag is to keep all the animal heat of the body inclosed in it, and to do that in a satisfactory manner you must have no openings to let in the cold outside air. The bag that I have used and which I found served the purpose excellently, was made of 12oz. waterproof canvas lined with sheep skin with the wool on, and was made with but one opening. The dimensions (which are not arbitrary) are shown in the diagram. I would suggest that the width would suit most any one but a fat man. The length should be suited to the height of the individual, making the length from the slit or opening the same as height of individual, and six inches more, with the

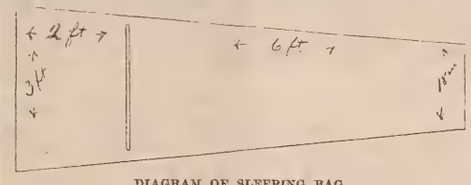

DIAGRAM OF SLEEPING BAG.

length above opening about two feet. This makes a fine hood or cover for the head at night, and a little bag in which to put dry hose or "little tricks" of any kind.

The inside lining of sheep skin with wool on is made of the same shape as the outside bag, but it does not extend beyond the opening; the top part of the bag being intended only as a hood does not need to be lined.

Preference is given to sheep skin as a lining, as it is light, cheap, warm and easily procured. No doubt some kinds of fur would be excellent, but would be expensive and not so durable as sheep skin. Reindeer skins are not easily gotten, and they would be heavier than light sheep skins. I do not consider that, weight for weight, blankets would begin to be as warm as the sheep skin.

A little description of how I use my bag may not be out of place, and it will give a good idea how a "boss" bed is made in the mountains. First a layer of fine fir boughs is laid on the ground; over this is put a "gum" blanket, and on that a saddle blanket or two, according to the coldness of weather; if very cold most of the blankets are kept to throw over the top. Then the bag is laid on, and thrown over it are the rest of the saddle blankets. When ready for bed boots and pantaloons are taken off, a dry pair of woolen hose slipped on, and sliding down into the bag the sleeper draws a clean pair of blankets about his face and neck, lifts the projecting hood, and there he is "snug as a bug in a rug." The clean pair of blankets is all the bedding carried, excepting the bag; for the saddle blankets with proper care do well enough for outside covering when necessary. But one needs one pair of ordinary heavy, clean blankets. When rolled up the bag makes a bundle only 34in. long by 10 in diameter, and weighs 10lbs. It need not cost more than one good pair blankets, and for comfort beats any number of pairs.

PRAIRIE DOG.

"PODGERS" COMMENTARIES.

THE idea expressed and explained under the heading of "Rod and Gun and Camera" in your last issue is a capital one, and your readers will hail with delight the prospect of the future illustrations of all things pertaining to sport, and that is proven by the great favor the illustrations met with in your number referred to (April 7). No doubt we shall see some very creditable work of amateurs. Everything is pictorial nowadays, and the FOREST AND STREAM seems not disposed to be behind in enterprise.

The Anglers' Association of the St. Lawrence River seem to be doing splendid work, as referred to in your editorial column. That sort of thing is the only way to inspire respect for the game laws. Capture the nets and we shall see the net results.

That Delmonico woodcock case will never come to trial, for doubtless "Del," has a "pull" gastronomically on the stomach of some official who has influence enough to tie the bandage so tightly over the eyes of the goddess that she never can "see it." But may we all live long enough to see the case tried. The gourmand always likes his bird to hang up until it is a little gamy. When the trial finally comes off it will be found that the body has departed and only the leg remains, not enough of the original bird to make out a case. The next official whose business it will be to try it will probably remark this is a "'leg I see' left me by my predecessor." The offense is rank and smells to high Heaven.

You say the trout streams of Connecticut are pretty well fished out. No wonder, for regardless of law or decency, the people in the vicinity of the streams begin to fish early in March, especially the farmers' boys, and by the time law-abiding people set out to fish there are none left. It only seems necessary to make a restraining law for fish and game to have every man and boy in the vicinity of a stream wild to infringe on it. It is precisely the same principle that prevails in the case of the Sunday liquor law. Men who never cared before for stimulants are seized with a seemingly unquenchable thirst, and are frantic to find a saloon side door open, failing in which (very seldom) they rush to the ferries and invade the primitive shores of Jersey. They make perilous journeys to Hoboken in quest of the cup that first cheers and subsequently inebriates.

Dr. Binion writes charmingly of tarpon fishing at Fort Myers, Florida, and as old a fisherman as I am, and notwithstanding long experience and much good fishing, I confess to a sense of enthusiasm and feel the tingling of the electric thrill when reading his description, that a fisherman only knows when he strikes the foeman worthy of his rod. I do not quite agree with the doctor as to his idea that much fishing is reducing the numbers of this gamy fish. As long as tarpon fishing is confined to the rod, as it seems perforce to be, there is little danger of their annihilation. So thinks with me, doubtless, the unsuccessful tarpon fisher. There are wider fields still untried, for instance, over on the west coast in the waters of Apalachicola and St. Vincent's Island. While there last fall I learned that large schools of the tarpon were seen often in the channel in front of St. Vincent's: but as yet no fisherman has essayed a trial of these waters. I have never fished for tarpon, but when salmon have the floor I shall have a few words to say; and, by the way, I am not quite ready to surrender the *gateaux* to the tarpon against any salmon of its size and weight. If the Doctor wants to make a comparison I can tell him where to go to get his fill of salmon fishing.

"Camp Fire Flickerings" is not a bad heading to your column of "That reminds me's," but after reading that duck yarn in last number I suggest that you change the heading and call it "Ananias, His Column."

"Kelpie's" short reminiscence talk of the old flintlock "Manton" carries me back to my boyhood days, and the old double barrel that my governor owned, and which, out of regard for the memory of that famous old gun maker, he would never allow to be modernized. There were other guns in the house, which I often surreptitiously abstracted for a furtive Saturday afternoon shooting, but I never dared to lay hands on the old "Manton," which we boys looked upon with a sense of awe and held sacred. It was about the only thing we did. Moreover we knew that while our punishment for filching the other guns would be of a moderate character, to lay finger on the old "Manton" was a sacrilege that would insure dire results. Accustomed as we were to having our jackets tanned for ordinary offenses, we dared not risk this one. The gun remained in its old moth-eaten green baize case, too sacred to be touched, and we were proud enough to be allowed to have an occasional look at it when the governor took it out to oil and polish it. But, alas! the destruction by fire of that part of the old house ended its career; peace to its ashes.

The yachting department of last number does Mr. Stephens great credit. His drawings and description of that nondescript, the Gloriana, is a most elaborate and creditable piece of work. We have heretofore had only fractional descriptions and cuts of that wonderful craft, but here we have her in every detail to the life and she is not a beauty; but on the principle of "handsome is as handsome does" we must accept her with all her ugliness. By the way, in the art gallery in the Rector street Elevated Railroad Building can be seen a splendid oil painting of her under full sail, as she appeared in the race off Newport. It is by a Boston artist, and well worth a visit, and should become the property of the present owner of the craft.

There is much more to be said of the interesting contents of the last number of the FOREST AND STREAM, but I have used up my share of space, and we will adjourn until next week. PODGERS.

OUR PHOTOGRAPHY COLLECTION.

Editor Forest and Stream:

For the benefit of the community at large I would like you to state in your next issue where you expect to stop in adding new features to your paper. Your pigeon-match type is a great thing; your illustrations of the Fulford–Brewer matches were immense; your portraits of men and dogs are excellent, especially of Mike in last week's issue—and, by the way, it was a happy thought to publish his picture, as all readers form a mind picture of the men and dogs they read of. Mike may be dumb, but he don't look it; and I think his owner, the Judge, would sooner leave his rod behind when starting for a trip than Mike.

But to get back to the subject of surprises, you have in this week's issue made your biggest strike when you throw your columns open to the amateur photographic sportsman; but you don't realize what you have done. If you don't get a carload of negatives and pictures you are lucky. I myself will send you a supply of negatives, all of fishing and shooting subjects; and there must be hundreds of other shooters and fishermen who have an equal number and will just as gladly send them to you.

There is nothing like pictures. While your brilliant descriptive writers give us a mind picture of their sport, it is not half so satisfying as the reproduced photograph, where the scene can be taken in at a glance, and the story of the tumbling rapids, the still pool, the cosy camp with the game and fish hung up, will be read with greater interest if the actual picture is before us.

You are making a great paper, and it will bother others of the same kind to keep up with it; and this last move should make it still more popular if possible. So give us lots of pictures. PIGARTH.

HARRISBURG, Pa.

AN IDAHO FISH AND GAME COUNTRY.—With pleasure and appreciation I noticed Mr. Holberton's comment on my article, headed by FOREST AND STREAM "An Idaho Fish and Game Country" (very appropriate) by me, however, "Where and how I went and what I found there." The different headings explain what there is to be said. The former might imply, as Mr. Holberton seems to, and possibly others do take it, an "ad." in favor of some place in which I might be interested; the latter stamps it and it was intended only as a simple report. The fish and game are there, and more plentiful than I have found them on the same area in the acknowledged best grounds of Colorado, New Mexico or Texas. The greater portion of the country is very rough, but there are here and there a few miles of very fair stalking ground and the Idaho laws permit hounding during the entire season. If I can arrange it I will spend about three months on Kaniskee and Priest lakes this coming fall, and would be glad to welcome any reader of FOREST AND STREAM who might stumble over one or the other of my camps. I am outfitted in superior style, and mine is a Western invitation and means as previous ones extended by me: "Enjoy yourself and keep your hands from your purse strings."—MUX.

MANY SNIPE have been killed on Long Island this spring, although the law forbids it.

WOULD THERE BE MORE FUN IN THE FIELD IN A DAY?—One revolution of the earth on its axis is called a day. A day is divided into twenty-four parts called hours. Each hour is divided into sixty minutes, and each minute is divided into sixty seconds. The day is again divided into two equal parts of twelve hours each. This division is arbitrary and productive of no little confusion. It is two days in one day. Various attempts have been made to remedy this defect, but none have succeeded. The railroads sought to abolish the two tables and make one of twenty-four hours, regulating all time and time machinery accordingly; but for some reason nothing has come of it. Perhaps its effect on all chronometers prevented its introduction. An innovation that would invalidate all the timepieces of the world would not readily be submitted to. A remedy is near at hand, and perhaps from its very simplicity has been overlooked. Double the length of the hour, minute and second, and regulate all time machinery down to one-half its present velocity. That would meet all difficulties now existing, and increase the value of all chronometers. They would run slower, last longer and do better service, and A. M. and P. M. would retire.—LEVI S. KLAGLE (Vinton, Ia.).

DUCKS IN FISHING NETS.—Erie, Pa.—Unluckily, though the Pennsylvania game laws protect the ducks along our shore of Lake Erie from gunners in the spring, they do not keep them out of the gill-nets of the fishermen. Nearly every tug and smack coming in from the nets of late have had a goodly number of plump bluebills and other ducks aboard. The fishermen are not pleased at these catches—as might be at first expected that they would be—the damage the ducks do to the delicate nets is so great. As I have written before, the price the drowned birds bring does not recompense the fishermen for the damage they do. Bluebills from the nets are offered on our street market at 15 cents each, and do not find purchasers. And when large numbers have been shipped East to commission houses, they have almost invariably been thrown back on the senders' hands.—MALLARD.

OUR WILD GOAT PICTURE.—The author of the wild goat hunting relation (issue of April 7) writes of the illustration: "Mr. Seward is to be congratulated on his success of his photograph. I had good opportunity to observe the goats lying down, feeding and moving about undisturbed; and can say that the picture is true to life, and the surroundings are perfect. We have four persons in this place who have hunted the wild goat; and they all unite in praise of the picture. My brother, who hunted the wild goat near Mt. Baker, Wash., had a fine opportunity to observe some old bucks sitting upon their haunches, a habit they frequently indulge in when disturbed by anything unusual in sight. If I go West this fall, shall try to get my camera up in the range and secure some pictures from life.—E. H."

LARD AS A CONCENTRATOR.—"The next time you load any shells," a friend told me, "put about a spoonful of melted lard on the shot. The lard will run down through the shot and harden, making a regular slug." Two days later I set out with several shells loaded with slugs made of No. 6 shot and lard. A crow sat on a big dead pine seventy-three good paces away. I shot at him and he died. Seventeen shots had pierced his side and head. Shots at a paper 10×12in., at 80yds., showed an average of twenty-three shot in them.—RAY SPEARS.

LINNÆAN SOCIETY OF NEW YORK.—Regular meetings of the society will be held at 8 P. M. at the American Museum of Natural History, Eighth avenue and Seventy-seventy street, on May 4 and 18. May 4.—Remarks by Mr. F. M. Chapman on a recent trip to Cuba. May 18.—Remarks by Dr. C. S. Allen on a recent trip to Florida. Reports by the members on the spring migration.—ARTHUR H. HOWELL, Sec'y, 212 Madison street, Brooklyn.

THE NATIVES OF TIERRA DEL FUEGO catch seals with a decoy of seal-skin stuffed with grass, which they draw through the water by a thong, imitating at the same time to great perfection the bellow of the animal. Birds they catch at night by torch-light, letting themselves down the cliffs by ropes of leather, and fish they take in nets made of sinews of the guanaco.—*Scottish Geographical Magazine.*

MICHIGAN SNIPE.—East Saginaw.—A good many snipe have been shot around Saginaw this spring, but as I do not believe in spring shooting I have not been out.—M.

THE NEW YORK GAME BILL.—Albany, May 2.—[*Special to Forest and Stream.*]—Governor Flower has not yet signed the game code.—M.

Notes of The Season.

It is to be hoped that the man who draws a loaded gun toward him muzzle first will shoot no one but himself. Any way he has no business with a loaded gun at this season.

Now is the time when the old adage is reversed, and a bird in the bush or marsh is worth two in the hand, and two spared now may prove a dozen in the hand in the fall. AWAHSOOSE.

Map of the United States.

A large, handsome map of the United States, mounted and suitable for office or home use, is issued by the Burlington Route. Copies will be mailed to any address on receipt of twelve cents in postage by P. S. EUSTIS, General Pass. Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

THE TENT YOU WANT.—If you need a new tent for your camping trip this summer, it will pay you to investigate the "Protean Tent," elsewhere advertised in these columns. It is far better for the purpose than any other tent, and will add much to the pleasure and comfort of your outing.—*Adv.*

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—*Adv.*

A certain well-known angler was playing an active salmon. "Land him, sir, land him, or he'll break your lines," shouted the guide. "Can't do it, can't do it," returned the fisherman composedly. "'Wells's Manual' says I must run him at least ten minutes." And he lost his fish.—*Boston Journal.*

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws.*

Trout Near New York.

WE have secured, for the private information of the readers of FOREST AND STREAM, knowledge of a number of streams and lakes easily accessible from this city, where we believe that good fishing for trout and black bass may be had. The information, much of which comes from private sources, we are not at liberty to print, but we shall be glad to furnish it without charge to any reader of FOREST AND STREAM who will apply for it, either personally or by letter.

PACIFIC SALMON AND TROUT.*

A HIGHLY interesting, popular account of the salmon and trout of the Pacific Coast of the United States, from the pen of Dr. D. S. Jordan, has been issued as Bulletin No. 4 by the Board of Fish Commissioners of California. This article condenses into 15 octavo pages a vast deal of information of value to anglers and students generally.

Dr. Jordan says: "Of all the families of fishes, the one most interesting from almost every point of view is that of the *Salmonidæ*, the salmon family. It is not one of the largest families, comprising less than a hundred species, but in beauty, activity, gaminess, quality as food, and even in size of individuals, different members of the group stand easily with the first among fishes.

Salmonidæ are found in the north temperate and Arctic regions, and are everywhere almost equally abundant wherever suitable waters occur.

"All the *Salmonidæ* feed upon fish; the smaller ones upon worms, insects and small fish; the larger forms on fishes and crustacea—whatever they can find.

"Naturalists divide *Salmonidæ* into nine genera: *Coregonus*, the whitefish; *Plecoglossus*, a little annual fish which is found in the waters of Japan, born in the spring, runs up the rivers in the summer, and dies in the following winter, only the young surviving; *Brachymystax*, a large and scarcely known salmon-like fish in the waters of Siberia; *Stenodus*, the inconnu, a large, weak-toothed salmon found in the Mackenzie River; *Thymallus*, the grayling; *Hucho*, the Huchen, or Rothfisch of the River Danube, a large, voracious, pike-like salmon, which seems to be little known either to naturalists or to anglers; *Oncorhynchus*, the Pacific coast salmon, or quinnats; *Salmo*, the salmon and trout; and *Salvelinus*, the charr, or red-spotted trout. Of these the various fishes commonly known as salmon and trout belong to the last three genera." Dr. Jordan then gives the source of the common names.

Salmo, from *salio*, to leap. *Fario* (Forelle of the German), trout of Izaak Walton and all English writers. The Latin word *Trutta*, from which the name trout is derived, was applied to the sea or salmon trout, *Salmo trutta*. The Doctor remarks that there are in England, whence our names have come, "three species of black-spotted silvery fishes of this family: (1) The salmon, largest of all and anadromous; (2) The trout, living in the brooks and the lakes only; (3) The salmon trout, which stands between the two. All three belong to the genus *Salmo*, and the only difference of any importance between the salmon and the trout, so far as structure goes, lies in the fact that the salmon sheds the teeth on its vomer, that is the middle part of the roof of its mouth, as it grows older, while in the trout these teeth are preserved throughout the life of the animal. Living in salt water and feeding on large fishes and crustacea, the salmon is the more vigorous, with coarser and more oily flesh, but this difference becomes of small importance as a matter of distinguishing species." Then the charr of England is mentioned, known as saibling in Germany and ombre chevalier in France. The generic name is *Salvelinus* (the same including our brook trout), and is a sort of diminutive of *Salmo*, meaning a little salmon. The name ombre is given in allusion to its dark colors and love of shady places in the lakes and brooks.

"Armed with these names of salmon, trout, salmon trout and charr, our ancestors came to America." The name charr was little known, and has probably never been in common language applied to any American fish. "In the fresh waters of New England and New York, in all the clear streams throughout the Allegheny region, and in the lakes of Canada and the Northwest, our forefathers found a red-spotted, fine-scaled, dark-colored, speckled beauty. Finding no real trout with black spots and large scales in the rivers, and having forgotten the name of 'charr,' they gave to this fish the name of trout, or speckled trout, or brook trout, and in spite of the fact that in reality it is not a trout, but a charr, the name of brook trout is likely to adhere forever to the *Salvelinus fontinalis*.

"Real trout there are none on our Atlantic coast, and salmon trout is likewise wanting, but the name salmon trout is often given to the brook trout, or charr, which has run out into the sea." This name is applied also, and more generally to the lake trout (*Salvelinus namaycush*).

"In the lakes of Greenland and the eastern part of British America, the European charr (*S. alpinus*), is as abundant as it is in Europe—a fact which has been only lately made manifest, and even yet there is some question whether some of these which are found in the lakes in New Hampshire have not, some time or other, been brought over and planted there from Europe." To the Pacific coast were taken the names used in the East, and besides the salmon the settlers found an abundance of what they called trout. Black-spotted, and in every way closely resembling the trout of Europe, wholly unlike the charr or trout of the Eastern States.

The derivation of the name Dolly Varden trout is given as follows: "In Oregon the red-spotted trout, or charr, is distinguished by the name of bull trout. In California it had, for a long time, no distinctive name. A landlady in some hotel in the neighborhoyd of the U. S. Fish Hatchery at Baird, on the McCloud River, at the time of the Dolly Varden craze, noticing the gaudy colors of this charr, proposed to call it the Dolly Varden trout. This name coming to the ears of Professor Baird, then United States Fish Commissioner, pleased his fancy, and he directed me, who then had the classification of the trout in the Smithsonian Institution in hand, to continue for this species the common name of Dolly Varden trout, and so, in the books at least, Dolly Varden trout it is to this day."

There are five species of salmon on the west coast, namely, the quinnat or king, the blue-back or red, the silver, the dog and the humpback. The first averages 22lbs. in weight, and reaches 100lbs. The red fish usually weighs from 5 to 8lbs.; the silver salmon 3 to 8lbs.; the dog salmon averages about 12lbs., and the humpback (the smallest) weighs but from 3 to 6lbs. The king and blue-back salmon run in the spring, the others in the fall. An account of the habits of the fish when in the rivers is given, and the food, spawning and changes in form and color. The great destruction of salmon in the Columbia River and decrease in the fisheries all along the coast are mentioned.

"Of the American trout," says the Doctor, "the one which most closely approaches the European *Salmo fario* is the rainbow trout of California, *Salmo irideus*, as it was named some forty years ago by Dr. W. P. Gibbons, of Alameda." No specimens of this trout have been obtained east of the Cascade Range or of the Sierra Nevada. It ranges in size from six inches in length to six pounds in weight.

"Another California trout is the so-called steel-head, more usually known in California as salmon trout, a fish sufficiently like the salmon trout of Europe, but the name steel-head seems to me preferable, because it is given to no other fish." The name is suggested by the color of its head and hardness of the skull bones; usual weight in Columbia River 12lbs., maximum 25lbs. (We have seen 32lb. fish). The Doctor compares the steel-head and rainbow, and finds few and minor differences. "It is not at all unlikely that the steel-head is simply a rainbow trout which has descended into the sea and which has grown larger and coarser, and acquired somewhat different form and habits on account of its food and its surroundings."

Next is the cut-throat trout, *Salmo mykiss*. "It is the most widely-distributed of all our (west coast) trout, being found throughout Alaska, Kamtschatka, in all the streams of Washington and Oregon, in the northwestern part of California; throughout the rivers of the great basin of Utah, in all the streams on both sides of the Rocky Mountains until we come to the desert lands, where the washes of sand make the streams uninhabitable to any trout, and thence extending its range southward in the mountains as far as the springs in Chihuahua, the southernmost point reached by any trout in any country." The name cut-throat alludes to the crimson blotch around the throat. [A better name is red throat]. It reaches a weight of 25lbs. or more. The largest known specimens occurring in Lake Tahoe and in the salt water of Puget Sound.

The next and last fish is the Dolly Varden. "The finest of the trout-like fishes on the Pacific coast, and scarcely different from the Eastern brook trout, the slight difference being, on the whole, to his advantage. It is rather plumper in body than the brook trout of the coast. The red spots are on the back as well as on the sides, and the back and upper fins do not show the dark green marblings which are characteristic of *Salvelinus fontinalis*. In food, in body and in gaminess, the Dolly Varden, or *Salvelinus malma* (this, too, a Russian name, first given it by Steller), is not inferior to its Eastern cousin.

"Everywhere on the Pacific coast, in the clear streams of the Cascade and Sierra Nevadas, and even the Coast Range of mountains, some species of trout abounds. This region should be the paradise of anglers."

*Salmon and Trout of the Pacific Coast. By Dr. David Starr Jordan, President of the Leland Stanford, Junior, University. Sacramento, State Office. A. J. Jonston, Supt. State Printing. 1892.

A TRIP TO SABATTIS.

A MONUMENT situated in the town of Wales, Me., will perpetuate the name of the old Indian, Sabattis, in the memory of Maine during all time to come. Near Sabbatis Pond stands this monument—Sabattis Mountain. It commemorates the name of the once famous and widely-known chief. It is a beautiful structure and decorated in nature's loveliest fashion. For all we know, like the Pyramids, it may be full of chambers, where repose unknown treasures or the valueless remains of ancient dead. We do know that an entrance to the pyramid of Sabbattis exists, but no one has as yet had courage to explore this ancient structure, built long before the name Sabattis was given it. It was our purpose to explore the cave of Sabattis Mountain and to get some shooting and fishing in its vicinity, when over a decade ago the writer visited the locality.

Sabattis Pond years ago afforded unsurpassed fishing and hunting to the sportsmen of the neighboring city and towns. Pickerel were abundant and large; ducks, snipe and yellowlegs were plentiful. The lake was near the low-tide of its glory when we sought to wage warfare on nature's children there. Only the last remnants of the tribes that inhabited the waters or the neighboring forest remained. As the Indians had disappeared slowly from the banks long ago, leaving only the name of a chief to indicate their former abode there, so the pickerel were gradually being exterminated in their turn, as had the trout before them. Enough could be caught to induce the Sunday sportsman to come from Lewiston, and enough snipe and plover, with an occasional duck, sufficed to excite the huntsman's ardor, and in the woods of the mountains gray squirrels still abounded. The pond, it is said, was once stocked with black bass, but they have given no sign of existence there.

We found our guide, old friend of our boyhood, who, provided with a lantern and geological hammer, conducted us to the entrance of the dread abode. The space was too low to allow a person to enter otherwise than by wriggling flat on his stomach. We wormed our way up a slight incline into quite a spacious gallery. How far it extended we did not learn. The somber walls and roof glittered with precious goms, which at the touch of human hands turned to drops of water. We found no treasures near the entrance, so proceeding a short distance further we tried to peer through Stygian darkness ahead. My guide was positive he could see two green eyes staring at him and insisted upon a departure, which soon after we concluded to make, as our light flickered and went out. We scratched a match, which, too, was immediately extinguished. We then threw some stones

as far ahead as we could and heard the splash of water as they struck and concluded that it would be unsatisfactory work to explore uncertain holes in a mountain with no light. Besides the air or lack of air became oppressive and those "green eyes" might belong to Old Nick himself. We made an exit through the tortuous passage by which we entered and spent the rest of the day gathering material for a squirrel stew.

We expressed our desire to try for pickerel the next day, but the plan was surreptitiously abandoned when our guide informed us that he knew where there were some trout—"big fellers."

On the following morning, long before dawn, we had embarked upon our dubious voyage in a square-end punt propelled by a single paddle, our guide paddling while we bailed. It was the intention to direct our course to the mouth of Dead River, which sluggishly makes its way into Sabattis Pond, then follow up the stream to the "trout hole." A thick mist rested on the pond, and after traveling until sunrise and finding ourselves near the point of our departure we concluded that we had been cutting a circle in the fog. It was of no use to think of catching trout then, our guide informed us, for nothing would bite after sunrise but "flounders and hornpouts." I was at a loss to know to what fish he alluded as "flounders," but afterward learned that it was the little sunfish or pumpkin seed (*Lepomis gibbosus*). The hornpout is a small catfish (*Animus catus*).

On the following morning we made a successful attempt to reach our destination, where we arrived a little after dawn. Our guide proceeded to unwind a stout line with a large hook and baited with several ground worms. He fished by hand with no rod, while we attempted to cast our flies. The space was small, and very little chance to play a trout should one be hooked. We had the pleasure of seeing a beauty break away and disappear from our covetous gaze. Our guide pulled in three 2-pounders hand over hand, as they rushed from side to side, and advised us that "them fellers like worms better'n feathers." Those three trout were the only ones taken. Just before sunrise the sunfish and hornpouts began to bite, and soon seemed to fairly swarm in the water. We then pulled up stakes and made our way back along this stream, which, near the pond, made its way through a good-sized marsh where numerous huge watersnakes (*Tropidonotus sipedon*) were sunning themselves on the banks and logs. That day was consumed in an almost constant fusilade against plovers and sandpiper, which were quite plentiful, though wild, in the marsh. A good supply were bagged, and graced our table in the shape of an exceedingly palatable pot pie.

This summer I met our old guide, who informed me that the squirrels had migrated, the birds are few, the pickerel extinct and the trout of the past, but the pond still rested there, snakes still abounded in Dead River and bull frogs croaked out an undisturbed existence.

BILL.

BOSTON ANGLING PARTIES.

BOSTON anglers were never more anxious for the departure of the ice from the more celebrated of the Maine trout lakes than they are this season. Up to the time of this writing the ice was still hard and solid in Moosehead Lake and the Rangeleys, and the chances are not in favor of its moving before the 8th to the 10th of May. Several parties will start from Boston as soon as the telegraph brings word that the ice is out, while others, of the less enthusiastic class, but often the more fortunate, will wait for brighter days and warmer weather. The latest accounts still mention extremely low water, with rain badly needed. One party has already left for Rangeley, indeed, with the hope that some sport may early be had with the landlocked salmon in Rangeley Lake. This party as made up, nearly to the time of starting, was composed of Mr. Foster, of the boot and shoe house of Lamkin & Foster, Mr. J. B. Field, and several friends. They go to Rangeley first, then to the Birches, as Capt. Fred C. Barker has lately renamed his camps at Student Island, in Mooselucmaguntic. Another party, anxious to be off, is the Camp Vive Vale party, the owners of the pretty camp of that name in the Narrows of Richardson Lake. This party is composed of Mr. C. P. Stevens, of the printers' roller house of Wilde & Stevens, his nephew, F. B. Stevens, of the same house, E. J. Shattuck, manager of the printers' ink house of Geo. K. Morrill & Co., and his brother, Chas. H. Shattuck, manager of the San Francisco branch of the same house. Mr. Charles H. Shattuck, though an Eastern man originally, has never fished the Rangeleys, and is expecting great sport. He came on to visit his brother a week or two ago, and through the solicitations of the same brother and Fred Stevens he has concluded to prolong his visit till the ice is out of the lakes and then to try the Maine trout. A letter to-day from Mrs. F. M. Thomas, of Andover, says that the Narrows are already open, though the ice is still in the lake above and below. For Charley Shattuck's sake this party will be off even before the ice is announced as out, if it stays many more days, though one or two of the older hands at the business wish secretly in their own minds that it may not go too soon. They have been up there before when the weather was cold, with a freeze every night and the trees bare of leaves.

Mr. C. Z. Bassett, of Geo. B. Appleton & Co., tackle dealers, and his friend Mr. G. N. Smally will go to the Rangeleys, but they are not over anxious for the ice to be out, nor to be up there in the cold days of early spring. They will go about the 21st of May, however, and they will visit several of the best fishing points in the Rangeley system. Among other attractions they hope to be late enough for some fly-fishing at Little Kennebago. Mr. Basset had good sport last year, going over about the same ground and leaving Boston about the same date.

It seems that the Lawton party could hardly wait for the Maine trout lakes to open this year. They started Friday for Lake George, N. Y. They go for lake trout or togue fishing, for which that lake is noted, in the way of very fine fish. At least such was the opinion of the party when it started. It is suggested, however, by friends of the party, that they will come back ready to go to Maine after the trout they did not get at Lake George. The party was made up to include Mr. Herbert Lawton, commission dealer in woolens, 145 Franklin street; Mr. Henry A. Priest, of Priest, Page & Co.; his brother John F. Priest and Mr. Will F. Chapman. The Messrs. Priest have been to the Rangeleys in former seasons, I believe.

A party of considerable dignity and influence has been made up for Grand Lake Stream, and it was to start on Saturday. It was made up of Mayor Nathan Mathews of Boston, Superintendent of Streets Carter, Alderman Lee, Mr. C. F. Rice, and Mr. Perry of the Massachusetts Building Association. They have fitted out extensively, and expect good fishing for landlocked salmon. The ice is out in those waters, but not much fishing is yet reported. It is plain that angling is popular in Boston. Both the Governor and the Mayor, with most of the ex-Governors, are earnest devotees. Then there are the clergymen, the lawyers, the schoolmasters and the clerks, who go later at vacation time, each with rod and line.

Again there are reports of big sport salmon fishing at Bangor. It is current that one day last week Mr. Fred Ayer, the noted salmon fisherman of that city, took twenty salmon in one day, while another report says that he has taken twenty this season. The latter report is probably the correct one. But there have been one or two days of remarkable fishing in the great pool below the dam at that place. A Boston gentleman who was in Bangor on business on one of those days was attracted by the crowd and stopped and saw the sportsmen land several of these most noble fish. He came back to Boston wishing that he was a salmon angler, and indeed he went into one of the tackle stores to find out the cost of an outfit. But when he had inquired about tackle to the cost of $200 or $300 and found that he was scarcely more than begun, he gave up in discouragement.

What is termed the "Boy's Party" of the Monomoy Brant Club got back to Boston the other day, after a week or more of shooting. They found the weather good, but brant proved to be scarce, and only 15 were killed by this party. The party was composed of four or five members of the club and three or four invited guests. The members of the club were Mr. Harry D. Reed, A. H. Wright, Robert S. Gray, E. Frank Lewis and Henry Colburn. Among the invited guests was Mr. Henry Simonds, who has been with the same party a great many times.

Mr. Henry C. Litchfield, with Dame, Stoddard & Kendall, in the fishing tackle trade, received a very handsome present on Saturday. It was a fine specimen of brook trout from Swan Lake, near Belfast, Me. It was sent with another one by Mr. C. B. Hazeltine with a letter which stated that the two were out of nine taken from that lake the day before by Fish Commissioner Henry C. Stanley and a friend. Mr. Hazeltine also stated that the two trout were about the average size—one weighed over 4lbs. and the other a trifle less—and he also remarked that it was "rather slow fishing." His friends in Boston would like to know what he considers "fast fishing" if nine of such beautiful fish in a day as the one shown in Dame, Stoddard & Kendall's window is to be considered "slow." Mr. Hazeltine doubtless would like to take twenty nine-pounders in a day, and so would we all of us; but to the eyes of Boston anglers that 4lbs. Swan Lake trout was a "whopper." Mr. Hazeltine invites his friend, Mr. Litchfield, to "try them any day." Perhaps some of the rest of us may be there. By the way, it will doubtless be remembered by the readers of FOREST AND STREAM that Commissioner Stanley was about the first to succeed in taking these beautiful trout from Swan Lake a couple of years or more ago. It had been known for some time that they were in the lake, but no one had taken them to any extent till Mr. Stanley succeeded and established the fact that they are there in abundance. He took a number of trout for spawning purposes from the same place last fall.

Mr. Samuel Hano, owner of the beautiful camp on Birch Island, in the bend of Cupsuctic Lake, is very anxious for the ice to go out. Indeed, it is hardly possible that he will wait for the announcement that the ice is gone, but will start this week. He hopes to get some early trolling for landlocked salmon. Some of his friends suggest that if he goes to Rangeley before the ice leaves that he have a trench cut in the ice a mile or two long, and that he troll in this, walking on the ice and dragging the line behind in the trench. Mr. Hano has built about as many houses in Newton and Alston as anybody in the world.

Mr. C. A. Hopkins, New England agent of the New York Mutual Life Insurance Co., left for Grand Lake Stream yesterday. He expects good sport. It would almost seem though, as if a greater number than ever had gone to that locality for landlocked salmon this year, and the season is scarcely begun yet.

Mr. L. Dana Chapman, whom the FOREST AND STREAM mentioned as down to Bourne with his friend F. A. Larkin, of Milwaukee, trout fishing last week, brought back a dozen.

Some three or four years ago Mr. Henry C. Litchfield got up a special split-bamboo fly-rod for Mr. Howe, of the Emerson Piano Co. Mr. Howe made a present of the rod to his wife. That very autumn Mrs. Howe was killed on the Tobique River in New Brunswick, the sad and unfortunate circumstances of which were related in the FOREST AND STREAM at that time. Mrs. Howe was a sister of Mrs. Dizer, who is to make up one of the Chapman party to Student Island, mentioned in the FOREST AND STREAM last week. The beautiful fly-rod has been presented to Mrs. Dizer by Mr. Howe, and it will be used this spring.

Mark Hollingsworth, a visitor almost every season to the Upper Dam, and well known in the world of artists, will go to the old haunts this year again, and proposes to take Mrs. Hollingsworth with him. This will be Mrs. Hollingsworth's first trip to the trout lakes, I believe. They will not start before the first of June, preferring warm weather and green trees to ice water and overcoats. Mrs. Hollingsworth took an 8lbs. trout just out from Camp Stewart last year. That trout had been previously marked by Mrs. Moody, of the Camp Stewart party, but they came out one day too soon. SPECIAL.

BANGOR FISHERMEN say there is no such thing as a Kennebec salmon, as the fish will not go into that river; yet Kennebecs are sold regularly in the markets, and even before the sea salmon have returned to the coast. How is this accomplished? By bringing over from Puget Sound the steelhead or Gairdner's trout, which passes current for the Kennebec without the slightest trouble.

WOODVILLE, N. H.—The trout fishing in this vicinity is opening well on the early brooks, though the snow is not off yet back in the hills. The Wild Ammonoosuc will soon be in condition, however, and some good strings and large fish (from ¼ to 2lbs.) will be showed before the 1st of June. I know for I have tried it before.—C. S. G.

BASS FISHING.

[Concluded from page 399.]

I WOULD strongly recommend the novice to start in with trolling. Flies can be used in this style of fishing by one utterly ignorant of casting. In using them let the lower fly sink, but keep the upper fly on the surface; draw them along with a jerky motion. Strike on sight or touch. In trolling always use a swivel to connect the leader with the line, to prevent twisting. The dead minnow can be used as in directions given for casting, or this style may suit you better: Take a piece of gut and fasten two hooks about 2in. apart; the upper hook can travel on a small gut loop or be made a fixture; have both hooks pointing the same way; now, take a dead minnow, 3 or 4in. is large enough, and pass the upper hook through the upper and lower lips, and the end hook near the back fin. Use two swivels with the arrangement, this lower one about the center of the leader. Fasten by passing the upper loop through the ring, bring it over the lower ring and back to the starting point, bring the lower loop over the ring and pass the hook, point first, through it; pull the gut through and shove the loop down, about 3ft. from the end, throw the leader into a loop and attach a fly in this manner; if you fancy, have it on a piece of gut 3 or 4in. long or take the fly loop, pass the strand around the leader and bring the fly through the loop.

The angler sits with his back to the oarsman, who should row quietly over the best grounds. Paddling is best in shoal water, and sailing is the best of all. About 35yds. for shoal water and a trifle less for deep is about the right length of line. Trail the line aside from the boat's course; it will then pass over undisturbed water; lengthen the line by pulling it off the reel; the resistance will take up the slack. Deep pools and places near the bank of the stream are the best. In ponds troll near the lily pads or any likely spot, keeping your boat well out. Occasionally vary the motion of your minnow. Strike close on the rise or tug. The same directions will apply to grasshoppers, spoon, etc. If you are fastened to a large fish get him away from the shore and into deep water as soon as possible. In playing a fish near sunken logs or weeds, net him the first good chance you get. A 6ft. leader in two parts, connected by loops, will be found very useful for general bait-fishing. If possible, avoid fishing with the sun at your back. The early morning and late afternoon fishing is apt to be the best. Remember that to be successful you must keep your line wet. The bait question is often a vexed one to the angler who visits a strange locality. Minnows and grasshoppers are often scarce early in the season, however, the humble worm is always accessible and is a bait not to be despised. Use a very small hook for catching minnows, tied on to a piece of cast-off leader or a fine line; they are very shy about biting sometimes. You can use a minnow seine if you like. This is stretched across the stream and the minnows driven into it. A fine-meshed landing net can also be used. For my part I can generally catch enough with a hook and line. For grasshoppers, a box punched full of small holes, the width and depth the same, is the best to use. Make a quick grab and shove them in head first. Avoid overgrown specimens. You can catch frogs the same way, or use a piece of red flannel on a hook; the smaller ones are the best. Hook them through the skin of the hind leg, close up to the body, and use them the same as live minnows. Search under stones on the rifts for crawfish; use them as a bottom bait. A flat box, with pieces of cork glued to the bottom, will answer fairly well to keep your hooks, flies, leaders, etc. Always carry your leaders in a neat coil. Carry the leader you intend to use coiled around your hat; it will soon straighten out in the water. On your return draw all the line off the reel and hang it up in coils to dry, the leader likewise. Wipe off the reel and oil the working parts occasionally with watchmaker's or sewing machine oil. Wipe off the rod and the inside of the ferrules; keep them plugged when not in use; lay the rod down flat in a cool place. In going through brush it is a good plan to either take off the butt piece or take the rod apart and pack the joints together by winding your line about them, not very tight. Good tackle will last a long time with care. Always put your bucket in shape and turn it bottom up over night, and then hang it up.

If any of my readers feel thankful for information given they can give a substantial proof of their gratitude by returning to the water all black bass under ½lb. in weight; double it for some waters. A few remarks about Milton Lake and vicinity will be of interest to the anglers who intend to visit us during the season. The west bank of the lake and stream is by far the best; a rough place, about a quarter of a mile below the bridge, has been cleared sufficiently to give an abundance of casting room; this portion of the stream is very secluded. The angler will have no difficulty in fishing both sides, as the stream is quite narrow, the pool at the camp excepted. There is another good pond about 100yds. above the camp. Large bass are seldom seen around the bridge, and there is no fishing worthy of the name above it. There used to be a pond stocked with black bass about a mile up stream from this point. The great flood of 1882 destroyed it. The greatest depth of water in the lake is off the evergreens; this place will suit the easy-going angler, as deep-water fishing does not require the same caution that shoal water does. A boat is not needed, unless you want to troll, as most of the fishing can be done from the shore; seek for minnows in the stream above the bridge and below the dam; rely on bait, as the fly is an uncertain lure. The experienced angler always has a good fighting chance, provided the water is not too high; remember, if you leave before dusk you are liable to miss the best of the fishing for both fly and bait. The pool at the bridge, near Milton, contains some fair-sized bass; between this point and the upper bridge there is a good place for minnows; about three-quarters of a mile to the north is the water works. The Rahway River at this point is a charming combination of woods and water. A good spring of water, along with a fair supply of black bass, contributes to render the place attractive to the angler. The best places are a short distance above the little falls; the bass are very gamy, but average small in size. Rely on grasshoppers and worms, as minnows are scarce in this locality. The angler who appreciates the beauties of nature gets the best results from his outing. ARTIST.

RAHWAY, New Jersey.

TROUT FISHING IN ALASKA will open late this year, writes a correspondent from Port Townsend, Wash.

NEW HAMPSHIRE'S COLD STREAMS.

CHARLESTOWN, N. H., April 30.—As your correspondent "Halford" says, "the trout law is off," so far as the laws of New Hampshire are concerned, but those of nature are on yet, and pretty well "froze on," too. There have been very few brook trout caught yet. I have heard of 12 and 13lb. landlocked salmon from Newfound Lake, and some good trout from Sunapee, caught from the rocks on shore, where they were chasing the smelt on their spawning beds. Live bait was used in both cases.

In 1840, before there were any game laws, I caught a big basketful of trout on April 23, and it has been a "red-letter day" in my memory ever since. Last Saturday, being the anniversary, I thought I would try again, and taking rod, creel and "worm box" (too early for flies) I went up the "Mill Brook," about two miles from the village, and fished back leisurely, trying every yard of water that I could drop a hook into. The morning promised well, cloudy and rather milder than for a week. Thermometer 54° at 7:30, and I anticipated a good day, but before I had got fairly at it the wind rose and the clouds began to scurry overhead, and it was with difficulty I could manage my line among the alders. I took two small ones under the old Sawmill Dam, one of which went back again in short order, and by the time I had fished down through the old "Sugar Orchard," an eighth of an acre or so, I had basketed five, the best 9in. long, and thrown back two more. This was all in the swift water and in the open. Then through a short piece of woods, full of good holes, without a bite, and a mile through the big meadow in the same way, till just as I was reaching the main road again and thinking of starting by it for home, my line declined to come out from under a little bunch of willows, where I had thrown it. Supposing it had caught in a twig, I gave a vigorous pull, which made the light split-bamboo tip spring and quiver, but resulted in swinging safely in the grass of the meadow a noble trout 12½in. long with the hook well bedded in his throat. He had given no signs of life, nor had I a suspicion of his being in the neighborhood.

Two young friends of mine tried another brook on Thursday last, getting a few trout of good length, but very lank and lean, and reported the same state of dullness and inactivity.

It will be the middle of May, instead of April, before the trout will rise freely, even in this part of the State, and certainly June before it will be worth while to go to Diamond Ponds or the Connecticut Lakes. My friend Scott writes me from Lebanon, 30 miles north, that he went "opening day," the 15th, and caught three, of which he threw back one, and went again last Tuesday, the 26th, and got "one bite." I hope our next Legislature will put the date for opening the season back to May 1, where it should be, so as to correspond with Maine and Vermont. And if New York would fix the same date for all waters north of the Erie Canal, it would be amply early, on the average of seasons.

"That calf" would not find much feed "on the lawn" yet, in this part of the world. We need rain badly, the brooks are rather low, and only cold spring water mixed with that from a few belated snow drifts in them.

However, I have had some good tramps over the hills for "May-flowers," the *Epigea*, usually miscalled "arbutus," which have been very plentiful this year. The cool weather has agreed with them. VON W.

Editor Forest and Stream:

The opening of the fishing season in New Hampshire found the ponds in the northern part of the State covered with ice, and the same condition of things obtains at this writing. Most of the streams are open, but little fishing has been done yet, although I saw Mart Noyes at Colebrook yesterday, and he said some trout had been caught through the ice at Diamond Ponds. But the ice is so rotten now that a stake can be driven through it almost anywhere, making it unsafe fishing. Mart has his camps at the ponds nearly ready for occupancy and will go out to stay some time next week. The daily stage from Colebrook to the ponds will resume its regular trips just as soon in fact as Mart gets out there and gets his "post office" in the cupboard in the corner of the "gent's" office in running order.

Brad Bailey has gone into Hell Gate Camp (will the new owners pardon me if I use the old name?), on Dead Diamond, to make ready for the spring delegation of anglers which are sure to visit him.

There is a rumor of a new sportsman's camp to be built this season at Greenough Ponds, about six or seven miles northwest of Errol Dam. Fine trout fishing is to be had there, and if the project is carried out I will endeavor to give you more definite information. Greenough is at present visited by numbers of sportsmen each year, but as there are no camps or houses nearer than about four miles, it is not quite so convenient to fish it unless camp and equipment are taken in. Mr. Walter Aikers lives the nearest to the pond, and I know of several parties who stop with him, and I think he has a small camp or "shake down" at the pond which might accommodate a party of two or three.

While at Colebrook this week I met O. C. Bumford of Connecticut Lakes. He says he has a crew of men at Second Lake cutting and storing his summer's supply of ice. How is that for early fly-fishing? Mr. Bumford has commenced his new camps at that place too, and will complete them by the time fishing will probably begin, which wont be much before May 20 or 25. The Lake House at First Lake will be opened May 10.

Commissioner Hodge has at the Colebrook Hatchery, 20,000 landlocked salmon fry which will be put into First Lake, as soon as the conditions are favorable. We are expecting great things from the Colebrook hatchery, which was erected last fall. With this aid to the natural increase it is expected to improve upon the already very satisfactory trout fishing this portion of the State affords.

When the act of the last session of the Legislature, changining the opening of the fishing season from May 1 to April 15, was passed an amendment should have been added prohibiting the taking of speckled trout through the ice. It may be all right for our brother anglers in the southern part of the State to go fishing in the middle of April, as there is fully that difference in the season between the northern and southern portion; but every 15th of April finds the ponds in Coos county covered with ice, and as with this season, the ice remains until from the first to the tenth of May, thus affording two weeks or more of time to fish through the ice and take the speckled trout legally. It may be all right, but there are some of "us fellows" who have "notions" about fishing, with which the above methods do not in any sense coincide, and we propose ro try at the next Legislature to have the matter so arranged that ice fishing for speckled trout will no longer be allowed. Of course this feeling is not confined to any particular section, but is shared by all true sportsmen throughout the State, and I think that clause was left out by the last session more by accident than design.

I notice in this week's issue of FOREST AND STREAM that "Halford" reports the ice as "rapidly passing out of Connecticut Lake." Mr. Bumford is cutting and hauling ice to fill his ice house. Solid blue ice 14 to 18in. thick don't "pass out" very "rapidly" in any other way with such weather as we have had the past three weeks. We have a job here for the man who produces rain, nice warm rain, if he is present will he please step forward.

BOB.

LANCASTER, N. H., April 30.

CANADIAN WATERS.

QUEBEC, April 29.—Before these lines reach the eyes of the FOREST AND STREAM readers the waters of Canadian rivers and lakes will have been whipped by thousands of anglers who are now busy assorting their tackle and impatiently awaiting the end of the close season on Sunday next. The streams in the vicinity of Quebec, as well as in the entire Lake St. John district are all clear of ice, but Lake St. John, Lake Edward and Lake Beauport are still frozen over at present writing, though the ice may leave at any moment. The season is fully ten days earlier here this year than usual, but notwithstanding this, the army of fly-fishermen, now preparing for the attack, can expect but little success in their role of gay deceivers of the finny kind during the first fifteen days of May. What may be called successful fly-fishing, rarely commences in this Province prior to May 20. This season, judging by present indications, good sport will probably be had from the 12th or 15th inst. Large catches of heavy fish will undoubtedly be heard of prior to those dates, especially in lakes Edward and St. Joseph, but they will be taken by bait—minnows and earth worms. Anglers that want to make sure of good catches of large red trout at any time during the last twenty days of May and first part of June, are sure to find what they want at either of the localities above mentioned, provided they have patience to return to the bait-fishing of their boyhood days. Any amount of minnows can be had in close proximity to the fishing grounds.

Ouananiche are seldom lured by the fly during the first few weeks of the season. But they take bait readily in Lake St. John from the time that the ice leaves the surface of the water. Mr. B. A. Scott, of Roberval, an authority upon everthing connected with this inland sea, and who is well known to almost all American ouananiche fishermen, is at present in Quebec, and tells me that the ice will probably leave the lake this year some time next week. From the week following until the middle of June these fresh-water salmon will readily take bait, not only close to the Roberval shore of the lake, directly opposite the terminus of Lake St. John Railway, but also at the mouth of the Ouiatchouan River, a short distance below the far-famed falls of that name. Here they will take the fly in the early part of June, and I will endeavor to let your readers know later about the period that they are making their way toward the seething waters of the Grande Discharge.

While the Canadian authorities have declined to grant the prayer of the petition of the American salmon fishermen, who asked to extend the time during which nets must be renewed each week from the mouths of the rivers in order to permit the fish to ascend to their spawning beds; they have acceded to the demands of a deputation of prominent anglers, chiefly members of the Restigouche Salmon Club, who waited upon the Minister of Marine and Fisheries at Ottawa, and simply asked that existing laws regarding the raising of nets, etc., be strictly enforced. Even this, it is claimed, if the promise be faithfully observed, will result in very great advantage in the preservation of the fish, and it is certainly the least that any government can be asked to do, to attend to the enforcement of its own laws.

Mr. Samuel Wilmot, superintendent of fishculture, has returned from Tadousac, whither he went ten days ago to examine the new government hatchery. He says the establishment is one of the most complete of its kind in existence. It will be utilized principally for the purpose of salmon breeding, and at the present time about 300,000 salmon eggs are in the trays.

E. T. D. CHAMBERS.

SALMON AT THE BANGOR POOL.

BANGOR, Me., April 27.—Inclosed find the list of salmon taken at the Penobscot pool this season up to date. On account of a rise of water in the river they have not taken the fly very well the last two or three days, but the water has cleared up now and there will be good fishing, as there is no snow to make a freshet this spring.

PERE MARQUETTE FISHING CLUB.

EAST SAGINAW, Mich., April 18.—Two Saginaw sportsmen, Messrs. Jas. B. Peters and C. P. Morley, have purchased Kinne Creek, 100 miles west of Saginaw on the F. & P. M. Ry. This stream affords good trout fishing for about six or seven miles, or in other words its entire length: it heads in two lakes, fed by cool springs, and empties in the Pere Marquette River. It has long been famous for the quantity and size of its brook trout; an occasional grayling is also taken, but of late they have become very scarce. Though a small stream, trout weighing 3lbs. have been taken from its waters, and claims not thoroughly substantiated of 4lb. monsters have frequently been made. It is proposed to stock this thoroughly, and we hope to locate a fish hatchery on the premises. The entire plant (after the saw mill was moved) of the W. & D. Wing Co. lumbering outfit went with the purchase; twelve or fifteen very good houses, together with barn, ice house, etc., are standing unused on the premises; for, as the pine is cut out in northern Michigan, land is good for little else; and in this case it was purchased at a nominal figure. Eventually a club will be formed of 25 to 30 members, but for this year, possibly for some time to come, a favored few will get great fishing, thanks to the kindness and hospitality of Messrs. Peters and Morley. W. B. M.

Mr. Peters sends us these additional details:

The stream is about six miles in length and is fed by never-failing springs. Its temperature ranges from forty degrees in winter to fifty degrees in the hottest months of summer. It has a fall of about seventy-five feet, and varies but little in its volume, being never turbid or muddy. It has never been meandered and does not appear upon any of the government maps, nor is it a navigable stream. It is, therefore, in the hands of its present owners, as private as a spring flowing in any one's door-yard. The owners have posted notices required by law in order to designate their property as being private and intend to inclose it, and in order to eventually have the good fishing which they desire, have agreed to restrict their own use of the stream to a few days and a few pounds of fish for each owner for the next few years. The organization is purely private and not incorporated, yet for convenience, and by reason of proximity to the waters of the great river so named, it has assumed the title of the Pere Marquette Fishing Club.

The headquarters are at Wingleton, as a central point convenient to the waters named, and from which many other streams and lakes in the vicinity can be reached. A comfortable club house, well furnished, is on the property. To carry out the plans of the owners a keeper has been placed in charge of the property with instructions to notify trespassers that private rights must be respected, and while it is not apprehended that many will, after becoming acquainted with the facts, insist upon using property belonging to others, yet, in such cases as may arise, those who do not respect private rights will find the owners prepared to enter upon a disagreeable and expensive litigation in defense of their property.

The public can rest assured that the action of the new owners of Kinne Creek will not detract from the pleasures which fishermen have enjoyed heretofore in that vicinity. It is true that one stream will be closed to the public, but the benefit that adjoining streams will receive from the planting of brook trout, lake trout, German trout and bass in adjoining waters will more than compensate them.

The State Game Warden has agreed to appoint the keeper now in charge as one of his deputies, to the end that the State laws in regard to the protection of fish may be better enforced, and it is to be hoped that hereafter the stories of spearing, netting and fishing out of season which have come from that section will cease.

PIKE COUNTY, (PA.) LAW.—Commenting on a correspondent's note in these columns suggesting that the Pike county, Pa., special fish law was unconstitutional, the Port Jervis *Gazette* says: "The writer speaks unadvisedly when he says that the Constitution of Pennsylvania 'prohibits the passing of any special act,' etc. Section 8, Article III., of the Pennsylvania Constitution says: 'No local or special law shall be passed unless notice of the intention to apply therefor shall have been published in the locality where the matter or the thing to be situated,' etc. This shows that special laws can be passed in Pennsylvania. We presume that the special game law for Pike county was passed in pursuance of this provision. The provision prohibiting the regulating of the affairs of counties, townships, boroughs, etc., cannot be stretched to prohibit the passage of a special game law. It is worthy of remark here that the Governor approved the present general game law of Pennsylvania and the special law for Pike county on the same day, after they had both been examined and passed upon favorably by the Attorney-General, and it is fair to presume that he knew what he was doing. And the fact that Attorney-General Hensel, in recently passing a question relating to the special law, recognized its validity, is proof sufficient that he considers it a constitutional enactment. The special game law of Pike county must be considered as good and, we believe, it cannot be repealed by a general act but only by a special act, after due notice as required for its passage."
